CERTIFICATION
Consumer Confidence Report (CCR)

Alcorn County Water Assn. Inc.
Public Water Supply Name

 certo 2006
List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. You must mail, fax or email a copy of the CCR and Certification to MSDH. Please check all boxes that apply.

Customers were informed of availability of CCR by: (Attach copy of publication, water bill or other)

☒ Advertisement in local paper (attach copy of advertisement)
☐ On water bills (attach copy of bill)
☐ Email message (MUST Email the message to the address below)
☐ Other

Date(s) customers were informed: 6/2/17 /

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used ________________________________

Date Mailed/Distributed: / /

CCR was distributed by Email (MUST Email MSDH a copy) Date Emailed: / / 

☐ As a URL (Provide URL ________________________________)
☐ As an attachment
☐ As text within the body of the email message

CCR was published in local newspaper. (Attach copy of published CCR or proof of publication)

Name of Newspaper: Daily Corinthian

Date Published: 6/2/17

CCR was posted in public places. (Attach list of locations) Date Posted: / /

CCR was posted on a publicly accessible internet site at the following address (DIRECT URL REQUIRED):

CERTIFICATION
I hereby certify that the Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply

Bobby Stegner, See. Date 6/13/17

Name/Title (President, Mayor, Owner, etc.)

Submission options (Select one method ONLY)

Mail: (U.S. Postal Service) MSDH, Bureau of Public Water Supply P.O. Box 1700 Jackson, MS 39215
Fax: (601) 576-7800
Email: water.reports@msdh.ms.gov

CCR Deadline to MSDH & Customers by July 1, 2017!
STATE OF MISSISSIPPI,
COUNTY OF ALCORN
PERSONALLY CAME before me, the undersigned, a Notary Public in and for Alcorn County, Mississippi, the CLERK of THE DAILY CORINTHIAN, a newspaper published in the City of Corinth, First Judicial District of Alcorn County, in said State, who being sworn, deposes and says that THE DAILY CORINTHIAN is a newspaper as defined and prescribed in Senate Bill No. 203 enacted at the regular session of the Mississippi Legislature of 1948, amending Section 1858, of the Mississippi Code of 1942, and that the publication of a notice, of which the annexed is a copy, in the manner of:

Quality on Tap Report

has been made in said paper ______ times consecutively, to-wit:
On the ______ day of _____, 20__
On the ______ day of _____, 20__
On the ______ day of _____, 20__
On the ______ day of _____, 20__
On the ______ day of _____, 20__
On the ______ day of _____, 20__

SWORN TO and subscribed before me this ______ day of _____, 20__

[Signature]
Notary Public

[Signature]
Clerk

Corinth, Miss. ______, 20__

To THE DAILY CORINTHIAN, Dr.
(Name Newspaper)

TO PUBLISHING Quality on Tap Report

case of PWS ID 02006

words space 4 x 10.5

_______ times and making proof, $ 355.80.

RECEIVED OF ____________________________

payment in full of the above amount.

_____________________________, 20___
We're pleased to present to you this year's Annual Water-Quality Report. This report is designed to inform you about the water we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the effort we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source is three wells pumping from the Paleozoic aquifer and one from the Gordon formation.

This consumer confidence report will not be mailed to our customers, but copies are available at our office at 116 S. Case Street.

We are pleased to report that our drinking water meets all federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact David Lutz at 116 S. Case Street or call 662-286-5689. We want our valued customers to be informed about their water reality. If you want to learn more, please attend any of our regularly scheduled meetings. They are held at our office on the second Tuesday of each month at 5:00 P.M.

Alcorn County Water Association, Inc. routinely monitors for contaminants in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1st to December 31st, 2016. As water travels over the land or underground, it can pick up substances or contaminants such as microbes, inorganic and organic chemicals, and radioactive substances. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Treatment Technique (TT) - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water. If a contaminant is detected at or above action level, a treatment technique is required to reduce the level of the contaminant.

Maximum Contaminant Level Goal (MCLG) - The goal level of a contaminant that the EPA believes is safe for drinking water.

MCL - The maximum level of a contaminant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

### TEST RESULTS

### Additional Information for Lead

If present, elevated levels of lead can cause serious health problems, especially for pregnant women, and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Alcorn County Water Association is responsible for providing high quality drinking water, but you can protect the quality of water supplied to your tap by installing and using a water treatment system that removes lead. If your water has been stored in your tap for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are unsure what lead may be in your water, you may wish to have your water tested. Lead in drinking water, testing methods, and steps you can take to minimize exposure are available from the Safe Drinking Water Hotline or at http://www.epa.gov/groundwater/lead. The Mississippi State Department of Health Public Health Laboratory offers lead testing for $20 per sample. Please contact 662-377-7598 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man-made. These substances can be inorganic, organic, or radioactive. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. Information about compounds and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immunocompromised persons, diabetics, persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, and persons with HIV/AIDS or other immunosuppressant diseases, some elderly, and infants can be particularly at risk. These people should seek advice about drinking water from their health care provider. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microorganisms are available from the Safe Drinking Water Hotline (1-800-426-4791).

Your CCR will not be mailed to you; however, you may obtain a copy from the water office. Please call 662-286-5689 if you have any questions.
