BUREAU OF PUBLIC WATER SUPPLY
CALENDAR YEAR 2011 CONSUMER CONFIDENCE REPORT
CERTIFICATION FORM

WEST HOLMES WATER
Public Water Supply Name

0260027
List PWS ID #s for all Water Systems Covered by this CCR

The Federal Safe Drinking Water Act requires each *community* public water system to develop and distribute a consumer confidence report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed to the customers, published in a newspaper of local circulation, or provided to the customers upon request.

Please Answer the Following Questions Regarding the Consumer Confidence Report

Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*

- Advertisement in local paper
- On water bills
- Other _____

Date customers were informed: 6/27/12

CCR was distributed by mail or other direct delivery. Specify other direct delivery methods:

Date Mailed/Distributed: 1/1

CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: HOLMES County Herald

Date Published: 6/26/12

CCR was posted in public places. *(Attach list of locations)*

Date Posted: 6/27/12 - West Holmes water H.G. office Board.

CCR was posted on a publicly accessible internet site at the address: www. N/A

CERTIFICATION

I hereby certify that a consumer confidence report (CCR) has been distributed to the customers of this public water system in the form and manner identified above. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

Chris Clark, operator

Water Quality Data Table

The table below lists all of the drinking water contaminants that we detected during the calendar year of this report. The presence of contaminants in the water does not necessarily indicate that the water poses a health risk. Unless otherwise noted, the data presented in this table is from testing done in the calendar year of the report. The EPA or the State requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants do not change frequently.

Important Drinking Water Definitions:

MCLG: Maximum Contaminant Level Goal: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

MCL: Maximum Contaminant Level: The highest level of a contaminant that allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology. **AL:** Action Level: The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Contaminants	MCLG	MCL	Your water	Range Low	Range High	Sample Date	Violation Source	Typical Source
Chromium (total)	0.1	0.1	0.0146	.003	.003	04-15-08	N/A	Discharge from steel and pulp mills Erosion of natural deposits
Fluoride (ppm)	4	.1	0.147	0.13	0.13	04-15-08	N/A	Erosion of natural deposits; water which promotes strong teeth; Discharge water additive used to control crobacteria
additive chlorine	4	1.8	1.80	1.50	1.90	12-31-11		
Nitrite (measured As Nitrogen) (ppm)	1	1	.02	0.1	0.0	02-11-11	N/A	Run off from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural Deposits.
Radioactive contaminants Beta/photon Emitters (PCI/L)	15	15	1.0	1.0	1.	02-11-11	N/A	Decay of natural and man-made deposits. The EPA considers 50 PCI/L to be the Level of concern for Beta particles.
Inorganic Contaminants Copper (ppm)	1.3	1.0	N/A 0	N/A 0	N/A 0	N/A 12-31-11	N/A	Erosion of natural deposits; Leaching From wood preservative; Corrosion of Household plumbing systems.
Lead(ppb)	15	15	3	0	3	12-31-11	N/A	Corrosion of household plumbing systems Erosion of natural deposits.
Cyanide	0.2	0.2	0.005	0.005	0.010	04-17-08	N/A	
Bacteriological	0.0	0.0	4			12-31-11		Bact monitoring Routine See Routine Bact Monitoring Violations

Units Descriptions: N/A Not applicable, N/D Not decided, NR: Not reported, MNR: Monitoring not required, ppm: parts per million, or milligrams per liter (mg/l) ppb: parts per billion, or micrograms per liter (ug/l) PCI/L: picocuries per liter (a measure of radioactivity).

If present, elevated level of lead can cause health problems, especially for pregnant women and young children. Lead in drinking water is

 LEXINGTON, MISSISSIPPI

2011 WATER QUALITY REPORT
 2012 JUL -2 AM 9:24

STATE OF MISSISSIPPI,
HOLMES COUNTY

Personally appeared before me, the undersigned authority, Chancery Clerk of said County and State, Bruce Hill, publisher of a public newspaper called the Holmes County Herald established in 1959 and published continuously since that date in said County and State, who, being duly sworn, deposed and said that the notice, of which a true copy is hereto annexed, was published in said paper for _____ times, as follows, to wit:

2011 WATER QUALITY REPORT
 WEST HOLMES WATER ASSOCIATION
 PWS ID # 0260027

Is my water safe?
 Last year, in its year-end report, your tap water met all U.S. Environmental Protection Agency (EPA) and state drinking water health standards. Local water utilities have never violated a water supply and once again we are proud to report that our system has never violated a maximum contamination level. This report is a snapshot of last year's water quality, included an analysis of where your water comes from, what it contains, and how it compares to the standard set by regulatory agencies. We are committed to providing you with information because informed customers are our best allies.

Do I need to take special precautions?
 Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplant, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the safe Water Drinking Hotline (800-426-4791).

Where does my water come from?
 Our water comes from two wells. Well one (1) is located at 2684 Marcella/Hitchford Road, and well two (2) is located at 199 Marcella/Waldone Road, Belzoni, MS. Well two (2) is the control center with an elevated water storage tank. This well draws water from the Meridian-upper Wilcox Aquifer.

Source water assessment and its availability:
 Currently, our source water assessment is being prepared by the Mississippi State Department of Health. When it is completed, you will be notified and copies will be made available upon request.

Why are there contaminants in my drinking water?
 Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

How can I get involved?
 Drinking water meetings are held on the second Monday of each month at 6:00 p.m. at Our monthly board meetings are held on the second Monday of each month at 6:00 p.m. at the West Holmes Water Association Headquarters. We hold on the second Monday in May at 6:00 p.m. at West Holmes Water Headquarters. We encourage all customers who have any concerns or questions to meet with us and voice your concerns.

Other information:
 You may want additional information about your drinking water. You may contact our certified waterworks operators or you may prefer to log on to the internet and obtain specific information about your system and its compliance history at the following address:
<http://www.westholmeswater.com>

Information including current and past pertaining to your water supply may be obtained by contacting: West Holmes Water Association (Onis Clark, Certified Operator - 1787 Marcella Road Belzoni, MS 39003). Phone: 662-235-4031 or 662-299-9508, or West Holmes Water on Monday, Wednesday and Friday at 662-235-0330.

Water Quality Data Table

The table below lists all of the drinking water contaminants that we detected during the calendar year of detection. The presence of contaminants in the water does not necessarily indicate that the water poses a health risk. Unless otherwise noted, the data presented in this table is based on the most recent available public report. The EPA sets the maximum contaminant level for various contaminants in public water supplies. The table below lists the maximum contaminant level for each contaminant. The concentration of a contaminant which is exceeded during a year is indicated by a water quality code.

Report on Drinking Water Health:
 The table below lists all of the drinking water contaminants that we detected during the calendar year of detection. The presence of contaminants in the water does not necessarily indicate that the water poses a health risk. Unless otherwise noted, the data presented in this table is based on the most recent available public report. The EPA sets the maximum contaminant level for various contaminants in public water supplies. The table below lists the maximum contaminant level for each contaminant. The concentration of a contaminant which is exceeded during a year is indicated by a water quality code.
