MISSISSIPPI STATE DEPARTMENT OF HEALTH
BUREAU OF PUBLIC WATER SUPPLY
CCR CERTIFICATION
CALENDAR YEAR 2014

City of Guntown
Public Water Supply Name

0410006
List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must mail, fax or email a copy of the CCR and Certification to MSDH.** ***Please check all boxes that apply.***

Customers were informed of availability of CCR by: ***(Attach copy of publication, water bill or other)***

- ☑ Advertisement in local paper (attach copy of advertisement)
- ☑ On water bills (attach copy of bill)
- ☐ Email message (MUST Email the message to the address below)
- ☐ Other _____

Date(s) customers were informed: 5/13/15, 6/1/15, / /

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____

Date Mailed/Distributed: / /

CCR was distributed by Email (MUST Email MSDH a copy) Date Emailed: / /

- ☐ As a URL (Provide URL _____)
- ☐ As an attachment
- ☐ As text within the body of the email message

CCR was published in local newspaper. ***(Attach copy of published CCR or proof of publication)***

Name of Newspaper: Saltillo - Guntown Gazette

Date Published: 5/13/2015

CCR was posted in public places. ***(Attach list of locations)*** Date Posted: / /

CCR was posted on a publicly accessible internet site at the following address (**DIRECT URL REQUIRED**):

_____

CERTIFICATION

I hereby certify that the 2014 Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

Name/Title (President, Mayor, Owner, etc.)

6-1-2015
Date

Deliver or send via U.S. Postal Service:
Bureau of Public Water Supply
P.O. Box 1700
Jackson, MS 39215

May be faxed to:
(601)576-7800

May be emailed to:

"2014 Annual Drinking Water Quality Report"
Town of Guntown
PWS ID# 0410006
April 7, 2015

We're pleased to present to you this year's Annual Water Quality Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source is two wells. Our wells draw from the Eutaw Formation.

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identified potential sources of contamination. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The wells for Guntown water System have received a moderate susceptibility ranking to contamination.

I'm pleased to report that our drinking water meets all federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact Nikoma Myhand at (662)–348-5353. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the first Tuesday of each month at 5:30 P.M. at the Town Hall.

Guntown Water Dept. routinely monitors for constituents in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1st to December 31st, 2014. As water travels over the land or underground, it can pick up substances or contaminants such as microbes, inorganic and organic chemicals, and radioactive substances. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Treatment Technique (TT) - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

Maximum Contaminant Level - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal - The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

MRDL: Maximum residual disinfectant level. The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants

TEST RESULTS								
Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL	Unit Measurement	MCLG	MCL	Likely Source of Contamination
Disinfectants & Disinfection By-Products (There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.)								
Chlorine (as Cl2) (ppm)	N	2014	1.5	.00—2.1	Ppm	4	4	Water additive used to control microbes
Inorganic Contaminants								
Arsenic	N	*2012	.65	.0--.65	Ppb	n/a	50	Erosion of natural deposits; runoff from orchards; runoff from glass and electronics production wastes
Barium	N	* 2012	.138	.114--.138	Ppm	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
Copper	N	2014	.2	.0081-- .1612	ppm	1.3	AL-1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
TTHM [Total trihalomethanes	N	*2013	1.25	No-range	Ppb	0	100	By-product of drinking water chlorination

**** No sample required in 2014***

*****Additional Information for Lead*****

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. **The City of Guntown** is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead. Please contact 601-576-7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Your CCR will not be mailed to you however; you may obtain a copy at the by calling 662-348-5353 if you have questions.

Mississippi's 1st Spring Squirrel Season Opens May 15

Mississippi has a new spring squirrel hunting season that will be open statewide May 15 – June 1. Hunters should note that the bag limit is only four squirrels per day during the spring season.

In many ways, the spring season will be similar to the early part of the fall season in that it will be warm with many leaves on the trees. Hunters should watch for venomous snakes so they can avoid them if encountered. Mosquitoes and ticks will be very active by this time, so using a repellent is a good idea. One difference between spring and fall squirrel hunting is squirrels may not be as concentrated in hardwood forests as they are in fall when acorns and nut crops are usually abundant. Squirrels use a wide variety of foods in spring, such as fruits, berries, mushrooms, and insects. Hunters can still rely heavily on sight and sound to find squirrels. In addition to sighting squirrels, hunters can locate squirrels by listening for barking and other vocalizations.

For those in search of a place to hunt, most of Mississippi's public lands will offer spring squirrel hunting opportunities, and most allow squirrel hunting with dogs. However, anyone planning to hunt public land should consult the regulations for those areas. Some may have season dates and rules that differ from general, statewide regulations.

On public lands especially, there may be more people participating in non-hunting recreational use during the spring season. Visibility can be reduced by spring vegetation growth, so all hunters on public and private land should be aware of what lies beyond their target when shooting.

For more information regarding squirrel hunting in Mississippi, visit our website at www.mdwfp.com/squirrel or call us at (601) 432-2199. Follow us on Facebook at www.facebook.com/mdwfp or on Twitter at www.twitter.com/MDWFPonline.

COMMENCEMENTS

Services Building was dedicated in his honor in October 2013. He retired as ICC President on June 30, 2013, but served as interim president at Holmes Community College last summer. On May 3, he returned to ICC as the interim vice president of Economic and Community Services. He earned his bachelor's, master's and doctorate degrees from the University of Mississippi, where he was honored as the Education Alumnus of the Year in 1993. He is active in civic, church and professional activities. He is married to the former Betty Darby, and they have four children and nine grandchildren.

Summers also serves as a clinical assistant professor for the University of Mississippi School of Pharmacy, where she precepts students in the final year of pharmacy school. Her lengthy involvement with the Mississippi Society of Health-System Pharmacists includes serving as Northern Region vice president. She received the MSHP Service award in 1998 and twice has been selected as Pharmacist of the Year by MSHP. She graduated cum laude from the University of Mississippi School of Pharmacy and completed graduate work at the University of Arkansas for Medical Sciences with a 4.0 GPA. At the UM School of Pharmacy, she served as a research assistant in the Pharmacognosy Department, was vice president of the pharmacy class, editor of the Ole Miss Pharmacist, a member of Phi Kappa Phi and a recipient of both the Pharmacy Administration and Excellence in Pharmacy awards. Her activities and honors at ICC include Miss ICC, member of Kaleidoscope and Hall of Fame, Who's Who Among Students in American Junior Colleges, Student Court, Student Scientists, Phi Theta Kappa, coeditor of the Mirror for two years and a member of the casts of "Dracula" and "Grease." She is a life member of both the ICC Alumni Association, for which her service includes board member, president-elect, president and immediate past president; and the University of Mississippi Alumni Association. She is a volunteer at the Good Samaritan Free Clinic in Tupelo, a charter member of the Tupelo Symphony Chorus and is past president of the Pilot Club of Mantachie. She and her husband, Mark, have two sons, Lincoln and Evan. They own and operate Lakefront Gardens, LLC, a landscape design/build firm and retail garden nursery in Tupelo.

A combined total of approximately 600 students will participate.
