

MISSISSIPPI STATE DEPARTMENT OF HEALTH
BUREAU OF PUBLIC WATER SUPPLY

JUN 28 AM 8:55

CCR CERTIFICATION FORM
CALENDAR YEAR 2012
Cason Water District Inc.
Public Water Supply Name

048-0019

List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **Since this is the first year of electronic delivery, we request you mail or fax a hard copy of the CCR and Certification Form to MSDH. Please check all boxes that apply.**

Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*

- Advertisement in local paper (attach copy of advertisement)
- On water bills (attach copy of bill)
- Email message (MUST Email the message to the address below)
- Other _____

Date(s) customers were informed: ___ / ___ / ___ , ___ / ___ / ___ , ___ / ___ / ___

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____

Date Mailed/Distributed: ___ / ___ / ___

CCR was distributed by Email (MUST Email MSDH a copy) Date Emailed: ___ / ___ / ___

- As a URL (Provide URL _____)
- As an attachment
- As text within the body of the email message

CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: The Monroe County Shopper

Date Published: 6/19/13

CCR was posted in public places. *(Attach list of locations)* Date Posted: ___ / ___ / ___

CCR was posted on a publicly accessible internet site at the following address (**DIRECT URL REQUIRED**):

CERTIFICATION

I hereby certify that the 2012 Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

Darrell A. G...
Name/Title (President, Mayor, Owner, etc.)

6-26-13
Date

Deliver or send via U.S. Postal Service:
Bureau of Public Water Supply
P.O. Box 1700
Jackson, MS 39215

May be faxed to:
(601)576-7800

May be emailed to:
Melanie.Yanklowski@msdh.state.ms.us

2012 CONSUMER WATER REPORT CASON WATER DISTRICT

RECEIVED - WATER SUPPLY

Why is my water safe?
We are pleased to present this year's Annual Water Quality Report (Consumer Confidence Report) as required by the Safe Drinking Water Act (SDWA). This report is designed to provide details about where your water comes from, what it contains, and how it compares to standards set by regulatory agencies. This report is a snapshot of last year's water quality. We are committed to providing you with information because informed customers are our best allies.

Do I need to take special precautions?
Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC's Guidelines for Community Water Systems on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Water Drinking Hotline (800-426-4791).

Where does my water come from?
Our water source is from wells drawing from the McShaw Formation and Gosport Formation Aquifers.

Water assessment and its availability
A detailed report is available for viewing upon request.

Why are there contaminants in my drinking water?
Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's (EPA) Safe Drinking Water Hotline (800-426-4791). The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems; and radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water that must provide the same protection for public health.

How can I get involved?
Please join our monthly board meetings on the first Tuesday of every month at our office at 5:00 PM.

Monitoring and Reporting of Compliance Data Violation
April 1, 2013 MESSAGE FROM MSDBH CONCERNING RADIOLOGICAL SAMPLING: In accordance with the Radon-in-Water Rule, all community public water supplies were required to sample quarterly for radon-in-water beginning January 2007 - December 2007. Your public water supply completed sampling by the schedule deadline; however, during a visit of the Mississippi State Department of Health Radiological Health Laboratory, the Environmental Protection Agency (EPA) requested analyses and reporting of radiological compliance samples and results until further notice. Although this was not the result of action by the public water supply, MSDBH was required to issue a violation. This is to notify you that as of this date, your water system has not completed the monitoring requirements. If you have any questions, please contact Melissa Waters, Deputy Director, Bureau of Public Water Supply, at 601-576-7518.

Additional Information for Lead
If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Cason Water District, Inc. is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/lead/>.

Water Quality Data Table
In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of contaminants in water provided by public water systems. The table below lists all of the drinking water contaminants that we detected during the calendar year of this report. Although many more contaminants were tested, only those substances listed below were found in your water. All waters of drinking water contain some naturally occurring contaminants. At low levels, these substances are generally not harmful in our drinking water. Removing all contaminants would be extremely expensive, and in most cases, would not provide increased protection of public health. A few naturally occurring minerals may actually improve the taste of drinking water and have nutritional value at low levels. Unless otherwise noted, the data presented in this table is from testing done in the calendar year of this report. The EPA or the State requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants do not vary significantly from year to year, or the system is not considered vulnerable to this type of contamination. As such, some of our data, though representative, may be more than one year old. In this table you will find terms and abbreviations that might not be familiar to you. The help box better understand these terms, we have provided the definitions below.

Contaminant	MCL or MCLG (ppm)	Year	Range	Sample Date	Violation	Typical Source
Chloride (ppm)	250	2012	15	NA	No	Discharge from chemical and industrial factories, discharge from domestic activities.
Iron (ppm)	0.3	2012	0.15	NA	No	Discharge from petroleum refineries, iron and steel mills, iron and steel foundries, steel mills, and other iron and steel processing facilities.
Lead (ppm)	0.01	2012	0	NA	No	Discharge from metal refineries and metal processing facilities, discharge from chemical, electronics, and other metal processing facilities.
Mercury (ppm)	0.02	2012	0	NA	No	Discharge from metal refineries and metal processing facilities, discharge from chemical, electronics, and other metal processing facilities.
Nitrate (ppm)	10	2012	0	NA	No	Discharge from agricultural operations, discharge from domestic activities, and discharge from other sources.
Phosphate (ppm)	0.1	2012	0	NA	No	Discharge from agricultural operations, discharge from domestic activities, and discharge from other sources.
Sulfate (ppm)	250	2012	10	NA	No	Discharge from petroleum refineries, discharge from chemical and electronics factories, and discharge from other sources.
Total Dissolved Solids (ppm)	500	2012	150	NA	No	Discharge from petroleum refineries, discharge from chemical and electronics factories, and discharge from other sources.
Uranium (ppm)	0.02	2012	0	NA	No	Discharge from uranium processing facilities, discharge from nuclear power plants, and discharge from other sources.
Vanadium (ppm)	0.1	2012	0	NA	No	Discharge from petroleum refineries, discharge from chemical and electronics factories, and discharge from other sources.
Zinc (ppm)	0.3	2012	0	NA	No	Discharge from metal refineries and metal processing facilities, discharge from chemical, electronics, and other metal processing facilities.

Unit Descriptions
ppm: parts per million, or milligrams per liter (mg/L)
ppb: parts per billion, or micrograms per liter (µg/L)
NA: not applicable
ND: not detected
NR: monitoring not required, but recommended

Important Drinking Water Definitions
MCLG: Maximum Contaminant Level Goal: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLG's allow for a margin of safety.
MCL: Maximum Contaminant Level: The highest level of a contaminant that is allowed in drinking water. MCL's are set as close to the MCLG as feasible using the best available treatment technology.
TT: Treatment Technique: A required process intended to reduce the level of a contaminant in drinking water.
AL: Action Level: The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.
Variances and Exemptions: Variances and Exemptions: State or EPA permissions not to meet an MCL, or a treatment technique under certain conditions.
MRDLG: Maximum residual disinfectant level goal: The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLG's do not reflect the benefits of the use of disinfectants to control microbial contaminants.
MRDL: Maximum residual disinfectant level: The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
MNR: Monitor Not Required
MPL: State Assigned Maximum Permissible Level

Contaminant	MCL or MCLG (ppm)	Year	Range	Sample Date	Violation	Typical Source
Asbestos (ppm)	0.07	2012	0	NA	No	Discharge from asbestos processing facilities, discharge from asbestos-containing materials, and discharge from other sources.
Boron (ppm)	2	2012	0	NA	No	Discharge from boron processing facilities, discharge from boron-containing materials, and discharge from other sources.
Cadmium (ppm)	0.01	2012	0	NA	No	Discharge from metal refineries and metal processing facilities, discharge from chemical, electronics, and other metal processing facilities.
Chromium (ppm)	0.1	2012	0	NA	No	Discharge from metal refineries and metal processing facilities, discharge from chemical, electronics, and other metal processing facilities.
Copper (ppm)	1.3	2012	0	NA	No	Discharge from metal refineries and metal processing facilities, discharge from chemical, electronics, and other metal processing facilities.
Fluoride (ppm)	4	2012	0	NA	No	Discharge from petroleum refineries, discharge from chemical and electronics factories, and discharge from other sources.
Formaldehyde (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Glycol Ethers (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorocyclopentadiene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics factories, discharge from other sources.
Hexachlorobenzene (ppm)	0.1	2012	0	NA	No	Discharge from chemical and electronics

PROOF OF PUBLICATION

STATE OF MISSISSIPPI
COUNTY OF MONROE

Before the undersigned, a Notary Public in

And for said state and county, Jeff Boozer, editor, publisher and manager of
The Monroe County Shopper, an advertising medium in Amory, in said County and state
makes oath that the
Cason Water District

Of which the article hereunto attached is a true copy, was published in said advertising medium
as follows:

Edition # 1677 Dated 19-Jun 2013

And I hereby certify that the issue above mentioned has been examined by me, and I find the publication
therof to have been duly made, and that The Monroe County Shopper has been established, published
and had a bonafide circulation in said town, county and state for more than one year next preceding the
first insertion of the article described herein.

Jeff Boozer
Editor, publisher and manager

Sworn to and subscribed before me this 19th day of
June, 2013.

Lisa K. Cummins
Notary Public
