

MISSISSIPPI STATE DEPARTMENT OF HEALTH
BUREAU OF PUBLIC WATER SUPPLY
CCR CERTIFICATION FORM
CALENDAR YEAR 2012

RECEIVED-WATER SUPPLY

2013 JUN 18 AM 8:36

PHILADELPHIA WATER ASSOCIATION

Public Water Supply Name

0310010

PWS ID # ('s):

The Federal Safe Drinking Water Act requires each Community public water system to develop and distribute a consumer confidence report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **Since this is the first year of electronic delivery, we request you mail or fax a hard copy of the CCR and Certification Form to MSDH. Please check all boxes that apply.**

Please Answer the Following Questions Regarding the Consumer Confidence Report

Customers were informed of availability of CCR by: *(Attach copy of publication, water bill, or other)*

- Advertisement in local paper (attach copy of advertisement)
- On water bills (attach copy of bill)
- E-mail message (MUST Email the message to the address below)
- Other _____

Date customers were informed: 6/9/13 / /

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used

Date mailed/distributed: / /

CCR was published in local newspaper. *(Attach copy of published CCR and proof of publication)*

Name of Newspaper: The Chronicle
Date Published: 6/9/2013

CCR was posted in public places. *(Attach list of locations)* Date posted: 6/17/2013 Heidelberg Post Office

CCR was posted on a publicly accessible internet site at the address: **(DIRECT URL REQUIRED):**

CERTIFICATION:

I hereby certify that the 2012 Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

Debbie Cross, Ofc. Mgr.
Name/Title (President, Mayer, Owner, etc.)

6-17-13
Date

This Consumer Confidence Report (CCR) was completed by MS Cross Connection, LLC with information provided by the above Public Water System and is certified only to be as true & correct as the information provided.

Susan Boyett
Signature

5/23/13
Date

Deliver or send via U. S. Postal Service:
Bureau of Public Water Supply
P O Box 1700
Jackson, MS 39215

May be faxed to:
(601) 576-7800

May be emailed to:
Melanie.Yanklowski@msdh.state.ms.us

CORRECTED
Annual Drinking Water Quality Report
Philadelphia Water Association
PWS ID # 0310010
June, 2013

2013 JUN 24 PM 12: 16

We're pleased to present to you this year's Annual Water Quality Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source consists of three wells that draw from the Cockfield Aquifer.

A source water assessment has been completed for the Philadelphia Water Association's water supply to determine the overall susceptibility of its drinking water to identify potential sources of contamination. The water supply for Philadelphia Water Association received a moderate susceptibility ranking to contamination.

We're pleased to report that our drinking water meets all federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact William (Bud) Dixon at 601-787-2117. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the fourth Monday of each month at the Philadelphia Water Assn office at 6:00 p.m.

Philadelphia Water Association routinely monitors for constituents in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1st to December 31st, 2012. As water travels over the land or underground, it can pick up substances or contaminants such as microbes, inorganic and organic chemicals, and radioactive substances. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Treatment Technique (TT) - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

Maximum Contaminant Level - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal - The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

TEST RESULTS

Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL	Unit Measurement	MCLG	MCL	Likely Source of Contamination
Inorganic Contaminants								
10. Barium	N	2009*	.00647	No Range	Ppm	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
13. Chromium	N		0.82	No Range	Ppb	100	100	Discharge from steel and pulp mills; erosion of natural deposits
14. Copper	N	1/1/09 to 12/31/11*	0.9	None	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
15. Cyanide	N	2009*	34	No Range	ppb	200	200	Discharge from steel/metal factories; discharge from plastic and fertilizer factories
16. Fluoride	N		0.41	No Range	ppm	4	4	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
17. Lead	N	1/1/09 to 12/31/11*	1	None	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits
Disinfectants & Disinfection By-Products								
Chlorine (as Cl ₂)	N	1/1/12 to 12/31/12*	1.50	1.00 to 1.80	ppm	4	4	Water additive used to control microbes
73. TTHM [Total tri-halomethanes]	N		47	None	ppb	0	80	By-product of drinking water chlorination
HAA5 [Haloacetic acids]	N		16	None	ppb	0	60	By-product of drinking water chlorination

* Most recent sample results available

*******APRIL 1, 2013 MESSAGE FROM MSDH CONCERNING RADIOLOGICAL SAMPLING*******

In accordance with the Radionuclides Rule, all community public water supplies were required to sample quarterly for radionuclides beginning January 2007 - December 2007. Your public water supply completed sampling by the scheduled deadline; however, during an audit of the Mississippi State Department of Health Radiological Health Laboratory, the Environmental Protection Agency (EPA) suspended analyses and reporting of radiological compliance samples and results until further notice. Although this was not the result of inaction by the public water supply, MSDH was required to issue a violation. This is to notify you that as of this date, your water system has completed the monitoring requirements and is now in compliance with the Radionuclides Rules. If you have any questions, please contact Karen Walters, Director of Compliance and Enforcement, Bureau of Public Water Supply, at 601-576-7518.

Additional Information for Lead

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Philadelphia Water Association is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing for \$10 per sample. Please contact 601.576.7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or

man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

This report being published in the paper will not be mailed. Please call our office if you would like a copy or have any questions.

*Annual Drinking Water Quality Report
Philadelphia Water Association
PWS ID # 0310010
May, 2013*

Notary Public

The Laurel Exchange Club presented checks to the S.T.A.R.S. (Striving Toward Awareness and Respect For Self) and C.H.A.M.P.S (Changing Hearts Attitudes and Minds for Personal Success) programs for youth in the community and the Domestic Abuse Family Shelter in Jones County. Both programs help support the Exchange Club's national project of child abuse prevention. The funds presented to the groups are being distributed from monies the Exchange Club raised through donations and the club's golf event co-sponsored by Kim's No Bull Car dealership. Pictured are David Wolgast, president of the Laurel Exchange Club, Johnnie Uimer, director of the STARS and CHAMPS mentoring programs; and Becky Sims, director of the Domestic Abuse Center.

JCJC blood drive June 18

Jones County Junior College will hold its community-wide Summer Blood Drive Tuesday, June 18 from 8:30 a.m. - 4 p.m. in the P.E. Building.

Because of the heat, many areas in the South suffer a summer blood shortage, and this year is no exception. Members of the community are encouraged to participate in this one-day drive to ensure United Blood Services reaches its goal of 90 procedures. All blood types are needed, but there is a severe shortage of both type O positive and negative, said Beverly Clark, senior donor representative for UBS.

All donors will receive a free t-shirt. For more information, or to schedule an appointment by phone, call 601-477-4066 or 601-477-2416.

MAGEE

Continued from 1A

Magee said he plans to inform council members in advance of asking them to vote on items.

"I want to bring them (council members) in from the start. I want to let them know what's going on and let them know the details," Magee said. "So many times council members have to ask questions that should have been answered before they get to that point."

Magee said he wants to be able to answer many of the council members' questions before they are asked to vote on things in a meeting.

"This process will hopefully allow us to move smoothly and progressively," the mayor-elect said.

Magee said he also plans to take an overview of the city's current operations before implementing any changes.

"I want to look at each and every department," he said. "I am familiar with the departments, but I have never been in the position to know the day-to-day operations of each department."

"I want to look at department heads and department heads and look at their weaknesses and strengths," he added. "When we have the right employees, then we will be able to serve the people more efficiently."

Magee said he also plans to continue to work on the water and sewer line improvements already underway.

"We will look at everything in the city, United Water included. If there is any waste, we will be dealing with it," Magee said. "We are working for the citizens, and we want to give them everything they deserve for their dollars."

However, Magee said, he didn't foresee any major changes.

"We have no plans of implementing any new positions or new departments," he said. "We believe that the departments we have are sufficient to run the city."

Magee said he would continue to evaluate the various aspects of the city and hopefully make some firm decisions within 90 days of becoming Laurel's new mayor.

Calling for all Laurel residents to become a part of the process to move Laurel forward, Magee said he plans to work together with all entities of the city and county.

"I would like for the citizens to know that my goal is to improve the city," he said. "In any election, there are going to be some issues. We have gone through three different elections."

"At the end of the day, we are all Laureites, and we all care about what happens in Laurel," he said. "We all love the city." Magee said he wants everyone to become a "unified team trying to move in the same direction and move Laurel forward."

"I want to thank those who supported me and those who didn't support me to work with me. We all need to come together and help make Laurel the kind of place we want it to be."

Magee thanked his team of supporters and campaign workers. He also praised the work of Sandra Hadley, who he called "a steadfast campaign supporter" throughout the three elections that climaxed on Tuesday.

Magee is scheduled to take office in July for a four-year term as mayor.

Annual Drinking Water Quality Report Philadelphia Water Association. Includes a table of test results for various contaminants like Arsenic, Barium, Chloride, Copper, Cyanide, Fluoride, Lead, Chlorates, and Disinfection By-Products.
