

MISSISSIPPI STATE DEPARTMENT OF HEALTH
BUREAU OF PUBLIC WATER SUPPLY
CCR CERTIFICATION
CALENDAR YEAR 2013

Big V Water Association
Public Water Supply Name

59-0002

List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must mail, fax or email a copy of the CCR and Certification to MSDH. Please check all boxes that apply.**

Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*

- Advertisement in local paper (attach copy of advertisement)
- On water bills (attach copy of bill)
- Email message (MUST Email the message to the address below)
- Other _____

Date(s) customers were informed: 5/15/14 / / , / /

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____

Date Mailed/Distributed: ___ / ___ / ___

CCR was distributed by Email (MUST Email MSDH a copy) Date Emailed: ___ / ___ / ___

As a URL (Provide URL _____)

As an attachment

As text within the body of the email message

CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: The Banner Independent

Date Published: 5/15/14

CCR was posted in public places. *(Attach list of locations)* Date Posted: ___ / ___ / ___

CCR was posted on a publicly accessible internet site at the following address (**DIRECT URL REQUIRED**):

CERTIFICATION

I hereby certify that the 2013 Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

2013 Annual Drinking Water Quality Report
 2013 Annual Drinking Water Quality Report
 2013 Annual Drinking Water Quality Report

We are pleased to present to you this annual drinking water quality report. This report is prepared to inform you about the quality of your water and to provide you with a summary of the water quality data collected during the year. We have included information on the water quality data collected during the year, and we have also included information on the water quality data collected during the year.

The water quality data collected during the year is presented in the following tables. The water quality data collected during the year is presented in the following tables. The water quality data collected during the year is presented in the following tables.

If you have any questions about the report or concerning your water quality, please contact the Public Utility Commission at 1-800-455-7444. We will be happy to assist you.

TEST RESULTS

Contaminant	Maximum Contaminant Level (MCL)	Actual Concentration	Units	Notes
Redoxactive Contaminants				
Chlorine Residual	4.0	1.5	mg/L	Required for disinfection
Total Chlorine	4.0	1.5	mg/L	Required for disinfection
Inorganic Contaminants				
Calcium	75	110	mg/L	Hardness
Magnesium	30	10	mg/L	Hardness
Total Hardness	105	120	mg/L	Hardness
Disinfection By-Products				
Total Trihalomethanes (TTHM)	0.1	0.05	mg/L	Disinfection by-product
Halooacetic Acids (HAA5)	0.1	0.05	mg/L	Disinfection by-product

These results are based on samples collected during the year. The water quality data collected during the year is presented in the following tables. The water quality data collected during the year is presented in the following tables.

2013 Annual Drinking Water Quality Report
Big V Water Association
PWS# 590002 - May 2014

We're pleased to present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source is from wells drawing from the Gordo Formation Aquifer.

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identified potential sources of contamination. The general susceptibility rankings assigned to each well of this system are provided inmediately below. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The wells for the Big V Water Association have received a lower to moderate susceptibility ranking to contamination.

If you have any questions about this report or concerning your water utility, please contact Donja Larkin at 662.728.6901. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the first Tuesday after the 10th of each month at 6:00 PM, the office located at 410 Outlet Road.

We routinely monitor for constituents in your drinking water according to Federal and state laws. All of the drinking water contaminants that were detected during the period of January 1st to December 31st, 2013, in areas where monitoring wasn't required in 2013, the table reflects the most recent results. As water travels over the surface of land or underground, it dissolves naturally occurring minerals and, in some cases, radioactive materials and can pick up substances or contaminants from the presence of animals or from human activity; microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm water runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations and septic systems; radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily indicate that the water poses a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Maximum Contaminant Level (MCL) - The Maximum Allowed (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The Goal (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health.

17. Lead	N	2011/2013	1	0	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits
----------	---	-----------	---	---	-----	---	-------	--

Disinfection By-Products								
81. HAAS	N	2013	3	No Range	ppb	0	60	By-Product of drinking water disinfection
82. THM (Total trihalomethanes)	N	2013	6.23	No Range	ppb	0	80	By-Product of drinking water disinfection
Chlorine	N	2013	1.30	.72-1.91	Mg/l	0	MCL=1.0	Water additive used to control

Our water works around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.
