2008 Annual Drinking Water Quality Report
Buckhannon Water Works
PWSID: 070001
May 2010

We're pleased to present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality water we've provided to you during the year. Our customers are the most important part of our business, and we're committed to providing you with the highest quality water possible. We've made sure to understand the quality of water you receive from the Buckhannon Water Works and the treatment process and provide you with the information you need to know about the quality of your water. Our water is safe to drink and is free from any harmful substances.

The annual water assessment has been completed for our public water system. The results of the assessment are provided to you in this report. The assessment was conducted by a third-party laboratory and the results are provided to you in this report. The assessment was conducted in accordance with the requirements of the Safe Drinking Water Act (SDWA) and the Buckhannon Water Works is committed to providing you with the highest quality water possible.

If you have any questions or concerns about the quality of your water, please contact Water Works at 501.410.0041. We want to make sure you're satisfied with the quality of your water. We'll be happy to help you understand the quality of your water and the treatment process. We'll also be happy to help you understand the quality of your water and the treatment process.

In this report you will find many facts and observations you might not be familiar with. To help you better understand these facts we've provided the following information. This information is intended to help you understand the quality of your water and the treatment process. We'll also be happy to help you understand the quality of your water and the treatment process.

Maximum Contaminant Level (MCL) - The highest level of a contaminant that is allowed in drinking water. MCLs are set to protect public health. MCLs are based on the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The MCLG is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs do not take into account the feasibility of water treatment technology.

Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a disinfectant below which there is no known or expected risk to health. MRDLGs do not apply to the use of disinfectants to control microbial contaminants.

TEST RESULTS

Contaminant	Units	Concentration	Level	Range of Disinfectant Residuals (ppm)	Test Method	MCL	MCLG	MCL	Primary Source of Contamination
Inorganic Contaminants									
As	ppm	0.01	0.05	0.1 - 0.2	ppm	0.05	0.01	0.05	Discharge of mining wastes, natural sources, and other sources.
B	ppm	0.01	0.01	0.1 - 0.2	ppm	0.01	0.01	0.01	Discharge of mining wastes, natural sources, and other sources.
Ca	ppm	140	180	100 - 150	ppm	180	180	180	Discharge of mining wastes, natural sources, and other sources.
Cl	ppm	100	100	100 - 100	ppm	100	100	100	Discharge of mining wastes, natural sources, and other sources.
Cr	ppm	0.01	0.01	0.1 - 0.2	ppm	0.01	0.01	0.01	Discharge of mining wastes, natural sources, and other sources.
Cu	ppm	0.01	0.01	0.1 - 0.2	ppm	0.01	0.01	0.01	Discharge of mining wastes, natural sources, and other sources.
Fe	ppm	0.3	0.3	0.1 - 0.2	ppm	0.3	0.3	0.3	Discharge of mining wastes, natural sources, and other sources.
Mn	ppm	0.05	0.05	0.1 - 0.2	ppm	0.05	0.05	0.05	Discharge of mining wastes, natural sources, and other sources.
N	ppm	0.01	0.01	0.1 - 0.2	ppm	0.01	0.01	0.01	Discharge of mining wastes, natural sources, and other sources.
P	ppm	0.01	0.01	0.1 - 0.2	ppm	0.01	0.01	0.01	Discharge of mining wastes, natural sources, and other sources.
S	ppm	0.01	0.01	0.1 - 0.2	ppm	0.01	0.01	0.01	Discharge of mining wastes, natural sources, and other sources.
Se	ppm	0.01	0.01	0.1 - 0.2	ppm	0.01	0.01	0.01	Discharge of mining wastes, natural sources, and other sources.
Si	ppm	0.01	0.01	0.1 - 0.2	ppm	0.01	0.01	0.01	Discharge of mining wastes, natural sources, and other sources.
V	ppm	0.01	0.01	0.1 - 0.2	ppm	0.01	0.01	0.01	Discharge of mining wastes, natural sources, and other sources.
Zn	ppm	0.01	0.01	0.1 - 0.2	ppm	0.01	0.01	0.01	Discharge of mining wastes, natural sources, and other sources.
Disinfection By-Products									
THM5	ppm	0.1	0.1	0.1 - 0.2	ppm	0.1	0.1	0.1	Discharge of mining wastes, natural sources, and other sources.
HAAs	ppm	0.01	0.01	0.1 - 0.2	ppm	0.01	0.01	0.01	Discharge of mining wastes, natural sources, and other sources.

Notes: All test results are in compliance with the SDWA. We're proud that your drinking water meets or exceeds all federal and state requirements. We have tested our water and found that it meets or exceeds all federal and state requirements. We'll also be happy to help you understand the quality of your water and the treatment process.

We are required to monitor your drinking water for specific contaminants on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health objectives. We'll also be happy to help you understand the quality of your water and the treatment process.

We also conduct the monitoring requirements for disinfectant residuals that showed no concern. In an effort to ensure compliance with the SDWA, we'll also be happy to help you understand the quality of your water and the treatment process.

If you have any questions or concerns about the quality of your water, please contact Water Works at 501.410.0041. We want to make sure you're satisfied with the quality of your water. We'll be happy to help you understand the quality of your water and the treatment process.

All sources of drinking water are naturally contaminated with various minerals and trace elements. The presence of these minerals and trace elements can be beneficial to your health. We'll also be happy to help you understand the quality of your water and the treatment process.

The Buckhannon Water Works staff around the clock to provide top quality water to every tap. We check and monitor the system regularly. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life, and the health of our community.
