BUREAU OF PUBLIC WATER SUPPLY

CALENDAR YEAR 2008 CONSUMER CONFIDENCE REPORT
CERTIFICATION FORMNortheast Copiah Water Assn. Inc.
Public Water Supply Name0150010
List PWS ID #s for all Water Systems Covered by this CCR

The Federal Safe Drinking Water Act requires each *community* public water system to develop and distribute a consumer confidence report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed to the customers, published in a newspaper of local circulation, or provided to the customers upon request.

Please Answer the Following Questions Regarding the Consumer Confidence Report

Customers were informed of availability of CCR by: (*Attach copy of publication, water bill or other*)

- Advertisement in local paper ✓
 On water bills ✓
 Other _____

Date customers were informed: 6/17/09

CCR was distributed by mail or other direct delivery. Specify other direct delivery methods:

Date Mailed/Distributed: / /

CCR was published in local newspaper. (*Attach copy of published CCR or proof of publication*)

Name of Newspaper: The Meteor

Date Published: 6/17/09

CCR was posted in public places. (*Attach list of locations*)

Date Posted: / /

CCR was posted on a publicly accessible internet site at the address: www. _____

CERTIFICATION

I hereby certify that a consumer confidence report (CCR) has been distributed to the customers of this public water system in the form and manner identified above. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

Neal Walters Dec.
Name/Title (President, Mayor, Owner, etc.)

RECEIVED WATER SUPPLY

Is my water safe?

Last year, we conducted tests for more than 80 contaminants. While none of these contaminants were at levels higher than the EPA allows, we did receive notice of a previous Monitoring Violation for failing to collect and/or submit MRDL samples for May 2004. Additionally, due to an audit of the Mississippi State Department of Health Radiological Laboratory by the US Environmental Protection Agency, all public water systems in Mississippi including Northeast Copiah Water Association incurred a Reporting Violation although this was not the result of inaction by the water system. For more information see the paragraph marked **Violations** at the end of this report. This report is a snapshot of last year's water quality. Included are details about where your water comes from, what it contains, and how it compares to standards set by regulatory agencies. We are committed to providing you with information because informed customers are our best allies.

Do I need to take special precautions?

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Water Drinking Hotline (800-426-4791).

Where does my water come from?

Our water comes from three wells. One of these wells draws ground water from the Sparta Sand Aquifer, the other draws from the Forest Hill Sand Aquifer, and the third draws from the Catahoula Formation Aquifer.

Source water assessment and its availability:

Our Source Water Assessment Plan has been prepared by the Mississippi Department of Environmental Quality and is available for review during normal business hours.

Why are there contaminants in my drinking water?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

How can I get involved?

Our annual membership meeting is on the fourth Thursday of July each year at 7:00 p.m. at the Crystal Springs Police Station. This is a very important meeting in which all customers are encouraged to attend.

Other information:

You may want additional information about your drinking water. You may contact our certified waterworks operator or you may prefer to log on to the Internet and obtain specific information about your system and its compliance history at the following address: <http://www.msdh.state.us/watersupply/index.htm> Information including current and past boil water notices, compliance and reporting violations, and other information pertaining to your water supply including "Why, When, and How to Boil Your Drinking Water" and "Flooding and Safe Drinking Water" may be obtained.

Water Quality Data Table

The table below lists all of the drinking water contaminants that we detected during the calendar year of this report. The presence of contaminants in the water does not necessarily indicate that the water poses a health risk. Unless otherwise noted, the data presented in this table is from testing done in the calendar year of the report. The EPA or the Mississippi State Department of Health requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants do not change frequently. Some of the data though representative of the water quality, may be more than one year old.

Terms and Abbreviations used in tables:

MCLG: Maximum Contaminant Level Goal: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

MCL: Maximum Contaminant Level: The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

AL: Action Level - The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Units Description:

ppm: parts per million, or milligrams per liter (mg/l)

ppb: parts per billion, or micrograms per liter (µg/l)

| Contaminants | MCLG or MRDLG | MCL, MRL, or MRE | Your Water | Range Low | Range High | Sample Date | Violation | Typical Source |
|---|---------------|------------------|------------|-------------|------------------------|-------------|-----------|--|
| Disinfectants & Disinfection By-Products | | | | | | | | |
| TTHMs (Total Trihalomethanes) (ppb) | 80 | 80 | 1.82 | NA | 1.82 | | No | By-product of drinking water disinfection |
| Inorganic Contaminants | | | | | | | | |
| Barium (ppm) | 2 | 2 | 0.094 | 0.080 | 0.094 | | No | Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits |
| Chromium (ppb) | 100 | 100 | 1.857 | ND | 1.857 | | No | Discharge from steel and pulp mills; Erosion of natural deposits |
| Selenium (ppb) | 50 | 50 | 0.691 | ND | 0.691 | | No | Discharge from petroleum and metal refineries; Erosion of natural deposits; Discharge from mines |
| Volatile Organic Contaminants | | | | | | | | |
| Carbon Tetrachloride (ppb) | 0 | 5 | 0.798 | ND | 0.798 | | No | Discharge from chemical plants and other industrial activities |
| Contaminants | | | | | | | | |
| | MCLG | AL | Your Water | Sample Date | # Samples Exceeding AL | Exceeds AL | Violation | Typical Source |
| Inorganic Contaminants | | | | | | | | |
| Copper - action level at consumer taps (ppm) | 1.3 | 1.3 | 0.1 | | 0 | No | No | Corrosion of household plumbing systems; Erosion of natural deposits |
| Lead - action level at consumer taps (ppb) | 0 | 15 | 9.0 | | 0 | No | No | Corrosion of household plumbing systems; Erosion of natural deposits |

Violations:

Monitoring Violation - EPA and MSDH sets minimum monitoring schedules that drinking water systems must follow. We failed to monitor and/or submit required samples for testing of Maximum (Chlorine) Residual Disinfectant Level (MRDL) during May 2004.

Reporting Violation - Regulations require that drinking water systems submit certain reports to MSDH as well as notify its customers of potential problems and other information. During an audit of the Mississippi State Department of Health Radiological Health Laboratory, the Environmental Protection Agency (EPA) suspended analyses and reporting of radiological compliance samples and results until further notice. Although this was NOT the result of inaction by the public water supply, MSDH is required to issue a reporting violation. MSDH takes full responsibility for this violation and will answer any questions should customers need further information by calling:

(601) 576-7618

CCR Rule Notification Requirement:

The publication of the 2008 Northeast Copiah W.A. Annual Drinking Water Quality Report (Consumer Confidence Report) fully complies with the USEPA and MDH CCR Rule Requirements. Copies of this report WILL NOT be mailed to customers except by request. Copies may also be picked up at our office.

| Inorganic Contaminants | | | | | | | |
| Copper - action level at consumer taps (ppm) | 1.3 | 1.3 | 0.1 | | 0 | No | Corrosion of household plumbing systems; Erosion of natural deposits |
| Lead - action level at consumer taps (ppb) | 0 | 15 | 9.0 | | 0 | No | Corrosion of household plumbing systems; Erosion of natural deposits |

Additional Information for Lead:

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Northeast Copiah Water Association is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing for \$10 per sample. Please contact 601-576-7582 if you want to have your water tested.

Violations:

Monitoring Violation - EPA and MSDH sets minimum monitoring schedules that drinking water systems must follow. We failed to monitor and / or submit required samples for testing of Maximum (Chlorine) Residual Disinfectant Level (MRDL) during May 2004.

Reporting Violation - Regulations require that drinking water systems submit certain reports to MSDH as well as notify its customers of potential problems and other information. During an audit of the Mississippi State Department of Health Radiological Health Laboratory, the Environmental Protection Agency (EPA) suspended analyses and reporting of radiological compliance samples and results until further notice. Although this was **NOT** the result of inaction by the public water supply, MSDH is required to issue a reporting violation. MSDH takes full responsibility for this violation and will answer any questions should customers need further information by calling: **(601) 576-7618**

CCR Rule Notification Requirement:

The publication of the 2008 Northeast Copiah W.A. Annual Drinking Water Quality Report (Consumer Confidence Report) fully complies with the USEPA and MDH CCR Rule Requirements. Copies of this report WILL NOT be mailed to customers except by request. Copies may also be picked up at our office.

The Mississippi State Department of Health Public Health Laboratory offers lead testing for \$10 per sample. Please contact 601-576-7582 if you want to have your water tested.

Violations:

Monitoring Violation - EPA and MSDH sets minimum monitoring schedules that drinking water systems must follow. We failed to monitor and / or submit required samples for testing of Maximum (Chlorine) Residual Disinfectant Level (MRDL) during May 2004.

*******MESSAGE FROM MSDH CONCERNING RADIOLOGICAL SAMPLING *******

In accordance with the Radionuclides Rule, all community public water supplies were required to sample quarterly for radionuclides beginning January 2007 - December 2007. Your public water supply completed sampling by the scheduled deadline; however, during an audit of the Mississippi State Department of Health Radiological Health Laboratory, the Environmental Protection Agency (EPA) suspended analyses and reporting of radiological compliance samples and results until further notice. Although this was not the result of inaction by the public water supply, MSDH was required to issue a violation. The Bureau of Public Water Supply is taking action to resolve this issue as quickly as possible. If you have any questions, please contact Melissa Parker, Deputy Director, Bureau of Public Water Supply, at
