

MISSISSIPPI STATE DEPARTMENT OF HEALTH

BUREAU OF PUBLIC WATER SUPPLY

CALENDAR YEAR 2009 CONSUMER CONFIDENCE REPORT CERTIFICATION FORM

Harland Creek W/A
Public Water Supply Name

0260009, 0260022, 0260039, 0260043
List PWS ID #s for all Water Systems Covered by this CCR

The Federal Safe Drinking Water Act requires each community public water system to develop and distribute a consumer confidence report (CCR) to its customers each year.

Please Answer the Following Questions Regarding the Consumer Confidence Report

- Customers were informed of availability of CCR by: (Attach copy of publication, water bill or other)
Advertisement in local paper
On water bills
Other

Date customers were informed: / /

- CCR was distributed by mail or other direct delivery. Specify other direct delivery methods:

Date Mailed/Distributed: / /

- CCR was published in local newspaper. (Attach copy of published CCR or proof of publication)

Name of Newspaper: Holmes County Herald

Date Published: / /

- CCR was posted in public places. (Attach list of locations)

X Date Posted: 6/10/10

- CCR was posted on a publicly accessible internet site at the address: www.

CERTIFICATION

I hereby certify that a consumer confidence report (CCR) has been distributed to the customers of this public water system in the form and manner identified above.

Annual Drinking Water Quality Report
Holmes County Water Association
PWS ID 53200009
June 2010

We're very pleased to provide you with this year's Annual Quality Water Report. We want to keep you informed about the excellent water and service we have delivered to you over the past year. Our goal is to keep you better informed so you can make an informed decision about your water. Our water source is ground water. Our water flows from the Mendon Spring which is a natural spring.

A water quality assessment has been completed for our public water system to determine the overall acceptability of the drinking water supply and to identify potential sources of contamination. The general information and data provided in this report is based on the most recent monitoring data available. A report detailing detailed information on how the sampling and monitoring was conducted can be found in the Appendix (PWS ID 53200009) and is available upon request.

The water in Holmes County Water Association has been tested for numerous water quality parameters.

If you have questions about this report or concerning your water quality, please contact William L. Cook at (601) 833-2512. We want our valued customers to be informed about their water quality. If you want to learn more, please contact any of our employees at the address listed on the second Tuesday of each month at 1:00 PM at the Holmes County Water Association Center. The annual meeting is held by the Holmes County at 7:00 PM at the Holmes County Center.

The Holmes County Water Association routinely monitors for contaminants in your drinking water according to federal and state laws. This table shows the results of our monitoring for the period of January 1st to December 31st, 2009. As water varies over the length of a year, it can pick up substances or contaminants such as nitrates, nitrites, and organic chemicals and substances in addition to drinking water. Drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some substances. It is important to remember that the presence of these substances does not necessarily pose a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Parts per million (ppm) or milligrams per liter (mg/l)
Parts per million (ppm) or milligrams per liter (mg/l)

Action Level (AL) - The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which are more stringent than monitoring.

Maximum Contaminant Level Goal (MCLG) - The MCLG is the highest level of a contaminant that is allowed in drinking water. MCLGs are set as close to the MCL as is feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The MCLG is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs do not take a margin of safety.

PWS ID 53200009

TEST RESULTS									
Contaminant	Value	Unit	Law	Unit	MCLG	MCL	AL	AL	AL
Radiative Contaminants									
Radionuclides	9	1.1	meq/l	0	0	0	0	0	0
Inorganic Contaminants									
Barium	0	0.033	ppm	0	0	0	0	0	0
Cadmium	0	0.017	ppm	0.01	0.01	0.01	0	0	0
Copper	0	0.1	ppm	1.3	1.3	1.3	0	0	0
Lead	0	0.01	ppm	0.05	0.05	0.05	0	0	0
Manganese	0	0.05	ppm	0.05	0.05	0.05	0	0	0
Nitrate (as Nitrogen)	0	0	ppm	10	10	10	0	0	0
Nitrite (as Nitrogen)	0	0	ppm	0.1	0.1	0.1	0	0	0
Total Hardness	140	mg/l	ppm	75	75	75	0	0	0

Notes:
1. Drinking of drinking water containing lead from service lines, faucets, and other plumbing fixtures is not regulated by the SDWA.
2. Drinking of drinking water containing lead from service lines, faucets, and other plumbing fixtures is not regulated by the SDWA.
3. Drinking of drinking water containing lead from service lines, faucets, and other plumbing fixtures is not regulated by the SDWA.
4. Drinking of drinking water containing lead from service lines, faucets, and other plumbing fixtures is not regulated by the SDWA.
5. Drinking of drinking water containing lead from service lines, faucets, and other plumbing fixtures is not regulated by the SDWA.
