2018 CERTIFICATION

Consumer Confidence Report (CCR)

Tiptersville Development Association, Inc.

Public Water System Name

0700010

List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community Public Water System (PWS) to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the PWS, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must email, fax (but not preferred) or mail, a copy of the CCR and Certification to the MSDH.** Please check all boxes that apply.

Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*

- Advertisement in local paper *(Attach copy of advertisement)*
- On water bills *(Attach copy of bill)*
- Email message *(Email the message to the address below)*
- Other _____

Date(s) customers were informed: 4 / 17 / 2019 / _____ / _____ / _____ / 2019

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____

Date Mailed/Distributed: _____ / _____ / _____

CCR was distributed by Email *(Email MSDH a copy)* Date Emailed: _____ / _____ / 2019

- As a URL _____ *(Provide Direct URL)*
- As an attachment
- As text within the body of the email message

CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: Southern Sentinel

Date Published: 4 / 17 / 2019

CCR was posted in public places. *(Attach list of locations)* Date Posted: 4 / 24 / 2019

CCR was posted on a publicly accessible internet site at the following address: _____ *(Provide Direct URL)*

CERTIFICATION

I hereby certify that the CCR has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the PWS officials by the Mississippi State Department of Health, Bureau of Public Water Supply

CCR Deadline to MSDH & Customers by July 1, 2019!

Inorganic Contaminants								
10. Barium	N	2018	.2057	.1981 - .2057	ppm	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
13. Chromium	N	2018	2.1	2 – 2.1	ppb	100	100	Discharge from steel and pulp mills; erosion of natural deposits
14. Copper	N	2015/17*	.1	0	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
16. Fluoride	N	2018	.14	.1 – 1.4	ppm	4	4	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
17. Lead	N	2015/17*	0	0	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits
Disinfection By-Products								
Chlorine	N	2018	.5	.5 – .5	ppm	0	MRDL = 4	Water additive used to control microbes

* Most recent sample. No sample required for 2018.

As you can see by the table, our system had no violations. We're proud that your drinking water meets or exceeds all Federal and State requirements. We have learned through our monitoring and testing that some contaminants have been detected however the EPA has determined that your water IS SAFE at these levels.

We are required to monitor your drinking water for specific contaminants on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. In an effort to ensure systems complete all monitoring requirements, MSDH now notifies systems of any missing samples prior to the end of the compliance period.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Our water system is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing. Please contact 601.576.7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1.800.426.4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline 1.800.426.4791.

The Tiplersville Development Association works around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.

Diversicare patients receive Easter baskets

Volunteers prepared the Easter baskets full of eggs, candy and other items for patients at Diversicare last Friday, April 12. Patients from Diversicare, from left: Frances Corder, Mary Luttrell, Ezra Aldridge, Eva Jones, Nellie Wallace, U. Estifer Jones and Linda Stewart were recipients of Easter baskets that were hand-delivered to call patients by a group of volunteers, spear-headed by Robbi Duckworth. The baskets were filled with Easter eggs, candy and other surprises for all of the current patients at the facility.

for their service, as well as allow that the community cares and supports what our armed forces have done for our country. The park will feature the United States Seal, the U.S. flag, a monument for each of our country's armed conflicts, a flag wall with flags for all branches of the military, a silhouette

groundwork and concrete and then the City will advertise for bids on the work. Once the work is completed, the tank will be able to be moved to the site. Brick pavers are being sold to decorate the walkway entrance of the park, as well as being used to recognize any past and

present veterans from all 50 brick have been sold so far but they hope to sell 5,000. The park will have a room for 5,000 pavers. The bricks cost \$50 for a small brick and \$100 for a large brick. Marsalis said after the groundwork and concrete is completed the next step

21 Annual Drinking Water Quality Report
Tippah County Development Association
April 2019

Water is essential to our life. It is a precious commodity. The water in our area is clean and safe to drink. We are proud to provide you with the best water possible. We are committed to providing you with the highest quality water possible. We are committed to providing you with the highest quality water possible.

Sounds You Love

INTRODUCING OUR BEST TECHNOLOGY EVER.

Our most natural sound quality.
 Your ears' more processing power. 1 GENIUSm 3.0 technology delivers listening so natural, you might just say you have hearing aids in your ears.

Life's better when you're more connected.
 Any telephone conversations, music and streaming in high-quality sound, streamed directly to your GENIUSm 3.0 hearing aids.

Endless options to fit your lifestyle.

Miracle-Ear hearing aids come in a variety of sizes and styles, from the nearly invisible to the super powerful, the possibilities are endless.

Water in Georgia by EPA

The primary reason for contamination in the drinking water supply is the presence of lead pipes. The EPA issued a rule in 1991 that required the replacement of lead pipes by the end of 2010. In cases where replacement is not possible, the EPA requires that the water be treated to remove lead. This is done by adding a chemical called sodium bisulfite to the water. This chemical reacts with the lead in the pipes to form a harmless compound that can be filtered out. The EPA also requires that the water be treated to remove lead from public water systems. This is done by adding a chemical called sodium bisulfite to the water. This chemical reacts with the lead in the pipes to form a harmless compound that can be filtered out.

Advisory Level - The concentration of a contaminant is such that, if consumed, ingestion, treatment or other requirements within a water system may be warranted. This level is not a health risk, but it indicates that the water may contain a contaminant at a level that could be a health risk.

Maximum Contaminant Level (MCL) - The "Maximum Allowable" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set to protect the public health using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The "Best" (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary to control microbial contamination.

Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contamination.

Units - One part per million (ppm) is one part per million (ppm) - one part per million corresponds to one minute in two years of a single penny in \$10,000.

Units - One part per million (ppm) is one part per million (ppm) - one part per million corresponds to one minute in two years of a single penny in \$10,000.

TEST RESULTS

Contaminant	Unit	City	Year	Level (ppm)	MCL (ppm)	MCLG (ppm)	MRDL (ppm)	MRDLG (ppm)
Inorganic Contaminants								
1. Arsenic	ppm	2013	2017	1.01	0.05	0.01	0.05	0.01
2. Chloride	ppm	2013	2.1	2-2.1	100	100	100	100
3. Copper	ppm	2013	1.1	0	1.5	1.5	1.5	1.5
4. Fluoride	ppm	2013	1.1	1-1.5	4	4	4	4
5. Lead	ppm	2013	0	0	0	0	0	0

Disinfection By-Products

Contaminant	Unit	City	Year	Level (ppm)	MCL (ppm)	MCLG (ppm)	MRDL (ppm)	MRDLG (ppm)
1. Trihalomethanes	ppm	2013	0.1	0.1	0.1	0.1	0.1	0.1
2. Haloacetic acids	ppm	2013	0.1	0.1	0.1	0.1	0.1	0.1
3. Haloacetonitriles	ppm	2013	0.1	0.1	0.1	0.1	0.1	0.1
4. Haloacetylaldehydes	ppm	2013	0.1	0.1	0.1	0.1	0.1	0.1

As you can see by the table, our system had no violations. Why? Because our drinking water meets or exceeds all Federal and State requirements. We have learned through our monitoring and testing that some contaminants have been included because the EPA has determined that your water is safe to drink.

If present, certain levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water can be reduced by flushing your tap water for 30 seconds before drinking. You can also use bottled water for drinking and cooking. If you are concerned about lead in your water, you may wish to have your water tested. For more information, contact the U.S. Environmental Protection Agency at 1-800-426-4633.

The Tri-State Development Association would like to thank the staff for providing quality water to every tap. We are proud of our customers and the product we provide, which sets the standard for our industry. For more information, contact us at 837-8111.
