CCR CERTIFICATION
CALENDAR YEAR 2015

Carrollton Water System

Public Water Supply Name

080002 (D)

List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must mail, fax or email a copy of the CCR and Certification to MSDH. Please check all boxes that apply.**

Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*

- Advertisement in local paper (attach copy of advertisement)
 On water bills (attach copy of bill)
 Email message (MUST Email the message to the address below)
 Other _____

Date(s) customers were informed: 05 26 16 / / , / /

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____

Date Mailed/Distributed: ____ / ____ / ____

CCR was distributed by Email (MUST Email MSDH a copy)

Date Emailed: ____ / ____ / ____

- As a URL (Provide URL _____)
 As an attachment
 As text within the body of the email message

CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: The Conservative

Date Published: 05 26 16

CCR was posted in public places. *(Attach list of locations)*

Date Posted: ____ / ____ / ____

CCR was posted on a publicly accessible internet site at the following address (**DIRECT URL REQUIRED**):

CERTIFICATION

I hereby certify that the 2015 Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

Russell H. Wilson, Mayor

Name/Title (President, Mayor, Owner, etc.)

Annual Drinking Water Quality Report

Town of Carrollton

PWS ID: DO2556

July 1, 2016

RECEIVED-WATER SUPPLY

2016 JUN 28 AM 8: 2

We're pleased to provide to you this year's Annual Water Quality Report. We want to keep you informed about the quality of water and services we deliver to you every day. This year's report shows one deficiency. Our source water assessment is currently being conducted and is not available at this time. As soon as it is completed you will be notified and copies of this assessment will be provided.

We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source is ground water and our three wells draw from the Middle Wilcox aquifer. If you have any questions about this report or concerning your water utility, please contact Russell Wilson (662 237 4600) or Mr. Eli Shumaker (601504 5909). If you want to learn more, please attend any of our regularly sched-

uled meetings, held on the first Tuesday of each month at the Water Department in Carrollton.

The Town of Carrollton routinely monitors for contaminants in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period January 1st to December 31, 2015. As water travels over the land or underground, it can pick up substances or contaminants such as microbes, inorganic and organic chemicals and radioactive substances. All drinking water, including bottled drinking water, may be reasonable expected to contact at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

If present, elevated levels of lead can cause serious health problems; especially for pregnant women and young children. Lead in drinking water is primarily from materials and components

associated with service lines and home plumbing. Carrollton Water Association is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing for \$10.00 per sample. Please contact 601 576 7582 if you wish to have your water tested.

Thallium	N	2014	0.0005		0.002 ppm	MCL

All sources of drinking water subject to potential contamination by substances that are naturally occurring or manmade. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that lie water poses a health risk: More information about contaminants and potential health effects can be obtained b)calling the Environmental

Protection Agency's Safe Drinking Water hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population.

Immune-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune System disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health

care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium, and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791),

We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.

Please call our office if you have questions. Copies of this report are available at the Carrollton Water Department. Please call 662 237 4600 if you have any questions.
