

# CERTIFICATION

## Consumer Confidence Report (CCR)

Town of Potts Camp Water System  
Public Water Supply Name

PWS ID# 0050019, PWS ID# 0470004  
List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must mail, fax or email a copy of the CCR and Certification to MSDH. Please check all boxes that apply.**

Customers were informed of availability of CCR by: (*Attach copy of publication, water bill or other*)

Advertisement in local paper (attach copy of advertisement)

On water bills (attach copy of bill)

Email message (MUST Email the message to the address below)

Other \_\_\_\_\_

Date(s) customers were informed: 06/08/17, / / , / /

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used \_\_\_\_\_

Date Mailed/Distributed: \_\_\_\_\_ / /

CCR was distributed by Email (MUST Email MSDH a copy)

Date Emailed: \_\_\_\_\_ / /

As a URL (Provide URL \_\_\_\_\_)

As an attachment

As text within the body of the email message

CCR was published in local newspaper. (*Attach copy of published CCR or proof of publication*)

Name of Newspaper: South Reporter, Southern Advocate

Date Published: 06/08/2017

CCR was posted in public places. (*Attach list of locations*)

Date Posted: \_\_\_\_\_ / /

CCR was posted on a publicly accessible internet site at the following address (**DIRECT URL REQUIRED**):

### CERTIFICATION

I hereby certify that the Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply

Kathrine J. Brock, Clerk  
Name/Title (President, Mayor, Owner, etc.)

**CCR Deadline to MSDH & Customers by July 1, 2017!**

RECEIVED-WATER SUPPLY

# Annual Drinking Water Quality Report

Town of Potts Camp

PWS ID# 0050019 \* 470004

May 17, 2017

2017 MAY 22 PM 12: 50

We're very pleased to provide you with this year's Annual Water Quality Report. We want to keep you informed about the excellent water and services we have delivered to you over the past year. Our goal is and always has been, to provide to you a safe and dependable supply of drinking water. Our water source is groundwater and our wells draw from the Ripley Aquifer. The wells for the Potts Camp have received **lower** to **moderate** rankings to contaminations.

I'm pleased to report that our drinking water meets all federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact John Childs at (662)-333-7285. We want our valued customers to be informed about their water utility. If you want to learn more, please attend one of our regular meetings held at 6 P.M on the first Tuesday of each month at the Town Hall.

The **Town of Potts Camp** routinely monitors for constituents in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1<sup>st</sup> to December 31<sup>st</sup>, 2016. As water travels over the land or underground, it can pick up substances or contaminants such as microbes, inorganic and organic chemicals, and radioactive substances. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

*Action Level* - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

*Treatment Technique (TT)* - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

*Maximum Contaminant Level* - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

*Maximum Contaminant Level Goal* - The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

*MRDL*: Maximum residual disinfectant level. The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants

0470004

We are required to monitor your drinking water for specific contaminants on a monthly basis. Results of regular monitoring are an indicator whether or not our drinking water meets health standards. During January and February 2016 we did not monitor or test bacteriological or chlorine contaminants and therefore cannot be sure of the quality of our drinking water. Also we took 2 samples for coliform bacteria during January 2016 and 3 for coliform bacteria in March 2016. Those samples showed the presence of coliform bacteria. The standard is that no more than 1 sample per month of our samples may do so.

## TEST RESULTS 0470004

### Disinfectants & Disinfection By-Products

(There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.)

| Contaminant                          | Violation Y/N | Date Collected | Level Detected | Range of Detects or # of Samples Exceeding MCL/ACL | Unit Measurement | MCLG | MCL | Likely Source of Contamination          |
|--------------------------------------|---------------|----------------|----------------|--|------------------|------|-----|---|
| Chlorine (as Cl <sub>2</sub> ) (ppm) | N             | 2016           | .8             | .10—1.7  | Ppm              | 4    | 4   | Water additive used to control microbes |

### Inorganic Contaminants

|                              |   |       |                   |            |        |     |        |   |
|------------------------------|---|-------|-------------------|------------|--------|-----|--------|---|
| Barium                       | N | 2016  | .115              | .112--.115 | Ppm    | 2   | 2      | Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits                                |
| Copper                       | N | 2016  | .13               | No-Range   | ppm    | 1.3 | AL=1.3 | Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives                    |
| Fluoride                     | N | *2015 | .257<br>.324      | No-Range   | Ppm    | 4   | 4      | Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories |
| Lead                         | N | 2016  | 1.4               | No-Range   | Ppb    | 0   | AL=15  | Corrosion of household plumbing systems, erosion of natural deposits  |
| HAA5                         | N | 2016  | 17                | No-range   | Ppmpbb | 0   | 60.0   | By-product of drinking water chlorination   |
| TTHM [Total trihalomethanes] | N | 2016  | 4.57<br>No Detect | No-Range   | Ppb    | 0   | 100    | By-product of drinking water chlorination   |
| HAA5                         | N | 2016  | 2.0               | No-range   | Ppm    | 0   | 60.0   | By-product of drinking water chlorination   |

## TEST RESULTS 0050019

### Disinfectants & Disinfection By-Products

(There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.)

| Contaminant                          | Violation Y/N | Date Collected | Level Detected | Range of Detects or # of Samples Exceeding MCL/ACL | Unit Measurement | MCLG | MCL | Likely Source of Contamination          |
|--------------------------------------|---------------|----------------|----------------|--|------------------|------|-----|---|
| Chlorine (as Cl <sub>2</sub> ) (ppm) | N             | 2016           | 1.0            | .09—1.90   | Ppm              | 4    | 4   | Water additive used to control microbes |

### Inorganic Contaminants

|          |   |       |           |          |     |     |        |   |
|----------|---|-------|-----------|----------|-----|-----|--------|---|
| Barium   | N | *2015 | .014      | No-Range | Ppm | 2   | 2      | Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits                                |
| Chromium | N | *2015 | 1.5       | No-Range | Ppb | 100 | 100    | Discharge from steel and pulp mills; erosion of natural deposits  |
| Copper   | N | 2016  | .13<br>.1 | No-Range | ppm | 1.3 | AL=1.3 | Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives                    |
| Fluoride | N | *2015 | .257      | No-Range | Ppm | 4   | 4      | Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories |
| Lead     | N | 2016  | 1.4<br>1  | No-Range | Ppb | 0   | AL=15  | Corrosion of household plumbing systems, erosion of natural deposits  |

\*Most recent sample. No sample was required in 2016

0050019

We routinely monitor for the presence of drinking water contaminants. We took 3 samples for coliform bacteria during January 2016 and 2 for coliform bacteria in March 2016. Those samples showed the presence of coliform bacteria. The standard is that no more than 1 sample per month of our samples may do so.

During 2016 we were required to make available to you the Consumer Confidence Report (CCR) by July 1, 2016. We failed to do this by the deadline but have since been returned to compliance.

**\*\*\*Additional Information for Lead\*\*\***

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The **Town of Potts Camp** is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. Please contact 601-576-7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Your CCR will not be mailed to you however; you may obtain a copy from the Town Hall. Please call 662-333-7285 if you have any questions.

Obituaries

SHIRLEY KING
Shirley Thomas King, 76, resident of the Concan Community and a pastor active for many years in the business, religious and community affairs of Benton County, passed away peacefully Wednesday afternoon, May 31, 2017, at Baptist Memorial Hospital in Memphis following a brief illness.

Funeral services celebrating the Christian life of Mrs. King were Saturday June 3 at the Heritage Chapel of Ripley Funeral Home with Bro. John Franklin, Pastor of Hamilton Baptist Church officiating. Burial followed in the Hamilton Cemetery in Benton County, Born Jan.

12, 1941 in Prentiss County, she was one of nine children born to the late James Arlis and Luna Bell Johnson Thomas. Mrs. King was a graduate of Pisgah High School in Prentiss County where she was a member of the school basketball team. She was married on May 4, 1959 to Norris Tate King, retired merchant and owner of King's Auto Sales in Benton County who preceded her death on Jan. 10, 2013. Mr. and Mrs. King moved to Benton County in 1968 and will be remembered by many as the owners of King's Grocery Store in the Concan Chapter for a number of years before their retirement. Mrs. King was also employed as Assistant Manager of the Ashley Retail Store in Ripley. A Christian and a lifelong Baptist, Mrs. King was a member of the Concan Baptist Church and in recent

years enjoyed attending Hamilton Baptist Church with family and friends. Mrs. King will also be remembered as a family oriented person who enjoyed crocheting, quilting and cooking for family dinners. Many requests came from her family and friends for her famous "Chicken and Dumplings" that no one seemed to duplicate. She was an active member of the Eastern Star Chapter as long as health permitted. Blessed with a large loving family, those left to cherish her memory are her sons, James "Jimmy" King (Bonnie) and Steven King, both of Ashland and Jeffrey King (Lisa) of Michigan City, three sisters, Evelyn Corwilt of Baldwin, Olive Fay Thomas of Corinth and Nancy Edwards of Ripley, Tennessee, five grandchildren, Jonathan King (Stephanie), Stephanie Turner, Jan Harris, Zachary

and Ty King, seven great grandchildren and a great great grandson. She also preceded in death by two sisters, Ruby Coburn and Mollie Bell Hurst and three brothers, Clavin, Clarence and Ralph Thomas. Pallbearers were Kevin James, Mark Thomas, Gary Turner, Jonathan and Ethon King, Jan Harris, Don Corwilt and Lony Webb. The family requests that memorials be directed to the Hamilton Baptist Church Cemetery Fund, 1575 Hamilton Rd, Folkner, MS 39627. The Ripley Funeral Home invites you to share memories with the King family at www.ripleyfuneralhome.com

GRACE FLOYD
Mrs. Grace Stroupe Floyd 89, passed away on May 25, 2017 at the Tippah County Hospital in Ripley. Grace was born on July 15, 1927 to Leonard Johnson and Lile Ruth Simpson Stroupe in Benton County. She was employed with Ace Hardware in Ripley and also Golden Living Nursing Home in Ripley. Grace attended Beech Hill Church of Christ and later the Ripley Church of Christ. Services for Grace were Sunday May 28, 2017 at McBride Funeral Home in Ripley. Burial followed in the Beech Hill Church of Christ Cemetery. She is survived by one son, Eugene Wayne Floyd, Jr. of Kansas City, Missouri; three daughters, Sylvia E. Kingsley of Tupelo, Bonita Terrell (Glen) of Picnic, and Nancy Sauri, Deborah Sue Long (Mike) of Memphis, Tennessee; one brother, Hal Stroupe of Holly Springs;

two sisters, Sandra Graves of Ripley, Brenda Williams of Memphis, Tennessee; six grandchildren and seven great-grandchildren. Grace was preceded in death by her parents, two sisters, Dorena Lynn Hollifield, Carolyn Jordan; two brothers, Garlon Rice Stroupe, Neil Johnson Stroupe. Pallbearers were Bryson Burks, Jerry Wolfe, Barry Hobson, Tommy Simpson, Ronnie Johnson, Ronald Stroupe. The family request memorials to the PineVale Children's Home in Corinth, Mississippi. Condolences for the Floyd family may be sent to www.mcbridefuneralhome.com

2016 Annual Drinking Water Quality Report
Town of Ashland
We placed in present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality water and service we deliver to you every day. Our number one goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources.

Annual Drinking Water Quality Report
Town of Potts Camp
We're very pleased to provide you with this year's Annual Water Quality Report. We want to keep you updated about the excellent water and services we have delivered to you over the past year. Our goal is and always has been to provide you with a safe and dependable supply of drinking water. Our water source is groundwater and we draw from the Ripley Aquifer. The wells for the Potts Camp have received lower to moderate rankings to contamination.

Northwest Mississippi Community College Senatobia PTK students light candles as part of their induction ceremony. (Photo by Julie Bauer, director of communications)

### Northwest holds PTK induction on Senatobia campus

Northwest Community College students from the Senatobia campus were inducted into the Theta Sigma Chapter of Phi Theta Kappa Honor Society on April 24. Dr. Brandi Hephner LaBanc, vice chancellor for student affairs at the University of Mississippi, gave the keynote address at the induction ceremony. Each student came forward to sign the PTK pledge and participated in a candle ceremony in which students

lit each other's candles, signifying the passing of the "flame of knowledge." PTK advisers for the Senatobia campus are Judy Barham, Carroll Huebner, Dawn Stevens and Kristin Watson. Those who were inducted in the ceremony included Alexys Calhoun of Waterford, Joshua Featherly, Shelby Hangey, both of Holly Springs, Heather Issel of Byhalia, Samantha Latham of Waterford, Ruth Smith of

Red Banks, Samantha Spencer of Byhalia, and Brandy McGee of Potts Camp. PTK is an international scholastic and leadership honor society for two-year colleges. Students who are working toward an associate degree are eligible for membership. Northwest requires a 3.5 grade point average for initiation and membership in PTK. Members are eligible for scholarships at universities throughout the nation.

H.W. Byers Choir

### H.W. Byers Choir Spring Concert at Slayden Church

On Tuesday, May 23, the H.W. Byers Choir serenaded the souls of the community with a Spring Concert held at Slayden Baptist Church. The concert was full of classical, gospel and comedic music. The H.W. Byers Choir is under the leadership of Jaime Jones, a graduate of Byhalia High School and Alcorn State University, and he is accompanied by Polly Gill. The journey was very short for the choir since the instructor started at the top of December, which caused the choir to have strict consis-

tency with practicing, learning, and molding. In only five months the choir grew from five to 15 people who took on a new lifestyle through music along with other sports and extracurricular activities. The concert opened up presenting some stellar praise dancers from the middle school, who performed three dance numbers from our favorite gospel soundtracks of today. The choir embedded a smooth and melodic sound and also brought forth future soloists - Dawn Fitzpatrick, Jordan Rubbin, Quarterrious Jones, Ryescha Talley and Terric Carr. There was also a stellar performance from freshman pianist Dallas Fitzpatrick.

The community came out to support the event, and the ambiance of the soulful sound still surrounds the community, and it is contagious to communities nearby. This is most definitely a start to something greater. The H.W. Byers music program greatly appreciates the support of the community and Slayden Baptist Church.

### Potts Camp HS academic awards

Potts Camp High School announces its academic awards 2017. Perfect Attendance - (Ninth grade) Mackenzie Brownlee, Myles Clifton, Kiara Johnson, Nathan Peace, C.J. Samoly; (10th grade) Ashley Anderson, LaKayla Collins, Shunn Gardner, Roja Hernandez, Olivia King, Jose Ramirez, Jose Reyes, Alan Shaw, JaBryan Pegues; (11th grade) Danetria Hankins, Dylan Minor, Ben Shaw, Danielle Tally.

Anthony Bryson, Olivia Floyd; English II, Anthony Bryson, Collin Massengill, Alan Shaw; Theater, Jose Reyes. Mrs. Samples - Algebra I, Ana Ramirez; Foundations of Algebra, Lydia Hulsey. Mrs. Simpson - Honor Roll, Rache Villamil. Mr. Winburn - Honor Roll, Marie Carr, Savannah Colburn, Krishonna Ford, Ethan Fraser; Psychology, Anthony Bryson; Sociology, Anthony Bryson, ACT Prep, Dylan Minor. Coach Wren - Honor Roll,

Dillon Rikard, Alan Shaw, Hunter Skelton, Dasana Trammell; U.S. History, Dylan Minor; Economics, Jalen Shaw; Government, JaBryan Pegues, Anthony Bryson; Geography, Amber Anderson; MS Studies, Amber Anderson. Mrs. Young - Child Development, Ana Ramirez; Family Dynamics, Ana Ramirez; Nutrition and Wellness, Ana Ramirez; Health, Kelli Skelton; FCCLA Awards, Anthony Bryson, Kiara Jones, Justin Holbrook, JaBryan Pegues, Ashanti Turnage.

#### Request for Proposals Mississippi Department of Education Special Education Services

The Holly Springs School District (HSSD) through the Department of Special Education is soliciting competitive written proposals from qualified service providers for the following Special Education Services:

- Psychological Evaluation Services
- Physical Therapy Services
- Occupational Therapy Services
- Speech/Language Therapy Services
- Behavioral Therapy Services

#### Request for Information

Questions concerning the provision of services for any of the areas listed above should be directed to: Karin Autry, Special Education Director, at 662-252-2183 ext. #1004.

#### Due Dates for Proposals

One (1) typewritten proposal must be received by 4 p.m. Central Time (CT) on Monday, June 19, 2017, at the following address based upon the delivery method used:

**Hand Deliver Proposals to:**  
Karin Autry  
Special Services Department  
Holly Springs School District  
840 Hwy. 178 East  
Holly Springs, MS 38635

**Note: Proposals received after the deadline will not be considered.**

The Holly Springs School District offers educational and employment opportunities to all persons without discrimination and without regard to age, sex, race, or religion.

# Honors list at ICC

Officials at Itawamba Community College have released the honors lists for the 2017 spring semester. Named to the President's List, which includes those students with a 3.8-4.0 grade point average, were:

Holly Springs - Maura J. Autry;  
Potts Camp - Ricky Lee Clayton, Cory Wayne Henderson, Lindsay D. McGee;  
Dean's List scholars, who have a grade point average between 3.5 and 3.79, include:

Byhalia - Endia K. Wright; Hickory Flat - Phillip Andrew Leonard, Sarah Elise Saunders;  
Michigan City - Michaela H. Shoup;  
Potts Camp - Jonna D. Lumpkin.

### Annual Drinking Water Quality Report

Town of Potts Camp  
PWS ID# 0650019, ID # 0470004  
May 17, 2017

We're very pleased to provide you with this year's Annual Water Quality Report. We want to keep you informed about the excellent water and services we have delivered to you over the past year. Our goal is and always has been, to provide to you a safe and dependable supply of drinking water. Our water source is groundwater and our well's draw from the Ripley Aquifer. The wells for the Potts Camp have received lower to moderate rankings to contaminations.

I'm pleased to report that our drinking water meets all federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact John Childs at (662)-333-7285. We want our valued customers to be informed about their water utility. If you want to learn more, please attend one of our regular meetings held at 6 P.M. on the first Tuesday of each month at the Town Hall.

The Town of Potts Camp routinely monitors for constituents in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1<sup>st</sup> to December 31<sup>st</sup>, 2016. As water travels over the land or underground, it can pick up substances or contaminants such as microbes, inorganic and organic chemicals, and radioactive substances. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

**Action Level** - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

**Treatment Technique (TT)** - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

**Maximum Contaminant Level** - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

**Maximum Contaminant Level Goal** - The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

**MRDL** - Maximum residual disinfectant level. The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants

\*Most recent sample. No sample was required in 2016.

#### 0470004

We are required to monitor your drinking water for specific contaminants on a monthly basis. Results of regular monitoring are an indicator whether or not our drinking water meets health standards. During January and February 2016, we did not monitor or test bacteriological or chlorine contaminants and therefore cannot be sure of the quality of our drinking water. Also we took 2 samples for coliform bacteria during January 2016 and 3 for coliform bacteria in March 2016. These samples showed the presence of coliform bacteria. The standard is that no more than 1 sample per month of our samples may do so.

#### 0050019

We routinely monitor for the presence of drinking water contaminants. We took 3 samples for coliform bacteria during January 2016 and 2 for coliform bacteria in March 2016. These samples showed the presence of coliform bacteria. The standard is that no more than 1 sample per month of our samples may do so.

During 2016 we were required to make available to you the Consumer Confidence Report (CCR) by July 1, 2016. We failed to do this by the deadline but have since been returned to compliance.

#### \*\*\*Additional Information for Lead\*\*\*

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The Town of Potts Camp is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. Please contact 601-576-7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man-made. These substances can be inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immunocompromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Your CCR will not be mailed to you however, you may obtain a copy from the Town Hall. Please call 662-333-7285 if you have any questions.
