APPROVED

BUREAU OF PUBLIC WATER SUPPLY
CALENDAR YEAR 2008 CONSUMER CONFIDENCE REPORT
CERTIFICATION FORM

CITY OF VERONA
Public Water Supply Name

0410016
List PWS ID #s for all Water Systems Covered by this CCR

The Federal Safe Drinking Water Act requires each *community* public water system to develop and distribute a consumer confidence report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed to the customers, published in a newspaper of local circulation, or provided to the customers upon request.

Please Answer the Following Questions Regarding the Consumer Confidence Report

- Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*
 - Advertisement in local paper
 - On water bills
 - Other _____

Date customers were informed: 6/4/09

- CCR was distributed by mail or other direct delivery. Specify other direct delivery methods:

Date Mailed/Distributed: / /

- CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: THE COURIER

Date Published: 6/4/09

- CCR was posted in public places. *(Attach list of locations)*

Date Posted: / /

- CCR was posted on a publicly accessible internet site at the address: www. _____

CERTIFICATION

I hereby certify that a consumer confidence report (CCR) has been distributed to the customers of this public water system in the form and manner identified above. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

Bobby Williams
Name/Title (President, Mayor, Owner, etc.)

6-11-09
Date

Mail Completed Form to: Bureau of Public Water Supply/P.O. Box 1700/Jackson, MS 39215
Phone: 601-576-7518

ALL BLANKS MUST BE FILLED IN TO PROCESS YOUR REPORT

2008 Consumer Confidence Report

All Blanks Must Be Filled In!

Please Print

Name of System: CITY OF VERONA

System PWS ID#(s): 041 0016

System Full Mailing Address: P.O. BOX 420 VERONA, MISS. 38879

Number of Wells: 4 Aquifer(s): MCSHAW FORMATION
EUTAW FORMATION

Do you purchase water () Yes (X) No

If yes, from System Name: _____

System ID #: _____

Contact person & phone number that you want printed in the report:

Name: MIKE A. STAHL Phone: 662-566-1517

Regular meetings are scheduled:

Day: 1ST TUESDAY Date: EACH MONTH

Time: 6:00 PM Location: CITY HALL

If your system does not have regular scheduled meetings, when is your annual meeting? We can use this date to publish in the report.

Day: _____ Date: _____

Time: _____ Location: _____

Did your system have any bacteria present in 2008? () Yes (X) No

If yes, please explain what kind and how they were solved and what date.

Did your system have any violations? If yes, what type and when?

— Major Date: —

— Minor Date: —

— Monitoring Date: —

Please explain: _____

SEE BACK OF THIS FORM

All Blanks Must Be Filled In!

Please provide the following information from your systems Source Water Assessment Program (SWAP) List each well and their ranking of susceptibility to contamination.

Example: Well #1 - (Well ID #) - moderate susceptibility to contamination
ALL (4) FOUR WELLS RATED MODERAT SUSCEPTIBILITY TO CONTAMINATION

Person we can contact at your system if we need additional information:

Name: MIKE A. STAHL Position: CERTIFIED OPERATOR

Daytime Phone (8:00 am - 5:00PM): 662-231-7946 - 662-566-2211

Cell: 662-231-7946

Best time to contact: DAYTIME Fax: 662-566-2209

You may add information to your report about your system, as a public relations tool. If you would like for us to insert any additional information, please provide here or attached on separate page. Please type or print.

The MsRWA will not be responsible if the report is missing information that you did not provide us. I understand that the MsRWA can complete a true Consumer Confidence Report only if I provide them with the necessary information. If the MsRWA has to re-develop the report, extra charges will be added.

Date: 5-18-09

System Name: CITY OF VERONA 0410016

Signature: 

This form must be returned with the necessary test results for the MsRWA to complete your report. No report will be completed without it. Please make sure there is a signature on this form.

Return this form and the processing fee to: Mississippi Rural Water Association,
5400 N Midway Rd, Raymond, MS 39154
If you need additional information please contact MsRWA, PH: 1.601.857.2433 Fax:
1.601.857.2434
No Report will be returned without payment.

2007 Annual Drinking Water Quality Report

CITY OF VERONA

PWS ID #0410016

May 2009

We're are pleased to present you this year's Annual Water Quality Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. our water source is from wells drawing from the McShan Formation and Eutaw Formation Aquifers.

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identify potential sources of contamination. The general susceptibility rankings assigned to each well of this system are provided immediately below. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The wells for the City of Verona have received moderate susceptibility rankings to contamination.

If you have any questions about this report or concerning your water utility, please contact Mike A. Stahl at (662) 566-1517. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are on the first Tuesday of the month at 6:00 p.m. at the city hall.

We routinely monitor for constituents in you drinking water according to Federal and State laws. This table below lists all of the drinking water contaminants that we detected during for the period of January 1st to December 31, 2008. In cases where monitoring wasn't required in 2008, the table reflects the most recent results. As water travels over the surface of land or underground, it dissolves naturally occurring minerals and in some cases, radioactive materials and can pick up substances or contaminants from the presence of animals or from human activity, microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife;

inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm-water run-off, industrial, or domestic wastewater discharges, oil and gas production, mining or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm-water runoff and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations and septic systems, radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily indicate that the water poses a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions.

Action Level - The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Maximum Contaminant Level (MCL) - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The "Goal" (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Parts per Million (ppm) or Milligrams per liter (mpl) — one part per million corresponds to one minute in two years or a single penny in \$10,000.

Parts per billion (ppb) or Micrograms per liter — one part per billion corresponds to one minute in 2,000 years or a single penny in \$10,000,000.

TEST RESULTS

Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL	Unit Measurement	MCLG	MCL	Likely Source of Contamination
Inorganic Contaminants								
4. Cooper	N	2008	3		ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits, leaching from wood preservatives.
17. Lead	N	2008	1	0	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits

Disinfection By-Products

82. TTHM (Total trihalomethanes)	N	2007*	1.73	No Range	ppb	0	80	By-product of drinking water chlorination.
✓ Chlorine	N	2008	1.63	.63-1.63	ppm	0	MDRL=4	Water additive used to control microbes.

* Most recent sample. No sample required for 2008.

As you can see by the table, our system had no violations. We're proud that your drinking water meets or exceeds all Federal and state requirements. We have learned through our monitoring and testing that some constituents have been detected however the EPA has determined that your water IS SAFE at these levels.

We are required to monitor your drinking water for specific constituents on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. Beginning January 1, 2004 the Ms. Dept. of Health (MSDH) required public water systems that use chlorine as a primary disinfectant to monitor/test for chlorine residuals as required by Stage 1 Disinfection by Products Rule. Our water system failed to complete these monitoring requirements in January of 2004. We did complete the monitoring requirements for bacteriological sampling that showed no coliform present. In an effort to ensure systems complete all monitoring requirements MSDH now notifies systems of any missing samples prior to the end of the compliance period.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Our Water Association is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offer lead testing for \$10 per sample. Please contact (601) 576-7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances

can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

A message from MSDH concerning radiological sampling.

In accordance with the Radionuclides Rule, all community public water supplies were required to sample quarterly for radionuclides beginning January, 2007 - December 2007. Your public water supply completed sampling by the scheduled deadline; however, during an audit of the Ms. State Department of Health Radiological Health Laboratory, the Environmental Protection Agency (EPA) suspended analyses and reporting of radiological compliance samples and results until further notice.

Although this was not the result of inaction by the public water supply, MSDH was required to issue a violation. The Bureau of Public Water Supply is taking action to resolve this issue as quickly as possible. If you have any questions, please contact Melissa Parker, Deputy Director, Bureau of Public Water Supply, at (601) 576-7518.

The City of Verona works around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our
