

MISSISSIPPI STATE DEPARTMENT OF HEALTH
 BUREAU OF PUBLIC WATER SUPPLY
 CCR CERTIFICATION FORM
 CALENDAR YEAR 2012

2013 JUN 12 AM 8:46

Friendship Community Water System, Inc.
 Public Water Supply Name

0570002
 List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **Since this is the first year of electronic delivery, we request you mail or fax a hard copy of the CCR and Certification Form to MSDH. Please check all boxes that apply.**

Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*

- Advertisement in local paper (attach copy of advertisement)
- On water bills (attach copy of bill)
- Email message (MUST Email the message to the address below)
- Other _____

Date(s) customers were informed: ____ / ____ / ____ , ____ / ____ / ____ , ____ / ____ / ____

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____

Date Mailed/Distributed: ____ / ____ / ____

CCR was distributed by Email (MUST Email MSDH a copy) Date Emailed: ____ / ____ / ____

- As a URL (Provide URL _____)
- As an attachment
- As text within the body of the email message

CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: Enterprise Journal

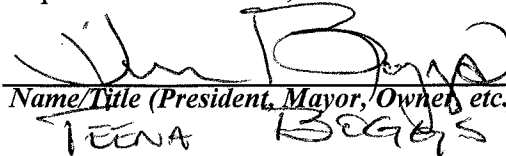

Date Published: 06/03/13

CCR was posted in public places. *(Attach list of locations)* Date Posted: ____ / ____ / ____

CCR was posted on a publicly accessible internet site at the following address (**DIRECT URL REQUIRED**):

CERTIFICATION

I hereby certify that the 2012 Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

 PRESIDENT 6/11/13
 Name/Title (President, Mayor, Owner, etc.) Date

Deliver or send via U.S. Postal Service:
 Bureau of Public Water Supply
 P.O. Box 1700
 Jackson, MS 39215

May be faxed to:
 (601)576-7800

May be emailed to:
Melanie.Yanklowski@msdh.state.ms.us

2013 MAY 24 PM 1:13

2012 Annual Drinking Water Quality Report
 Friendship Community Water System, Inc.
 PWS#: 0570002
 May 2013

We're pleased to present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to providing you with information because informed customers are our best allies. Our water source is from wells drawing from the Miocene Aquifer.

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identify potential sources of contamination. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The wells for the Friendship Community Water Association have received a moderate ranking in terms of susceptibility to contamination.

If you have any questions about this report or concerning your water utility, please contact Charles Schilling at 601.248.6277. We want our valued customers to be informed about their water utility. If you want to learn more, please join us at any of our regularly scheduled meetings. They are held on the first Monday of the month at 6:00 PM at the Friendship Baptist Church located at HWY 44 E, McComb, MS.

We routinely monitor for constituents in your drinking water according to Federal and State laws. This table below lists all of the drinking water contaminants that were detected during the period of January 1st to December 31st, 2012. In cases where monitoring wasn't required in 2012, the table reflects the most recent results. As water travels over the surface of land or underground, it dissolves naturally occurring minerals and, in some cases, radioactive materials and can pick up substances or contaminants from the presence of animals or from human activity; microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm-water runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm-water runoff, and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations and septic systems; radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily indicate that the water poses a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Maximum Contaminant Level (MCL) - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The "Goal" (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a drinking water disinfectant below which there is no known or expected risk of health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Parts per million (ppm) or Milligrams per liter (mg/l) - one part per million corresponds to one minute in two years or a single penny in \$10,000.

Parts per billion (ppb) or Micrograms per liter - one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

TEST RESULTS								
Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL/MRDL	Unit Measure -ment	MCLG	MCL	Likely Source of Contamination

Inorganic Contaminants									
14. Copper	N	2012	1.5	4	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives	
17. Lead	N	2012	16	3	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits	
Disinfection By-Products									
Chlorine	N	2012	1.2	.21 – 2.62	mg/l	0	MRDL = 4	Water additive used to control microbes	

* Most recent sample. No sample required for 2012.

Inorganic Contaminants:

(15) Copper. Copper is an essential nutrient, but some people who drink water containing copper in excess of the action level over a relatively short amount of time could experience gastrointestinal distress. Some people who drink water containing copper in excess of the action level over many years could suffer liver or kidney damage. People with Wilson's Disease should consult their personal doctor.

(18) Lead. Infants and children who drink water containing lead in excess of the action level could experience delays in their physical or mental development. Children could show slight deficits in attention span and learning abilities. Adults who drink this water over many years could develop kidney problems or high blood pressure.

Our system received a CCR violation for not submitting the 2011 CCR report by the July 1st annual deadline.

We are required to monitor your drinking water for specific constituents on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. In an effort to ensure systems complete all monitoring requirements, MSDH now notifies systems of any missing samples prior to the end of the compliance period.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Our water system is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing. Please contact 601.576.7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline 1.800.426.4791.

******April 1, 2013 MESSAGE FROM MSDH CONCERNING RADIOLOGICAL SAMPLING******

In accordance with the Radionuclides Rule, all community public water supplies were required to sample quarterly for radionuclides beginning January 2007 – December 2007. Your public water supply completed sampling by the scheduled deadline; however, during an audit of the Mississippi State Department of Health Radiological Health Laboratory, the Environmental Protection Agency (EPA) suspended analyses and reporting of radiological compliance samples and results until further notice. Although this was not the result of inaction by the public water supply, MSDH was required to issue a violation. This is to notify you that as of this date, your water system has completed the monitoring requirements and is now in compliance with the Radionuclides Rule. If you have any questions, please contact Karen Walters, Director of Compliance & Enforcement, Bureau of Public Water Supply, at 601.576.7518.

The Friendship Community Water System, Inc. works around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future. Please note: this CCR report will not be mailed to each customer.

MAGNOLIA SAMPLE BALLOT

- For Mayor**
- Mike Hertz (D)
 - Dennis Olson (R)
- For Alderman at Large**
- Clarence Brown (D)
 - Mercedes Rife (D)
 - Clara White (D)
- For Ward 4 Alderman**
- Jim Andrews (R)
 - Joe Conaschke (D)
 - Clara White (D)

SUMMIT SAMPLE BALLOT

- For Mayor**
- Percy Robinson
- For Town Council**
(Vote for four)
- Ashley Almon
 - Joe Lewis
 - Lester Jones
 - Deborah Pope
 - Dany Porter Jr.
 - Lester Swanigan

OSYKA SAMPLE BALLOT

- For Mayor**
- Allan Appleback
 - Jamie W. Hazel
- For Alderman**
(Vote for four)
- Danz Christie
 - Tommy Kzar
 - Kae Mewis Jr.
 - Betty Madala
 - N.F. "Boke" Ruffolo
 - Robbie Yarnado

LIBERTY SAMPLE BALLOT

- For Mayor**
- Richard H. "Dick" Strahan
- For Alderman**
(Vote for five)

GLOSTER SAMPLE BALLOT

- For Mayor**
- Bill Adams
 - Billy Johnson
- For Alderman Ward 1**
- Carol M. Canal
 - Joyce Parkins
- For Alderman Ward 2**
- Steve F. Hoyt
 - Cassandra McEbin
- For Alderman Ward 3**
- Keisha M. Newwood
- For Alderman Ward 6**
- Tamara Lee Sr.
 - Betty Ravecraft

BRIDE SAMPLE BALLOT

- For Mayor**
- Earl Case
 - Linda Dal Green
 - Arthur "Mac" Luffman
- Alderman at Large**
- Gladys Huff

MONROE SAMPLE BALLOT

- Alderman Ward 1**
- Howard Jean Kelly
- Alderman Ward 2**
- John Knight
- Alderman Ward 3**
- Tommy Anthony Lebs Sr.
- Alderman Ward 4**
- Fannie M. Brown

MEADOWS SAMPLE BALLOT

- For Mayor**
- W.P. Hickey Jr.
 - Lana D. Reed
- For Alderman**
(Vote for five)
- Charles Gidycz
 - Bart Jones
 - Bobby Kay
 - William David Scarborough
 - Kim Scott

Area town voters head to polls Tuesday

Area voters will head to the polls Tuesday to elect their representatives to local government. The election is being held on a Tuesday to encourage higher voter turnout.

CENTREVILLE
The election in Centerville will be held at 7 a.m. with the polls closing at 7 p.m. The candidates for Mayor are Larry Lee and Robert Brown. The candidates for Alderman are Mary West and Mary Sanders. Thomas Lee is also running for Mayor.

BOKE
Boke has a three-way race for Mayor. The candidates are Robert Knight, John Knight and Arthur "Mac" Luffman.

OSYKA
Osyka voters will elect a Mayor and four Aldermen. The candidates for Mayor are Allan Appleback and Jamie W. Hazel.

MONROE
Monroe voters will elect a Mayor and four Aldermen. The candidates for Mayor are W.P. Hickey Jr. and Lana D. Reed.

Franklin Community Water System Report

Franklin Community Water System Report
FRANCIS, MISSISSIPPI
MAY 2012

This report is prepared to you this year's Annual Quality Water Report. This report is designed to inform you about the quality of water you receive from the Franklin Community Water System. The report includes information on the water quality monitoring program, the water quality standards, and the water quality data for the year. The report also includes information on the water quality monitoring program, the water quality standards, and the water quality data for the year.

The water quality monitoring program is designed to ensure that the water you receive from the Franklin Community Water System is safe and of high quality. The program includes regular sampling and testing of the water at various locations throughout the system. The results of the testing are reported in this Annual Quality Water Report.

The water quality standards are established by the Environmental Protection Agency (EPA) and the State of Mississippi. These standards are designed to protect public health and the environment. The Franklin Community Water System consistently meets or exceeds these standards.

The water quality data for the year is presented in the following table. This table shows the results of the sampling and testing of the water at various locations throughout the system. The table includes information on the date of sampling, the location of sampling, and the results of the testing.

TEST RESULTS

Parameter	Location	Date	Result	Standard	Notes
Inorganic Contaminants	C-100	05/15/12	1.5	1.0	AP1-3.1
		05/22/12	1.8	1.0	AP1-3.1
		05/29/12	1.2	1.0	AP1-3.1
		06/05/12	1.6	1.0	AP1-3.1
Disinfection By-Products	C-100	05/15/12	0.1	0.1	MSDA-4.1
		05/22/12	0.1	0.1	MSDA-4.1
		05/29/12	0.1	0.1	MSDA-4.1
		06/05/12	0.1	0.1	MSDA-4.1

The test results show that the water quality is consistently good and meets or exceeds the standards. The inorganic contaminants are consistently below the standard, and the disinfection by-products are consistently below the standard.

The water quality monitoring program is a key component of the Franklin Community Water System's commitment to providing safe and high-quality water to our customers. We will continue to monitor the water quality and report the results in this Annual Quality Water Report.

The water quality standards are established by the Environmental Protection Agency (EPA) and the State of Mississippi. These standards are designed to protect public health and the environment. The Franklin Community Water System consistently meets or exceeds these standards.

The water quality data for the year is presented in the following table. This table shows the results of the sampling and testing of the water at various locations throughout the system. The table includes information on the date of sampling, the location of sampling, and the results of the testing.

The test results show that the water quality is consistently good and meets or exceeds the standards. The inorganic contaminants are consistently below the standard, and the disinfection by-products are consistently below the standard.
