

**2011 Annual Drinking Water Quality Report**  
**St. Andrews Water & Sewer, Inc.**  
**PWS ID#: D300033**

**Why are we testing?**  
 We are pleased to provide you with this year's Annual Water Quality Report. This report is designed to inform you about the quality of the water you receive from your water utility. Our commitment is to provide you with safe drinking water. We are committed to providing you with safe drinking water. We are committed to providing you with safe drinking water.

**How can I get involved?**  
 We encourage you to get involved in the water quality process. We encourage you to get involved in the water quality process. We encourage you to get involved in the water quality process. We encourage you to get involved in the water quality process.

**Additional information for lead:**  
 If you have a lead service line, you should have your water tested for lead. If you have a lead service line, you should have your water tested for lead. If you have a lead service line, you should have your water tested for lead.

**Water Quality Data Table**  
 The table below lists all of the drinking water contaminants that we tested during the calendar year of this report. The parameters of concern are listed in boldface type. The table also lists the Maximum Contaminant Level (MCL) for each contaminant. The table also lists the Maximum Contaminant Level (MCL) for each contaminant.
