

CALENDAR YEAR 2013 CONSUMER CONFIDENCE REPORT  
CERTIFICATION REPORT  
CITY OF RULEVILLE  
PWS ID # ('s): 0670011

2014 JUN 12 AM 9:26

The Federal Safe Drinking Water Act requires each *community* public water system to develop and distribute a consumer confidence report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed to the customers, published in a newspaper of local circulation, or provided to the customers upon request.

**Please Answer the Following Questions Regarding the Consumer Confidence Report**

Customers were informed of availability of CCR by: *(Attach copy of publication, water bill, or other)*

- Advertisement in local paper
- On water bills
- Other \_\_\_\_\_

Date customers were informed: \_\_\_\_\_

CCR was distributed by mail or other direct delivery. Specify other direct delivery methods:

Date mailed/distributed: \_\_\_\_\_

CCR was published in local newspaper. *(Attach copy of published CCR and proof of publication)*

Name of Newspaper: BOLIVAR COMMERCIAL

Date Published: MAY 15, 2014

CCR was posted in public places. *(Attach list of locations)*

Date posted: \_\_\_\_\_

CCR was posted on a publicly accessible internet site at the address: www: \_\_\_\_\_

**CERTIFICATION:**

I hereby certify that a Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

Shirley Edwards  
Name/Title (President, Mayor, Owner, etc.)

6-10-14  
Date

This Consumer Confidence Report (CCR) was completed by MS Cross Connection, LLC with information provided by the above Public Water System and is certified only to be as true & correct as the information provided.

PROOF OF PUBLICATION

STATE OF MISSISSIPPI,  
COUNTY OF BOLIVAR.

Personally appeared before me, the undersigned authority in and for the County of Bolivar, State of Mississippi, DLANE MAKAMSON, Publisher of THE BOLIVAR COMMERCIAL, daily newspaper and published in the City of Cleveland, in said County and State who, on oath, deposes and says that The Bolivar Commercial is a newspaper as defined and prescribed in Senate Bill No. 203 enacted at the regular session of the Mississippi Legislature of 1948, amending Section 1958 of the Miss. Code of 1942, and that the publication of which the instrument annexed is a true copy, was published in said paper, to wit:

In Volume	<u>98</u>	No.	<u>74</u>	Dated	<u>May 15 20 14</u>
In Volume	_____	No.	_____	Dated	_____
In Volume	_____	No.	_____	Dated	_____
In Volume	_____	No.	_____	Dated	_____
In Volume	_____	No.	_____	Dated	_____
In Volume	_____	No.	_____	Dated	_____
In Volume	_____	No.	_____	Dated	_____

and that said newspaper "has been established for at least twelve months next prior to the first publication" of this notice.

*Dlane Makamson* Publisher

Sworn to and subscribed before me this the

day of May, 20 14.

Annual Drinking Water Quality Report  
City of Ruleville  
PWS ID # 0670011  
May 2014 2014 JUN 12 AM 9:26

We're pleased to present to you this year's Annual Water Quality Report. This report is designed to inform you about the quality water services we deliver to you every day. Our constant goal is to provide you with safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source consists of two wells that draw from the Meridian-Lower Wilcox Aquifer.

A source water assessment has been completed for the water supply to determine the overall susceptibility of this drinking water to identify potential sources of contamination. The water supply for the City of Ruleville received a moderate susceptibility ranking to contamination.

We're pleased to report that our drinking water meets all federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact John Downs at 655-756-2791. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the second Tuesday of each month at Ruleville City Hall at 200 E. Floyd St at 7:00 p.m.

The City of Ruleville routinely monitors for contaminants in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1st to December 31st, 2013. As water travels over the land or underground, it can pick up substances (or contaminants) such as microbes, inorganic and organic chemicals, and radioactive substances. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some contaminants. It's important to remember that the presence of these contaminants does not necessarily pose a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

**Action Level** - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

**Treatment Technique (TT)** - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

**Maximum Contaminant Level** - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLG as is feasible using the best available treatment technology.

**Maximum Contaminant Level Goal** - The "Goal" (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

TEST RESULTS

Contaminant	Number of Samples	Number of Samples Exceeding	Level Detected	Regulatory Requirement (MCL, MCLG, or Action Level)	Unit	MCL	MCLG	AL	Level Exceeded	Level Exceeded Contaminant
<b>Inorganic Contaminants</b>										
10. Arsenic	8	0	0.043	No Range	ppm	5	2	2	0	Discharge of mining wastes, discharge from acid solution, or use of natural deposits
11. Copper	8	0	0.1	No Range	ppm	1.3	1.3	1.3	0	Corrosion of household plumbing systems, erosion of natural deposits, run-off from road construction
12. Fluoride	8	0	0.94	No Range	ppm	4	4	4	0	Discharge of various deposits, waste solutions which seep into the soil, discharge from fertilizer and sludge treatment
13. Lead	8	0	0.01	No Range	ppm	1.5	0.01	0.01	0	Corrosion of household plumbing system, erosion of natural deposits
Nitrate	8	0	20.1	No Range	ppm	10	10	10	0	Discharge from chemical fertilizers, animal manure and petroleum refineries
<b>Disinfectants &amp; Disinfection By-Products</b>										
Chlorine (in Chlorine Dioxide)	8	0	0.5	No Range	ppm	4	4	4	0	Water treatment and residual chlorine
THM (Total Trihalomethanes)	8	0	0.2	No Range	ppm	8	8	8	0	By-product of drinking water disinfection
HAA5 (Total Haloacetic Acids)	8	0	0.02	No Range	ppm	8	8	8	0	By-product of drinking water disinfection

Not every sample results available

To comply with the "Regulation Governing Fluoridation of Community Water Supplies", CITY OF RULEVILLE is required to report certain results pertaining to fluoridation of our water system. The number of months in the previous calendar year in which average fluoride sample results were within the optimal range of 0.7 to 1.3 ppm was 12. The percentage of fluoride samples collected in the previous calendar year that were within the optimal range of 0.7 to 1.3 ppm was 100%.

Additional Information for Lead

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The City of Ruleville is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline at <http://www.epa.gov/leadwaterlead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing for \$10 per sample. Please contact 601.576.7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man-made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immunocompromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infection. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

This report being published in the paper will not be mailed. If you have any questions or would like a copy please call our office.
