2019 CERTIFICATION

Consumer Confidence Report (CCR)

Town of Shuqualak

Public Water System Name

52-0008

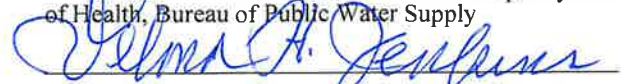

List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community Public Water System (PWS) to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the PWS, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must email, fax (but not preferred) or mail, a copy of the CCR and Certification to the MSDH.** Please check all boxes that apply.

- Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*
 - Advertisement in local paper *(Attach copy of advertisement)*
 - On water bills *(Attach copy of bill)*
 - Email message *(Email the message to the address below)*
 - Other _____
- Date(s) customers were informed: 5 / 7 / 2020 / / / 2020 / / / 2020
- CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____
Date Mailed/Distributed: / /
- CCR was distributed by Email *(Email MSDH a copy)* Date Emailed: / / 2020
 - As a URL _____ *(Provide Direct URL)*
 - As an attachment
 - As text within the body of the email message
- CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*
Name of Newspaper: The Beacon
Date Published: 5 / 7 / 2020
- CCR was posted in public places. *(Attach list of locations)* Date Posted: / / 2020
- CCR was posted on a publicly accessible internet site at the following address: _____
(Provide Direct URL)

CERTIFICATION

I hereby certify that the CCR has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the PWS officials by the Mississippi State Department of Health, Bureau of Public Water Supply

Name/Title (Board President, Mayor, Owner, Admin. Contact, etc.)
Dr. Velma H. Jenkins, Mayor

Fax: (601) 576 - 7800
****Not a preferred method due to poor clarity****

CCR Deadline to MSDH & Customers by July 1, 2020!

| Inorganic Contaminants | | | | | | | | |
|---------------------------------|---|----------|--------|-------------|------|------|----------|---|
| 8. Arsenic | N | 2019 | 2.1 | No Range | ppb | n/a | 10 | Erosion of natural deposits; runoff from orchards; runoff from glass and electronics production wastes |
| 10. Barium | N | 2019 | .235 | No Range | ppm | 2 | 2 | Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits |
| 14. Copper | N | 2015/17* | 0 | 0 | ppm | 1.3 | AL=1.3 | Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives |
| 16. Fluoride | N | 2019 | .199 | .198 - .199 | ppm | 4 | 4 | Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories |
| 17. Lead | N | 2015/17* | 0 | 0 | ppb | 0 | AL=15 | Corrosion of household plumbing systems, erosion of natural deposits |
| Disinfection By-Products | | | | | | | | |
| Chlorine | N | 2019 | 1.3 | .9 – 1.4 | mg/l | 0 | MDRL = 4 | Water additive used to control microbes |
| Unregulated Contaminants | | | | | | | | |
| Sodium | N | 2019 | 110000 | No Range | PPB | NONE | NONE | Road Salt, Water Treatment Chemicals, Water Softeners and Sewage Effluents. |

* Most recent sample. No sample required for 2019.

As you can see by the table, our system had no violations. We're proud that your drinking water meets or exceeds all Federal and State requirements. We have learned through our monitoring and testing that some constituents have been detected however the EPA has determined that your water IS SAFE at these levels.

We are required to monitor your drinking water for specific constituents on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. In an effort to ensure systems complete all monitoring requirements, MSDH now notifies systems of any missing samples prior to the end of the compliance period.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Our water system is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing. Please contact 601.576.7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1.800.426.4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline 1.800.426.4791.

The Town of Shuqualak works around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.

2019 Annual Drinking Water Quality Report
Town of Shuqualak
PWS# 0520008
April 2020

We're pleased to present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continuously improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water.

If you have any questions about this report or concerning your water utility, please contact Dr. Velma H. Jenkins, Mayor at 662.793.4675. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the first Tuesday of each month at 6:00 PM at the Town Hall.

Our water source is from wells drawing from the Gordo Formation and Massive Sand Aquifers. The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identify potential sources of contamination. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The wells for the Town of Shuqualak have received moderate susceptibility rankings to contamination.

We routinely monitor for contaminants in your drinking water according to Federal and State laws. This table below lists all of the drinking water contaminants that we detected during the period of January 1st to December 31st, 2019. In cases where monitoring wasn't required in 2019, the table reflects the most recent results. As water travels over the surface of land or underground, it dissolves naturally occurring minerals and, in some cases, radioactive materials and can pick up substances or contaminants from the presence of animals or from human activity, microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm-water runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm-water runoff, and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations and septic systems; radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily indicate that the water poses a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Maximum Contaminant Level (MCL) - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Contaminant Level Goal (MCLG) - The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary to control microbial contaminants.

Parts per million (ppm) or Milligrams per liter (mg/l) - one part per million corresponds to one minute in two years or a single penny in \$10,000.

Parts per billion (ppb) or Micrograms per liter - one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

| TEST RESULTS | | | | | | | | | |
|---------------------------------|---------------|----------------|----------------|--|--------------|------|----------|---|--|
| Contaminant | Violation Y/N | Date Collected | Level Detected | Range of Detects or # of Samples Exceeding MCL/MCL | Unit Measure | MCLG | MCL | Likely Source of Contamination | |
| Inorganic Contaminants | | | | | | | | | |
| 0. Arsenic | N | 2019 | 2.1 | No Range | ppb | n/a | 10 | Erosion of natural deposits; runoff from orchards; runoff from glass and electronics production wastes | |
| 10. Barium | N | 2019 | .235 | No Range | ppm | | 2 | Discharge of drilling water; discharge from metal refineries; erosion of natural deposits | |
| 14. Copper | N | 2015/17* | 0 | 0 | ppm | 1.3 | AL=1.3 | Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives | |
| 10. Fluoride | N | 2019 | 199 | .199 - .199 | ppm | 4 | 4 | Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories | |
| 17. Lead | N | 2015/17* | 0 | 0 | ppb | | AL=15 | Corrosion of household plumbing systems; erosion of natural deposits | |
| Disinfection By-Products | | | | | | | | | |
| Chlorine | N | 2019 | 1.3 | .9 - 1.4 | mg/l | 0 | MDRL = 4 | Water additive used to control microbes | |
| Unregulated Contaminants | | | | | | | | | |
| Sodium | N | 2019 | 110000 | No Range | PPB | NONE | NONE | Road Salt, Water Treatment Chemicals, Water Softeners and Sewage Effluents | |

IMPORTANT 2020 ELECTION DATES

Legal notices

**NOXUBEE COUNTY BOARD OF SUPERVISORS
INVITATION TO BID:**

Sealed bids will be received by the Board of Supervisors of Noxubee County, Mississippi in the Noxubee County Courthouse, Macon, MS until 10:00 A.M. on the 22nd day of May, 2020 and shortly thereafter opened for the Mowing of Right-of-ways of Prairie Point Road, Sandyland Road, and Deerbrook Road, located in District 1.

This is a Term Bid for Noxubee County, Mississippi. It begins at the date of acceptance and ends September 30, 2020.

Sealed bids must include the bidder's name, address, and telephone number. Any bid with missing information may be rejected. Bids will be opened at 10:00 a.m., Friday, May 22, 2020, in the board room.

The Noxubee County Board of Supervisors reserves the right to reject any or all bids and to waive bid formalities.

Further information may be obtained by calling Bryan Schimmel at 662-361-7808 and obtaining specifications from Alshautta Lyles, Comptroller at 662-728-6047, after May 7, 2020.

By order of the Board of Supervisors the 4th day of May, 2020.

/s/ James E. Coleman
James E. Coleman, President
NOXUBEE COUNTY BOARD OF SUPERVISORS

3-1p/191

NOTICE TO SELL SURPLUS/JUNK EQUIPMENT

Notice is hereby given that the Board of Supervisors of Noxubee County, Mississippi, has declared the following surplus/junk and to be sold by sealed bids to the highest and best bidder.

Noxubee County will receive sealed bids by 10:00 A.M. on Friday, May 22, 2020. The following used assets offered for sale to the highest bidder.

| USED ASSET | SERIAL/ID# |
|--|-------------------|
| 1. 2010 DODGE CHARGER | 2B3AA4CV9AH199247 |
| 2. CAVALIER 20FT CAMPER | 6481995 |
| 3. 2003 FORD CROWN VICTORIA CRUISER | 2FANP71W03X 19849 |
| 4. GUARDIAN NATURAL GAS GENERATOR | N/A |
| 5. 2008 FERRIS IS400 MOWER (FOR PARTS) | ASBET# 820116 |

Bids should remain good up to 10 days after bid date. Noxubee County reserves the right to take offers under advisement for further evaluation or to reject all offers. All assets will be available for pickup within 5 days by the successful bidder pending receipt of full payment.

Bidders should indicate the serial number above on bid. Bidders shall offer cash purchase price to be paid in full by certified cashier's check or money order prior to picking up vehicles at Noxubee County District Adult Detention Center.

It shall be incumbent upon each Bidder to understand that all assets are being sold in "as is condition" without warranty. The Noxubee County Board of Supervisors also reserves the right to accept or reject all bids.

Bids should be delivered to the Noxubee County Board of Supervisors, c/o Chancery Clerk at P.O. Box 147, 2832 Jefferson Street, Macon, Mississippi 39341, on or before 10:00 A.M. on May 22, 2020. The outside of the bid envelope should be marked "Bid for Purchase of Used Asset". Bids shall be opened and made public at 10:00 A.M. on May 22, 2020.

Any questions should be directed to Sheriff Tommy Roby at 662-726-5133. All assets will be available for viewing after Thursday, May 7, 2020.

By order of the Board of Supervisors on this the 4th day of May, 2020.

/s/ James Eddie Coleman, President
Noxubee County Board of Supervisors
2-1tc/336

CAREER OPPORTUNITY

The Noxubee County Tax Assessor & Tax Collector is currently looking for an Experienced Certified Property Tax Appraiser.

Job Description:

Requires ability to take physical measurements and make scale drawings of buildings and structures, walk on uneven terrain, bend or stoop to take measurements, and climb stairs in order to view physical or structural features of properties. Ability to learn to understand legal descriptions, plot maps and appraisal manuals. Develop and maintain good working relationships with staff and the general public. Ability to communicate effectively in writing and verbally. Duties includes but not limited to:

- Appraisal of Residential Property
- Appraisal of Personal Property
- Appraisal of Commercial Property
- Urban and Agricultural Land Valuation
- Maintenance and Updating Procedures
- Cost Index and Ratio Studies
- Property Tax (Land) Rolls
- Conducts special land valuation studies and research work as assigned by Tax Assessor
- Answer inquiries of the public relative to assessment values and pertinent appraisal.
- Hear complaints, explains appraisals and defines appraisals and appraisal conclusions and assessment values
- Responsible for meeting workload requirements and assignments to meet deadlines set by the State of Mississippi Department of Revenue guidelines and departmental policy.
- Work under the supervision, guidance, and evaluation of the Noxubee County Tax Assessor

Qualifications:

- Must be a MECP Certified Appraiser with five years experience in mass appraisal of land residences, commercial, and personal property as a certified appraiser.
