The responsibility for implementation and conduct of this program shall be vested in the State Health Officer of the State Board of Health along with such other officers and boards as may be specified by law or regulation.

(2) The board shall provide for the regulation and licensing of public and private ambulance service, inspection and issuance of permits for ambulance vehicles, training and certification of EMS personnel, including drivers and attendants, the development and maintenance of a statewide EMS records program, development and adoption of EMS regulations, the coordination of an EMS communications system, and other related EMS activities.

(3) The board is authorized to promulgate and enforce such rules, regulations and minimum standards as needed to carry out the provisions of this chapter.

(4) The board is authorized to receive any funds appropriated to the board from the Emergency Medical Services Operating Fund created in Section 41-59-61 and is further authorized, with the Emergency Medical Services Advisory Council acting in an advisory capacity, to administer the disbursement of such funds to the counties, municipalities and organized emergency medical service districts and the utilization of such funds by the same, as provided in Section 41-59-61.

(5) The department acting as the lead agency, in consultation with and having solicited advice from the EMS Advisory Council, shall develop a uniform nonfragmented inclusive statewide trauma care system that provides excellent patient care. It is the intent of the Legislature that the purpose of this system is to reduce death and disability resulting from traumatic injury, and in order to accomplish this goal it is necessary to assign additional responsibilities to the department. The department is assigned the responsibility for creating, implementing and managing the statewide trauma care system. The department shall be designated as the lead agency for trauma care systems development. The department shall develop and administer trauma regulations that include, but are not limited to, the Mississippi Trauma Care System Plan, trauma system standards, trauma center designations, field triage, interfacility trauma transfer, EMS aero medical transportation, trauma data collection, trauma care system evaluation and management of state trauma systems funding. (6) The State Board of Health is authorized to receive any funds appropriated to the board from the Mississippi Trauma Care System Fund created in Section 41-59-75.
