

Preface

Emergency Medical Services, Report 2001, is a continuation of the Division of Emergency Medical Services' ongoing assessment of Mississippi's emergency medical system. The Emergency Medical Services Annual Report captures EMS activities through a year in review chapter, an overview of the Mississippi EMS Operating Fund, and a yearly run report and provider information. An addition to the report is a section pertaining to trauma, a rapidly expanding program within DEMS.

The Division of EMS dedicates performance to ensuring high quality EMS care for all Mississippians. Proper training and testing, inspections and surveillance for proper equipment and certified staff, and monitoring skills performed through the run reporting system contribute to that assurance. The data is used by many entities in Mississippi, as well as nationally. Mississippi's prehospital data collection system is one of the best in the country.

To use Emergency Medical Services, Annual Report 2001, the reader should refer to —

- Chapter 1** Mississippi Emergency Medical Services Operating Fund

- Chapter 3** Mississippi Emergency Medical Services Information System
- Chapter 4** Mississippi Trauma Care System
- Chapter 5** Emergency Medical Services for Children
- Chapter 6** County Information

Chapter 1

Emergency Medical Services Operating Fund

The Mississippi Emergency Medical Services Operating Fund (EMSOF) was established in 1982 through legislation that added \$5 to fines assessed statewide on hazardous moving traffic violations. The funds are then distributed per capita to eligible governmental units (cities, counties, EMS districts) for local level EMS support. DEMS has administered the EMSOF since its establishment.

DEMS makes disbursements annually upon request from each governmental unit. According to law, these distributions must be used *in addition* to existing annual emergency medical services budgets of the governmental units.

Collections in fiscal year 2001 totaled \$2,014,725 and disbursements of \$1,001,663 were distributed to one EMS district, 7 cities, and 62 counties ruled eligible.

EMSOF Disbursements

The criteria used for determining priority for local expenditures follow:

- Basic Life Support – To increase the availability and/or improve the quality of basic ambulance service as described in Sections 41-59-1 through 41-59-49 of the Mississippi Code of 1972 as amended.
- Advanced Life Support – To increase the availability and/or improve the quality of advanced life support services as defined in Sections 41-60-11 through 49-60-13 of the Mississippi Code of 1972 as amended.
- Regionalization – To support or increase support for the establishment, administration, and/or expansion of EMS districts as defined in Sections 41-59-51 through 41-59-59 of the Mississippi Code of 1972 as amended.

The total collections since 1983 are \$23,385,697; disbursements since 1984 are \$20,814,793. Use of the cumulative EMSOF disbursements are categorized below.

Item	Amount	Percent
Ambulances	\$7,724,297	.38
Escrow	\$2,751,702	.13
ALS Equipment	\$2,066,751	.9
Communications	\$1,560,895	.8
Personnel	\$1,244,936	.6
Training	\$1,277,316	.6
BLS Equipment	\$1,037,151	.5
Districts	\$1,061,521	.5
Support Services	\$1,777,056	.10

FY'01 utilization remained similar to previous years, with 34 percent of funds purchasing new ambulances or paying lease-purchase notes on ambulances.

Item	Amount	Percent
Ambulance	\$345,501	.34
Support Services	\$158,306	.16
Escrow	\$86,090	.9
ALS Equipment	\$290,256	.29
Communication	\$50,568	.5
Districts	\$18,295	.2
Training	\$52,645	.6

Chapter 2

Providers Of Mississippi EMS

Personnel certified by the Credentialing Branch of DEMS provide emergency medical care in Mississippi. DEMS is responsible for ensuring that quality emergency medical care is provided through coordination of training for all levels of emergency medical technician (EMT) and EMS-Driver (EMS-D) certification, which is required for drivers of ambulance vehicles. Training for the EMS-D includes classroom and vehicle operation.

Branch staff also test all EMT candidates and certify those who meet the required educational standards. DEMS uses the National Registry of Emergency Medical Technicians' (NREMT) examination system. All levels of EMTs in Mississippi must perform National Registry practical skills and pass a written examination to be certified. Mississippi adheres to the three national standard levels of training for the EMT:

- EMT-Basic (EMT-B)
- EMT-Intermediate (EMT-I)
- EMT-Paramedic (EMT-P).

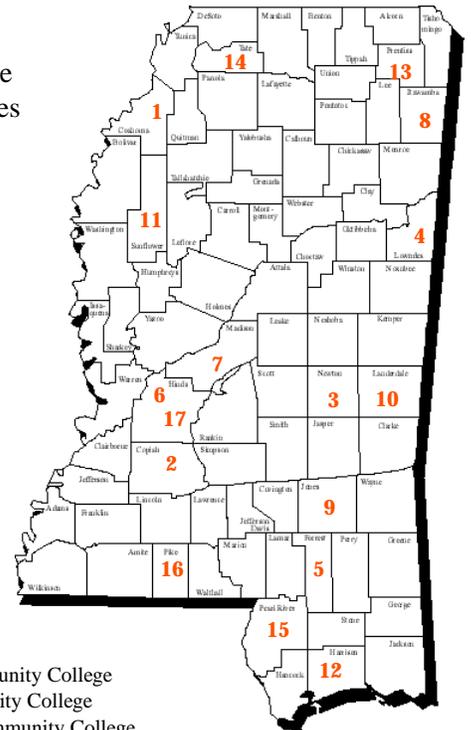

Numbers of certified personnel at each level in each county are listed in the county summaries.

Emergency Medical Technician – Basic

EMT-Basic (EMT-B) is the first level of training in the Emergency Medical Technician career structure. The course covers all techniques of basic life support and provides a solid foundation for care of injured or ill patients in the prehospital setting. The minimum classroom time for the EMT-Basic course is 110 hours. Each student must also document five emergency ambulance runs and 10 hours clinical training to complete the course.

With the cooperation of the Governor's Highway Safety Program, the Mississippi State Department of Health, the American College of Surgeons-Mississippi Committee on Trauma, and the Mississippi Chapter of the American College of Emergency Physicians, the Mississippi Vocational-Technical Education Division of the Department of Education offers the EMT-Basic training course through the Mississippi Community College system. Also, approved Advanced Life Support training programs are authorized to provide EMT-B training. In addition to national training standards, state guidelines assure standardization among all in-state EMT-B courses.

The map to the right indicates the location of educational instruction facilities for the EMT-Basic program.

- 1 – Coahoma Community College
- 2 – Co-Lin Community College
- 3 – East Central Community College
- 4 – East Mississippi Community College
- 5 – Forrest General Hospital
- 6 – Hinds Community College
- 7 – Holmes Community College
- 8 – Itawamba Community College
- 9 – Jones County Junior College
- 10 – Meridian Community College
- 11 – Mississippi Delta Community College
- 12 – Mississippi Gulf Coast Community College
- 13 – Northeast Community College
- 14 – Northwest Community College
- 15 – Pearl River Community College
- 16 – Southwest Community College
- 17 – University Medical Center

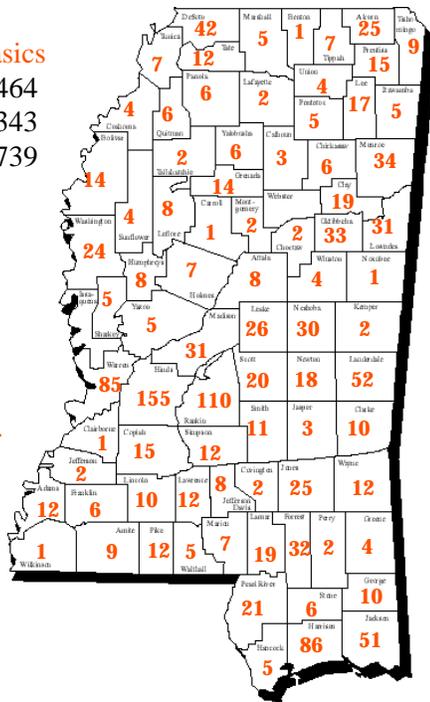

Most Mississippi community colleges offer EMT-Basic courses within their college district boundaries via satellite campuses.

In FY'01, 54 separate courses were provided through the community college system in Mississippi, resulting in 506 individuals completing the course. Upon completion of an approved EMT course and verification of competence in each of the required practical skill areas, students may apply to take the National Registry examination, which is given four times a year. In FY'01, 462 exams were administered with 240 passing scores of 70 percent or greater — a pass rate of 52 percent.

The number of certified EMT-Bs in Mississippi is shown.

Year	Basics
FY'99	1,464
FY'00	1,343
FY'01	1,739

Emergency Medical Technician — Basic

The Invalid Transfer level offers:

- At minimum an EMS Driver
- Transportation of non-emergency patients.

The Basic Life Support (BLS) level offers:

- At minimum an EMS Driver and one EMT-Basic
- Transportation of emergency and non-emergency patients in prehospital and/or interfacility situations.

The Advanced Life Support-Intermediate (ALS-Intermediate) offers:

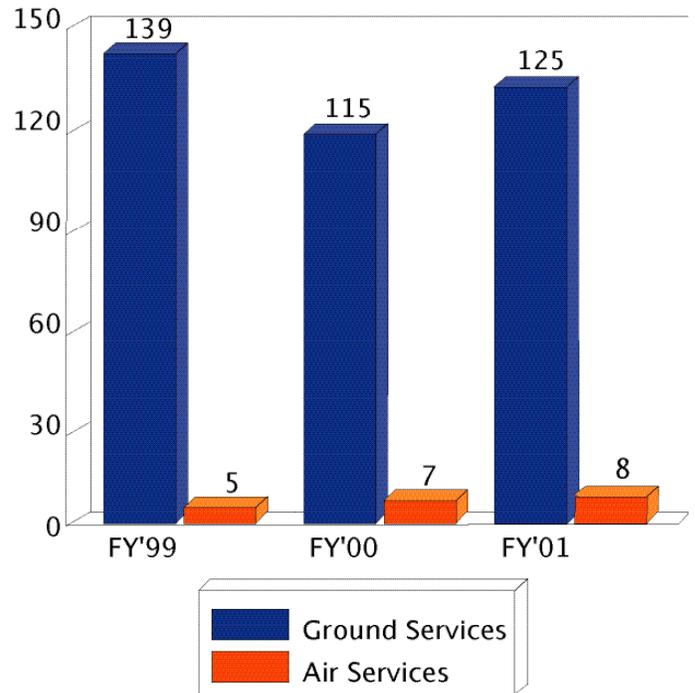

- At minimum an EMS Driver and one EMT-Intermediate
- Transportation of emergency and non-emergency patients in prehospital and/or interfacility situations
- Administration of basic fluids through intravenous lines
- Cardiac defibrillation and/or more aggressive airway management.

The Advanced Life Support-Paramedic (ALS-Paramedic) level offers:

- At minimum an EMS Driver and one EMT-Paramedic
- Transportation of emergency and non-emergency patients in prehospital and/or interfacility situations
- Advanced airway management, cardiac monitoring, drug therapy and/or advanced techniques that exceed the level provided by an ALS-Intermediate service.

Level of Ambulance Service Licensure in Mississippi

The compliance branch of the Division, under statutory authority of the Mississippi Annotated Code, licenses ambulance services by location and issues permits for each vehicle operated. Licenses are issued for ground or air ambulance services. The graph illustrates the number of licensed ambulance services for FY'99, FY '00 and FY'01. These numbers are represented as fiscal years (July 1 – June 30).

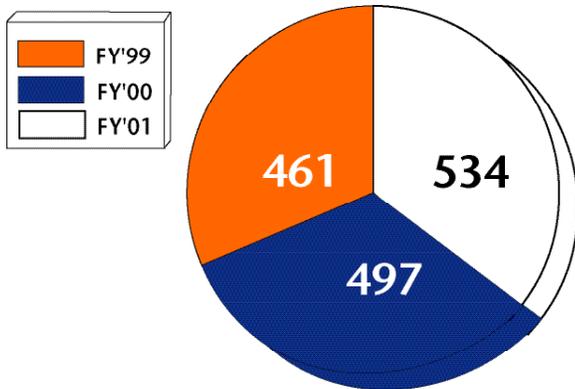

In Mississippi, corporate ambulance service ownership exceeds the number of hospital and government owned ambulance services. This trend is similar to the national trend towards privatization. However, 51 of Mississippi's EMS providers are still hospital based, which include public, private, non-profit, church, and public-lease hospitals.

Service Ownership

Corporation	.66
Hospital	.51
Volunteer	.3
Government	.13
Total Services	.96

Paramedic	.72
Basic Service	.10
Intermediate	.2
Invalid	.3
Critical Care Life Support-Air	.3
Total Services	.90

Every ambulance vehicle permitted in the State of Mississippi is inspected an average of four times annually to ensure compliance with EMS Law, Rules, and Regulations. The total number of ambulances permitted for the fiscal years 1999, 2000 and 2001 follow:

Included in this number are invalid vehicles, ground ambulances, air ambulances, intensive care, and special use vehicles.

Air Ambulance Service

Eight licensed providers offered air ambulance services in Mississippi for FY'01

- Acadian Air Medical Services, Lafayette, Louisiana
- Air Evac Lifeteam, Jackson, Tennessee
- Hospital Wing, Memphis, Tennessee
- North Mississippi Medical Center Ambulance Service, Tupelo, Mississippi
- Ochsner Flight Care, New Orleans, Louisiana
- Southeast Air Ambulance District, Hattiesburg, Mississippi
- University Medical Center — Aircare, Jackson, Mississippi
- Critical Care Transport, Birmingham, Alabama

Air service is provided through helicopter and fixed wing aircraft. Seven licensed helicopter services provide emergency scene flights to designated areas of the state. Complete state coverage of emergency air ambulance service has not yet been accomplished. Non-emergency coverage is available statewide through 11 helicopter and two fixed-wing aircraft.

Ground Ambulance Services

Five types of ground ambulance vehicles transport patients in Mississippi:

- Type 1 ambulances are cab and chassis ambulances with separation between the cab and patient care box
- Type 2 ambulances are van type ambulances
- Type 3 ambulances are cab and chassis ambulances without partition between the cab and chassis
- Invalid vehicles are stretcher vans that may be Type 1, 2, or 3
- Special-use vehicles are supervisory or sprint cars permitted for emergency operation in connection with emergency medical service calls.

Included in the above types of ambulances are intensive care units which provide specialized services such as neonatal and cardiac transfers. Most ambulances are the van Type 2 ambulances.

Chapter 3

Mississippi Emergency Medical Services Information System

Mississippi established the first Mississippi EMS Information System (MEMSIS) in 1992. Every licensed ambulance service was required by law to report every EMS response to the Division of EMS (DEMS), either by scannable form or electronically. This data collection system was modeled after the National Highway Traffic Safety Administration's (NHTSA) minimum data set for prehospital providers. In 1993, DEMS added the second component to MEMSIS. This second component maintained information on testing, certification, and ambulance licensing.

In FY'01, DEMS began the implementation of the new MEMSIS. The new MEMSIS is a paperless patient encounter form system. Software is provided by DEMS to all licensed ambulance services. EMS encounter information is entered into the computer locally, and is then transmitted to the state via a modem. The new system minimizes errors and shortens time frames of when information is available to fill report requests. It also allows DEMS to collect a larger amount of data, which gives a better picture of EMS care in Mississippi.

The implementation of MEMSIS began with beta testing that was conducted by American Medical Response-South and Kings Daughters Medical Center Ambulance Service. Concurrently, DEMS upgraded the certification portion of MEMSIS internally. In May, 2000, deployment of the new software began. As of July 1, 2001, all providers are required to submit data utilizing the new system.

The new MEMSIS has several significant changes. Previously, there were two types of calls, medical and trauma, with interfacility transfers documented as medical-calls. Now MEMSIS recognizes four types of calls, medical, trauma, transfers, (which are only between acute care facilities), and transports.

In FY'01, data was collected in both the old scannable form system and the new electronic system. For the purposes of this report, the data from both systems was

integrated as much as possible. However, discrepancies may be apparent, but will be resolved by FY'02, when all providers will be online with the new system.

In FY'01, Mississippi providers responded to 313,402 EMS calls. This number includes all emergency, non-emergency, medical transfer, and cancelled calls. The responses were made by 125 ground and eight air ambulance services.

Age and gender statistics for patients encountered by EMS personnel in FY'01 are shown.

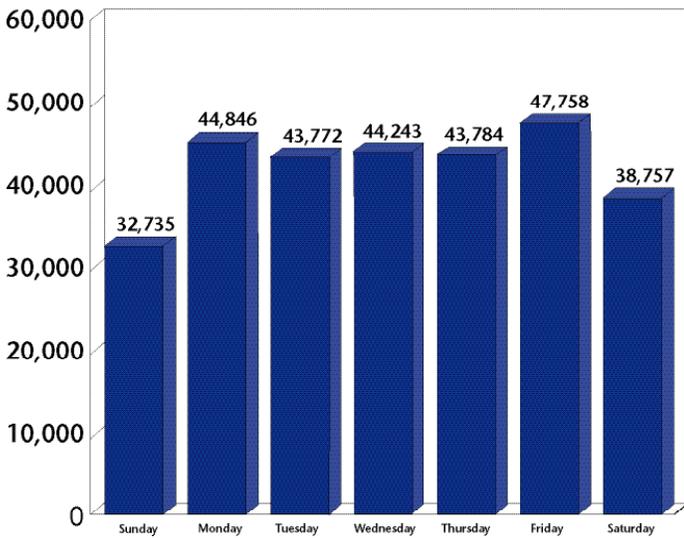

Age	Male	Female	Total
0-1	1,645	1,360	3,008
1-4	2,799	2,071	4,887
5-9	1,923	1,538	3,465
10-14	2,351	2,400	4,756
15-19	6,409	8,078	14,502
20-24	6,900	8,333	15,253
25-29	6,036	6,645	12,696
30-34	6,090	6,657	12,759
35-39	7,640	7,003	14,659
40-44	8,541	7,534	16,089
45-49	8,173	7,421	15,613
50-54	8,079	7,209	15,299
55-59	8,404	7,355	15,769
60-64	7,160	7,227	14,393
65-69	8,665	9,649	18,352
70-74	9,928	12,942	22,886
75-79	10,740	15,448	26,213
80-84	9,114	17,035	26,177
85-89	6,257	16,239	22,508
90-94	2,745	10,023	12,770
95+	1,216	4,702	6,033

Total calls received for FY'01 was 313,402.

Fifty-four percent of all EMS patients encountered were white, 40 percent were black, six percent were Asian, American Indian, Hispanic, or Other.

As in previous years, over 50 percent occurred between the hours of 8 a.m. and 4 p.m.

The highest call volume occurred on Friday, with 16 percent of the total calls. A high percentage of EMS calls result from medical transfers between facilities and to-and-from home. Most of these transfers occur during the week, resulting in higher percentages on these days.

The average response times for each EMS time category are listed.

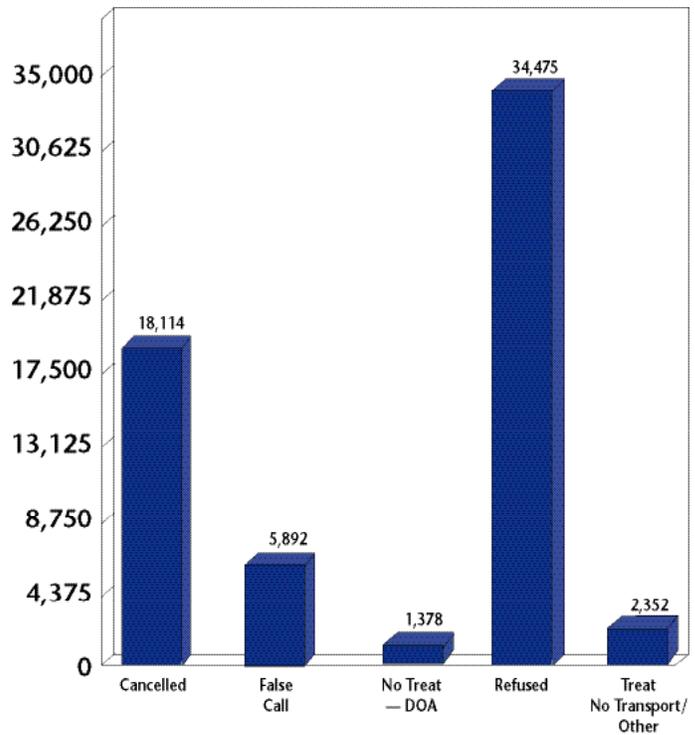

Time Category	Time (in minutes)
Call received until dispatch	.0
Dispatched until enroute	.0
Enroute until on location	.15
On scene time	.16
From scene to destination	.26
At destination until available	.10
Median Time Per Call	.67

The implementation of the 911 system has decreased response times between calls received, dispatched, and enroute. These all occur within seconds of one another. The longest times were spent on the scene and enroute to the final destination.

In FY'01, 37 percent of all incidents occurred in the patient's residence. Because of transfers made by EMS providers either between facilities or from the hospital after being discharged, the second largest group occurred in the hospital.

Location	Percent
Residence	37
Hospital	23
Convalescent Facility	10
State/Federal Highway	7
City Street	6
Recreational/Public Area	5
Clinic/Doctor Office	4
County Road	3
Industrial/Farm	1
Restaurant/Bar	1
Other	3

Of the total number of calls received, 313,402 resulted in prehospital care being given by EMS personnel. This includes those patients transported by the EMS, by other means, or treated at the scene but not transported. Causes of no transport following an EMS call include:

Medical transfers are those made between acute care facilities, extended care facilities, doctors' offices and clinics, and patients' homes. Emergency calls are normally transported to a hospital or emergency department. In FY'01, 205,700 people were transported to a Mississippi emergency department or hospital by EMS providers. Over 7,000 Mississippi patients were transported to Tennessee hospitals. Listed below are the 10 Mississippi hospitals receiving the largest number of patients.

Hospital	City	Received
University Medical Center	Jackson	14,375
North Mississippi Medical Center	Tupelo	11,707
Forrest General Hospital	Hattiesburg	9,830
Memorial Hospital	Gulfport	7,703
Mississippi Baptist Medical Center	Jackson	6,483
St. Dominic Memorial Hospital	Jackson	6,061
South Central Regional Medical Center	Laurel	5,297
Central Mississippi Medical Center	Jackson	4,926
Baptist Memorial Hospital DeSoto County	Southaven	4,845
Delta Regional Medical Center	Greenville	4,494

Type of Call – Trauma

EMS providers responded to 83,347 trauma calls in FY'01. Numbers and types of trauma calls received for FY'99, FY'00, and FY'01 are shown.

Type	FY'99	FY'00	FY'01
MVC	46,535	47,371	39,647
Fall	18,210	18,311	16,055
Assault	7,922	7,802	6,839
Gunshot	1,533	1,441	1,052
Stabbing	1,298	1,174	1,033
Other	3,633	7,332	6,464

Motor vehicle crashes (MVC) constituted over 56 percent of all reported trauma calls in FY'01. Trauma calls in the Other category include motorcycle, bicycle, pedestrian, waterway, fire/burn, hazardous materials, mass casualty incidents, ATV incidents, farm/agriculture and industrial incidents.

EMS collects injury information by body region on all trauma calls. The head region received more than 17,000 injuries in FY'01, making it the leading injury site. In FY'01, over 83,000 separate injuries were recorded for the following body regions.

Type	Total
Head	16,949
Arm/Hand	13,752
Leg/Foot	12,433
Back	8,853
Face	8,183
Neck	7,549
Hip/Pelvis	5,613
Chest	5,412
Abdomen	3,072
Eye	1,531

The injuries recorded include:

Type	Total
Pain	48,675
Lacerations	11,384
Soft Tissue wounds	8,842
Blunt trauma	6,114
Fractures/Dislocations	4,902
Penetrating wounds	1,725
Burns	1,548
Amputations	157

Most of these are reported as obvious injuries to each body region. Internal injuries are difficult to determine in the prehospital setting; the patient, when complaining of pain to the affected area, is documented by EMS personnel with "pain" as the type of injury, making this category significantly higher than others. Lacerations to all of these areas are common in MVC's, making this injury numerous. After pain, soft tissue wounds - along with lacerations - are the most common injuries sustained to these areas.

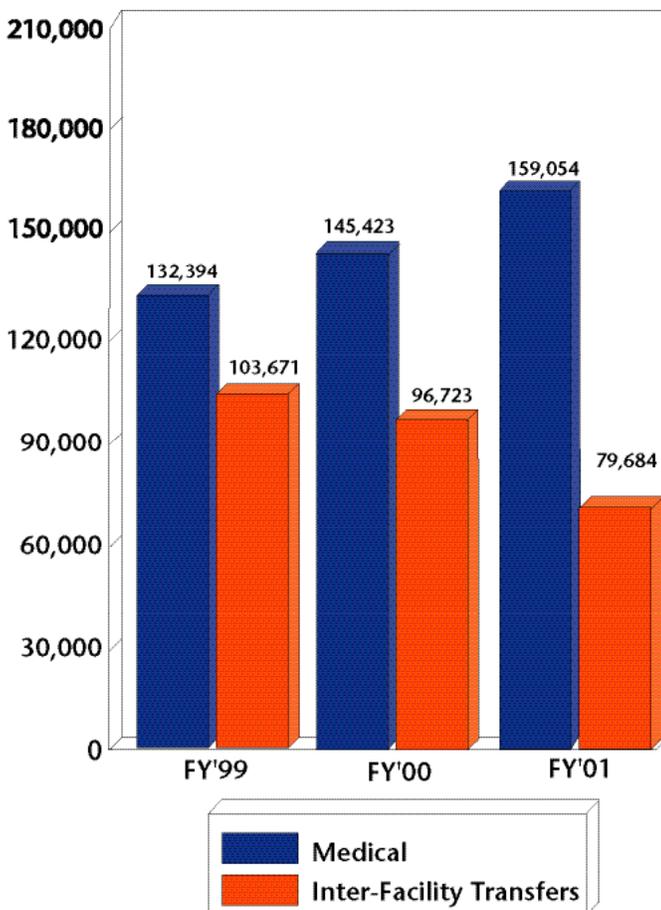

Over 36 percent of all incidents originated in private residences. The age group receiving the most care from EMS providers are those from 70 to 89. This group uses the growing area in EMS — medical transfers conducted between medical facilities and/or patients' homes. Medical transfers decreased seven percent, with total medical calls decreasing ten percent. Trauma calls have also decreased over FY'01. Motor vehicle crash (MVC) related calls totaled 39,647, the

largest group of trauma calls in FY'01. In those cases reported, 25 percent used no protective device, also a decrease. Protective devices used follow:

Device	Percent Used
Lap Belt Only	.54 %
Safety Seat	.2 %
Air Bag	.7 %
Shoulder Belt Only	.53 %
Unknown	.9 %
Automatic	.1 %

Type of Call – Medical

In the past, an ambulance was called for an emergency medical condition, such as a heart attack, or in the event of an accident causing a traumatic injury. Today, the growing area in EMS involves medical calls, more specifically medical transfers. The number of medical calls and interfacility transfers in FY'98, FY'99, and FY'00 follow:

Illustrated are the illnesses and symptoms reported with the medical calls received in FY'00.

Reported	Percent
Weakness	.28.5
Breathing Difficulty	.11.9
Pain	.11.5
Chest Pain	.8.2
Altered Level of Conscious	.5.5
Seizure	.4.4
Behavioral	.3.1
Abdominal Distress	.2.9
Syncope	.2.9
Diabetic	.2.7
Other	.2.6
Vomiting	.2.6
Nausea	.2.3
Heart/Cardiac	.2.2
Cardiac Arrest	.2.0
Stroke	.1.9
Fever	.1.7
Drug/Alcohol	.1.6
OB	.1.4

Weakness constitutes nearly 29 percent of the total symptoms and is commonly correlated with medical interfacility transfers, making it significantly larger.

Basic Life Support (BLS) procedures performed by EMS personnel involve the following:

Procedure	Amount	Percent of Total Calls
Oxygen therapy	100,237	.54
Spinal Immobilization	30,459	.16
Crisis Intervention	15,675	.8
Airway	15,465	.8
Wound Management	9,570	.6
Other	7,353	.5
Splint Extremity	3,952	.2
CPR	2,617	.1

Advanced Life Support (ALS) procedures can only be performed by personnel certified as an EMT-Intermediate or higher. In FY'00, the following ALS procedures were performed.

Type	Number	Percent
Cardiac Monitor	199,884	.51
Vascular Access - Peripheral	103,239	.26
Drug Administration	32,297	.8
Pulse Oximetry	27,663	.7
Blood Glucose Check	21,538	.5
Intubation - Nasal	1,566	
Blood Drawn	1,396	
Intubation - Oral	1,311	
Intubation - Stoma	.6	

Nitroglycerine	9,399
Nitros Oxide	.9
Oral Glucose	.129
Other	3,995
Oxygen	37,046
Oxytocin	.10
Procainamide	.5
Sodium Bicarb	.510
Thaimine	.206
Vasopressor	.88
Verapamil	.8

As shown above, eight percent of all ALS procedures involved the administration of approved drugs. Those drugs administered and the number of times given are shown.

Medication	Administered
Activated Charcoal	.13
Adenosine	.86
Aminophylline	.11
Aspirin	1,935
Atropine	3,164
Bretylol	.28
Bronchodilator	6,474
Calcium	.12
Decadron	.37
Demerol	.215
Dextrose 50%	2,851
Diazepam	.787
Diphenhydramine	.83
Dopamine	.70
Epi (1:1000)	.722
Epi (1:10000)	3,581
Furosemide	1,419
Glucagon	.155
Isuprel	.1
Lidocaine	.733
Mannitol	.3
Morphine	2,101
Naloxone	.605
Nifedipine	.1

Chapter 4

Mississippi Trauma Care System

Trauma is a significant public health problem in Mississippi. Trauma is the leading cause of death for all age groups from birth to age 44. It is one of the most serious social, economic and medical problems of our time. Serious injury and death resulting from trauma events such as vehicle crashes, falls and firearms, claim 2,000 lives and disable 6,000 Mississippians each year. Trauma victims require immediate, expert attention.

Passage of legislation during the 1991 Mississippi legislative session designated the Division of Emergency Medical Services (DEMS), Mississippi State Department of Health (MSDH), as the lead agency for trauma system development in Mississippi. Since the passage of this law, the Trauma Care Plan for the State of Mississippi has been written and adopted.

In 1992, DEMS took the first steps in developing a statewide trauma system by implementing a statewide trauma registry. The trauma registry was originally installed in five regional hospitals strategically located throughout the state. To date, each hospital participating in the Mississippi Trauma System is actively collecting trauma data and submitting it to DEMS. This data provides a stable foundation for the development of the Mississippi Trauma System.

In 1997, the Mississippi Legislature established the Trauma Care Task Force (TCTF) to review the status of trauma and its impact on the public's health. The task force focused on three developmental areas for the implementation of a statewide trauma system: prevention and public awareness, financial support and legislative authority, and prehospital and hospital standards of trauma care. The recommendations of the TCTF were formalized into a report that was presented to the Governor and Legislature on December 15, 1997. The report was used as a guideline for drafting and subsequent passage of House Bill 966, "an act relating to a statewide Trauma Care System".

The 1998 Legislature took to heart the report given to them by the Trauma Care Task Force and passed legislation (HB 966) giving the Division of Emergency Medical Services, Mississippi State Department of Health the authority to develop a statewide trauma care system. This legislation also established a permanent funding source through a \$5 assessment on all moving

traffic violations, creating the Trauma Care Trust Fund. This money is available for administrative functions at both the state and regional levels. The legislation also expanded the Mississippi Emergency Medical Services Advisory Council to include trauma professionals who make up the Mississippi Trauma Advisory Committee (MTAC).

The passage of this legislation means many things to different entities. Participation in the statewide system is voluntary. Hospitals and medical staff make the decision on whether or not to participate. If an acute care facility decides to participate, it works in conjunction with other facilities in its region to develop regional trauma plans and protocols. Prehospital providers receive new trauma specific training, new field triage protocols, and become more involved in the evaluation of patient outcomes.

The Mississippi Trauma Advisory Committee (MTAC) was developed as a subcommittee of the EMS Advisory Council. In 1998, it developed the Mississippi Trauma Care Regulations that were subsequently adopted by the State Board of Health in October, 1998. These regulations describe the requirements for regional plan development and the trauma center designation process. They also state the hospital requirements for trauma program development, which include the entire continuum of care from injury to rehabilitation.

The Mississippi legislature added \$6 million to the Trauma Care Trust Fund during the 1999 Legislature Session. These additional monies brought the total amount in the Trauma Care Trust Fund to about \$8 million per year. Legislators authorized annual funding for regional support and uncompensated trauma care as defined by the trauma registry through regional contracts with the Department of Health, payable from the fund.

The funds became available on July 1, 1999, for designated trauma care regions through annual contracts with the State Department of Health, Division of Emergency Medical Services. The first checks were distributed in FY'00 after hospital designations were announced for Level I and II trauma centers.

In FY'2001, a total of \$6,538,545 was distributed from the Trauma Care Trust Fund for reimbursement of uncompensated care. The fund was divided between designated trauma centers and eligible physicians based on allocation of 70% to hospitals and 30% to eligible physicians.

a total of 61 trauma centers which include two level I, five level II, twelve level III, and 42 level IV trauma centers. Additional hospitals are participating and have applied to be inspected in FY'02

Below is a chart representing the hospitals and their levels designated in FY'01.

By the end of FY 2001, the Mississippi State Department of Health had provisionally designated

Mississippi Designated Trauma Care Centers as of June 30, 2001

Hospital	P/NP/D	Level	Address	Administrator	REGION

Chapter 5

Mississippi Emergency Medical Services For Children

The Emergency Medical Services for Children (EMSC) Program is a federally-funded initiative designed to reduce child and youth disability and death due to severe illness or injury. The first EMSC legislation was passed in 1984. At present, all 50 states have received funding through the EMSC Program. The EMSC Program is jointly administered by the U.S. Department of Health and Human Services through the Health Resources and Services Administration's Maternal and Child Health Bureau and the U.S. Department of Transportation's National Highway Traffic Safety Administration.

EMSC is the only Federal program that focuses on improving the quality of children's emergency care. It builds upon existing Emergency Medical Services (EMS) systems. Its goals are to ensure that state-of-the-art emergency medical care is available for ill or injured children and adolescents, to ensure that pediatric service is well integrated into an emergency medical services system, and to ensure that the entire spectrum of emergency services - including primary prevention of illness and injury, acute care, and rehabilitation - are provided to children and adolescents. To reach these goals, the EMSC Program provides grants to states to improve and enhance pediatric emergency care.

The Division of Emergency Medical Services, Mississippi State Department of Health was awarded the EMSC Program Planning grant in August of 1998. The goals of the planning phase were to evaluate the current state of pediatric care in Mississippi, to develop programs to improve the care of pediatric patients in the state, and to develop programs geared toward injury prevention and community involvement in pediatric issues. This was accomplished by conducting a pediatric needs assessment survey.

As a result of this survey, two areas of need in pediatric care were found: advanced pediatric education and injury prevention programs. Programs were developed to address these needs.

DEMS was awarded the EMSC Program Implementation grant in FY'00. This grant provided funding to implement programs developed during the planning grant. The programs implemented included advanced pediatric education courses and a comprehensive school-based injury

prevention curriculum. The courses are Pediatric Education for Prehospital Professionals (PEPP) and Pediatric Basic Trauma Life Support (PBTLS). The injury prevention curriculum that was implemented was a program developed by the National Fire Protection Association called Risk Watch.

PEPP represents a comprehensive source of prehospital medical information for the emergent care of infants and children. It teaches prehospital professionals how to better assess and manage ill or injured children. This course is administered at eight sites across the State. This course has been offered by the Mississippi EMSC Program to Mississippi physicians, nurses, and all Mississippi certified emergency medical technicians at no cost to the participants.

Risk Watch is a comprehensive school-based injury prevention program designed for children in preschool through eighth grade. The Mississippi EMSC Program provides the curriculum to any school in Mississippi that wishes to participate in the program.

The PBTLS course is a one-day training program devoted to pediatric trauma care. This program provides information about pediatric trauma and pediatric assessment skills for critically injured children. The PBTLS course is offered by the Mississippi EMSC Program to Mississippi physicians, nurses, and Mississippi certified emergency medical technicians at no cost to the participant.

For FY'01, a total of 2,700 professionals were trained in both the PEPP and PBTLS courses. Risk Watch has been implemented in 20 schools across the State. It is the goal of the Mississippi EMSC Program to expand these programs throughout the duration of the three-year implementation grant.

In the coming years, the Mississippi EMSC Program plans to address several other areas of need as they pertain to children's issues. There remains much to be done to ensure children receive optimal medical care. Health care providers, parents, caregivers, teachers, and local organizations involved with or interested in child health care can play a significant role in the effort to improve the care that children receive in Mississippi.

Chapter 6

County Information

The following pages provide information on a county-by-county basis. Listed are the providers of emergency medical care, both ground and air services, and the level and type each service provides, and the

number of certified EMTs at each level living in each county. EMSOF grant money is based on population. The disbursements, collections, recipients, and uses of EMSOF money are provided.
