Water Quality Report

2015

IS MY WATER SAFE ? Last year your tap water met all monitored U.S. Environmental Protection Agency (EPA) and state drinking water health standards. We vigilantly safeguard the water supply and we are proud to report that our system meets all monitored federal and state requirements.

REPORT AVAILABILITY This report is not mailed to the residents; however, it is published annually in the local paper and is also posted in the central office on the bulletin board for review.

DO I NEED TO TAKE SPECIAL PRECAUTIONS? Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Water Drinking Hotline (800-426-4791).

WHERE DOES MY WATER COME FROM? Our water comes from two wells over 200 feet deep, which draw ground water from the Sparta Sand Aquifer.

SOURCE WATER ASSESSMENT AND ITS AVAILABILITY. Our source water assessment has been completed by the Mississippi State Department of Health. The results of the report are available at:

<http://landandwater.deq.ms.gov/swap/reports/report.aspx?id=0170027>

The susceptibility ranking of each of our wells was Moderate

WHY ARE THERE CONTAMINANTS IN MY DRINKING WATER? Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

HOW CAN I GET INVOLVED? We encourage all customers who have any concerns or questions to contact our office.

OTHER INFORMATION: You may want additional information about your drinking water. You may contact our certified waterworks operator or you may prefer to log on to the Internet and obtain specific information about your system and its compliance history at the following address:

<http://www.msdh.state.us/watersupply/index.htm>

Information including current and past boil water notices, compliance and reporting violations, and other information pertaining to your water supply including "Why, When, and How to Boil Your Drinking Water" may be obtained.

Water Quality Data Table

The table below lists all of the drinking water contaminants that we detected during the calendar year of this report. The presence of contaminants in the water does not necessarily indicate that the water poses a health risk. Unless otherwise noted, the data presented in this table is from testing done in the calendar year of the report. The EPA or the State requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants do not change frequently.

Important Drinking Water Definitions:

ND: Non-Detects: Laboratory analysis indicates that the constituent is not present.

MCLG: Maximum Contaminant Level Goal: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

MCL: Maximum Contaminant Level: The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

AL: Action Level: The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Units Description:

NA: Not applicable

ND: Not detected

NR: Not reported

MNR: Monitoring not required, but recommended.

ppm: parts per million, or mg/l: milligrams per liter

ppb: parts per billion, or µg/l: micrograms per liter

Nitrates

Contaminant	MCL	Your Water
Sample Date	MCLG	Violation Y / N
Nitrate	10 ppm	< 0.08 ppm
01/26/2015		N
Nitrite	1 ppm	< 0.02 ppm
01/26/2015		N
Nitrate-Nitrite	10 ppm	< 0.1 ppm
01/26/2015		N

Cyanide

Contaminant	MCL	Your Water
Sample Date	MCLG	Violation Y / N
Cyanide	0.2 ppm	< 0.015 ppm
07/14/2014		N

During a sanitary survey conducted on June 6, 2011, the Mississippi State Department of Health cited the following significant deficiency(s):

Inadequate internal cleaning / maintenance of storage tanks.

Corrective Actions: MSDH is currently working with this system to return them to compliance since the expiration of the compliance deadline. It is anticipated we will be returned to compliance by June 30, 2016.
