

For week 48 (11/29/09- 12/05/09), the overall state ILI rate (6.7%) was lower than last week (7.2%) and this time last year (8.0%).

The 2009-10 state ILI rate was below baseline for week 48 and has been below baseline for the past four weeks.

During week 48, five districts (3, 4, 7, 8, and 9) had a decrease in ILI activity, three districts (1, 2, and 6) had an increase, and one remained about the same (5).

To date, 2,738 flu specimens have been submitted for testing to the MSDH PHL since April 27th. 1,278 lab-confirmed novel H1N1 specimens have been reported to MSDH. This total includes 320 positives reported from outside labs. There have been a total of 22 reported flu deaths, 13 that were confirmed H1N1. The positive cases and deaths were from the following counties:

County	H1N1 Swine	All Flu Deaths	H1N1 Death	Other Flu Deaths

*Other flu types include any flu case not confirmed as H1N1 swine flu.

Below is a comparison of the state ILI rate to the number of positive influenza isolates since August 2nd. The predominant flu type identified continues to be novel H1N1 (swine) flu.

Mississippi reported “**local**” (Outbreaks of influenza or increases in ILI cases and recent laboratory-confirmed influenza in a single region of the state) activity for week 48. For more information on flu activity nationwide, please refer to the CDC’s website at: <http://www.cdc.gov/flu/weekly/fluactivity.htm>.
