

MISSISSIPPI STATE DEPARTMENT OF HEALTH
BUREAU OF PUBLIC WATER SUPPLY

CCR CERTIFICATION
CALENDAR YEAR 2013

West MARION WATER ASSOCIATION
Public Water Supply Name

0460013

List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must mail, fax or email a copy of the CCR and Certification to MSDH. Please check all boxes that apply.**

Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*

- Advertisement in local paper (attach copy of advertisement)
- On water bills (attach copy of bill)
- Email message (MUST Email the message to the address below)
- Other _____

Date(s) customers were informed: 05/28/14 / /

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____

Date Mailed/Distributed: / /

CCR was distributed by Email (MUST Email MSDH a copy) Date Emailed: / /

As a URL (Provide URL _____)

As an attachment

As text within the body of the email message

CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: The Columbian Progress

Date Published: 05/17/14

MARION County Library

CCR was posted in public places. *(Attach list of locations)*

Date Posted: 06/02/14

CCR was posted on a publicly accessible internet site at the following address (**DIRECT URL REQUIRED**):

CERTIFICATION

I hereby certify that the 2013 Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

Sherrill Lee / OPERATOR
Name/Title (President, Mayor, Owner, etc.)

2013 Annual Drinking Water Quality Report
 West Marion Water Association
 PWS#: 0460013
 May 2014

2014 JUN 26 PM 2: 25

corrected

We're pleased to present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source is from wells drawing from the Miocene Aquifer.

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identified potential sources of contamination. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The wells for the West Marion Water Association have received a lower susceptibility ranking to contamination.

If you have any questions about this report or concerning your water utility, please contact Sherwood Reagan at 601-731-2601. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the first Monday on or after the 10th of each month at 6:00 PM at the West Marion Water Office.

We routinely monitor for constituents in your drinking water according to Federal and State laws. This table below lists all of the drinking water contaminants that were detected during the period of January 1st to December 31st, 2013. In cases where monitoring wasn't required in 2013, the table reflects the most recent results. As water travels over the surface of land or underground, it dissolves naturally occurring minerals and, in some cases, radioactive materials and can pick up substances or contaminants from the presence of animals or from human activity; microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm-water runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm-water runoff, and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations and septic systems; radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily indicate that the water poses a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Treatment Technique (TT) - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

Maximum Contaminant Level (MCL) - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a drinking water disinfectant below which there is no known or expected risk of health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

TEST RESULTS								
Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL	Unit Measure -ment	MCLG	MCL	Likely Source of Contamination
Inorganic Contaminants								
10. Barium	N	2012*	.004	No Range	ppm	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
13. Chromium	N	2012*	1.7	1.1 - 1.7	ppb	100	100	Discharge from steel and pulp mills; erosion of natural deposits
14. Copper	N	2009/11*	.4	0	ppm	1.3	AL=1.3	Corrosion of household plumbing

								systems; erosion of natural deposits; leaching from wood preservatives
16. Fluoride	N	2012*	.158	.156 - .158	ppm	4	4	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
17. Lead	N	2009/11*	1	0	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits
Disinfection By-Products								
81. HAA5	N	2013	5	No Range	ppb	0	60	By-Product of drinking water disinfection.
82. TTHM [Total trihalomethanes]	N	2013	10	No Range	ppb	0	80	By-product of drinking water chlorination.
Chlorine	N	2013	1.2	.95 – 1.64	mg/l	0	MDRL = 4	Water additive used to control microbes

* Most recent sample. No sample required for 2013.

As you can see by the table, our system had no violations. We're proud that your drinking water meets or exceeds all Federal and State requirements. We have learned through our monitoring and testing that some constituents have been detected however the EPA has determined that your water IS SAFE at these levels.

We are required to monitor your drinking water for specific constituents on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. In an effort to ensure systems complete all monitoring requirements, MSDH now notifies systems of any missing samples prior to the end of the compliance period.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Our Water Association is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing. Please contact 601.576.7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline 1-800-426-4791.

The West Marion Water Association works around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.

14. Copper	N	2009/11*	.4	0	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
16. Fluoride	N	2012*	.158	.156 - .158	ppm	4	4	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
17. Lead	N	2009/11*	1	0	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits

CALENDAR

Health Fair and Blood Drive, May 17

The Junior Auxiliary of Columbia is sponsoring a Health Fair and Blood Drive from 10 a.m. until 2 p.m. on Saturday, May 17 in the First Baptist Church of Columbia Gymnasium.

For more information, call Tina Andrews at (601) 441-5155.

Spring Fashion Show, May 18

holding its Spring Fashion Show at 2 p.m. on Sunday, May 18. There are three categories to enter: Sunday's best, hats and casual wear. There is also a special category for evening wear.

CHS Show Choir Jazz Band Concert, May 18

The Columbia High School Show Choir Jazz Band Concert will be held at 2 p.m. on Sunday, May 18.

Pastor's Installation, May 18

New Hope Missionary Baptist Church will hold the Installation Service for the Rev. Rickey Lee at 2 p.m. on Sunday, May 18. The guest speaker will be the Rev. Alfred Fairley.

May Day Celebration, May 18

Little Rock Missionary Baptist Church will hold its annual May Day Celebration at 11:15 a.m. on Sunday, May 18.

Grace Baptist Church Revival, May 18-21

Grace Baptist Church will hold a Revival beginning Sunday, May 18 and continue until Wednesday, May 21. The services on Sunday will be at 10:45 a.m. and 1:30 p.m. and the services Monday through Wednesday will begin at 7 p.m. each night. The guest speaker will be Bro. Joe Lott.

"Get out and Vote '14," May 19

The Marion County NAACP will present the program "Get Out and Vote '14" at 7 p.m. on Monday, May 19 at the New Zion United Methodist Church Rural Center.

For more information, contact the Rev. R.T. McGowan at (601) 736-1755 or (601) 731-0519.

East Marion Kindergarten Round-Up, May 19-20

The second round of East Marion Elementary School Kindergarten Round-Up will be held from 9 a.m. until 3 p.m. Monday, May 19 and Tuesday, May 20.

Second Mt. Bethel Missionary Baptist Church, May 19-21

Second Mt. Bethel Missionary Baptist Church will hold its annual Spring Revival beginning at 7:30 p.m. each night Monday, May 19 through Wednesday, May 21. The evangelist will be the Rev. Clayton Expose.

CHS Class of 1954 Meeting, May 20

The Columbia High School Class of 1954

will hold a meeting at 1:30 p.m. on Tuesday, May 20 at the Marion County-Columbia Library to plan for the 60th reunion.

For more information, call Emma Pritchard at (601) 736-3614.

Christian Tabernacle of Holiness Tent Revival, May 20-23

The Christian Tabernacle of Holiness will hold its Tent Revival from Tuesday, May 20 through Friday, May 23. The guest speakers for the week will be Minister Larry Johnson, Tuesday; Pastor W.J. Magee, Wednesday and Apostle Paul Beard, Thursday and Friday.

Marion County Alcorn State Alumni Association Meeting, May 21

The Marion County Alcorn State University Alumni Association will meet at 7 p.m. on Wednesday, May 21 at New Zion United Methodist Church.

Blood Drive, May 24

Springhill Missionary Baptist Church will sponsor a blood drive in honor of Rashod Johnson, Ava Fountain and Erica Brown from 11 a.m. until 5 p.m. on Saturday, May 24 at the Country Diner on Hwy. 35 S. To make an appointment, go to www.bloodhero.com (sponsor code: springhillmbc) or call Karen Mingo at (601) 736-0695.

Women Day Program, May 25

Mt. Zion Missionary Baptist Church will hold its annual Women Day Program at 1:30 p.m. on Sunday, May 25. The guest speaker will be the Rev. Johnny Porter.

St. Mark Missionary Baptist Church Revival, May 25-28

St. Mark Missionary Baptist Church will hold a Revival beginning at 2 p.m. on Sunday, May 25 with the Rev. Larry Jenkins serving as the guest speaker. The Revival will continue Monday, May 26 through Wednesday, May 28 at 7 p.m. each night. The guest speakers will be: Monday, Elder Johsua Osbey; Tuesday, the Rev. Rodney Smith and Wednesday, the Rev. Donald Paige.

Christian Hill Missionary Baptist Church Revival, May 25-28

Christian Hill Missionary Baptist Church will hold its Revival beginning at 1:30 p.m. on Sunday, May 25 with the Rev. Kevin D. Russell Jr. serving as the guest speaker. The Revival will continue Monday, May 26 through Wednesday, May 28 at 7 p.m. each night. The guest speakers will be: Monday, Elder Johsua Osbey; Tuesday, the Rev. Rodney Smith and Wednesday, the Rev. Donald Paige.

Building Fund Fundraiser, June 3

Dexter Pentecostal Church will have a Building Fund Fundraiser featuring singing and auction beginning at 5 p.m. on Tuesday, June 3 at Popwell's Family Restaurant.

2013 Annual Drinking Water Quality Report West Marion Water Association PWS#:0460013 May 2014

We're pleased to present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality of your drinking water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water and to protect our water resources. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source is from wells drawing from the Moccasin Aquifer.

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identified potential sources of contamination. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The wells for the West Marion Water Association have received a lower susceptibility ranking to contamination.

If you have any questions about this report or concerning your water utility, please contact Sherwood Reagan at 601-731-2601. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the first Monday on or after the 1st of each month at 6:00 PM at the West Marion Water Office.

We routinely monitor for constituents in your drinking water according to Federal and State laws. This table below lists all of the drinking water contaminants that were detected during the period of January 1st to December 31st, 2013. In cases where monitoring was not required in 2013, the table reflects the most recent results. As water travels over the surface of land or underground, it dissolves naturally occurring minerals and, in some cases, radioactive materials and can pick up substances or contaminants from the presence of animals or from human activity, microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife, inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm-water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, and farming, pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm-water runoff, and residential uses, organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations and auto service stations, radon, which is a naturally occurring radioactive gas that enters your water from the ground, and disinfection by-products, which are formed when disinfectants used to kill bacteria also react with organic matter in your water. In order to ensure that tap water is safe to drink, we routinely monitor for the presence of these contaminants. This does not necessarily indicate that the water poses a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Treatment Technique (TT) - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

Maximum Contaminant Level (MCL) - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The "Goal" (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

TEST RESULTS

Contaminant	Violation	Date Collected	Level Detected	Range of Values or # of Samples Exceeding MCL/MCLG	Unit Measure	MCLG	MCL	Likely Source of Contamination
Inorganic Contaminants								
10 Barium	N	2012	004	No Range	ppm	2	2	Discharge of mining wastes, discharge from metal refineries, erosion of natural deposits
13 Chromium	N	2012	1.7	1.1 - 1.7	ppb	100	100	Discharge from steel and pulp mills, erosion of natural deposits
14 Copper	N	200911*	4	0	ppm	1.3	AL=1.3	Corrosion of household plumbing systems, erosion of natural deposits, leaching from wood preservatives
15 Fluoride	N	2012	158	150 - 158	ppm	4	4	Erosion of natural deposits, water additives which promotes strong teeth, discharge from fertilizer and aluminum factories
17 Lead	N	200911*	1	0	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits

Disinfection By-Products

62 THM1 (Total Trihalomethanes)	N	2010*	5.63	No Range	ppb	0	80	By-product of drinking water chlorination
Chlorine	N	2013	1.2	95 - 1.64	mg/l	0	MRDL = 4	Water additive used to control microbes

* Most recent sample. No sample required for 2013. As you can see by the table, our system had no violations. We're proud that your drinking water meets or exceeds all Federal and State requirements. We have learned through our monitoring and testing that some constituents have been detected however, the EPA has determined that your water IS SAFE at these levels.

We are required to monitor your drinking water for specific constituents on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. In an effort to ensure systems complete all monitoring requirements, MSDH now notifies systems of any missing samples prior to the end of the compliance period.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Let drinking water is primarily from materials and components associated with service lines and home plumbing. Our Water Association is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. If your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the U.S. Environmental Protection Agency at <http://www.epa.gov/lead/>. The Mississippi State Department of Health Public Health Lab offers lead testing. Please contact 601 576 7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. Some substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek other drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection from drinking water are available from the Safe Drinking Water Hotline at 1-800-426-4791.

The West Marion Water Association works around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.
