

MISSISSIPPI STATE DEPARTMENT OF HEALTH
BUREAU OF PUBLIC WATER SUPPLY
CCR CERTIFICATION FORM
CALENDAR YEAR 2012

2013 JUL -1 AM 10:48

City Point Water Association
Public Water Supply Name

0410004

List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **Since this is the first year of electronic delivery, we request you mail or fax a hard copy of the CCR and Certification Form to MSDH. Please check all boxes that apply.**

- Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*
 - Advertisement in local paper (attach copy of advertisement)
 - On water bills (attach copy of bill)
 - Email message (MUST Email the message to the address below)
 - Other _____

Date(s) customers were informed: 6/6/2013 / /

- CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____

Date Mailed/Distributed: / /

- CCR was distributed by Email (MUST Email MSDH a copy) Date Emailed: / /
 - As a URL (Provide URL _____)
 - As an attachment
 - As text within the body of the email message

- CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: Lee County Courier

Date Published: 6/6/2013

- CCR was posted in public places. *(Attach list of locations)* Date Posted: / /

- CCR was posted on a publicly accessible internet site at the following address **(DIRECT URL REQUIRED)**: _____

CERTIFICATION

I hereby certify that the 2012 Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

“2012 Annual Drinking Water Quality Report”**City Point Water Association**

PWS ID: 0410004

May 20, 2013

We're very pleased to provide you with this year's Annual Water Quality Report. We want to keep you informed about the excellent water and services we have delivered to you over the past year. Our goal is and always has been, to provide to you a safe and dependable supply of drinking water. Our water source is three wells. Our wells draw from the McShan Formation and The Eutaw Formation Aquifers.

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identified potential sources of contamination. The general susceptibility rankings assigned to each well of this system are provided immediately below. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. All of our wells received a **moderate** susceptibility to contamination rating.

I'm pleased to report that our drinking water meets all federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact David Payne at (662)-680-5710. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the third Monday of each month at 6PM. at the Water Office located at 3488 Hwy. 6 Plantersville, Ms.

City Point Water Association routinely monitors for constituents in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1st to December 31st, 2012. As water travels over the land or underground, it can pick up substances or contaminants such as microbes, inorganic and organic chemicals, and radioactive substances. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

Action Level - the concentration of a contaminant, which, if exceeded, triggers treatment or other requirements, which a water system must follow.

Treatment Technique (TT) - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

Maximum Contaminant Level - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal - The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

MRDL: Maximum residual disinfectant level. The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

TEST RESULTS

Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL	Unit Measurement	MCLG or MRDG	MCL or MRDL	Likely Source of Contamination
Disinfectants & Disinfection By-Products (There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.)								
Chlorine (as Cl ₂) (ppm)	N	2012	1.2	0.18-2.03	Ppm	4	4	Water additive used to control microbes
Inorganic Contaminants								
Barium	N	2012	.114	.07-.11496	Ppm	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
Fluoride	N	2012	.103	No-range	Ppm	4.0	4.0	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
Chromium	N	2012	1.9	.83-1.9	Ppb	100	100	Discharge from steel and pulp mills; erosion of natural deposits
Copper	N	2011	.5	n/a	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
Lead	N	2011	1.0	n/a	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits

**Most recent sample no sample was required in 2012*

*** A message from MSDH concerning radiological sampling ***

In accordance with the Radionuclides Rule, all community public water supplies were required to sample quarterly for radionuclides beginning January 2007- December 2007. Your public water supply completed sampling by the scheduled deadline; however, during an audit of the Ms. State Department of Health Radiological Health Laboratory, the Environmental Protection Agency (EPA) suspended analyses and reporting of radiological compliance samples and results until further notice. Although this was not the result of inaction by the public water supply, MSHD was required to issue a violation. This is to notify you that as of this date, your water system has completed the monitoring requirements and is now in compliance with the Radionuclides Rule. If you have any questions, please contact Karen Walters, Director of Compliance & Enforcement, Bureau of Public Water Supply, at (601)576-7518.

Additional Information for Lead

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The **City Point Water Association** is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. Please contact 601-576-7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

PROOF OF PUBLICATION

STATE OF MISSISSIPPI
COUNTY OF LEE

Before the undersigned, a NOTARY
in and for said state and county, JIM CLARK
general manager of the

LEE COUNTY COURIER

in the Town of TUREO in said county and state, makes oath that the

WATER REPORT

of which the article hereunto attached is a true copy, was published in said newspa-
per as follows:

Volume 22, No. 20 Date 6/6 2013
Volume _____, No. _____ Date _____ 20____
Volume _____, No. _____ Date _____ 20____
Volume _____, No. _____ Date _____ 20____
Volume _____, No. _____ Date _____ 20____

And I, hereby certify that the issues above mentioned have been examined
by me, and I find the publication thereof to have been duly made, and that The Lee
County Courier has been established, published and had a bona fide circulation in
said city, county and state for more than one year next proceeding the first date writ-
ten above.

SUBMIT YOUR EVENT
 regional, national and local artists bring their talents to the stage in a variety of genres. The event is a preliminary round of the Ultimate Elvis Tribute Artist Contest. In addition to all of the great music, the festival features a number of food vendors, a carnival midway, pet parade, beauty pageant, 5k run, disc golf, movie poster exhibit, and much more. Event details, tickets and schedule are available at www.tupeloelvisfestival.com.

ELVIS DRIVING TOUR MARKER UNVEILING will take place on June 6 at 3 p.m. at the Music Bend Nature Trail, 59 N. Veterans Blvd. in Tupelo. This event marks the addition of a 1th site on the trail. For more information, call 800-533-0511.

LIVING HISTORY ENCAMPMENT AND WALKING TOUR is set for June 8 from 9 a.m.-2 p.m. at Brice's Crossroads National Battlefield in Baldwin. The event will mark the 145th anniversary of the Battle of Brice's Crossroads and Tupelo/Harrisburg battles. Artisans, musicians, camp cooks, re-enactors will demonstrate and living history camps will be available for demonstration. Military and civilian impersonators of those who witnessed the battle first hand will present their stories during a walking tour on hallowed ground. Camp life, canon and weapon firing, camp food, preachers and musicians will be available all day to portray civil war life for the public. Also, a closing vesper under the arbor will be presented at the Bethany Historic Cemetery at 7 p.m. and a dedication of a marker for Confederate soldier Haney will be held. Cost is \$5 and children under 5 free. For more information, call 662-365-3969.

OREN DUNN CITY MUSEUM SUMMER CAMP will be held June 10-14 from 9 a.m. to noon each day. It will offer a fun educational experience through diverse activities which could include playing a banjo to playing with vintage toys. Learning about wars and worms, gems and geology, looking for dinosaur bones and minerals, touring the museum and tasting produce from the garden will be on the agenda. Cost is \$75 for one child and \$50 for each additional sibling. Pre-registration ends May 25. Call 662-841-6438 or visit www.orendunnmuseum.org.

THE SALTILLO PERFORMING ARTS (SPA) THEATRE CAMP will be held June 10-14 at the Saltillo Elementary School auditorium. The camp will consist of a three-hour session in the morning for grades K-3 and in the afternoon for grades 4-8. The morning sessions start at 9:30 a.m. and the afternoon session begins at 12:30. Campers will work on all aspects of theatre production culminating in a performance Friday evening that will give all campers a time to shine and share their experience with family and friends. Cost is \$75 and includes camp T-shirt, picture and daily snacks. Scholarships and sibling discounts available. For more information, visit www.facebook.com/SaltilloPerformingArts or email Diane Lutz at saltilloperformingarts@gmail.com. Lutz can be reached by phone at 678-6455 or 842-8931.

The Lyric Krewe, Tupelo Community Theatre's support organization, will present their 10th annual street fiesta, **MUSIC, MONET, AND MARGARITAS**, on June 16 from 7:30 p.m. until 11:30 p.m. The event will be on Broadway Street in front of the Lyric and will include music by The Jam Band and a silent auction of local artist's work. Tickets are \$25 and include food provided by Outback Steakhouse and your first drink. For more information or to buy tickets, call the TCT office at 844-1935 or visit www.tct.ms.

PIED PIPER PLAYERS SUMMER THEATRE CAMP Rock and Roll Forever! June 17-21 with a Saturday performance on June 22 at 10 a.m. The camp is for students who completed K6 grades this year. Cost is \$60. Scholarships and sibling discounts are available. Call Debby Gibbs at 662-678-3844 or email: piedpipertheatreupelo@gmail.com for details.

Tupelo Community Theatre's Summer Youth Theatre production of **CHARLOTTE'S WEB** will June 20-22 at the Lyric Theatre. Based on the children's novel first published in 1952 the play tells the story of a pig named Wilbur and his friendship with a spider named Charlotte. Tickets are \$10 for adults and \$5 for students and younger and may be purchased anytime by calling the TCT box office at 844-1935.

Gumtree TWGS, BancorpSouth and United Furniture Industries present the **2013 FATHER/DAUGHTER GUMTREE BALL**, benefiting Le Bonheur Children's Hospital. This year's event will take place on June 22 from 6-9 p.m. at the BancorpSouth Arena in Tupelo. This special evening for daddies and daughters will feature a silent and live auction, dancing and more. Food will be provided by Bishop's BBQ. Tickets are \$40 per couple and \$10 for each additional daughter. Tickets may be purchased by emailing gumtreeinfo@gmail.com. Reserved tables, accommodating eight guests, are also available for \$1000, \$500 or \$300. Tickets and reserved table purchases must be made by June 7 in order to avoid a late fee of \$25. You may also register online.

"2012 Annual Drinking Water Quality Report" City Point Water Association PWS ID: 0410004 May 20, 2013

We're very pleased to provide you with this year's Annual Water Quality Report. We want to keep you informed about the excellent water and services we have delivered to you over the past year. Our goal is and always has been, to provide to you a safe and dependable supply of drinking water. Our water source is three wells. Our wells draw from the McShine Formation and The Eutaw Formation Aquifers.

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identified potential sources of contamination. The general susceptibility rankings assigned to each well of this system are provided immediately below. A report containing susceptibility rankings assigned to each well of this system were made has been furnished to our public water system and is available for viewing upon request. All of our wells received a moderate susceptibility to contamination rating.

I'm pleased to report that our drinking water meets all federal and state requirements. If you have any questions about this report or concerning your water utility, please contact David Payne at (662)-680-5710. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the third Monday of each month at 6PM at the Water Office located at 3488 Hwy. 6 Plantersville, Ms.

City Point Water Association routinely monitors for constituents in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1st to December 31st, 2012. As water travels over the land or underground, it can pick up substances or contaminants such as microbes, inorganic and organic chemicals, and radioactive substances. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

Action Level - the concentration of a contaminant, which, if exceeded, triggers treatment or other requirements, which a water system must follow.
