WATER SUPPLY
2015 JUN 28 8:10

MISSISSIPPI STATE DEPARTMENT OF HEALTH
BUREAU OF PUBLIC WATER SUPPLY
CCR CERTIFICATION
CALENDAR YEAR 2014

Beaverdam Water Association - North
Public Water Supply Name

MS0310003
List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must mail, fax or email a copy of the CCR and Certification to MSDH.** ***Please check all boxes that apply.***

Customers were informed of availability of CCR by: ***(Attach copy of publication, water bill or other)***

- ☑ Advertisement in local paper (attach copy of advertisement)
- ☑ On water bills (attach copy of bill)
- ☐ Email message (MUST Email the message to the address below)
- ☐ Other _____

Date(s) customers were informed: 6 / 15, 6 / 15, / /

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____

Date Mailed/Distributed: / /

CCR was distributed by Email (MUST Email MSDH a copy) Date Emailed: / /

- ☐ As a URL (Provide URL _____)
- ☐ As an attachment
- ☐ As text within the body of the email message

CCR was published in local newspaper. ***(Attach copy of published CCR or proof of publication)***

Name of Newspaper: The Laurel Leader-Call

Date Published: 6 / 6 / 15

CCR was posted in public places. ***(Attach list of locations)*** Date Posted: / /

CCR was posted on a publicly accessible internet site at the following address (**DIRECT URL REQUIRED**):

_____

CERTIFICATION

I hereby certify that the 2014 Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

Beaverdam Water Asso.
Clifton E. Barber, President of Board

FOR THE RECORD

JCSD: Jones County Sheriff's Department; LPD: Laurel Police Department; EPD: Ellisville Police Department; SPD: Sandersville Police Department; MDOC: Miss. Department of Corrections; MHP: Miss. Highway Patrol

false pretense, interfere with duties of police (LPD)

property, petit larceny- less than $1000 (JCSD)

paraphernalia, careless driving, no insurance, failure to signal lane change (LPD)

STABBING

Continued from A1

On the witness stand, when Assistant District Attorney Dennis Bisnette asked Sullivan why his memory of the incident was *more clear eight months* later, he said, "I just wanted to get it over with. I didn't want it to go to court. I'm supposed to move out of state this month."

Sullivan is now in a dating relationship with Fenderson's sister, several sources with knowledge of the case said, but that didn't come up in testimony.

The jury deliberated for less than 15 minutes before returning the verdict.

Bisnette said he knew the case would be difficult to prosecute with wishy-washy witnesses.

"If the victim doesn't care, why should the jury?" he said. "We tried to go forward anyway. We're encouraged to go forward by the people with the state."

Sullivan admitted to being drunk and high on cocaine on the night of the incident, but Laurel police officer Tyler Zugg and Investigator Kim Stewart both testified that he didn't appear to be impaired when they talked to him at the hospital.

"Being stabbed will sober you up pretty quick, won't it?" Bisnette asked Zugg.

The confrontation happened at about 2 a.m. Aug. 10 when Sullivan was driving up Lindsey Avenue and had just turned onto 20th Street when they saw a group of young black men in the street. Haynes was in the passenger's seat beside him and Michael Cook was in the back seat. Sullivan and Haynes testified that they heard someone call Sullivan's name, so he stopped. When he did, they started getting punched through the open windows. Sullivan got out and began to fight with his assailant, "then I blacked out" and got back in the car, he testified. He drove a little ways then noticed the gaping wound below his left rib cage.

He drove himself to the emergency room at South Central Regional Medical Center and got out alone. Haynes then drove away from the hospital.

"I was going to get (Sullivan's) sister," Haynes testified.

Sullivan testified, "The only thing I remember is going to the hospital and waking up after surgery."

Thompson asked him directly several times if Fenderson stabbed him.

"No, sir," Sullivan answered every time.

Stewart testified that Sullivan "understood fully what was going on" when he gave his sworn statement several hours after his surgery in the hospital.

But Thompson noted that Sullivan admitted to being under the influence of alcohol and cocaine, then from morphine that doctors had given him for pain.

"He appeared to be thinking clearly," Stewart testified. "If he was really high and drunk, I wouldn't have talked to him then. He was aware of what he was saying."

Thompson also asked if any weapon or bloody clothes were found.

"Eight days later, you're not going to find that," Stewart said.

In his opening statement, Bisnette told jurors that he was dealing with reluctant witnesses, but prosecutors were still trying the case.

"We don't want this to happen to other people and we don't want the victim trying to extract revenge," he said, "so the state is standing in place of the victim."

In the closing argument, Bisnette said it was up to the jury to decide why the two witnesses' statements changed. He noted that there were four consistent statements immediately after the incident and only one that Sullivan changed eight months later.

"Did Mr. Fenderson's people get to him?" he asked. "If Mr. Fenderson wasn't guilty, why didn't he walk down to the Laurel Police Department and surrender himself? No, eight days later, he was found hiding behind a refrigerator in a residence."

Thompson closed by saying that the state had failed to prove its case "beyond a reasonable doubt" and that Sullivan's statement, "while he was high on cocaine, drunk and on morphine" after major surgery shouldn't be considered credible.

The jury deliberated for 13 minutes before foreman Josh "The Guru" Nichols came back and read the "not guilty" verdict to the court.

As Fenderson walked out with Thompson, Bisnette said, "Don't let me see you back in here."

Annual Drinking Water Quality Report
Beaverdam Water Association
PWS ID # 0310003
MAY 2015

We're pleased to present to you this year's Annual Water Quality Report. This report is designed to inform you abo[ut] the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe a[nd] dependable supply of drinking water. We want you to understand the efforts we make to continually improve the wa[ter] treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our wa[ter] source consists of two wells that draw from the Sparta Sand Aquifer.

A source water assessment has been completed for the Beaverdam Water Association's water supply to determine t[he] overall susceptibility of its drinking water to identify potential sources of contamination. The water supply [...] Beaverdam Water Association received a moderate susceptibility ranking to contamination.

We're pleased to report that our drinking water meets all federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact Annie Windham at 60[1-] 787-4714. We want our valued customers to be informed about their water utility. If you want to learn more, plea[se] attend any of our regularly scheduled meetings. They are held on the second Tuesday of each month at the Beaverd[am] Water Association office at 6:30 p.m.

Beaverdam Water Association routinely monitors for constituents in your drinking water according to Federal a[nd] State laws. This table shows the results of our monitoring for the period of January 1st to December 31st, 2014. [...] water travels over the land or underground, it can pick up substances or contaminants such as microbes, inorganic [...] organic chemicals, and radioactive substances. All drinking water, including bottled drinking water, may [...] reasonably expected to contain at least small amounts of some constituents. It's important to remember that [...] presence of these constituents does not necessarily pose a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Treatment Technique (TT) - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

Maximum Contaminant Level - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal - The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

TEST RESULTS

Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL	Unit Measurement	MCLG	MCL	Likely Source of Contamination
Inorganic Contaminants								
10. Barium	N	2014-04-11	0.0245	No Range	Ppm	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
13. Chromium	N	2014-04-11	0.0036	No Range	ppm	0.1	0.1	Discharge from steel and pulp [...]; erosion of natural deposits
17. Copper 90th	N	01/01/2012-12/31/2014	0.3 mg/L	None	mg/L	1.3	AL=1.3	Corrosion of household plumb[ing] systems; erosion of natural de[posits]; leaching from wood preservati[ves]
16. Fluoride	N	2012*	0.217	No Range	ppm	4	4	Erosion of natural deposits; [water] additive which promotes stron[g] teeth; discharge from fertilizer [and] aluminum factories
Lead 90th	N	01/01/2012-12/31/2014	0.003	None	mg/L	0	AL=0.015 mg/L	Corrosion of household plumb[ing] systems; erosion of natural de[posits]
Volatile Organic Contaminants								
76. Xylenes	N	2014-06-2[...]	0.5 ppb	No Range	ppb		10000	Discharge from petroleum fac[tories]; discharge from chemical facto[ries]
CYANIDE	N	2014-00-20	0.016		ppm		0.2 ppm	
NITRATE	N	2014-04-03	0.05		ppm			
Disinfectants & Disinfectant By-Products								
Chlorine (as Cl2)	N	1/1/13 to 12/31/13	1.10	0.70 to 1.30	ppm	4	4	Water additive used to contro[l] microbes
73. TTHM [Total trihalomethanes]	N		39	None	ppb	0	80	By-product of drinking water chlorination
HAA5	N		10	None	ppb	0	60	By-product of drinking water chlorination

Additional Information for Lead
If present, elevated levels of lead can cause serious health problems, especially for pregnant women and yo[ung] children. Lead in drinking water is primarily from materials and components associated with service lines a[nd] home plumbing. Beaverdam Water Association is responsible for providing high quality drinking water, bu[t] cannot control the variety of materials used in plumbing components. When your water has been sitting fo[r] several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 mi[nutes] before using water for drinking or cooking. If you are concerned about lead in your water, you may wish t[o have] your water tested. Information on lead in drinking water, testing methods, and steps you can take to minim[ize] exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead. The Mississippi State Department of Health Public Health Laboratory offers lead testing for $10 per sample. Pl[ease] contact 601.576.7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurrin[g or man] made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All [drinking] water, including bottled water, may reasonably be expected to contain at least small amounts of some conta[minants]. The presence of contaminants does not necessarily indicate that the water poses a health risk. More informat[ion about] contaminants and potential health effects can be obtained by calling the Environmental Protection Agen[cy's Safe] Drinking Water Hotline at 1-800-426-4791.
