Expungement Clinic at Cameron Center

People who have suffered a setback because of their criminal record are invited to attend an expungement clinic from 10 a.m.-noon Saturday at the Cameron Center (711 N. 10th Ave.), Laurel. Many people who have been arrested and/or convicted of a misdemeanor or felony have been denied jobs, access to public housing or public benefits because of a criminal record. The clinic is an opportunity for them to learn more about the expungement process so that they can remove convictions from their records and move on. Participants should bring a valid I.D., a copy of their criminal record and an adjudication certificate.

GUNS

Continued from A1
Chief Stewart wanted to make it a high priority, sent officer Layne Bounds to the Laurel area, where they are being sought on the stolen from Laurel. One of the weapons was reported stolen from Ohio, where it is believed that an organization is stealing guns from residents and pawn shops, then ferrying them to the Laurel area, where they are being sought on the

2015 Annual Drinking Water Quality Report
Oak Grove Water Association
June 2015
PWS ID: 034011

We are pleased to present this year's Annual Water Quality Report. This report is designed to inform you about the quality of the water you receive from your public water system. Our goal is to provide you with a safe and dependable supply of drinking water every day. Our commitment is to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water comes from three (3) deep wells that draw water from the Claiborne Aquifer.

The water quality assessment has been completed for our public water system to determine the overall susceptibility of its distribution system to various natural sources of contamination. A report containing detailed information on how the susceptibility assessment was conducted and the results of the assessment is available for viewing upon request. The well water quality assessment has been completed for our public water system and is available for viewing upon request. The well water quality assessment has been completed for our public water system and is available for viewing upon request.

If you have any questions about this report or concerning your water utility, please contact Forest Robinson at 601-472-2555 or email forest@oakgrovewater.com. If you want to learn more, please call us at any of our scheduled meetings on the second Monday of the month at 7:00 p.m. at the Oak Grove Water Association well site.

We routinely monitor for constituents in your drinking water according to Federal and State laws. The table below lists all of the drinking water constituents that were detected during the period of January 1 to December 31, 2014. In cases where more than one constituent was detected, the table reflects the most recent results. As water travels over the surface of the land or through the ground, it picks up naturally occurring minerals and, in some cases, radioactive materials, and can pick up substances resulting from the presence of plants, animals, industry, agriculture, and other sources. Some of these substances, such as salts and metals, are not harmful to human health. Others, such as nitrates, nitrites, and pesticides, can be harmful to human health. Some of these substances, such as nitrates, nitrites, and pesticides, can be harmful to human health. Some of these substances, such as nitrates, nitrites, and pesticides, can be harmful to human health.

The table below will list many items and abbreviations with which you might not be familiar. To help you better understand these items, we've provided the following definitions:

As: Action level. The concentration of a constituent which, if exceeded, triggers treatment or other requirements which a water system must follow.

MCL: Maximum Contaminant Level. The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLG as feasible using the best available treatment technology.

MCLG: Maximum Contaminant Level Goal. The level of a contaminant in drinking water below which there is no known or expected risk to public health (for a range of pH).

MRDL: Maximum Residual Disinfectant Level. The highest level of a drinking water disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary to control microbial contaminants.

Pf: parts per million, or milligrams per liter (mg/L). One part per million corresponds to one minute in two years per a single penny in \$10,000,000.
