

MISSISSIPPI STATE DEPARTMENT OF HEALTH  
BUREAU OF PUBLIC WATER SUPPLY

CCR CERTIFICATION  
CALENDAR YEAR 2013

2014 JUN -4 PM 3: 21

City of Jackson  
Public Water Supply Name

0250012

List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must mail, fax or email a copy of the CCR and Certification to MSDH. Please check all boxes that apply.**

Customers were informed of availability of CCR by: (*Attach copy of publication, water bill or other*)

Advertisement in local paper (attach copy of advertisement)  
On water bills (attach copy of bill)  
Email message (MUST Email the message to the address below)  
Other \_\_\_\_\_

Date(s) customers were informed: \_\_\_\_ / \_\_\_\_ / \_\_\_\_ , \_\_\_\_ / \_\_\_\_ / \_\_\_\_

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used \_\_\_\_\_

Date Mailed/Distributed: 05 / 30 / 2014

CCR was distributed by Email (MUST Email MSDH a copy) Date Emailed: \_\_\_\_ / \_\_\_\_ / \_\_\_\_  
As a URL (Provide URL \_\_\_\_\_)  
As an attachment  
As text within the body of the email message

CCR was published in local newspaper. (*Attach copy of published CCR or proof of publication*)

Name of Newspaper: \_\_\_\_\_

Date Published: \_\_\_\_ / \_\_\_\_ / \_\_\_\_

CCR was posted in public places. (*Attach list of locations*) Date Posted: \_\_\_\_ / \_\_\_\_ / \_\_\_\_

CCR was posted on a publicly accessible internet site at the following address (**DIRECT URL REQUIRED**):

www.jacksoms.gov posted on website 6.2.2014

**CERTIFICATION**

I hereby certify that the 2013 Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

  
\_\_\_\_\_  
Name/Title (President, Mayor, Owner, etc.)

Cynthia Hill, Water Plant Superintendent

\_\_\_\_\_  
June 3, 2014  
Date

Deliver or send via U.S. Postal Service:  
Bureau of Public Water Supply  
P.O. Box 1700  
Jackson, MS 39215

May be faxed to:  
(601) 576-7800

May be emailed to:  
Melanie.Yanklowski@msdh.state.ms.us

## Where Your Money Goes

Your water use charge is:

- \$3.21/100 cubic feet if you are within the City Limits,
- \$6.42/100 cubic feet if you are outside the City Limits but within 1 mile of the City Limits and
- \$2.48/100 cubic feet if you are more than 1 mile outside of the City Limits.

65% of this charge is used for operations and maintenance of the water system. 35% of this charge is used for debt retirement.

### Get Involved

We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future. Water conservation measures are an important first step in protecting our water supply. Such measures not only save the supply of our source water, but can also save you money by reducing your water bill. There are a few suggestions:

Conservation measures you can use inside your home include:

- ✓ Fix leaking faucets, pipes, toilets, etc.
- ✓ Replace old fixtures and install water-saving devices in faucets, toilets and appliances.
- ✓ Wash only full loads of laundry.
- ✓ Do not use the toilet for trash disposal.
- ✓ Take shorter showers.
- ✓ Do not let the water run while shaving or brushing teeth.
- ✓ Soak dishes before washing.
- ✓ Run the dishwasher only when full.

You can conserve outdoors as well:

- ✓ Water the lawn and garden in the early morning or evening.
- ✓ Use mulch around plants and shrubs.
- ✓ Repair leaks in faucets and hoses.
- ✓ Use water from a bucket to wash your car and save the hose for rinsing.

Information on other ways you can help conserve water can be found on the Environmental Protection Agency's website at [www.epa.gov/safewater/publicoutreach](http://www.epa.gov/safewater/publicoutreach).

### Thirsty for More Information about Your Water?

Please feel free to contact us:

If you have any questions about this report or concerning your water utility, please contact:  
Cynthia Hill, Water Plants Superintendent..... 601-960-2417

For water sampling and results, water quality complaints, or hot water questions, call:  
City of Jackson Water Laboratory..... 601-960-2723  
Lenore S. Hicks, Laboratory Supervisor..... 601-960-2730

For water leaks or repairs, water meter issues, or locating water lines, call:  
Water Maintenance (for leaks, repairs, or meters)..... 601-960-1777  
601-960-1778

Billing Questions/Concerns..... 601-960-2000  
For any other non-emergency issue in the City..... 311

2013 Annual Drinking Water Quality Report  
City of Jackson Maddox Road Well Water System  
Public Water Supply Identification Number MS0250012  
May 30, 2014

We are pleased to present the 2013 Annual Water Quality Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water.

You are a valued customer on the City of Jackson Maddox Road Well system. This system is comprised of six (6) groundwater wells located along the Hwy 18 corridor: Wiggins Rd Well, TV Road Well, Maddox Rd Well, Hwy 18 Well, Willowood Well, and Siwell Road Well.

*Our mission is to provide clean, safe drinking water that meets Federal and State regulations, in adequate amounts and at the lowest possible cost.*

## 2013 Water Quality Data

The Mississippi Department of Environmental Quality has completed their source water assessment report which is available for review by appointment at the Water / Sewer Utilities Division Office, 200 S. President Street, Room 405, between the hours of 8:00 AM and 5:00 PM Monday through Friday. Call 601-960-2090 for appointment. The final susceptibility assessment ranking is lower to moderate.

If you have any questions about this report or concerning your water utility, please contact Cynthia Hill, Water Plants Superintendent at 601-960-2417. We want our valued customers to be informed about their water utility. To participate in decisions that may affect the quality of the water, please attend any of our regularly scheduled City Council meetings. They are held every other Tuesday at either 6:00 PM or 10:00 AM within City Hall.

In order to ensure that your tap water is safe to drink, the City of Jackson Maddox Road Well Water System routinely monitors for constituents in your drinking water according to Federal and State laws. These laws limit the amount of certain contaminants in your drinking water. This table shows the results of our monitoring for the period of January 1, 2013 to December 31, 2013.

### Information about Your Water

The sources of drinking water (both tap and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man-made. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage, wildlife, and other sources.
- Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges.
- Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.
- Radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities.

For more information about contaminants and potential health effects, contact the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

### The Water Treatment Process

Your water is treated by disinfection. Disinfection involves the addition of chlorine to kill dangerous bacteria and microorganisms that may be in the water. Disinfection is considered to be one of the major public health advances of the 20th century.

## TEST RESULTS

Contaminant	Violation Yes/No	Sample Date	Level Detected	Range of Detects or # of Samples Exceeding AL	MCLG	MCL, TT, AL	Likely Source of Contamination
<b>Inorganic Contaminants</b>							
Barium (ppm)*	No	2012	0.0034	0.0020 - 0.0034	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
Chromium (ppb)*	No	2012	3.95	1.87 - 3.95	100	100	Discharge from steel and pulp mills; erosion of natural deposits
Copper (ppm) - consumer taps level; 90th percentile	No	2013	0.1	0 exceeding	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits
Fluoride (ppm)**	No	2012	1.28	0.92 - 1.28	4	4	Erosion of natural deposits; Water additive which promotes strong teeth; Discharge from fertilizer and aluminum factories
Lead (ppb) - consumer taps level; 90th percentile	No	2013	2	0 exceeding	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits
Nitrite (ppm)	No	2013	0.08	ND - 0.08	10	10	Runoff from fertilizer use; Leaching from septic tanks/sewage; Erosion of natural deposits
<b>Volatile Organic Carbons (VOCs)</b>							
Carbon Tetrachloride (ppb)	No	2013	0.524	ND - 0.524	0	5	Discharge from chemical plants and other industrial activities
<b>Disinfection Byproducts</b>							
Chlorine (ppm)	No	2013	2.1	0.3 - 3.5	4	4	Water additive used to control microbes
Haloacetic Acids (ppb)	No	2013	39.0 (RAA)	36.6 - 46.9	N/A	60	Byproduct of drinking water chlorination
Total Trihalomethanes (ppb)	No	2013	59.0 (RAA)	39.3 - 58.8	N/A	80	Byproduct of drinking water chlorination
<b>Unregulated Contaminants (averages)</b>							
Hexavalent Chromium (ppb)	N/A	2013	0.09	ND - 0.11	N/A	N/A	Unregulated contaminants do not have a drinking water standard set by the EPA. They are monitored to help the EPA decide whether a standard should be set for a contaminant.
Chromium (Total) (ppb)	N/A	2013	0.22	ND - 0.22	N/A	N/A	
Strontium (ppb)	N/A	2013	15	11 - 17	N/A	N/A	
Vanadium (ppb)	N/A	2013	0.38	0.31 - 0.44	N/A	N/A	

\*Most recent sample. No sample required for 2013.

\*\*Fluoride level is routinely adjusted to the MS State Department of Health's recommended level of 0.7 - 1.3 mg / L.

RAA = Running Annual Average

### ABBREVIATIONS & DEFINITIONS

**Non-Detects (ND):** laboratory analysis indicates that the constituent is not present.

**Parts per million (ppm):** one part per million corresponds to one minute in two years or a single penny in \$10,000.

**Parts per billion (ppb):** one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

**Picocuries per liter (pCi/L):** picocuries per liter is a measure of the radioactivity in water.

**Millirems per year (mrem/yr):** measure of radiation absorbed by the body.

**NTU:** Nephelometric Turbidity Unit is a measure of the clarity of water. Turbidity in excess of 5 NTU is just noticeable to the average person.

**Action Level (AL):** The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

**Treatment Technique (TT):** A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

**Maximum Contaminant Level (MCL):** The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

**Maximum Contaminant Level Goal (MCLG):** The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

## For Customers with Special Health Concerns

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

## Additional Information for Lead

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The City of Jackson is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead and copper testing for \$20 per sample. Please contact 601-576-7582 if you want to have your water tested.

## Fluoridation and Your Drinking Water

To comply with the "Regulation Governing Fluoridation of Community Water Supplies", CITY OF JACKSON-MADDOX RD. is required to report certain results pertaining to fluoridation of our water system. The number of months in the previous calendar year in which average fluoride sample results were within the optimal range of 0.7 to 1.3 ppm was 12. The percentage of fluoride samples collected in the previous calendar year that was within the optimal range was 90%.

City of Jackson Well Water system received a **4.7 out of 5.0** rating from the Mississippi Department of Health for our 2013 Inspection.

As you can see by the table, our system had **NO VIOLATIONS**. We're proud that our water meets or exceeds all Federal and State requirements.
