

# 2017 CERTIFICATION RECEIVED - WATER SUPPLY

Consumer Confidence Report (CCR) 2018 JUN -4 AM 9:05

Sylvarena Water Association

Public Water System Name

0650010

List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community Public Water System (PWS) to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the PWS, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must email, fax (but not preferred) or mail, a copy of the CCR and Certification to the MSDH.** Please check all boxes that apply.

Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*

- Advertisement in local paper *(Attach copy of advertisement)*
- On water bills *(Attach copy of bill)*
- Email message *(Email the message to the address below)*
- Other \_\_\_\_\_

Date(s) customers were informed: \_\_\_ / \_\_\_ / 2018    \_\_\_ / \_\_\_ / 2018    \_\_\_ / \_\_\_ / 2018

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used \_\_\_\_\_

Date Mailed/Distributed: \_\_\_ / \_\_\_ / \_\_\_

CCR was distributed by Email *(Email MSDH a copy)*      Date Emailed: \_\_\_ / \_\_\_ / 2018

- As a URL \_\_\_\_\_ *(Provide Direct URL)*
- As an attachment
- As text within the body of the email message

CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: Smith County Reformer

Date Published: 05 / 16 / 2018

CCR was posted in public places. *(Attach list of locations)*      Date Posted: \_\_\_ / \_\_\_ / 2018

CCR was posted on a publicly accessible internet site at the following address: \_\_\_\_\_ *(Provide Direct URL)*

## CERTIFICATION

I hereby certify that the CCR has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the PWS officials by the Mississippi State Department of Health, Bureau of Public Water Supply

Mack Lee

Name/Title *(President, Mayor, Owner, etc.)*

Date

## Submission options *(Select one method ONLY)*

**Mail:** (U.S. Postal Service)  
MSDH, Bureau of Public Water Supply  
P.O. Box 1700  
Jackson, MS 39215

**Email:** [water.reports@msdh.ms.gov](mailto:water.reports@msdh.ms.gov)

**Fax:** (601) 576 - 7800

**\*\*Not a preferred method due to poor clarity\*\***

**CCR Deadline to MSDH & Customers by July 1, 2018!**

*Annual Drinking Water Quality Report  
Sylvarena Water Association  
PWS ID # 0650010  
May 2018*

We're pleased to present to you this year's Annual Water Quality Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source consists of wells that draw from the Sparta Sand Aquifer.

A source water assessment has been completed for the water supply to determine the overall susceptibility of its drinking water to identify potential sources of contamination. The water supply for Sylvarena Water Association received a lower susceptibility ranking to contamination.

We're pleased to report that our drinking water meets all federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact Mack Lee at 601-764-2655. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the 1<sup>st</sup> Monday of each month at 7:00 pm. Please call the office for meeting location.

Sylvarena Water Association routinely monitors for constituents in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1<sup>st</sup> to December 31<sup>st</sup>, 2017. As water travels over the land or underground, it can pick up substances or contaminants such as microbes, inorganic and organic chemicals, and radioactive substances. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

**Action Level** - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

**Treatment Technique (TT)** - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

**Maximum Contaminant Level** - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

**Maximum Contaminant Level Goal** - The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

## TEST RESULTS

Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL	Unit Measurement	MCLG	MCL	Likely Source of Contamination
<b>Inorganic Contaminants</b>								
10. Barium	N	2016*	.0009	No Range	ppm	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
14. Copper	N	1/1/15 to 12/31/17	0.3	None	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
16. Fluoride	N	2016*	0.172	No Range	ppm	4	4	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
17. Lead	N	1/1/15 to 12/31/17	1	None	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits
<b>Disinfectants &amp; Disinfectant By-Products</b>								
Chlorine (as Cl <sub>2</sub> )	N	1/1/17 to 12/31/17	2.0	1.0 to 2.0	ppm	4	4	Water additive used to control microbes
73. TTHM [Total tri-halomethanes]	N	2016*	48.8	No Range	ppb	0	80	By-product of drinking water chlorination
HAA5	N	2016*	21.0	No Range	ppb	0	60	By-product of drinking water chlorination

\* Most recent sample results available

### Additional Information for Lead

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Sylvarena Water Association is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing for \$10 per sample. Please contact 601.576.7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

This report is being published in the paper and will not be mailed. Please call our office if you would like a copy or if you have any questions.

**JAL DRINKING WATER  
QUALITY REPORT  
NA WATER ASSOCIATION  
PWS ID # 0650010  
MAY 2018**

nt to you this year's Annual Water Quality Report. This  
nform you about the quality water and services we deliver  
constant goal is to provide you with a safe and dependable  
ter. We want you to understand the efforts we make to  
ie water treatment process and protect our water resources.  
ensuring the quality of your water. Our water source consists  
n the Sparta Sand Aquifer.

ment has been completed for the water supply to determine  
ty of its drinking water to identify potential sources of  
ater supply for Sylvarena Water Association received a lower  
to contamination.

t that our drinking water meets all federal and state

ons about this report or concerning your water utility, please  
01-764-2655. We want our valued customers to be informed  
y. If you want to learn more, please attend any of our  
eetings. They are held on the 1st Monday of each month at  
e office for meeting location.

iation routinely monitors for constituents in your drinking  
leral and State laws. This table shows the results of our  
iod of January 1st to December 31st, 2017. As water travels  
ground, it can pick up substances or contaminants such  
and organic chemicals, and radioactive substances. All  
ing bottled drinking water, may be reasonably expected to  
mounts of some constituents. It's important to remember  
ese constituents does not necessarily pose a health risk.

nd many terms and abbreviations you might not be familiar  
r understand these terms we've provided the following

centration of a contaminant which, if exceeded, triggers  
uirements which a water system must follow.

TT) - A treatment technique is a required process intended  
contaminant in drinking water.

nt Level - The "Maximum Allowed" (MCL) is the highest  
that is allowed in drinking water. MCLs are set as close to  
using the best available treatment technology.

nt Level Goal - The "Goal" (MCLG) is the level of a  
ig water below which there is no known or expected risk to  
or a margin of safety.

**PROOF OF PUBLICATION**

**The State of Mississippi,  
County of Smith**

PERSONALLY CAME before me, the undersigned a  
Notary Public in and for SMITH COUNTY,  
MISSISSIPPI the OFFICE CLERK of the SMITH  
COUNTY REFORMER, a newspaper published in the  
Town of Raleigh, Smith County, in said State, who being  
duly sworn, deposes and says that the SMITH COUNTY  
REFORMER is a newspaper as defined and prescribed in  
§ 13-3-31 of the Mississippi Code 1972 Annotated and  
that the publication of a notice, of which the annexed is a  
copy, in the matter of

Water Report

has been made in said paper 1 times consecutively,  
to-wit:
