

Maternal Innovations Program: OB EMS Boot Camp

*The estimated value of this training is \$138 per participant, but thanks to our HRSA funding, there is **NO COST TO YOU!***

Sponsored and presented by: The Mississippi Public Health Institute (MSPHI) Maternal Health Innovation (MHI) Team, the Mississippi Office of EMS and Acute Care Systems Division at the MS State Department of Health, and Triple S Review Services, LLC.

»» **The Goals:**

- 1) To assure** access to high quality and equitable health services to optimize health and well-being for all Maternal Child Health (MCH) populations and to strengthen public health capacity and workforce therefore improving outcomes for populations disproportionately impacted by maternal mortality and severe maternal morbidity.
- 2) To increase** routine screening of pregnancy status to identify at- risk patients in hospitals and emergency settings.
- 3) To improve** maternal and infant healthcare and outcomes statewide.

»» **The Training:** 4 hours in length: 8:00 a.m. – 12:00 p.m.

Didactic and simulation of emergency HTN management, postpartum hemorrhage (weighing blood), shoulder dystocia management, precipitous delivery, and maternal code (bedside C/S). The training will also include a blend of didactic and simulation training for maternal Code Blue, Shoulder Dystocia, Postpartum Hemorrhage, Emergency Hypertension, Seizure Management and Neonatal Stabilization plus more resources to care for the obstetric patient that may come to your hospital for care.

Educating providers to ask the screening question, "**Are you pregnant, and/or have you been pregnant in the past 12 months?**" and to review the **Urgent Maternal Warning Signs** to help reduce the chance of missing significant changes like cardiomyopathy that can lead to maternal mortality.

[An Ambulance will be provided at each training to authenticate the simulation part of this training.](#)

»» **The Instructor:**

Stephanie Swilley, MSNEd, RNC-OB/RNC-IAP/C-EFM/C-ONQS
Owner and Founder: Triple S Review Services, LLC

"My ultimate goal is to maintain and sustain emergency obstetrical education for EMS/EMT personnel while strengthening maternal and neonatal safety outcomes in the prehospital setting. I am deeply committed to equipping first responders with the knowledge, confidence and hands-on training necessary to manage high-risk, low-frequency obstetrical emergencies. Through collaborative training, simulation drills, preparedness initiatives and continued education, EMS professionals can improve rapid recognition, response, and outcomes for mothers and newborns during emergency childbirth situations."– S Swilley

»» **Target Audience:**

- **Emergency Medical Technicians**
- **Paramedics**

»» **The Schedule:**

Obstetrics and Special Population continuing education hours (4) approved for each training scheduled below:

Offered at 3 different locations:

8:00 a.m. – 12:00 p.m. each training listed below
