**BUREAU OF PUBLIC WATER SUPPLY**

**CALENDAR YEAR 2011 CONSUMER CONFIDENCE REPORT  
CERTIFICATION FORM**

City of Brandon  
Public Water Supply Name

610003  
List PWS ID #s for all Water Systems Covered by this CCR

The Federal Safe Drinking Water Act requires each *community* public water system to develop and distribute a consumer confidence report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed to the customers, published in a newspaper of local circulation, or provided to the customers upon request.

*Please Answer the Following Questions Regarding the Consumer Confidence Report*

- Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*
  - Advertisement in local paper
  - On water bills
  - Other \_\_\_\_\_

Date customers were informed: \_\_\_ / \_\_\_ / \_\_\_

- CCR was distributed by mail or other direct delivery. Specify other direct delivery methods:

Date Mailed/Distributed: 6/15/12

- CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: \_\_\_\_\_

Date Published: \_\_\_ / \_\_\_ / \_\_\_

- CCR was posted in public places. *(Attach list of locations)*

Date Posted: 6/15/12

- CCR was posted on a publicly accessible internet site at the address: www. cityofbrandon.net

**CERTIFICATION**

I hereby certify that a consumer confidence report (CCR) has been distributed to the customers of this public water system in the form and manner identified above. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

  
Name/Title (President, Mayor, Owner, etc.)

## 2011 Annual Drinking Water Quality Report

City of Brandon

PWS ID#: 610003

June 2012

The Mayor, Board of Aldermen and the City of Brandon Public Works Department are pleased to present to you this year's Annual Water Quality Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our wells draw from the Sparta and Cockfield formation aquifers.

Our system is required to adhere to all rules and regulations as set by the State and Federal officials. This includes, but is not limited to, monthly bacteriological samples, routine inorganic sampling, continuous educational classes and certifications, and billing and collection.

The city currently has eight operating wells, four tanks, and one standpipe.

***We are pleased to report that our drinking water meets all federal and state requirements.***

If you have any questions about this report or concerning your water utility, please contact Cathy Goolsby at 601-824-4579. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the first and third Monday of each month at 6:00 p.m. at the Brandon City Hall Board Room.

The City of Brandon routinely monitors for up to 154 constituents in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1, 2011 to December 31, 2011. As water travels over the land or underground, it can pick up substances or contaminants such as microbes, inorganic and organic chemicals, and radioactive substances. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

In this table you will find many terms and abbreviations which might not be familiar to you. To help better understand these terms we've provided the following definitions:

*Action Level* - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

*Treatment Technique (TT)* - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

*Maximum Contaminant Level* - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

*Maximum Contaminant Level Goal* - The "Goal" (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

**TEST RESULTS**

Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL	Unit Measurement	MCLG	MCL	Likely Source of Contamination
-------------	---------------	----------------	----------------	--	------------------	------	-----	--------------------------------

**Inorganic Compounds**

Antimony	N	2010	<0.0005 *	0	ppm	0	0.006	Discharge from petroleum refineries, fire retardants, ceramics, electronics
Arsenic	N	2010	<0.0005*	0	ppm	0	0.10	Erosion from natural deposits
Barium	N	2010	<0.0003*	0	ppm	0	2	Erosion of natural deposits
Beryllium	N	2010	<0.0001*	0	ppm	0	0.004	Discharge from metal refineries
Cadmium	N	2010	<0.0001*	0	ppm	0	0.005	Corrosion of galvanized pipes
Cyanide	N	2010	<0.015	0	ppm	0	0.2	
Chromium	N	2010	0.0010	0	ppm	0	0.1	
Fluoride	N	2011	.092mg/l	0	ppm	0	4	
Mercury	N	2010	<0.0002*	0	ppm	0	0.002	Erosion of natural deposits
Selenium	N	2010	<0.0025*	0	ppm	0	0.05	Erosion of Natural deposits
Thallium	N	2010	<0.0005*	0	ppm	0	0.002	Discharge from ore-processing sites

\*average from all well sites

**Disinfection By-Products**

TTHM	N	2011	13.96	0	ppb			
HAA5	N	2011	12.0	0	ppb			

\*last required sample

**Nitrates**

Nitrate (as N)	N	2011	<0.08	0	ppm		10	
Nitrite (as N)	N	2011	<0.02	0	ppm		1	
Nitrate Nitrite (as N)	N	2011	<0.1	0	ppm		10	

**Radiological Contaminants**

14. Copper	N	2010	0.5mg/L	0	ppm	0	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
17. Lead	N	2010	0.003mg/L	0	ppm	0	AL=0.015	Corrosion of household plumbing systems, erosion of natural deposits

**Maximum Residual Disinfectant Level Report**

Chlorine	N	Average 2011	0.90 mg/L	0	mg/L			Treatment of water
----------	---	--------------	-----------	---	------	--	--	--------------------

*The City of Brandon is proud that your drinking water meets or exceeds Federal and State requirements. We have learned through our monitoring and testing that some constituents have been detected; however the EPA has determined that your water is safe at these levels.*

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or manmade. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. Some people may be more vulnerable to contaminants in drinking water than the general population. Immune-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate

means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

### **Additional Information for Lead**

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The City of Brandon is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing for \$10 per sample. Please contact 601-576-7582 if you wish to have your water tested.

### **Regulation Governing Fluoridation of Community Water Supplies**

To comply with the "Regulation Governing Fluoridation of Community Water Supplies", the CITY OF BRANDON is required to report certain results pertaining to fluoridation of our water system. The number of months in the previous calendar year that average fluoride sample results were within the optimal range of 0.7-1.3 ppm was 11. The percentage of fluoride samples collected in the previous calendar year that was within the optimal range of 0.7-1.3 ppm was 74%.

### **Monitoring and Reporting of Compliance Data Violations**

We are required to monitor your drinking water for specific constituents on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. Beginning January 1, 2004, the Mississippi State Department of Health (MSDH) required public water systems that use chlorine as a primary disinfectant to monitor/test for chlorine residuals as required by the State 1 Disinfection By-Products Rule. Our system has completed all of these monitoring requirements and has received no compliance violations.

### **Other Information:**

Water Bills are due on the 28th of each month unless noted otherwise. Bank Draft service is available.

Your account is subject to a \$5.00 late fee if payment is not received by the close of normal business hours on the due date.

Should you have any questions about the information in this report please do not hesitate to contact the City of Brandon at 601-824-4579 or visit [www.cityofbrandon.net](http://www.cityofbrandon.net)

During dry and hot weather conditions, please conserve water by not watering during high peak times between 7:00 a.m. and 9:00 p.m.

***After-Hour and Weekend Emergencies – Call the Brandon Police Department at 601-825-7225.***

---

### **Non-Point Source Pollution and How You Can Help Keep Your Community Clean and Safe Stormwater Management for Homeowners and Businesses**

**Non-Point Source Pollution** is pollution that does not come from a single point or location; this type of pollution is carried into lakes, rivers and streams by storm water runoff. When it rains, the runoff collects pollutants from streets, lawns and parking lots (such as oil, gasoline, fertilizer, pesticides, litter and animal wastes) and carries pollutants into the water body.
