MISSISSIPPI STATE DEPARTMENT OF HEALTH
BUREAU OF PUBLIC WATER SUPPLY
CCR CERTIFICATION
CALENDAR YEAR 2014 ✓

Neely Utilities, Inc.
Public Water Supply Name

0210004
List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must mail, fax or email a copy of the CCR and Certification to MSDH.** ***Please check all boxes that apply.***

Customers were informed of availability of CCR by: ***(Attach copy of publication, water bill or other)***

- ☑ Advertisement in local paper (attach copy of advertisement)
- ☐ On water bills (attach copy of bill)
- ☐ Email message (MUST Email the message to the address below)
- ☐ Other_____

Date(s) customers were informed: 6/25/15 , / / , / /

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used_____

Date Mailed/Distributed: / /

CCR was distributed by Email (MUST Email MSDH a copy) Date Emailed: / /
- ☐ As a URL (Provide URL _____)
- ☐ As an attachment
- ☐ As text within the body of the email message

CCR was published in local newspaper. ***(Attach copy of published CCR or proof of publication)***

Name of Newspaper: Greene County Herald

Date Published: 6/25/15

CCR was posted in public places. ***(Attach list of locations)*** Date Posted: / /

CCR was posted on a publicly accessible internet site at the following address (**DIRECT URL REQUIRED**):

_____

CERTIFICATION

I hereby certify that the 2014 Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

Ray A Dixon, President — 6-25-15

or feet. "Cruisin' for St. Jude" t-shirts will be available for purchase. Popeyes will donate ten percent of all proceeds during this time to St. Jude Children's Research Hospital.

Ticket info for Mississippi DYW

Time is drawing near to order tickets for the 2015 Distinguished Young Women of Mississippi program which will be held July 23-25 at age form prior to the opening day of the program.

General admission tickets in the theater's top balcony are also available with the cost for all three nights being $45. Tickets can be ordered locally through Wednesday, June 24, by mailing Debbie McLeod, 6826 Old 63 N., Lucedale, MS 39452. Tickets can also be ordered directly by calling (601)480-3438.

ice. Meals will be provided at District 2 Recreational Center in State Line, Chicora United Methodist Church in Buckatunna, and New Pilgrim Missionary Baptist Church in Waynesboro. Breakfast will be served from 8-9 a.m. and lunch from 11 a.m.- 1 p.m. each day June 1-July 31.

Information Wanted

The Greene County

50th Wedding Anniversary

Donald and Betty Pipkins, will celebrate their 50th wedding anniversary at 3 p.m. Saturday, June 27, at Leakesville Presbyterian Church. Donald and Betty are requesting no gifts, only your presence.

Attorney General warns consumers

2014 Annual Drinking Water Quality Repo

Neely Utilities, Inc.

PWS#: 0210004

June 2015

We're pleased to present to you this year's Annual Quality Water Report. This report is desi inform you about the quality water and services we deliver to you every day. Our constant g provide you with a safe and dependable supply of drinking water. We want you to understand th we make to continually improve the water treatment process and protect our water resources. committed to ensuring the quality of your water. Our water source is wells drawing from the Hat Formation and the Catahoula Formation Aquifers.

The source water assessment has been completed for our public water system to determ overall susceptibility of its drinking water supply to identify potential sources of contamination. containing detailed information on how the susceptibility determinations were made has been fi to our public water system and is available for viewing upon request. The wells for the Neely Inc. have received a lower susceptibility ranking to contamination.

If you have any questions about this report or concerning your water utility, please contact Dixon at (601)525-3707. We want our valued customers to be informed about their water utilit want to learn more, please attend the meeting scheduled for September 24, 2015 at 7 p.m Neely Utilities office.

We routinely monitor for constituents in your drinking water according to Federal and State la table below lists all of the drinking water contaminants that were detected during the period of 1st to December 31st, 2014. In cases where monitoring wasn't required in 2014, the table refl most recent results. As water travels over the surface of land or underground, it dissolves n occurring minerals and, in some cases, radioactive materials and can pick up substa contaminants from the presence of animals or from human activity; microbial contaminants, viruses and bacteria, that may come from sewage treatment plants, septic systems, agr livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which naturally occurring or result from urban storm-water runoff, industrial, or domestic was discharges, oil and gas production, mining, or farming; pesticides and herbicides, which ma from a variety of sources such as agriculture, urban storm-water runoff, and residential uses; chemical contaminants, including synthetic and volatile organic chemicals which are by-pro industrial processes and petroleum production, and can also come from gas stations an systems; radioactive contaminants, which can be naturally occuring or be the result of oil production and mining activities. In order to ensure that tap water is safe to drink, EPA pr regulations that limit the amount of certain contaminants in water provided by public water s All drinking water, including bottled drinking water, may be reasonably expected to contain small amounts of some constituents. It's important to remember that the presence of these con does not necessarily indicate that the water poses a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To better understand these terms we've provided the following definitions:

Action Level – the concentration of a contaminant which, if exceeded, triggers treatment requirements which a water system must follow.

Maximum Contaminant Level (MCL) – The "Maximum Allowed" (MCL) is the highest le contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasib the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) – The "Goal" (MCLG) is the level of a contaminant in water below which there is no known or expected risk to health. MCLGs allow for a margin of sa

Maximum Residual Disinfectant Level (MRDL) – The highest level of a disinfectant allowed in

to be aware of phone scams

Special to the Herald

Attorney General Jim Hood is once again reminding Mississippi consumers to remain cautious of tax-related phone scams. Even though the 2015 tax season has ended, these scams continue.

Con artists are impersonating IRS agents when calling and threatening Mississippi consumers. Attorney General Jim Hood warns consumers not to fall victim to these con artists or others like them. "The answer is simple for this and other similar phone scams - listen to your instincts. If something sounds too good to be true or is suspicious, don't take the action requested."

How the Scam Works:

The scammer calls and claims to be an agent for the IRS. The victim is told he or she owes money to the IRS and it must be paid promptly through a pre-loaded debit card or wire transfer. If the victim refuses to cooperate, the scammer threatens the victim with arrest, deportation or suspension of a business or driver's license.

Victims may be told they have a refund in an effort to trick them into sharing private information. If the phone isn't answered, the scammers often leave an "urgent" callback request. These con artists can sound convincing when they call, using fake names and bogus IRS identification badge numbers. They may know a lot about their targets, and they usually alter the caller ID to make it look like the IRS is calling.

The Attorney General's Office offers the following information and tips to avoid this scam:

The IRS will never:

• Call to demand immediate payment, nor will the agency call about taxes owed without

contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a drinking water disinfectar which there is no known or expected risk of health. MRDLGs do not reflect the benefits of th disinfectants to control microbial contaminants.

Parts per million (ppm) or Milligrams per liter (mg/l) – one part per million corresponds to one in two years or a single penny in $10,000.

Parts per billion (ppb) or Micrograms per liter – one part per billion corresponds to one minute years, or a single penny in $10,000,000.

Test Results

Contaminants	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL	Unit Measurement	MCLG	MCL	Likely Source of Contamin
Inorganic Contaminants								
8. Arsenic	N	2014	3.9	3.6-3.9	ppb	n/a	10	Erosion of natural deposits; r orchards; runoff from gla electronics production w
10. Barium	N	2014	0.0213	0.0201-0.0213	ppm	2	2	Discharge of drilling wastes; D from metal refineries; Erosion deposits
13. Chromium	N	2014	2.8	2.3-2.8	ppb	100	100	Discharge from steel and pulp Erosion of natural deposits
14. Copper	N	2012/14	0.1	0	ppm	1.3	AL=1.3	Corrosion of household plumb systems; erosion of natural de leaching from wood preservati
16. Fluoride	N	2014	0.161	0.16-0.161	ppm	4	4	Erosion of natural deposits; W additive which promotes stron Discharge from fertilizer and a factories
17. Lead	N	2012/14	3	90 th % 0	ppb	0	AL=15	Corrosion of household plumb systems; erosion of natural dep
Disinfection By-Products								
81. HAA5	N	2014	4	No Range	ppb	0	60	By-Products of drinking water disinfection.
82. TTHM (Total trihalomethanes)	N	2014	2.83	No Range	ppb	0	80	By-Products of drinking water chlorination.
Chlorine	N	2014	0.7	0.3-1	mg/l	0	MRDL = 4	Water additive used to control

* Most recent sample. No sample required for 2014.

We are required to monitor your drinking water for specific constituents on a monthly basis. R of regular monitoring are an indicator of whether or not our drinking water meets health standa an effort to ensure systems complete all monitoring requirements, MSDH now notifies systems missing samples prior to the end of the compliance period.

If present, elevated levels of lead can cause serious health problems, especially for pregnant w and young children. Lead in drinking water is primarily from material and components associate service lines and home plumbing. Our Water Association is responsible for providing high quality ing water, but cannot control the variety of materials used in plumbing components. When your has been sitting for several hours, you can minimize the potential for lead exposure by flushin tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned lead in your water, you may wish to have your water tested. Information on lead in drinking testing methods, and steps you can take to minimize exposure is available from the Safe D Water Hotline or at http://www.epa.gov/safewater/lead. The Mississippi State Department of Public Health Laboratory offers lead testing. Please contact (601)576-7582 if you wish to hav water tested.

All sources of drinking water are subject to potential contamination by substances that are na occurring or man made. These substances can be microbes, inorganic or organic chemicals a dioactive substances. All drinking water, including bottled water, may reasonably be expected to c at least small amounts of some contaminants. The presence of contaminants does not necessa dicate that the water poses a health risk. More information about contaminants and potential hea fects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hot 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general popu Immuno-compromised persons such as persons with cancer undergoing chemotherapy, person have undergone organ transplants, people with HIV/AIDs or other immune system disorders, elderly, and infants can be particularly at risk from infections. These people should seek advice drinking water from their health care providers. EPA/CDC guidelines on appropriate means to l the risk of infection by cryptosporidium and other microbiological contaminants are available fro Safe Drinking Water Hotline 1-800-426-4791.

The Neely Utilities, Inc. works around the clock to provide top quality water to every tap. We as all our customers help us protect our water sources, which are the heart of our community, our y life and our children's future.
