CERTIFICATION
Consumer Confidence Report (CCR)

Topisaw Creek Water Assoc, Inc
Public Water Supply Name

List PWS ID #s for all Community Water Systems included in this CCR:

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must mail, fax or email a copy of the CCR and Certification to MSDH. Please check all boxes that apply.**

Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*

☑ Advertisement in local paper (attach copy of advertisement)
☐ On water bills (attach copy of bill)
☐ Email message (MUST Email the message to the address below)
☐ Other

Date(s) customers were informed: / / / / / / / / 

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used

Date Mailed/Distributed: / / 

CCR was distributed by Email (MUST Email MSDH a copy) Date Emailed: / /

☐ As a URL (Provide URL ____________)
☐ As an attachment
☐ As text within the body of the email message

CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: The daily leader
Date Published: 5/3/2017

CCR was posted in public places. *(Attach list of locations)* Date Posted: / / 

CCR was posted on a publicly accessible internet site at the following address *(DIRECT URL REQUIRED)*:

CERTIFICATION
I hereby certify that the Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply

[Signature]
Name/Title (President, Mayor, Owner, etc.)

Date 5-4-2017

Submission options *(Select one method ONLY)*

Mail: (U.S. Postal Service)
MSDH, Bureau of Public Water Supply
P.O. Box 1700
Jackson, MS 39215

Fax: (601) 576 - 7800

Email: water.reports@msdh.ms.gov

CCR Deadline to MSDH & Customers by July 1, 2017!
## Water Quality Report

### Why are state requirements important to my drinking water?

State requirements are important to ensure that your drinking water meets the highest standards of safety and quality. These requirements are established to protect public health and ensure that your water is free from contaminants that could cause health problems.

### Water Quality Data Table

### Water Additives & Disinfectants by Products

There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

- Chlorine: 4 ppm

### Inorganic Contaminants

- Arsenic
- Barium
- Chromium
- Fluoride
- Nitrate

### Radioactive Contaminants

- Alpha emitters (pCi/L) 0
- Beta/ photon emitters (pCi/L) 0

### Inorganic Contaminants

- Copper - action level at consumer taps (ppm) 1.3
- Lead - action level at consumer taps (ppm) 0.005

---

**Addition Information for Lead**

Lead is a toxic metal that can cause serious health problems, especially in children. Lead in drinking water primarily from corrosion and exposure to low levels of lead in water. Lead can be reduced by using lead-free plumbing materials or by using water softeners to remove lead from water. It is also a good practice to avoid using lead-based solder or fluxes in plumbing systems.

**Addition Information for Arsenic**

Arsenic is a toxic metal that can cause serious health problems, especially in children. Arsenic in drinking water primarily from natural and human activity. Arsenic can be reduced by using water filters that remove arsenic or by using water softeners to remove arsenic from water. It is also a good practice to avoid using lead-based solder or fluxes in plumbing systems.
Government 'needs a good shutdown'
