Year Report 1997

EMS

Preface

Emergency Medical Services, Report 1997, is a continuation of the Division of Emergency Medical Services' ongoing assessment of Mississippi's emergency medical system. The annual Emergency Medical Services report captures EMS activities through a year in review chapter, an overview of the Mississippi EMS Operating Fund, and yearly run report and provider information. An addition to the report is a section pertaining to trauma, a rapidly expanding program within DEMS.

The Division of EMS dedicates performance to ensuring high quality EMS care for all Mississippians. Proper training and testing, inspections and surveillance for proper equipment and certified staff, and monitoring skills performed through the run reporting system contribute to that assurance. The data is used by many entities in Mississippi, as well as nationally. Mississippi's prehospital data collection system is one of the best in the country.

To use Emergency Medical Services, Report 1997, the reader should refer to —

- Chapter 1** Mississippi EMS — The Year in Review
- Chapter 2** Mississippi Emergency Medical Services Operating Fund
- Chapter 3** Providers of Mississippi EMS
- Chapter 4** Mississippi Emergency Medical Services Information System
- Chapter 5** Trauma — The Neglected Disease of Modern Society
- Chapter 6** County Information.

Chapter 1

The Year in Review

Mississippi EMS providers remained busy in FY 97. EMS services reported 328,831 calls received. The number of certified EMT-Intermediates and EMT-Paramedics increased while the number of certified EMT-Basics declined. The number of licensed ambulance services increased.

The EMS Operating Fund grantees received \$1,548,248 in FY 97, the largest percentage being used to purchase ambulance vehicles.

Other FY 97 milestones for Mississippi EMS include:

- The establishment of the Mississippi EMS Trauma Care Task Force by the 1997 Mississippi Legislature
- The adoption of Air Ambulance Regulations based on National Highway Traffic Safety Administration and American Medical Association Commission of EMS Air Ambulance Guidelines
- The participation in the revision of the National Standard Curriculum for the EMT-Paramedic
- Southwest Mississippi Regional Medical Center's EMT-Paramedic training program received full accreditation by the Joint Review Committee on the Accreditation of EMT-Paramedic Training Programs
- The development of prehospital patient care guidelines for EMT-Basic, EMT-Intermediate, and EMT-Paramedic
- The beginning of voluntary testing of First Responders for the National Registry of Emergency Medical Technicians
- The development of medical director qualifications and medical director responsibility agreements
- The review of the Mississippi EMS Law, Rules, and Regulations
- The submission of an application for an EMS for Children planning grant
- The purchase of the statewide license agreement for the State Trauma Registry System
- The expansion of the State Trauma Registry System into 7 new sites

The trauma program is the newest program in EMS. Trauma system development and coordination is a component of the national EMS model, as developed by the National Highway and Traffic Safety Administration. The establishment of the Trauma Care Task Force by the 1997 Mississippi Legislature furthered the development efforts of a statewide trauma care system. More detail on the Mississippi EMS Trauma Care Task Force can be found in Chapter 5.

Two organizations, the EMS Advisory Council and the Committee on Medical Direction, Training, and Quality Assurance, play major roles in the development and ongoing direction of Mississippi EMS. The EMS Advisory Council is composed of representatives from the following associations:

- American College of Emergency Physicians, Mississippi Chapter
- American College of Surgeons, Committee on Trauma
- Ambulance Service Operator (two members)
- County/Municipal government (three members)
- Mississippi Hospital Association (two members)
- Mississippi Medical Association
- Mississippi Nurses Association.

The Council has been responsible for developing and updating all EMS rules and regulations, interpreting many controversial matters, and reviewing federal and state grant requests. The Committee on Medical Direction, Training, and Quality Assurance, a subcommittee of the State Board of Health, has membership consisting of:

- Director of DEMS
- Medical Direction Central Mississippi
- Medical Direction Delta
- Medical Direction Gulf Coast
- Medical Direction North Mississippi
- Medical Direction South Mississippi
- State Medical Director.

This committee provides a forum for issues regarding medical control, training, and evaluation. Both organizations provide outstanding support to DEMS and the agency.

The Division of EMS is a public health program within the Bureau of Licensure, Mississippi State Department of Health. State level medical direction is provided by contract to allow for part-time consultation as needed. Legal services are provided by the Attorney General through an agency-assigned attorney. The DEMS staff currently consists of 20 full-time positions. The Director of EMS, appointed by the State Board of Health on recommendation of the State Health Officer, is responsible for the development and administration of the State EMS program and for the enforcement of rules and regulations promulgated pursuant to EMS legislation. The organizational structure of the DEMS allows maximum use of staff to achieve the primary goals through three division branches. An organizational chart specifying the functions of each branch is shown.

The EMS program is functionally organized in five major elements, each possessing its own set of objectives and all supporting the primary goal:

- Management and administration
- Operations (licensure and compliance)
- Planning, grants, and evaluation
- Regional and local assistance, and
- Training, testing, and certification.

Chapter 2

Emergency Medical Services Operating Fund

The Mississippi Emergency Medical Services Operating Fund (EMSOF) was established in 1982 through legislation that added \$5 to fines assessed statewide on hazardous moving traffic violations. The funds then are distributed per capita to eligible governmental units (cities, counties, EMS districts) for local level EMS support. DEMS has administered the EMSOF since its establishment.

DEMS makes disbursements annually upon request from each governmental unit. According to law, these distributions must be used *in addition* to existing annual emergency medical services budgets of the governmental units.

Collections in fiscal year 1996 totaled \$2,160,913. In fiscal year 1997 disbursements of \$1,716,270 were distributed to two EMS districts, 11 cities, and 58 counties ruled eligible.

EMSOF Disbursements

The criteria used for determining priority for local expenditures follow:

- Basic Life Support – To increase the availability and/or improve the quality of basic ambulance service as described in Sections 41-59-1 through 41-59-49 of the Mississippi Code of 1972 as amended
- Advanced Life Support – To increase the availability and/or improve the quality of advanced life support services as defined in Sections 41-60-11 through 49-60-13 of the Mississippi Code of 1972 as amended
- Regionalization – To support or increase support for the establishment, administration, and/or expansion of EMS districts as defined in Sections 41-59-51 through 41-59-59 of the Mississippi Code of 1972 as amended.

The total collections since 1983 are \$19,603,082; disbursements since 1984 are \$16,801,573. Use of the cumulative EMSOF disbursements are categorized below.

Item	Amount	Percent
Ambulances	\$6,374,809	.38
Escrow	\$2,429,273	.15
ALS Equipment	\$1,379,670	.9
Communications	\$1,353,185	.8
Personnel	\$1,198,943	.8
Training	\$1,149,859	.7
BLS Equipment	\$1,000,860	.6
Districts	\$998,857	.6
Support Services	\$916,177	.55

FY'97 utilization remained similar to previous years, with 53 percent of funds purchasing new ambulances or paying lease-purchase notes on ambulances. The year saw an increase in the use of EMSOF for support services, increasing from seven percent in FY'96.

Item	Amount	Percent
Ambulance	\$906,244	.53
Support Services	\$262,024	.15
Escrow	\$251,518	.15
ALS Equipment	\$125,289	.7
Communication	\$60,205	.4
Districts	\$42,842	.3
Training	\$38,956	.2
BLS Equipment	\$29,192	.2
Personnel	\$0	.0

Chapter 3

Providers of Mississippi EMS

Personnel certified by the Credentialing Branch of DEMS provide emergency medical care in Mississippi. DEMS is responsible for ensuring that quality emergency medical care is provided through coordination of training for all levels of emergency medical technician (EMT) and EMS-Driver (EMS-D) certification, which is required for drivers of ambulance vehicles. Training for the EMS-D includes classroom and vehicle operation.

Branch staff also test all EMT candidates and certify those who meet the required educational standards. DEMS uses the National Registry of Emergency Medical Technicians' (NREMT) examination system. All levels of EMTs in Mississippi must perform National Registry practical skills and pass a written examination to be certified. Mississippi adheres to the three national standard levels of training for the EMT:

- EMT-Basic (EMT-B)
- EMT-Intermediate (EMT-I)
- EMT-Paramedic (EMT-P).

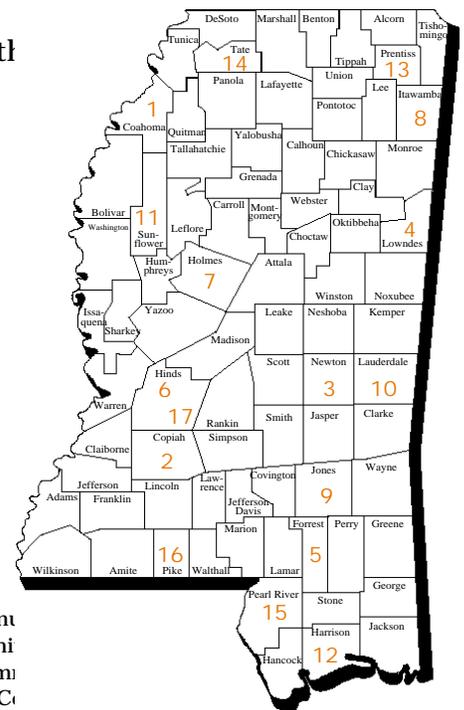

Numbers of certified personnel at each level in each county are listed in the county summaries.

Emergency Medical Technician – Basic

EMT-Basic (EMT-B) is the first level of training in the Emergency Medical Technician career structure. The course covers all techniques of basic life support and provides a solid foundation for care of injured or ill patients in the prehospital setting. The minimum classroom time for the EMT-Basic course is 110 hours. Each student must also document five emergency ambulance runs and 10 hours clinical training to complete the course.

With the cooperation of the Governor's Highway Safety Program, the Mississippi State Department of Health, the American College of Surgeons-Mississippi Committee on Trauma, and the Mississippi Chapter of the American College of Emergency Physicians, the Mississippi Vocational-Technical Education Division of the Department of Education offers the EMT-Basic training course through the Mississippi Community College system. Also, approved Advanced Life Support training programs are authorized to provide EMT-B training. In addition to national training standards, state guidelines assure standardization among all in-state EMT-B courses.

The map to the right indicates the location of educational instruction facilities for the EMT-Basic program.

- 16 – Southwest Community College
- 17 – University Medical Center

Compliance with Mississippi EMS Law, Rules, and Regulations

The compliance branch assures compliance with the state EMS Law, Rules, and Regulations. This includes the licensing of ambulance services and inspection of vehicles. The compliance branch licenses ambulance services by their level of care. The levels include:

- Invalid Transfer
- Basic Life Support (BLS)
- Advanced Life Support-Intermediate (ALS-Intermediate)
- Advanced Life Support-Paramedic (ALS-Paramedic).

The Invalid Transfer level offers:

- At minimum an EMS Driver
- Transportation of non-emergency patients.

The Basic Life Support (BLS) level offers:

- At minimum an EMS Driver and one EMT-Basic
- Transportation of emergency and non-emergency patients in prehospital and/or interfacility situations.

The Advanced Life Support-Intermediate (ALS-Intermediate) offers:

- At minimum an EMS Driver and one EMT-Intermediate
- Transportation of emergency and non-emergency patients in prehospital and/or interfacility situations
- Administration of basic fluids through intravenous lines
- Cardiac defibrillation and/or more aggressive airway management.

The Advanced Life Support-Paramedic (ALS-Paramedic) level offers:

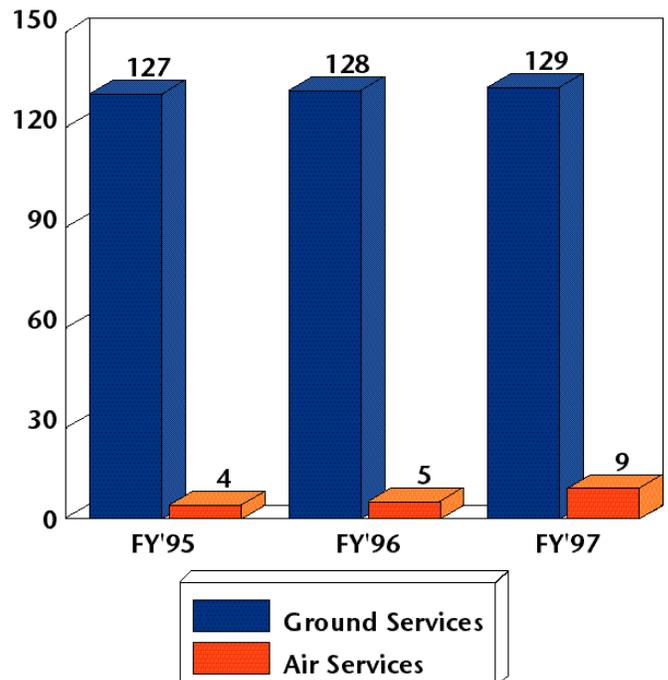

- At minimum an EMS Driver and one EMT-Paramedic
- Transportation of emergency and non-emergency patients in prehospital and/or interfacility situations
- Advanced airway management, cardiac monitoring, drug therapy and/or advanced techniques that exceed the level provided by an ALS-Intermediate service.

According to the 1990 Census, 89 percent of Mississippi's population has access to Advanced Life Support at either the Intermediate or Paramedic level. Listed in Chapter 6 are the levels of services provided in each county.

The compliance branch conducts surveillance activities and investigates complaints on ambulance services and individuals certified by the Division of Emergency Medical Services. In FY'97, staff devoted 210 manhours to ambulance surveillance, checking 155 vehicles. DEMS compliance staff also conducted 17 active investigations into ambulance service, EMT, hospital, and emergency service complaints.

Level of Ambulance Service Licensure in Mississippi

The compliance branch of the Division, under statutory authority of the Mississippi Annotated Code, licenses ambulance services by location and issues permits for each vehicle operated. Licenses are issued for ground or air ambulance services. The graph illustrates the number of licensed ambulance services for FY'95, FY'96, and FY'97. These numbers are represented as fiscal years (July 1 – June 30). After a slow decline, the number of services licensed has begun to rise.

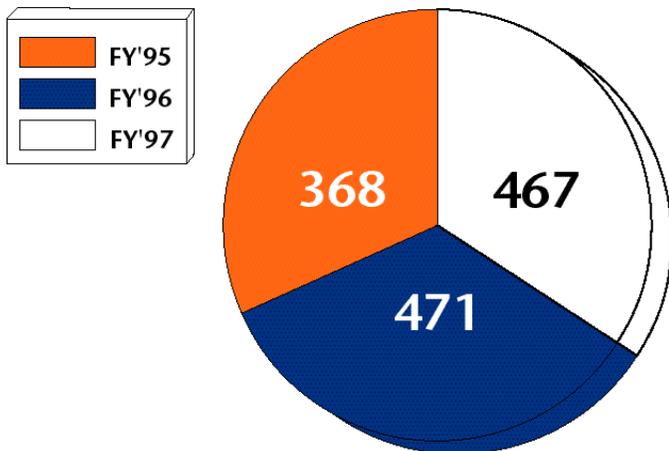

For the first time in Mississippi, commercial ambulance service ownership exceeds the number of hospital based ambulance services. This trend is congruent with the national trend towards privatization. However, 39 percent of Mississippi's EMS providers are still hospital based, which include public, private, non-profit, church, and public-lease hospitals.

Service Ownership

Commercial	.63
Hospital/Public	.39
Hospital/Public Lease	.9
Volunteer	.3
County	.9
City	.4
Fire Department	.4
Hospital/Proprietary	.4
Hospital/Non-Profit	.2
Hospital/Church	.1
Total Services	.138
Paramedic	.98
Basic Service	.23
Intermediate	.15
Invalid	.2
Total Services	.138

Every ambulance vehicle permitted in the State of Mississippi is inspected an average of four times annually to ensure compliance with EMS Law, Rules, and Regulations. The total number of ambulances permitted for the fiscal years 1995, 1996, and 1997 follow:

Included in this number are invalid vehicles, ground ambulances, air ambulances, intensive care, and special use vehicles. Additional privatization and consolidation prompted the slight decline in vehicles in FY'97.

Air Ambulance Service

Nine licensed providers offered air ambulance services in Mississippi for FY'97:

- American Medical Response Gulf Coast Division and Acadian Air Med, Baton Rouge, Louisiana
- American Medical Response Gulf Coast Division and Acadian Air Med, Lafayette, Louisiana
- AMR and Acadian, Alexandria, Louisiana
- Hospital Wing, Memphis, Tennessee
- North Mississippi Medical Center Ambulance Service, Tupelo, Mississippi
- Ochsner Flight Care, New Orleans, Louisiana
- Pafford Air One , Clarksdale, Mississippi
- Southeast Air Ambulance District, Hattiesburg, Mississippi
- University Medical Center — Aircare, Jackson.

Air service is provided through both helicopter and fixed-wing aircraft. Seven licensed helicopters provide emergency scene flights to designated areas of the state. But complete state coverage of emergency air ambulance service has not yet been accomplished. The ten helicopters and three fixed wing-aircraft also provide interfacility transfers in Mississippi. Non-emergency coverage is available statewide.

Ground Ambulance Service

Five types of ground ambulance vehicles transport patients in Mississippi:

- Type 1 ambulances are cab and chassis ambulances with separation between the cab and patient care box
- Type 2 ambulances are van type ambulances
- Type 3 ambulances are cab and chassis ambulances without partition between the cab and chassis
- Invalid vehicles are stretcher vans that may be Type 1, 2, or 3
- Special-use vehicles are supervisory or sprint cars permitted for emergency operation in connection with emergency medical service calls.

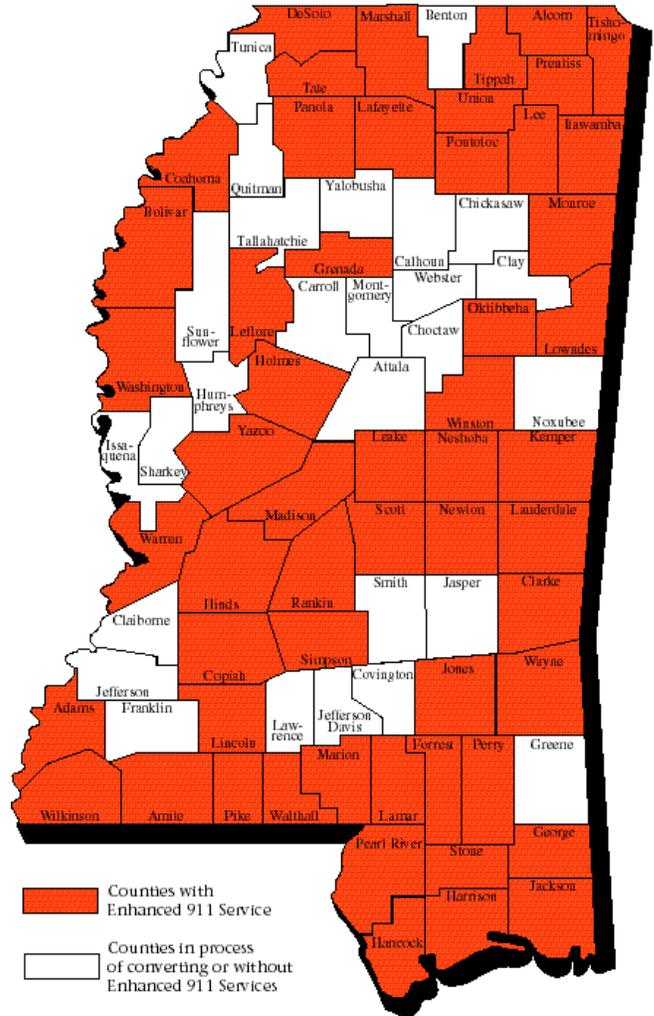

Included in the above types of ambulances are intensive care units which provide specialized services such as neonatal and cardiac transfers. Most ambulances, 66 percent, are the van Type 2 ambulances.

The ages of these vehicles range from brand-new to as old as 1978 models. But 45 percent of the Mississippi ground ambulance fleet is less than three years old and 63 percent is less than five years old.

911 Coverage

Communications is a vital part of the licensing process for an ambulance service. Many calls from the public for assistance are routed through the use of a 911 communication system.

Some enhanced 911 communication systems allow the operator to know who is calling and from what location. Even if the caller is disconnected before giving essential information, the operator can dispatch appropriate responders to the right location. In Mississippi, 55 of the 82 counties are covered, at least partially, under an enhanced 911 system.

Information from Bell South Telecommunications as of September 30, 1997.

Chapter 4

Mississippi Emergency Medical Services Information System

The current Mississippi Emergency Medical Services Information System (MEMSIS) has been in operation since 1992. Every licensed ambulance service is required by law to report all EMS calls to DEMS, either by scannable form or electronically. The information received is modeled after the National Highway Traffic Safety Administration minimum data set. This information is placed in EMSCAN, creating a prehospital database. Within this database is a wealth of information, provided upon request to interested parties.

In 1993, MEMSIS added EMS Data Systems CERTSCAN. CERTSCAN maintains databases on training, testing, certification, and ambulance service licensing. This system has enabled driver and emergency medical technician validation on ambulance responses reported to EMSCAN. The combination of the two systems enables DEMS to see what's happening in Mississippi EMS.

In FY'97, Mississippi providers responded to over 328,831 EMS calls. This number includes all emergency, non-emergency, and medical transfer calls. The responses were made by 129 ground and nine air ambulance services. Listed are the top 20 providers by call volume in FY'97. American Medical Response (AMR) holds three of the top five spots with a total of 66,606 in Hinds, Harrison and Jackson counties. This represents 20 percent of the total number of EMS calls for FY'97.

Service	County	FY'97 Calls
American Medical Response	Hinds	30,890
American Medical Response	Harrison	25,804
AAA	Forrest	13,624
American Medical Response	Jackson	9,912
North MS Medical Center	Lee	9,681
EMServ	Jones	7,813
Metro	Lauderdale	7,229
Rankin Medical Center	Rankin	6,950
Emergystat	Scott	6,699
Baptist Memorial Hospital		
Golden Triangle	Lowndes	6,295
Delta Regional Medical Center	Washington	6,081
Southwest Regional		
Medical Center	Pike	5,846
American Medical Response	Hancock	5,615
Magnolia EMS	Alcorn	5,508
Pafford Ambulance Service	Coahoma	4,989
Gieger Ambulance Service	Jones	4,834
American Medical Response	Adams	4,786
Bolivar County EMS	Bolivar	4,626
Amstat EMS	Leflore	4,527
Vicksburg Ambulance Service	Warren	4,514

From this call volume, 67 percent of EMS encounters resulted from methods of contact other than 911. Medical transfers, which constitute a large number of EMS calls, are initiated through direct contact with the EMS provider, not by using 911.

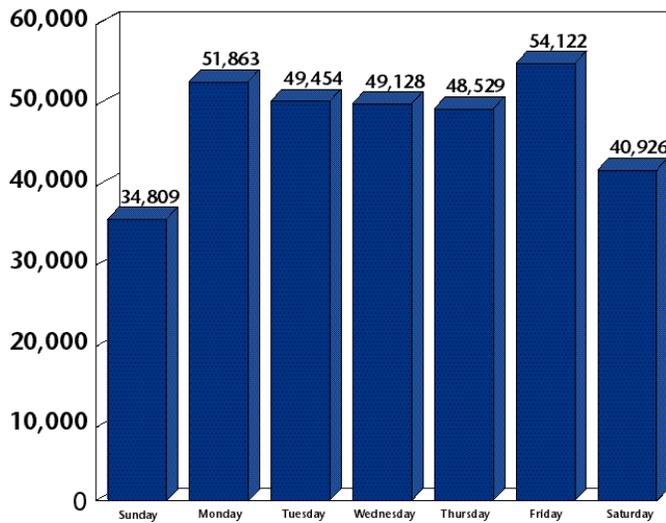

Age and gender statistics for patients encountered by EMS personnel in FY'97 are shown.

Age	Male	Female	Total
0<1	1,644	1,288	2,932
1-9	4,440	3,541	7,981
10-19	9,282	10,307	19,589
20-29	13,583	14,654	28,237
30-39	14,821	13,693	28,514
40-49	15,640	12,113	27,753
50-59	13,623	12,507	26,130
60-69	16,494	20,533	37,027
70-79	22,171	33,917	56,088
80-89	18,340	41,724	60,064
90-99	5,224	17,365	22,589

Fifty-six percent of all EMS patients encountered were white, 39 percent were black, four percent were not marked, while only one percent were Asian, American Indian, Hispanic, or Other.

As in previous years, the largest call volume occurred between the hours of 8 a.m. and 4 p.m.

The highest call volume occurred on Friday, with 16 percent of the total calls. A high percentage of EMS calls result from medical transfers between facilities and to-and-from home. Most of these transfers occur during the week, resulting in higher percentages on these days.

The average response times for each EMS time category are listed.

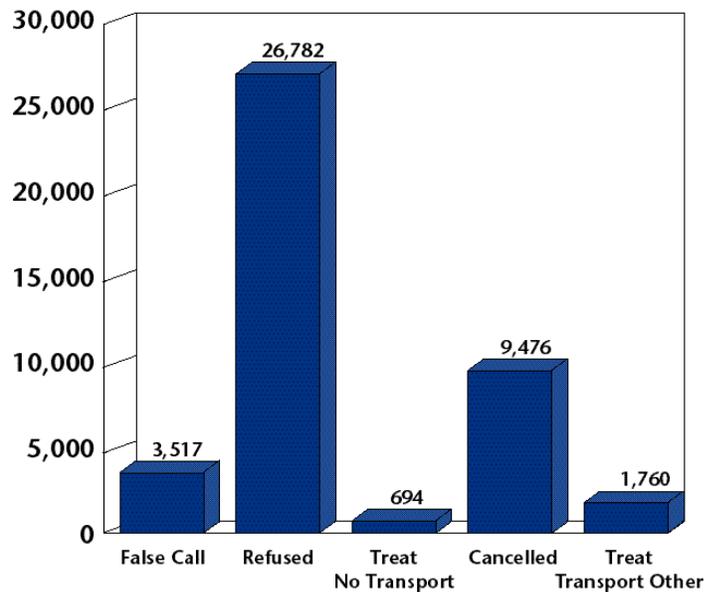

Time Category	Time (in minutes)
Call received until dispatch	.0
Dispatched until enroute	.0
Enroute until on location	.6
On scene time	.11
From scene to destination	.11
At destination until available	.10

The implementation of the 911 system has decreased response times between calls received, dispatched, and enroute. These all occur within seconds of one another. The longest times were spent on the scene and enroute to the final destination.

In FY'97, 35.6 percent of all incidences occurred in the patient's residence. Because of transfers made by EMS providers either between facilities or from the hospital after being discharged, the second largest group occurred in the hospital.

Location	Percent
Residence	35.6
Hospital	25.9
Convalescent Facility	11.3
State/Federal Highway	7.1
City Street	5.2
Clinic/Doctor Office	4.5
Recreational/Public Area	4.1
County Road	2.2
Other	1.6
Industrial/Farm	.5
Restaurant/Bar	.8
Not Entered	.7

Of the total number of calls received, 289,056 resulted in prehospital care being given by EMS personnel. This includes those patients transported by the EMS, by other means, or treated at the scene but not transported. Causes of no transport following an EMS call include:

Medical transfers are those made between acute care facilities, extended care facilities, doctors' offices and clinics, and patients' homes. Emergency calls are normally transported to a hospital or emergency department. In FY'97, 210,340 people were transported to a Mississippi emergency department or hospital by EMS providers. Listed below are the 10 hospitals receiving the largest number of patients.

Hospital	City	Received
University Medical Center	Jackson	10,996
North Mississippi Medical Center	Tupelo	10,397
Forrest General Hospital	Hattiesburg	9,845
Memorial Hospital	Gulfport	7,868
Mississippi Baptist Medical Center	Jackson	6,212
South Central Regional Medical Ctr.	Laurel	6,164
Methodist Hospital	Jackson	5,972
St. Dominic Memorial Hospital	Jackson	5,832
Delta Regional Medical Center	Greenville	5,306
Baptist Memorial Hospital		
DeSoto County	Southaven	4,710

Type of Call – Trauma

Calls received by EMS providers are considered to be either medical or trauma related. Trauma related calls occur when an injury results from a motor vehicle crash (MVC), motorcycle, pedestrian, waterway, gunshot, stab, assault, drowning, fall, or fire/burn.

EMS providers responded to 76,237 trauma calls in FY'97. Numbers and types of trauma calls received for FY'95, FY'96, and FY'97 are shown.

Type	FY'95	FY'96	FY'97
MVC	41,070	33,648	42,849
Fall	16,849	13,655	17,954
Assault	6,751	5,482	7,128
Other	3,446	4,080	5,205
DOA	2,424	2,198	2,597
Gunshot	2,181	1,439	1,722
Stabbing	1,631	1,416	1,379

Motor vehicle crashes (MVC) constituted 56 percent of all reported trauma calls in FY'97. Trauma calls in the Other category include motorcycle, pedestrian, waterway, drowning, fire/burn, hazardous materials, smoke inhalation, and mass casualty incidence (MCI) calls.

DEMS collects injury information by body region on all trauma calls. The head region received more than 15,000 injuries in FY'97, making it the leading injury site. In FY'97, over 64,000 separate injuries were recorded for the following body regions:

Type	Total
Head	15,148
Leg/Foot	12,265
Arm/Hand	12,206
Back	9,205
Neck	8,314
Face	7,110
Chest	6,209
Hip/Pelvis	5,876
Abdomen	2,798
Eye	1,293

The injuries recorded include:

Type	Total
Pain	33,312
Lacerations	11,167
Soft Tissue wounds	6,650
Fractures/Dislocations	5,385
Blunt wounds	5,027
Penetrating wounds	1,730
Burns	626
Amputations	133

Most of these are reported as obvious injuries to each body region. Internal injuries are difficult to determine in the prehospital setting; the patient, when complaining of pain to the affected area, is documented by EMS personnel with "pain" as the type of injury, making this category significantly higher than others. Lacerations to all of these areas are common in MVC's, making this injury numerous. After pain, fractures and dislocations - along with lacerations - are the most common injuries sustained to these areas.

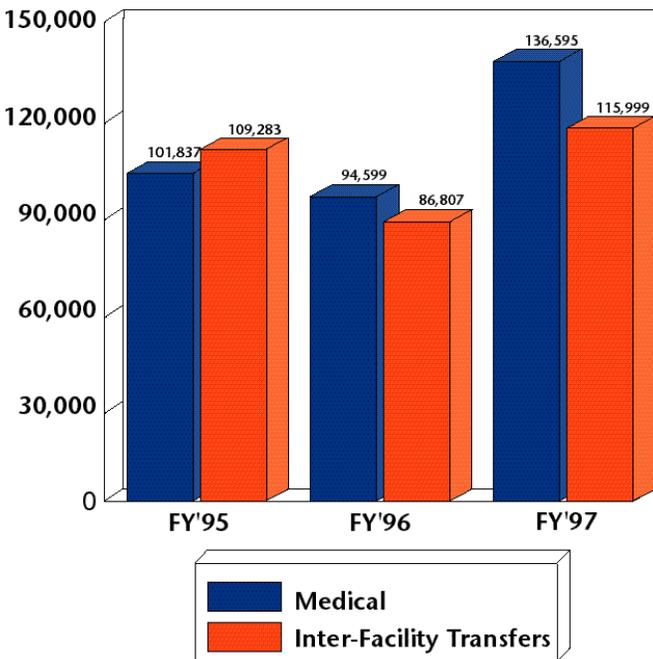

Over 35 percent of all incidences originated in private residences. The age group receiving the most care from EMS providers are those from 70 to 89. This group uses the growing area in EMS — medical transfers conducted between medical facilities and/or patients' homes. Medical transfers decreased one percent, with total medical calls decreasing seven percent. Trauma calls have also

increased over FY'96. Motor vehicle crash (MVC) related calls totaled 42,849 the largest group of trauma calls in FY'97. In those cases reported, 36 percent used no protective device. Protective devices used follow:

Device	Percent Used
Lap/Shoulder Belt	42
Lap Belt Only	4
Safety Seat	18
Helmet <i>(in accidents involving a motor vehicle and a motorcycle or bicycle)</i>	44
Air Bag	4
Shoulder Belt Only	1
Unknown	9

Type of Call - Medical

In the past, an ambulance was called for an emergency medical condition, such as a heart attack, or in the event of an accident causing a traumatic injury. Today, the growing area in EMS involves medical calls, more specifically medical transfers. The number of medical calls and interfacility transfers in FY'95, FY'96, and FY'97 follow:

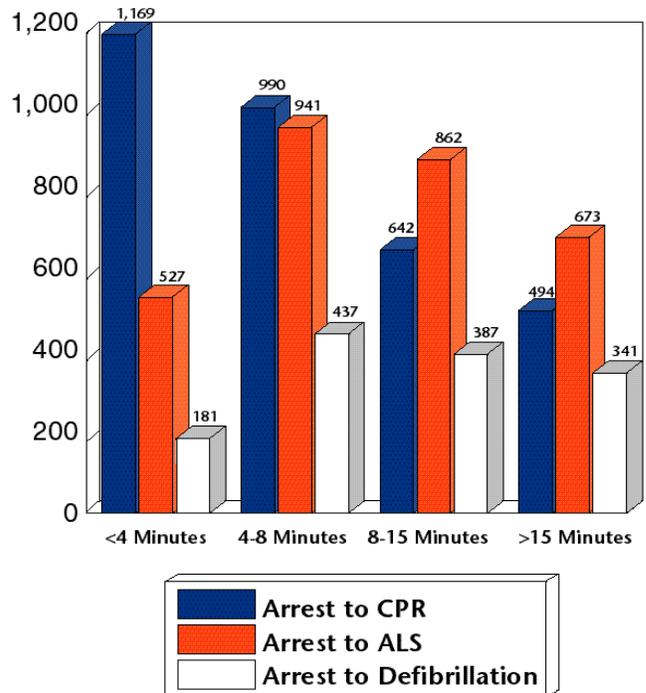

Illustrated are the illnesses and symptoms reported with the medical calls received in FY'97.

Reported	Percent
Weakness	40
Pain	11.1
Breathing Difficulty	9.8
Chest Pain	6.9
Seizure	3.7
Altered Level of Conscious	3.1
Stroke	2.2
OB	1.4
Syncope	2.6
Heart/Cardiac	1.9
Abdominal Distention	2.0
Diabetes	1.9
Cardiac Arrest	1.7
Drug/Alcohol	1.5
Other	10.2

Weakness constitutes 40 percent of the total symptoms and is commonly correlated with medical interfacility transfers, making it significantly larger.

In FY'97, CPR was conducted within four minutes after arrest in 1,169 cases, representing 28 percent of the total number of cardiac arrest incidents worked. This includes CPR performed by bystanders, fire and law enforcement personnel, etc., as well as EMS personnel. This chart illustrates cardiac arrest incidents versus intervention mechanisms in minutes.

Basic Life Support (BLS) procedures performed by EMS personnel involve the following:

Procedure	Amount	Percent
Airway	29,475	.9
Oxygen	97,392	.30
CPR	3,175	.1
Spinal Immobilization	35,763	.11
Splint Extremity	5,440	.2
Wound Management	12,853	.4
Other	35,514	.11
No BLS Procedure Done	183,853	.56

Of the total calls received, 56 percent recorded no BLS procedure performed. This percentage includes BLS skills performed but not recorded while done in conjunction with ALS procedures.

In FY'97, 293,938 opportunities for ALS intervention by ALS crews were received; 84 percent of these calls were performed under protocol established by medical control; 3 percent operated under verbal orders; 1 percent operated under written orders; 7 percent operated with no orders; and 0.2 percent operated under the orders given by an MD on the scene. Listed are the numbers and types of Advanced Life Support (ALS) procedures performed by EMS personnel.

Type	Number	Percent
Peripheral IV	50,654	.15
Intubation	2,806	.1
Blood Draw	12,667	.4
Cardiac Monitor	77,788	.24
Drug Administration	19,100	.6
Other	2,093	.1
No ALS Procedure Done	240,940	.82

Of the total calls received, 73 percent recorded no ALS procedure performed.

As shown below, 11 percent of all ALS procedures involved the administration of approved drugs. Those drugs administered and the number of times given are shown.

Medication	Administered
Aminophylline	.22
Atropine	2,292
Bretylol	.37
Bronchodilator	3,925
Decadron	.23
Demerol	.140
Dextrose 50%	2,089
Diazepam	.575
Epi (1:1000)	.335
Epi (1:10,000)	2,219
Furosemide	1,208
Isuprel	.2
Lidocaine	.905
Mannitol	.12
Morphine	1,061
Naloxone	.555
Nifedipine	.127
Nitro	.6,441
Oxytocin	.3
Procainamide	.13
Sodium Bicarb	425
Thiamine	.219
Total Administered	26,448
Vasopressor	.108
Other	3,712
No Medication Given	309,731

Chapter 5

Trauma — The Neglected Disease of Modern Society

In 1966, the National Research Council labeled trauma as “the neglected disease of modern society.” Almost 20 years later (1985), the book *Injury in America: A Continuing Public Health Problem* confirmed that little progress had been made and that “the neglected disease” remained neglected. Numerous published trauma death studies have demonstrated that as much as one third of trauma deaths occurring in areas without organized trauma care systems were preventable. The American College of Surgeons developed criteria for the designation of trauma centers and the establishment of trauma systems. States and regions of states that have adopted these criteria or similar trauma care standards have experienced a dramatic reduction in the percentage of preventable deaths.

The disease category trauma represents 25 percent of prehospital responses made by Mississippi EMS services. Trauma system development in Mississippi began with the passage of legislation, an amendment to the Mississippi EMS Act of 1974, in the 1991 legislative session. The legislation designated the Division of Emergency Medical Services as lead agency for trauma systems development and mandated the development of a trauma care plan. This plan was written and approved by the Mississippi State Department of Health, Mississippi EMS Advisory Council, and numerous health care organizations and associations.

With this designation came the authority to act as a centralized clearinghouse for data collected on major trauma cases. Those patients admitted into the trauma registry meet criteria developed by the American College of Surgeons. In 1993, the state purchased a State Trauma Registry from Cales and Associates. Along with this came the licensure to the State Registry’s counterpart, Cales’s Hospital Trauma Registry (HTR). A pilot test for the data collection took place at Singing River Hospital in Pascagoula.

Since then, the HTR has been placed in five regional trauma centers throughout the state. These hospitals include:

- Forrest General Hospital
- Greenwood-Leflore County Hospital
- North Mississippi Regional Medical Center
- Singing River Hospital
- University of Mississippi Medical Center.

In 1997, DEMS purchased the statewide license agreement from Cales and Associates that made the Hospital Trauma Registry available to any Mississippi hospital wanting to participate in the State Trauma Registry System. The registry was installed in 7 additional hospitals. They will begin reporting during FY'98. This expansion will provide a stable foundation for the development of a statewide trauma system.

The 1997 Legislature created the Mississippi EMS Trauma Care Task Force to research the status of trauma and its significance in the state. The membership of the task force is as follows:

- The Director of the Division of Emergency Medical Services
- Representative from each of the five original trauma registry hospitals
- Physician appointed by the Mississippi Chapter of the American College of Surgeons
- Physician appointed by the Mississippi Chapter of the American College of Emergency Physicians
- Emergency Medical Technician appointed by the State Department of Health
- Registered Nurse appointed by the State Department of Health
- Two members of the House of Representatives
- Two members of the Senate
- Representative of the Mississippi Hospital Association
- Member of the Governor's staff
- Victim of trauma appointed by the Governor.

The task force focused on three developmental areas for the implementation of a statewide trauma system. These are:

- Prevention and public awareness
- Financial support and legislative authority
- Prehospital and hospital standards of trauma care.

The recommendations of the TCTF will be formalized into a report that is due to the Governor and Legislature on December 15, 1997. From this report, legislation will be drafted for the 1998 Legislative session.

The FY'97 State Trauma Registry report is produced separately as an appendix to the EMS report.

Chapter 6

County Information

The following pages provide information on a county by county basis. Listed are the providers of emergency medical care, both ground and air services, and the level and type each service provides, and the number of

certified EMTs at each level living in each county. EMSOF grant money is based on population. The disbursements, collections, recipients, and uses of EMSOF money are provided.
