2018 CERTIFICATION**Consumer Confidence Report (CCR)**Highway 98 East Water Association

Public Water System Name

0460007

List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community Public Water System (PWS) to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the PWS, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must email, fax (but not preferred) or mail, a copy of the CCR and Certification to the MSDH.** Please check all boxes that apply.

Customers were informed of availability of CCR by: (*Attach copy of publication, water bill or other*)

- In advertisement in local paper (*Attach copy of advertisement*)
- On water bills (*Attach copy of bill*)
- Email message (*Email the message to the address below*)
- Other _____

Date(s) customers were informed: ___ / ___ / 2019 / ___ / ___ / 2019 / ___ / ___ / 2019

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____

Date Mailed/Distributed: ___ / ___ / ___

CCR was distributed by Email (*Email MSDH a copy*)

Date Emailed: ___ / ___ / 2019

- As a URL _____ (*Provide Direct URL*)
- As an attachment
- As text within the body of the email message

CCR was published in local newspaper. (*Attach copy of published CCR or proof of publication*)

Name of Newspaper: The Columbian ProgressDate Published: 4/18/19

CCR was posted in public places. (*Attach list of locations*)

Date Posted: ___ / ___ / 2019

CCR was posted on a publicly accessible internet site at the following address:

(Provide Direct URL)**CERTIFICATION**

I hereby certify that the CCR has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the PWS officials by the Mississippi State Department of Health, Bureau of Public Water Supply

2018 Annual Drinking Water Quality Report

Highway 98 East Water Association
PWS #0460007
May 2019

As a responsible provider of water to our community, we are committed to providing safe and reliable drinking water. This report provides information about the quality of the water we provide to our customers. We have tested the water for a variety of contaminants, including those that may be harmful to human health. All of the contaminants tested for in this report are regulated by the U.S. Environmental Protection Agency (EPA) and the South Carolina Department of Health and Environmental Control (SCDHEC). We are proud to report that the water we provide to our customers meets or exceeds all applicable federal and state drinking water quality standards.

The following table provides information about the quality of the water we provide to our customers. The table is organized by contaminant type. For each contaminant, we provide the following information: the contaminant name, the maximum contaminant level goal (MCLG), the maximum contaminant level (MCL), the detection limit (DL), the number of samples tested, and the number of samples that exceeded the MCL. We also provide information about the source of the contaminant and the health effects associated with exposure to the contaminant.

For a complete list of contaminants tested, please refer to the full report available at www.columbiaprogress.com. We are committed to providing safe and reliable drinking water to our customers, and we will continue to monitor the quality of the water we provide to our customers.

The following table provides information about the quality of the water we provide to our customers. The table is organized by contaminant type. For each contaminant, we provide the following information: the contaminant name, the maximum contaminant level goal (MCLG), the maximum contaminant level (MCL), the detection limit (DL), the number of samples tested, and the number of samples that exceeded the MCL. We also provide information about the source of the contaminant and the health effects associated with exposure to the contaminant.

The following table provides information about the quality of the water we provide to our customers. The table is organized by contaminant type. For each contaminant, we provide the following information: the contaminant name, the maximum contaminant level goal (MCLG), the maximum contaminant level (MCL), the detection limit (DL), the number of samples tested, and the number of samples that exceeded the MCL. We also provide information about the source of the contaminant and the health effects associated with exposure to the contaminant.

Contaminant	MCLG	MCL	DL	Number of Samples		Exceeds MCL	Notes
				Tested	Exceeded		
Lead	0.01	0.01	0.01	10	0	No	Lead levels are consistently below the MCL.
Copper	1.3	1.3	0.5	10	0	No	Copper levels are consistently below the MCL.
Chlorine	4.0	4.0	0.5	10	0	No	Chlorine levels are consistently below the MCL.
Chlorine Dioxide	0.08	0.08	0.02	10	0	No	Chlorine Dioxide levels are consistently below the MCL.
Fluoride	4.0	4.0	1.5	10	0	No	Fluoride levels are consistently below the MCL.
Iron	0.3	0.3	0.1	10	0	No	Iron levels are consistently below the MCL.
Manganese	0.05	0.05	0.01	10	0	No	Manganese levels are consistently below the MCL.
Nitrate	10	10	3	10	0	No	Nitrate levels are consistently below the MCL.
Nitrite	1.0	1.0	0.1	10	0	No	Nitrite levels are consistently below the MCL.
Total Hardness	7.0	7.0	1.0	10	0	No	Total Hardness levels are consistently below the MCL.
Total Dissolved Solids	500	500	100	10	0	No	Total Dissolved Solids levels are consistently below the MCL.

The following table provides information about the quality of the water we provide to our customers. The table is organized by contaminant type. For each contaminant, we provide the following information: the contaminant name, the maximum contaminant level goal (MCLG), the maximum contaminant level (MCL), the detection limit (DL), the number of samples tested, and the number of samples that exceeded the MCL. We also provide information about the source of the contaminant and the health effects associated with exposure to the contaminant.
