2018 CERTIFICATION

Consumer Confidence Report (CCR)

Days Water Association
Public Water System Name

0170005
List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community Public Water System (PWS) to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the PWS, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must email, fax (but not preferred) or mail, a copy of the CCR and Certification to the MSDH.** Please check all boxes that apply.

- Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*
 - Advertisement in local paper *(Attach copy of advertisement)*
 - On water bills *(Attach copy of bill)*
 - Email message *(Email the message to the address below)*
 - Other _____

Date(s) customers were informed: 6/28/2019 7/9/2019 7/11/2019

- CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____

Date Mailed/Distributed: / /

- CCR was distributed by Email *(Email MSDH a copy)* Date Emailed: / / 2019 *(Provide Direct URL)*
 - As a URL _____
 - As an attachment _____
 - As text within the body of the email message _____

- CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: DeSoto Times Tribune

Date Published: 7/9/2019 + 7-11-19

- CCR was posted in public places. *(Attach list of locations)* Date Posted: 7/9/2019

- CCR was posted on a publicly accessible internet site at the following address: Hernando Public Library *(Provide Direct URL)*

CERTIFICATION
I hereby certify that the CCR has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the PWS officials by the Mississippi State Department of Health, Bureau of Public Water Supply

2018 Annual Drinking Water Quality Report
 Days Water Association
 PWS#: 0170005
 May 2019

We're pleased to present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source is from wells drawing from the Meridian Upper Wilcox and Sparta Sand Aquifer.

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identified potential sources of contamination. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The wells for the Days Water Association have received a moderate susceptibility ranking to contamination.

If you have any questions about this report or concerning your water utility, please contact Jay Sartain at 662.781.0350. We want our valued customers to be informed about their water utility. If you want to learn more, please attend the meeting scheduled for 11-11-19 at 7:00 PM at the Hinds Chapel United Methodist, 5105 Church Rd, Lake Cormorant, MS 38641.

We routinely monitor for contaminants in your drinking water according to Federal and State laws. This table below lists all of the drinking water contaminants that were detected during the period of January 1st to December 31st, 2018. In cases where monitoring wasn't required in 2018, the table reflects the most recent results. As water travels over the surface of land or underground, it dissolves naturally occurring minerals and, in some cases, radioactive materials and can pick up substances or contaminants from the presence of animals or from human activity; microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm-water runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm-water runoff, and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations and septic systems; radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some contaminants. It's important to remember that the presence of these contaminants does not necessarily indicate that the water poses a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Maximum Contaminant Level (MCL) - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The "Goal" (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary to control microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a drinking water disinfectant below which there is no known or expected risk of health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Parts per million (ppm) or Milligrams per liter (mg/l) - one part per million corresponds to one minute in two years or a single penny in \$10,000.

Parts per billion (ppb) or Micrograms per liter - one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

TEST RESULTS								
Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL	Unit Measure -ment	MCLG	MCL	Likely Source of Contamination
Inorganic Contaminants								
10. Barium	N	2018	.0318	No Range	ppm	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
13. Chromium	N	2018	2.2	No Range	ppb	100	100	Discharge from steel and pulp mills; erosion of natural deposits

16. Fluoride**	N	2018	7.02	No Range	ppm	4	4	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
17. Lead	N	2015/17*	1	0	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits
19. Nitrate (as Nitrogen)	N	2018	.21	No Range	ppm	10	10	Runoff from fertilizer use; leaching from septic tanks, sewage; erosion of natural deposits
Disinfection By-Products								
81. HAA5	N	2018	5	No Range	ppb	0	60	By-Product of drinking water disinfection.
Chlorine	N	2018	1.5	1 – 1.7	mg/l	0	MRDL = 4	Water additive used to control microbes

* Most recent sample. No sample required for 2018.

** Fluoride level is routinely adjusted to the MS State Dept of Health's recommended level of 0.6 - 1.2 mg/l

We are required to monitor your drinking water for specific contaminants on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. We did complete the monitoring requirements for bacteriological sampling that showed no coliform present. In an effort to ensure systems complete all monitoring requirements, MSDH now notifies systems of any missing samples prior to the end of the compliance period.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Our water system is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing. Please contact 601.576.7582 if you wish to have your water tested.

To comply with the "Regulation Governing Fluoridation of Community Water Supplies", the DAYS WATER ASSOCIATION is required to report certain results pertaining to fluoridation of our water system. The number of months in the previous calendar year in which average fluoride sample results were within the optimal range of 0.6-1.2 ppm was 8. The percentage of fluoride samples collected in the previous calendar year that was within the optimal range of 0.6-1.2 ppm was 73%.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1.800.426.4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline 1.800.426.4791.

The Days Water Association works around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.

2018 Annual Drinking Water Quality Report
Days Water Association
PWS# 0170305
May 2019

We're pleased to present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality of water and ensure we deliver to you every day. This quality report is provided to you with a goal to assure you of the quality of the water you drink. We want you to understand the efforts we make to consistently improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water comes from wells flowing from the Middle and Upper Wood and Sand Aquifer.

The source water assessment has been completed for our public water system to determine the overall susceptibility of all drinking water supply to identified potential sources of contamination. A report containing detailed information on how the susceptibility of different sources of water has been determined for our public water system and is available for viewing upon request. The analysis for the Days Water Association has revealed a moderate susceptibility to contamination.

If you have any questions about this report or concerning your water quality, please contact Jay Jordan at 662-981-6380. We welcome your feedback comments to be forwarded about this water quality report. If you cannot attend the meeting scheduled for 11:15 AM on 7/18/19 at the Hinds Chapel United Methodist Church, 5105 Church St., Lake Cormier, MS 39041.

We routinely monitor for contaminants in your drinking water according to Federal and State laws. This table below lists all of the drinking water contaminants that were detected during the period of January 1st to December 31st, 2018. In cases where monitoring wasn't required by MDEQ, the table includes the most recent results. As a water source on the surface of land or underground, it contains naturally occurring minerals and in some cases, radioactive materials and can pick up substances as it moves from the source of origin or from man-made activities. Contaminants, such as chemicals and metals, that may come from sewage treatment plants, industrial processes, agricultural activities, and other man-made activities include: nitrate, nitrite, and other nitrogen compounds; lead, copper, iron, manganese, and other metals; and other substances such as herbicides, pesticides, and other chemicals. Some contaminants, such as herbicides, pesticides, and other chemicals, are not naturally occurring but are the result of human activities. Some contaminants, such as herbicides, pesticides, and other chemicals, are not naturally occurring but are the result of human activities. Some contaminants, such as herbicides, pesticides, and other chemicals, are not naturally occurring but are the result of human activities.

In the table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Maximum Contaminant Level Goal (MCLG) - The "Maximum Allowed (MCL)" is the highest level of a contaminant that is allowed in drinking water. MCLGs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level (MCL) - The "MCL" is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLs are set at a level of safety.

Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is concern of disinfectant by-products which are considered necessary to control microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Perchlorate (ppm) or Milligrams per Gallon (mg/L) - one part per million corresponds to one ounce in two years or a single penny in \$10,000.

Parts per billion (ppb) or Milligrams per Gallon (mg/L) - one part per billion corresponds to one ounce in 2,000 years, or a single penny in \$10,000,000.

TEST RESULTS

Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detection or Spacing (MCL/MCLG)	Unit	MDEQ Limit	MCL	Only Seasonal Contamination
Inorganic Contaminants								
12. Boron	N	2/18	0.018	No Range	ppm	2	2	Discharge of this product, discharge from point of view, known, industrial discharges
13. Chromium	N	2/18	2.7	No Range	ppm	100	100	Discharge from point of view, discharge from industrial discharges
15. Fluoride	N	2/18	7.02	No Range	ppm	4	4	Excess of natural deposits, water additive which promotes strong teeth, discharge from fertilizer and aluminum industries
17. Lead	N	2/18/17	1	No Range	ppb	0	15	Corrosion of household plumbing systems, erosion of natural deposits
18. Nitrate as Nitrogen	N	2/18	21	No Range	ppm	10	10	Runoff from fertilizers, leaching from septic tanks, sewage, erosion of natural deposits
Disinfection By-Products								
61. HAA6	N	2/18	5	No Range	ppm	0	0.5	By-Product of drinking water disinfection
Chloro	N	2/18	1.6	1-1.7	mg/L	0	MRDL=4	Water additive used to control microbes

* The current MCLG for HAA6 is 0.1 mg/L. The current MCL for HAA6 is 0.1 mg/L. The current MCLG for Chloro is 0.1 mg/L. The current MCL for Chloro is 0.1 mg/L.

We are required to monitor your drinking water for specific contaminants on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. We do complete the monitoring requirements for bacteriological sampling that

7525 Notice of Sale

SUBSTITUTED TRUSTEE'S NOTICE OF SALE
STATE OF MISSISSIPPI
COUNTY OF DeSoto
WHEREAS, on the 10th day of May, 2012, Jesse V. Mangrum, a single person, executed and delivered a certain Deed of Trust unto Wells Fargo Escrow Co., LLC, Trustee for Wells Fargo Home Mortgage Inc., Beneficiary, to secure an indebtedness therein described which Deed of Trust is recorded in the Office of the Chancery Clerk of DeSoto County, Mississippi in Book 5504 at Page 97, and
WHEREAS, by various assignments on record said Deed of Trust was ultimately assigned to Origin Bank by instrument recorded in the Office of the Chancery Clerk in Book 4698 at Page 180, and
WHEREAS, on the 30th day of May, 2019, the Holder of said Deed of Trust substituted and appointed Dean Morris, LLC as Substituted Trustee by instrument recorded in the Office of the Chancery Clerk in Book 4737 at Page 517, and
WHEREAS, default having been made in the payments of the indebtedness secured by the said Deed of Trust and the holder of said Deed of Trust, having requested the undersigned so to do, on the 7th day of July, 2019, I will during the lawful hours of the day, at public outcry, offer for sale and will sell, at the East front floor of Courthouse located at 2535 Hwy. 51 South of the DeSoto County Courthouse at Hernando, Mississippi, for cash to the highest bidder, the following described land and property situated in DeSoto County, Mississippi, to-wit:
Lot 32:
Legal Description of a 2.01 acre (more or less) tract of land being located in the southeast quarter of Section 29, Township 3 South, Range 2 West, DeSoto County, Mississippi, being part of the Original Daniels Estates Subdivision as recorded in Deed Book 202, Page 39 in the Office of the Chancery Clerk of DeSoto County, Mississippi, being more particularly described as follows:
Commencing at the southeast corner of Section 29, Township 3 South, Range 2 West, DeSoto County, Mississippi, thence S 87 Degrees 02 Minutes 00 Seconds West a distance of 914.20 feet, thence N05 Degrees 47 Minutes 48 Seconds West a distance of 607.08 feet to a 1/2 inch rebar set in the east line of Bluff Road 180 Feet right of way being the Point of Beginning, thence North 33 Degrees 11 Minutes 16 Seconds West along said east line, a distance of 578.51 feet to the point of curvature of a non-tangent curve, concave to the northeast, having a radius of 1082.92 feet, a central angle of 0 Degrees 48 Minutes 28 Seconds, and a chord of 153.72 feet bearing South 33 Degrees 11 Minutes 16 Seconds East thence northwesterly along said curve, a distance of 16.27 feet (3'-8 inch rebar set 2.66 feet east on line) thence North 87 Degrees 02 Minutes 00 Seconds East, a distance of 273.51 feet to a 3/8" rebar set, thence South 5 Degrees 47 Minutes 48 Seconds East a distance of 913.70 feet to the Point of Beginning said described tract containing 1.91 acres, more or less, as shown on survey by Michael Thomas Hensley of Hensley Land Surveying. I will only convey such title as is vested in me as Substituted Trustee.
WITNESS MY SIGNATURE

7525 Notice of Sale
WHEREAS, M & T Bank, the holder of the deed of trust, substituted McCrife Raymond Laibert Pierce, LLC as Trustee, as authorized by the terms thereof, by instrument recorded on June 18, 2019, and spread at large upon the records in the office of the aforesaid Chancery Clerk in Book 4744, Page 768, prior to the posting and publication of this notice; and
WHEREAS, default having been made in the terms and conditions of the deed of trust, and the entire debt secured thereby having been declared to be due and payable in accordance with the terms of the deed of trust, and the legal holder of said indebtedness, M & T Bank, has requested the undersigned Substitute Trustee to execute the deed of trust and sell said land, property and improvements in accordance with the terms of the deed of trust for the purpose of paying the sums due thereon, together with attorney's fees, Substituted Trustee's fees and expenses of sale;
THEREFORE, on July 23, 2019, the undersigned Substitute Trustee in the deed of trust, will offer for sale at public outcry and will sell to the highest bidder for cash within the hours of 11:00 a.m. and 4:00 p.m. (1) at the East front steps of the DeSoto County Courthouse in Hernando, Mississippi, the following described land, property and improvements lying and being situated in DeSoto County, Mississippi, to-wit:
The land lying and being situated in DeSoto County, Mississippi, more particularly described as follows, to-wit:
Lot 169, Section "E" Phase I, KINGDOM WEST SUBDIVISION situated in Section 23, Township 1 South, Range 2 West, City of Horn Lake, DeSoto County, Mississippi, as per plat thereof recorded in Plat Book 55, Page 48, in the Office of the Chancery Clerk of DeSoto County, Mississippi. The improvements thereon being known as 4183 Grass Blvd., Horn Lake, MS 38637 being five same lot parcels of ground which by Deed dated 03/08/1997 and recorded 08/12/1997 among the Land Records of DeSoto County, State of Mississippi in Book 202, page 188, was granted and conveyed by and between Reeves-Walkers, Inc., unto Johnny R. Marshall and Carolyn A. Marshall as tenants by the entirety with full rights of survivorship and net as tenants in common.
I WILL CONVEY only such title as is vested in the Substitute Trustee.
WITNESS MY SIGNATURE, this 7th day of June, 2019.
