

MISSISSIPPI STATE DEPARTMENT OF HEALTH
BUREAU OF PUBLIC WATER SUPPLY
CCR CERTIFICATION FORM
CALENDAR YEAR 2012

2013 JUN 21 AM 9:08

Spart Springs Water Association
Public Water Supply Name

0700009 & 0700022

List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **Since this is the first year of electronic delivery, we request you mail or fax a hard copy of the CCR and Certification Form to MSDH. Please check all boxes that apply.**

Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*

- Advertisement in local paper (attach copy of advertisement)
- On water bills (attach copy of bill)
- Email message (MUST Email the message to the address below)
- Other _____

Date(s) customers were informed: 5/29/2013 / / , / /

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____

Date Mailed/Distributed: ___ / ___ / ___

CCR was distributed by Email (MUST Email MSDH a copy) Date Emailed: ___ / ___ / ___

- As a URL (Provide URL _____)
- As an attachment
- As text within the body of the email message

CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: Southern Sentinel

Date Published: 5/29/2013

CCR was posted in public places. *(Attach list of locations)* Replay Public Library 837-7793 Date Posted: 5/29/2013

CCR was posted on a publicly accessible internet site at the following address (**DIRECT URL REQUIRED**): _____

CERTIFICATION

I hereby certify that the 2012 Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

Larry Jackson, President
Name/Title (President, Mayor, Owner, etc.)

Planning the Fair

Recently representatives from North Tippah and South Tippah schools met to plan School Night at the Tippah County Fair. This year the fair will be held Aug. 3-10, with School Night being Tuesday, Aug. 6. Admission for K-12 students will be free that night, with \$10 "ride all you want" armbands from 5-10 p.m. The Peoples Bank, Walmart and Mississippi Delta Shows will be sponsoring the event. New to school night this year will be a boxing ring and an XBOX trailer, sponsored by the Mississippi National Guard. Pictured are Coanie Walker, Nick Simmons, Jennifer Stroupe, Jay McCoy, Karen Walden, Debbie Harrison, Ruby Bennett, Jeff Palmer, Tony Elliott, Clint Stroupe, Becky Benson, Troy Shaw, and Cary Childs.

Loved it- LAST YEAR?!!?

Well, we have great news for you! The classified section is a great way to sell your "gently used" things, and make cash to get new things! Just call us at 837-8111 to get started!

CONCRETE STORM SHELTERS

Underground, Hillside, & Above Ground Shelters starting @ \$3095.00 installed. Call us to find out how you can receive 75% Federal Reimbursement on your storm shelter. 1-888-527-7700

Vote for Lamon McClain Alderman Ward 4. Member of Presbyterian Church, Air Force Veteran, Farmer, Served 4 Years as County Supervisor.

If elected, I will serve this city with honesty, respect, fairness to all, and ask God's guidance in every decision. I humbly ask for your vote on June 4th. Thank You!

Vote McClain Aldermen, Ward 4

Elect HOMER RICHARDSON

Alderman Ward 2 June 4, 2013

I am married to Sara Richardson and have had the pleasure of serving as your Alderman of Ward 2 in the City of Ripley for the past four years. I certainly appreciate and thank the citizens of Ward 2 for all of their votes and support in the primary election. Your continued support on June 4, 2013, in the general election will be greatly appreciated.

Thank you for all of your support.

Just imagine how many eyes are on this ad right now...

It could be yours!

Call us at 837-8111 and let us advertise for you today!

Annual Drinking Water Quality Report Spout Springs Water Association

PWS ID # 0700009 & 0700022 May 18, 2013

We're pleased to present to you this year's Annual Water Quality Report. This report is designed to inform you about the quality of water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the way we treat and protect our water resources. We are committed to ensuring the quality of your water. Our water source is two wells. Our wells draw from the Coffee Sand Aquifer.

The water quality assessment has been completed for our public water system to determine the overall susceptibility of the drinking water supply to identified potential sources of contamination. The general susceptibility groups assigned to each well of this system are provided immediately below. A report detailing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The wells for the Spout Springs Water Association have received no additional testing for contamination.

We're pleased to report that our drinking water meets all federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact Larry Jackson at (662) 587-7177. We want our valued customers to be informed about their water utility. If you want to learn more, please attend a special meeting the third Thursday in June, and the third Thursday night of December at the Spout Springs Fire Station at 7:00 P.M.

Spout Springs Water Association routinely monitors for constituents in your drinking water according to federal and state laws. This table shows the results of our monitoring for the period of January 1st to December 31st, 2012. As water travels over the land or underground, it can pick up substances or contaminants such as minerals, inorganic and organic chemicals, and radioactive substances. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Treatment Technique (TT) - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

Maximum Contaminant Level - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal - The "Goal" (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

TEST RESULTS PWS ID # MS 0700009

Contaminant Name: Chloride (in HCl) (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Chloride (in HCl) (M)	mg/L	2012	14	Surge	14	0	0		None

Contaminant Name: Nitrate (as N) (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Nitrate (as N) (M)	mg/L	2012	14	Surge	14	10	10		Discharge of nitrate to the environment can lead to eutrophication of surface waters, resulting in oxygen depletion and fish kills.

Contaminant Name: Copper (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Copper (M)	mg/L	2012	14	Surge	14	1.3	1.3	AD-13	Excessive consumption of copper can lead to liver and kidney damage.

Contaminant Name: Lead (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Lead (M)	mg/L	2012	14	Surge	14	0	0	AD-15	Excessive consumption of lead can lead to kidney damage, high blood pressure, and reproductive problems.

Contaminant Name: Sulfate (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Sulfate (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of sulfate can lead to diarrhea and dehydration.

Contaminant Name: Total Hardness (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Hardness (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total hardness can lead to kidney damage and dehydration.

Contaminant Name: Total Dissolved Solids (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Dissolved Solids (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total dissolved solids can lead to kidney damage and dehydration.

Contaminant Name: Total Suspended Solids (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Suspended Solids (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total suspended solids can lead to kidney damage and dehydration.

Contaminant Name: Turbidity (M) Unit: NTU

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Turbidity (M)	NTU	2012	14	Surge	14	0	0		Excessive consumption of turbidity can lead to kidney damage and dehydration.

Contaminant Name: Total Chlorine (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Chlorine (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total chlorine can lead to kidney damage and dehydration.

Contaminant Name: Total Hardness (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Hardness (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total hardness can lead to kidney damage and dehydration.

Contaminant Name: Total Dissolved Solids (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Dissolved Solids (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total dissolved solids can lead to kidney damage and dehydration.

Contaminant Name: Total Suspended Solids (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Suspended Solids (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total suspended solids can lead to kidney damage and dehydration.

Contaminant Name: Turbidity (M) Unit: NTU

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Turbidity (M)	NTU	2012	14	Surge	14	0	0		Excessive consumption of turbidity can lead to kidney damage and dehydration.

Contaminant Name: Total Chlorine (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Chlorine (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total chlorine can lead to kidney damage and dehydration.

Contaminant Name: Total Hardness (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Hardness (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total hardness can lead to kidney damage and dehydration.

Contaminant Name: Total Dissolved Solids (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Dissolved Solids (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total dissolved solids can lead to kidney damage and dehydration.

Contaminant Name: Total Suspended Solids (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Suspended Solids (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total suspended solids can lead to kidney damage and dehydration.

Contaminant Name: Turbidity (M) Unit: NTU

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Turbidity (M)	NTU	2012	14	Surge	14	0	0		Excessive consumption of turbidity can lead to kidney damage and dehydration.

Contaminant Name: Total Chlorine (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Chlorine (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total chlorine can lead to kidney damage and dehydration.

Contaminant Name: Total Hardness (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Hardness (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total hardness can lead to kidney damage and dehydration.

Contaminant Name: Total Dissolved Solids (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Dissolved Solids (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total dissolved solids can lead to kidney damage and dehydration.

Contaminant Name: Total Suspended Solids (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Suspended Solids (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total suspended solids can lead to kidney damage and dehydration.

Contaminant Name: Turbidity (M) Unit: NTU

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Turbidity (M)	NTU	2012	14	Surge	14	0	0		Excessive consumption of turbidity can lead to kidney damage and dehydration.

Contaminant Name: Total Chlorine (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Chlorine (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total chlorine can lead to kidney damage and dehydration.

Contaminant Name: Total Hardness (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Hardness (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total hardness can lead to kidney damage and dehydration.

Contaminant Name: Total Dissolved Solids (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Dissolved Solids (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total dissolved solids can lead to kidney damage and dehydration.

Contaminant Name: Total Suspended Solids (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Suspended Solids (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total suspended solids can lead to kidney damage and dehydration.

Contaminant Name: Turbidity (M) Unit: NTU

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Turbidity (M)	NTU	2012	14	Surge	14	0	0		Excessive consumption of turbidity can lead to kidney damage and dehydration.

Contaminant Name: Total Chlorine (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Chlorine (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total chlorine can lead to kidney damage and dehydration.

Contaminant Name: Total Hardness (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Hardness (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total hardness can lead to kidney damage and dehydration.

Contaminant Name: Total Dissolved Solids (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Dissolved Solids (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total dissolved solids can lead to kidney damage and dehydration.

Contaminant Name: Total Suspended Solids (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Suspended Solids (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total suspended solids can lead to kidney damage and dehydration.

Contaminant Name: Turbidity (M) Unit: NTU

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Turbidity (M)	NTU	2012	14	Surge	14	0	0		Excessive consumption of turbidity can lead to kidney damage and dehydration.

Contaminant Name: Total Chlorine (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Chlorine (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total chlorine can lead to kidney damage and dehydration.

Contaminant Name: Total Hardness (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
Total Hardness (M)	mg/L	2012	14	Surge	14	0	0		Excessive consumption of total hardness can lead to kidney damage and dehydration.

Contaminant Name: Total Dissolved Solids (M) Unit: mg/L

Contaminant Name	Unit	Sample Date	Sample Location	Sample Type	Sample Result	MCLG	MCL	TT	Health Effect of Contaminant
