2013 Annual Drinking Water Quality Report
Town of Florence, MS System
Public Water System Identification Number: 010410000
May 15, 2014

We are pleased to present the 2013 Annual Water Quality Report. This report is designed to inform you about the quality of water and services we provide to your area. Our concept goal is to provide you with a safe and dependable supply of drinking water. We work to understand the effects we make in providing the water treatment process and protect our water resources. We are committed to ensuring the quality of your water.

You are a valued customer on the Town of Florence West System. This system is comprised of four (4) groundwater wells that draw from the Cockfield Formation Aquifer.

The Mississippi Department of Environmental Quality has completed their source water assessment report for the Town of Florence, water supply to determine the overall sustainability of its drinking water to supply potential water contaminants. The water supply for the Town of Florence is not a naturally occurring contamination.

We are pleased to report that our drinking water meets all federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact: Jason Weaver at 601-555-0217. We would be pleased to answer any of your inquiries. We are available to you on our website, please visit any of our regular scheduled meetings. They are held on the first and third Tuesdays of each month at 6:00 PM at 2306 N.

In order to ensure that our water is safe to drink, the Town of Florence West System employs numerous methods to protect its drinking water according to Federal and State laws. These laws are the result of orders promulgated by your drinking water. These laws, along with the results of our monitoring for the period of January 1, 2013 to December 31, 2013:

Water quality report results

All samples of drinking water are subject to periodic monitoring by a laboratory that is certified to test for a wide range of contaminants. These contaminants include: lead, copper, iron, manganese, and other metals; nitrate, nitrite, and ammonia; disinfection byproducts; and other organic and inorganic compounds. The results of these tests are reported in this report. The results of these tests are reported in this report. The results of these tests are reported in this report.

Water Quality Report Summary

The results of the 2013 Annual Water Quality Report show that the Town of Florence West System's drinking water is safe to drink. All of the contaminants tested for in this report were found to be within the allowed limits. This is a testament to the quality of our water and the effectiveness of our water treatment process.
