2019 CERTIFICATION

Consumer Confidence Report (CCR)

Town of Hatley Water

Public Water System Name

0480008

List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community Public Water System (PWS) to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the PWS, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must email, fax (but not preferred) or mail, a copy of the CCR and Certification to the MSDH.** Please check all boxes that apply.

Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*

Advertisement in local paper *(Attach copy of advertisement)*

On water bills *(Attach copy of bill)*

Email message *(Email the message to the address below)*

Other _____

Date(s) customers were informed: ___ / ___ / 2020 ___ / ___ / 2020 ___ / ___ / 2020

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____

Date Mailed/Distributed: ___ / ___ / ___

CCR was distributed by Email *(Email MSDH a copy)* Date Emailed: ___ / ___ / 2020

As a URL _____ *(Provide Direct URL)*

As an attachment

As text within the body of the email message

CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: Monroe Journal

Date Published: 4 / 29 / 2020

CCR was posted in public places. *(Attach list of locations)* Date Posted: ___ / ___ / 2020

CCR was posted on a publicly accessible internet site at the following address: _____ *(Provide Direct URL)*

CERTIFICATION

I hereby certify that the CCR has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the PWS officials by the Mississippi State Department of Health/Bureau of Public Water Supply

CCR Deadline to MSDH & Customers by July 1, 2020!

Inorganic Contaminants								
10. Barium	N	2018*	.01	No Range	ppm	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
13. Chromium	N	2018*	.8	No Range	ppb	100	100	Discharge from steel and pulp mills; erosion of natural deposits
14. Copper	N	2015/17*	.2	0	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
17. Lead	N	2015/17*	1	0	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits
19. Nitrate (as Nitrogen)	N	2019	.22	No Range	ppm	10	10	Runoff from fertilizer use; leaching from septic tanks, sewage; erosion of natural deposits
Disinfection By-Products								
81. HAA5	N	2019*	3	No Range	ppb	0	60	By-Product of drinking water disinfection.
Chlorine	N	2019	1.1	.88 – 1.23	mg/l	0	MDRL = 4	Water additive used to control microbes
Unregulated Contaminants								
Sodium	N	2019	10000	No Range	PPB	NONE	NONE	Road Salt, Water Treatment Chemicals, Water Softeners and Sewage Effluents.

* Most recent sample. No sample required for 2019.

As you can see by the table, our system had no contaminant violations. We're proud that your drinking water meets or exceeds all Federal and State requirements. We have learned through our monitoring and testing that some contaminants have been detected however the EPA has determined that your water IS SAFE at these levels.

We are required to monitor your drinking water for specific contaminants on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. We did complete the monitoring requirements for bacteriological sampling that showed no coliform present. In an effort to ensure systems complete all monitoring requirements, MSDH now notifies systems of any missing samples prior to the end of the compliance period.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Our water system is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing. Please contact 601.576.7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1.800.426.4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline 1.800.426.4791.

The Town of Hatley Water Department works around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.

Please note: a copy of this report will not be directly delivered to each customer.

Amory aldermen approve development plans for Panther Park

BY JOHN H. WARD
Monroe Journal

AMORY — The board of aldermen approved a development plan April 21 for a new park near Amory High School where the former municipal swimming pool was. The Amory Parks and Recreation Department plan for Panther Park consists of four lots, an area of play for ages 7 to 12 and an area appropriate for ages 2 to 5. The plan includes swing set equipment, storage and area of miscellaneous.

Board members discussed a plan for a basketball court in the development, which is an example listed within the Land Use Code Ordinance. Land Use Code 17-1-010.

The John Victor and Elizabeth Cause Smith Foundation will be assisting with a basketball and other recreational groups. The Amory Parks and Recreation Department, Amory Municipal Library and Amory Regional Museum presented recent grants from the foundation.

Ward 1 Alderman Cory Bunch has not had concerns about dealing with potential fire and natural incidents at the new recreational facility.

Patrons can be in the night and forget to turn lights off. The issue may create neighborhood nuisance where nearby citizens

can't sleep," he said.

City Clerk James Morgan countered that the basketball court is an integral part of the grant specifications and is a good example of outdoor recreation and exercise.

"The playground work more than likely will not happen without the grant, and delaying this basket ball court reduces the chances of funding the game," she said.

Mayor Brad Block also reminded the board that the court will not be lighted for evening use. Morgan said that he would like a couple of items to mitigate the concerns.

"The grant is not specific as to size of the basketball court. It might be an outdoor court to make it as a playground for younger children and include shorter basketball goals," he said.

Ward 2 Alderman stated that the park would not have its own lighting.

Brigham, in a motion proposed and read the final discussing vote to approve the plan.

In other business, Amory Regional Alderman Gregory Byrd, County Response Center Director Wayne Knox invited the board on the progress of outreach to the city through contractors.

Byrd said that he would like to work with volunteers to distribute disinfectants, cleaning supplies and masks to city departments and churches, he said.

A development plan for Panther Park by the Amory Parks and Recreation Department. The plan shows a basketball court, playground, and other recreational areas. The plan is subject to city council approval.

He noted that the park would not have its own lighting.

Ward 2 Alderman Gregory Byrd, County Response Center Director Wayne Knox invited the board on the progress of outreach to the city through contractors.

Byrd said that he would like to work with volunteers to distribute disinfectants, cleaning supplies and masks to city departments and churches, he said.

Byrd said that he would like to work with volunteers to distribute disinfectants, cleaning supplies and masks to city departments and churches, he said.

spread of the virus, which includes washing hands, wearing a mask, using hand sanitizer and wearing a face mask when out in public.

"Wearing a mask doesn't obviously save a carrier, although we can be a carrier without knowing it. The virus is transmitted through airborne droplets that are captured by the mask," he said.

Amory Assistant Police Chief Nick Weaver received permission for the placement of Show Children at Play signs along 20th Avenue North at 10th Street and 30th Street.

"We can only be there sometimes," he said.

Aldermen also approved six plans for beer sales at the River Inn Club House along Highway 173 West, water city code number 17-2-1.

In a final item of business, the board approved to advertise for appointment of a school board member to serve the remainder of the current term of Tom Byrd.

Byrd resigned due to moving out of district. Byrd said there are 42 months remaining in Byrd's term.

Ward 2 Alderman Tom Phares posed a question to board attorney Scott Gentry about residency requirements for school board members. Gentry said Amory's population would limit board members to a certain number of districts.

Gentry said that he would like to work with volunteers to distribute disinfectants, cleaning supplies and masks to city departments and churches, he said.

Aberdeen aldermen delay election, approve spending freeze

BY RAY VAN DUSEN
Monroe Journal

ABERDEEN — The city council concluded a meeting April 21 concerning the board of aldermen approved a vote to delay the city's Democratic primary and general election April 23, along with a temporary spending freeze.

The new election date is June 2 for the Democratic primary, with the

election to be held on the same date. The general election will be held July 2.

"The election date is being essential," asked Mayor Matthew Houston.

Aldermen discussed the possibility of pushing the date. "You guys did not want to force a date on people but you're pushing back an essential election while keeping non-essential businesses open. That's a bad move to force law"

business," Ward 2 Alderman Doug Stone said of the city's current situation.

Alderman at large, Joe Meyer, asked that he was invited by a group of physicians urging that all employees at his store, Piggly Wiggly, wear masks when sharing space with customers.

He suggested the committee find a way to bring up the issue to the city council.

Transportation — equating \$300 per day due to closures such as utility restrictions and road delays.

The penalty elected to \$1,000, and the question was who is responsible — the city or the contractor who had no control over the closed-off construction.

There was a discussion about the city's current situation and the possibility of pushing the date.
