Preface

Overview

This publication reflects data collected in the hospital licensure process. A historical accounting of the responsibility for this function began in 1946 when the Mississippi Commission on Hospital Care was legislatively authorized to license non-federal hospitals and prepare an annual report. In 1979 the legislature passed a bill to merge the responsibilities of the Commission on Hospital Care into the Mississippi Health Care Commission and in 1986 another bill was passed to merge the responsibilities into the State Department of Health.

In October 1999, the Division of Health Facilities Licensure and Certification mailed copies of its combined "Annual Hospital Report and Application for Renewal of Hospital Licensure" and the American Hospital Association's "Annual Survey of Hospitals" to all non-federal hospitals in Mississippi. This survey is the source of statistics for this publication. A copy of the survey form is included in Appendix E. The hospital survey forms were reviewed and automated by the Division of Public Health Statistics. Questions regarding reported data were answered by hospital personnel through letters or telephone calls.

In 1982, for planning purposes, the Statewide Health Coordinating Council (SHCC) established seven hospital service areas based on where patients sought hospital care. For ease in using the data presented in this report some tables are presented by the planning service areas. Map II displays the hospital service areas.

This Annual Report is based on 105 hospitals; 97 acute care, 5 psychiatric, 1 rehabilitation, and 2 long-term acute care. The five federal hospitals in Mississippi have been excluded. Additionally, East Mississippi State Hospital, Mississippi State Hospital, Oak Circle Center and Whitfield Medical/Surgical Hospital have been excluded from all data except Map I, Table II and Table III. Map I shows location of hospitals by type of facility, Table II shows accreditations and Table III displays employees.

Hospital Ownership and Certification

As Map I indicates, the overwhelming majority, 97, of hospitals in Mississippi are classified as medical/surgical. There are eight psychiatric/mental hospitals, one rehabilitation hospital, and two long-term acute hospitals. These figures were based on the type of service that the hospitals provided to the majority of admissions. Data from the two long-term care hospitals are included with the 97 acute care hospitals. The other acute care facility, Whitfield Med/Surg is not included in the acute care statistics.

The nine counties in Mississippi that do not have a hospital are Amite, Benton, Carroll, Greene, Issaquena, Itawamba, Smith, Stone and Tunica. The counties having the most hospitals are Hinds and Rankin with seven, Harrison and

Lauderdale with six. Sixteen counties have 2 hospitals and fifty-two counties have one hospital.

Ownership and control of hospitals and beds are shown in Tables I-A through I-D. In 1999 there were 97 acute care hospitals (97 acute care plus 2 long term care

hospitals) and 11,786 licensed acute care beds. (This count excludes Whitfield Medical Surgical Hospital and includes Restorative Care Hospital at Baptist, Specialty Hospital of Biloxi and Specialty Hospital of Meridian.) Eighteen hospitals reported 720 licensed psychiatric beds. Approximately 59% of the beds, 424, were located at acute care hospitals. Sixteen hospitals reported 414 licensed chemical dependency beds. Trace Regional Hospital did not report any chemical dependency utilization during the reporting period. Approximately 93% (384 beds) were located at acute care facilities. Seven hospitals reported 278 rehabilitation beds. More than half (154) were located at 6 acute care facilities.

Table II indicates that 58.7% of the hospitals are accredited by the Joint Commission on Accreditation of Healthcare Organization (JCAHO). Almost all of the hospitals, 97.2% participate in Blue Cross and 95.4% participate in Medicare, and 97.2% participate in Medicaid.

Hospital Employees

Table III displays hospital personnel. Mississippi's hospitals employed 53,838 people during FY 99, 80.9% of which were full-time employees and 19.1% of which were part-time employees.

Services Utilization

Tables IV - XII show number of procedures by hospital service area for the following categories:

| | |
|---------------------------------|------------------------------------|
| Head and Body CT Scans | Cardiac Catheterization |
| Diagnostic Radioisotope | Angioplasty |
| X-Ray | Cardiac Surgeries |
| Magnetic Resonance Imaging | Renal Extracorporeal Shock Wave |
| Ultrasound | Lithotripter |
| Digital Subtraction Angiography | Hemodialysis |
| Single Photon Emission | Physical Therapy |
| Computerized Tomography (SPECT) | Occupational Therapy |
| Cobalt60 | Geriatric Patients Served |
| Linear Accelerator | Respite Patients Served |
| Radioactive Implants | Inpatient and Outpatient Surgeries |
| Therapeutic Radioisotope | Outpatient Utilization |
| X-Ray Radiation Therapy | Rural Health Clinics |
| Cardiac Catheterization | |

Hospital service areas are shown in Map II.

Seventy-seven hospitals reported 119,370 inpatient surgeries and seventy-nine hospitals reported 147,995 outpatient surgeries. This count includes only surgeries performed at acute care hospitals. As Table X shows, the majority of surgeries were performed in Service Area 3.

Table XI presents outpatient emergency visits and clinic/other visits by Hospital Service Area. Service Area 3 reported both the most outpatient emergency visits and clinic/other visits.

Twenty-eight hospitals reported 61 rural health clinics and 441,530 rural health clinic visits. Table XII shows rural health clinics and visits by hospital service area.

Bed Changes

The following hospitals closed

BHC Sand Hill Hospital
Central Medical Center North (included in this report)
Smith County Hospital
Stone County Hospital

North Mississippi State Hospital, a 50 bed psychiatric facility, opened during 1999.

Laurel Wood Center added 55 acute care beds October 15, 1999.

Memorial Hospital at Gulfport increased from 335 beds to 395 beds.

Mississippi State Hospital decreased from 1,506 beds to 1,479 beds.

Parkview Regional Medical Center and Vicksburg Medical Center merged to form River Region Health System.

Licensed Beds, Average Length of Stay, Average Daily Census and Occupancy Rate

Table XIII shows hospitals and beds by bed size groupings. Occupancy rates are also shown by bed size. Under acute care the greatest number of hospital beds was reported at hospitals with 25 - 49 beds, 50-99 beds, and 100-199 beds. Of the 18 hospitals reporting psychiatric beds, five were licensed as psychiatric hospitals. Four hundred fourteen chemical dependency beds were reported at 16 hospitals. This count includes the 12 CDU beds at Trace Regional Hospital. Seven hospitals reported 278 rehabilitation beds. Map III looks at the distribution of 105 Mississippi hospitals by bed size and county.

Table XIV-A gives average lengths of stay (ALOS), average daily census (ADC), percentages of occupancy for each hospital by licensed acute care bed capacity and state totals. Psychiatric data can be found in Table XIV-B, chemical dependency data in Table XIV-C, and rehabilitation data in Table XIV-D. Map IV displays location of psychiatric, chemical dependency and rehabilitation beds.

A comparison of licensed beds and beds set up and staffed is shown in Tables XV-A - XV-D. Of the 11,786 licensed acute beds, 10,649 beds were set up and staffed. All seven hundred twenty licensed psychiatric beds were set up and staffed. Three hundred seventy-one of the 414 licensed chemical dependency beds were set up and staffed. And, all of the 278 rehabilitation beds were set up and staffed.

Swing Beds

Table XVI shows the number of swing beds, average length of stay and average

daily census by facility. Table XVII shows the destination of discharged swing bed patients, number referred to home health, and number of acute care beds designated as swing beds by service area. More than one-half (61.1%) were discharged to their home, 14.1% were discharged to nursing homes, 11.6% were admitted to hospitals, 2.3% were admitted to personal care homes, and the remaining 10.9% were discharged to other destinations.

Swing bed utilization in 1999 by hospital service area is shown in Table XVIII.

Hospital Use Statistics

Table XIX shows the population of each service area in comparison with its licensed bed capacity. Service areas are maintaining a relatively close correlation between the percentage of population and percentage of licensed hospital beds. Service Area 3, including the city of Jackson and Hinds County, has the largest population at 25.7% and the most beds at 30.2%. Licensed beds by type are also shown by hospital service area.

Table XX-A provides information on acute hospital beds, admissions, discharges, deaths and inpatient days by service area and county. Psychiatric, chemical dependency and rehabilitation beds located in acute care facilities are included in Table XX-B along with those facilities that are licensed as psychiatric, or rehabilitation facilities. There are 11,786 licensed acute care hospital beds in Mississippi, 720 psychiatric beds, 414 chemical dependency beds, and 278 rehabilitation beds.

A comparison of utilization statistics for 1989, 1994 and 1999 is shown in Table XXI. While acute care data decreased from 1988 to 1999, most psychiatric, chemical dependency and rehabilitation data increased.

Table XXII deals with newborn statistics. Once again, Service Area 3 leads in every category, as does Hinds County. Table XXIII compares with the newborn statistics of 1999 with those of 1994 and 1989. There was a -2.3% percent of change in bassinets and a 8.7 percent of change in obstetrical beds set up and staffed. Deliveries decreased slightly from 1989-1999. The percent of change in fetal deaths was -11.6%.

Table XXIV displays discharges, discharge days, admissions and inpatient days by service area for DP SNF, geriatric psychiatric DP, patients 65 and older, Medicare and Medicaid.

Table XXV-A shows beds set up, discharges, discharge days and inpatient days for the State's acute care hospitals. Psychiatric, chemical dependency and rehabilitation data reported by these hospitals is included. Data reported by specialty hospitals is reported in Table XXV-B. Data is broken down into acute care, intensive care, other care, and long-term care. No data was reported for psychiatric intensive care, hospice, psychiatric long term care or mental retardation.

Obstetrical Utilization

1999 obstetrical utilization is shown in Appendix A.

1999 Hospital Patient Origin Data

Percent of hospital discharges by adjacent county of residence by rank order for combined four quarter patient origin study are shown in Appendix B. Discharges from other counties are grouped together under all others. Patient Origin Study dates used in combined data include October 5 - 18, 1998, January 4 - 17, 1999, April 5 - 18, 1999 and July 5 - 18, 1999. These dates correspond with the majority of hospitals' fiscal year of October 1, 1998 through September 30, 1999.

Hospital Listing

Hospitals are listed alphabetically by county in Appendix C. The hospital directory is located in Appendix D. The licensed bed capacity is reported as of January 1, 2000 whereas the rest of the report is as of the end of the reporting period, usually September 30, 1999.
