

BUREAU OF PUBLIC WATER SUPPLY

2010 AUG 19 AM 9:26

CALENDAR YEAR 2009 CONSUMER CONFIDENCE REPORT  
CERTIFICATION REPORT

TOWN OF WEBB  
PWS ID # ('s): 0680012

The Federal Safe Drinking Water Act requires each *community* public water system to develop and distribute a consumer confidence report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed to the customers, published in a newspaper of local circulation, or provided to the customers upon request.

*Please Answer the Following Questions Regarding the Consumer Confidence Report*

- Customers were informed of availability of CCR by: *(Attach copy of publication, water bill, or other)*
  - Advertisement in local paper
  - On water bills
  - Other \_\_\_\_\_

Date customers were informed: July 1, 2010

- CCR was distributed by mail or other direct delivery. Specify other direct delivery methods:

Date mailed/distributed: \_\_\_\_\_

- CCR was published in local newspaper. *(Attach copy of published CCR and proof of publication)*

Name of Newspaper: Sun-Sentinel  
Date Published: July 1, 2010

- CCR was posted in public places. *(Attach list of locations)* CITY HALL

Date posted: 6/15/10 POST OFFICE

- CCR was posted on a publicly accessible internet site at the address: www: \_\_\_\_\_

**CERTIFICATION:**

I hereby certify that a Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

Mary Clegg  
Name/Title (President, Mayor, Owner, etc.)

8-18-10  
Date

This Consumer Confidence Report (CCR) was completed by MS Cross Connection, LLC with information provided by the above Public Water System and is certified only to be as true & correct as the information provided.

Susan Bayliff

Date

Mail completed form to: Bureau of Public Water Supply ~ P O Box 1700 ~ Jackson, MS 39215  
Phone: 601-576-7518

**Annual Drinking Water Quality Report**  
**Town of Webb - PWS ID #0680012 June, 2010**

We're pleased to present to you this years Annual Quality Water Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source is from two wells drawing from the Tallahatta Formation Aquifer.

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identified potential sources of contamination. The general susceptibility rankings assigned to each well of this system are provided immediately below. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The wells for the Town of Webb have received a moderate susceptibility ranking to contamination.

We're pleased to report that our drinking water meets all federal and state requirements.

If you have any questions about this report or concerning your water utility please contact Bobby Brown at 662-721-7534. We want our valued customers to be informed about their utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the first Tuesday of each month at Webb Town Hall at 5:00 p.m.

The Town of Webb routinely monitors for constituents in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1st to December 31st, 2009. As water travels over the land or underground, it can pick up substances or contaminants such as microbes, inorganic and organic chemicals, and radioactive substances. All drinking water, including bottled water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

**Action Level** - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

**Maximum Contaminant Level** - The **Maximum Allowed (MCL)** is the highest level of a contaminant that is allowed in drinking water. **MCLs** are set as close to the **MCLGs** as feasible using the best available treatment technology.

**Maximum Contaminant Level Goal** - The **MCLG** (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. **MCLGs** allow for a margin of safety.

**TEST RESULTS**

Contaminant	Violation Type	MCLL Unit	Lead (ppm)	Page of Drinking Water Act	Unit of Measure	MCLG	MCL	Likely Source of Contamination
<b>Inorganic Contaminants</b>								
10. Barium	N	2006*	200	No Range	ppm	100	2	Discharge of acid mine drainage, formation of barium sulfate
12. Cadmium	N	2006*	176	No Range	ppb	1	1	Discharge of acid mine drainage, formation of barium sulfate
13. Chlorine	N	2006*	237	No Range	ppm	100	100	Discharge from industrial and municipal processes
14. Copper	N	2001*	1.3	None	ppm	1.3	AL=1.3	Discharge of industrial effluents, formation of copper carbonate
15. Cyanide	N	2006*	5	No Range	ppb	200	200	Discharge from industrial processes
16. Fluoride	N	2006*	256	No Range	ppm	4	4	Discharge from industrial processes, natural occurrence
17. Lead	N	2001*	0	None	ppb	0	AL=15	Discharge from industrial processes, natural occurrence
21. Selenium	N	2006*	0	No Range	ppb	50	50	Discharge from industrial processes, natural occurrence
<b>Disinfection By-Products</b>								
Chlorine (as Cl <sub>2</sub> )	N		0.54 to 0.62	None	ppm	4	4	Water added to disinfect
THM4 (Total trihalomethanes)	N		22 to 43	None	ppb	0	80	Byproduct of disinfection
HAAs	N		10 to 20	None	ppb	0	60	Byproduct of disinfection

\*Most recent sample results available.

**Additional Information for Lead**

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Town of Webb is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing for \$10 per sample. Please contact 601.661.7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be

# Affidavit (Proof) of Publication

## The Sun-Sentinel

State of Mississippi, County of Tallahatchie, City of Charleston

Before me, John Robert Clayton McFerrin Jr., a Notary Public of said state, county and city, personally appeared Krista McFerrin, clerk of The Sun-Sentinel, who upon oath stated that the notice attached hereto was published in said newspaper for 1 consecutive weeks, on the dates listed below:

First Publication: July 1, 2010  
Last Publication: July 1, 2010

In the following issues:
