

2017 CERTIFICATION JUN 11 AM 9: 54
Consumer Confidence Report (CCR)

Helix Water Assoc
 Public Water System Name
540008

List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community Public Water System (PWS) to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the PWS, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must email, fax (but not preferred) or mail, a copy of the CCR and Certification to the MSDH.** Please check all boxes that apply.

Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*

- Advertisement in local paper *(Attach copy of advertisement)*
- On water bills *(Attach copy of bill)*
- Email message *(Email the message to the address below)*
- Other _____

Date(s) customers were informed: ____ / ____ / 2018 ____ / ____ / 2018 ____ / ____ / 2018

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____

Date Mailed/Distributed: ____ / ____ / ____

CCR was distributed by Email *(Email MSDH a copy)*

Date Emailed: ____ / ____ / 2018

- As a URL _____ *(Provide Direct URL)*
- As an attachment
- As text within the body of the email message

CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: Panther

Date Published: 06/05/18

CCR was posted in public places. *(Attach list of locations)*

Date Posted: ____ / ____ / 2018

CCR was posted on a publicly accessible internet site at the following address:

_____ *(Provide Direct URL)*

CERTIFICATION

I hereby certify that the CCR has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the PWS officials by the Mississippi State Department of Health, Bureau of Public Water Supply

PROOF OF PUBLICATION

THE STATE OF MISSISSIPPI COUNTY OF PANOLA

DAVID MAGEE, personally appeared before me, the undersigned authority in and for said County and State, and states on oath that he is the CLERK of The Panolian, a newspaper published in the City of Batesville, State and County aforesaid, and having a general circulation in said county, and that the publication of the notice, a copy of which is hereto attached, has been made in said paper 1 consecutive times, to wit:

- Volume No. 138 on the 5th day of JUNE, 2018.
- Volume No. 138 on the _____ day of _____, 2018.
- Volume No. 138 on the _____ day of _____, 2018.
- Volume No. 138 on the _____ day of _____, 2018.

affiant

Sworn and subscribed before me, this the 5th day of JUNE, 2018.

Scholars named at MUW

COLUMBUS - Mississippi University for Women has recognized students who have been named to the President's List for the Spring 2018 semester.

In order to qualify for the President's List, the student must be enrolled full-time and have a quality point average of 4.0 on a 4.0 scale for the semester.

The university congratulates those students that choose to dare, dream and

achieve. They are: Lauren Axthelm of Sardis, NaTasha Johnson of Batesville, and Carol Watson of Como.

The W has also recognized students who have been named to the Dean's List for the Spring 2018 semester.

Those on the Dean's List have earned a quality point average of 3.5 to 3.99 on a 4.0 scale. They are: Dana Hall of Batesville, Megan Barnes of Sardis, and Stephanie Barksdale of Courtland.

2017 Annual Drinking Water Quality Report

Hebron Water Association

PWS ID # 0540006

May 30, 2018

We're pleased to present to you this year's Annual Water Quality Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source is three wells, one drawing from the Middle Wilcox Aquifer and the other ones drawing from the Lower Wilcox Aquifer.

If you have any questions about this report or concerning your water utility, please contact Donald Phelps at 662-609-3637. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on second Tuesday of each quarter at 7:00 p.m. at the water site on Ballentine Road in Sardis.

Hebron Water Association routinely monitors for constituents in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1st to December 31st, 2017. As water travels over the land or underground, it can pick up substances or contaminants such as microbes, inorganic and organic chemicals, and radioactive substances. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Treatment Technique (TT) - A treatment technique is a required process intended to reduce the level of a contaminant in drinking water.

Maximum Contaminant Level - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal - The "Goal" (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Parts per million (ppm) - Milligrams per liter (mg/L).

Parts per billion (ppb) - Micrograms per liter (ug/L).

TEST RESULTS								
Contaminant	Violated on Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/MCL	Unit Measurement	MCL G	MCL	Primary Source of Contamination
Disinfectants & Disinfection By-Products								
(There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.)								
Chlorine (as Cl ₂) (ppm)	N	2017	1.0	0.60-1.10	Ppm	4	4	Water additive used to control microbes
Inorganic Contaminants								
Barium	N	*2016	.0082	.0074 - .0082	Ppm	2	2	Discharge of drilling water; discharge from metal refineries; erosion of natural deposits
Copper	N	*2014	0.2	No-range	Ppm	1.3	AI-13	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
Chromium	N	*2016	2.6	1.4-2.6	Ppb	100	100	Discharge from steel and pulp mills; erosion of natural deposits
Lead	N	2017	3.0	No-range	ppb	0	AI-1.5	Corrosion of household plumbing systems; erosion of natural deposits
Nitrate (as nitrogen)	N	2017	0.24	No-range	Ppb	0	100	By-product of drinking water chlorination
Fluoride	N	*2016	.176	.166-.176	Ppm	1	1	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
Volatile Organic Contaminants								
HAAs	N	*2016	4.0	No-range	ppb	0	60	By-product of drinking water chlorination
THM (Total trihalomethanes)	N	*2016	12.3	No-range	Ppm	0	100	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories

*Most recent sample. No sample was required in 2017

*****Additional Information for Lead*****

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Hebron Water Association is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. Please contact 601-576-7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immunocompromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care

providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Your CCR will not be mailed to you however; you may obtain a copy from the water office. Please call 662-563-5189 if you have any questions.
