# 2019 CERTIFICATION

Consumer Confidence Report (CCR)

Chalybeate Water Association  
Public Water System Name

0700003

List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community Public Water System (PWS) to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the PWS, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. You must email, fax (but not preferred) or mail, a copy of the CCR and Certification to the MSDH. Please check all boxes that apply.

- Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*
  - Advertisement in local paper *(Attach copy of advertisement)*
  - On water bills *(Attach copy of bill)*
  - Email message *(Email the message to the address below)*
  - Other \_\_\_\_\_

Date(s) customers were informed:   /  /  2020   /  /  2020   /  /  2020

- CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used \_\_\_\_\_

Date Mailed/Distributed:   /  /  

- CCR was distributed by Email *(Email MSDH a copy)* Date Emailed:   /  /  2020
  - As a URL \_\_\_\_\_ *(Provide Direct URL)*
  - As an attachment
  - As text within the body of the email message

CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: Southern Sentinel

Date Published: 6/24/20

- CCR was posted in public places. *(Attach list of locations)* Date Posted:   /  /  2020
- CCR was posted on a publicly accessible internet site at the following address: \_\_\_\_\_ *(Provide Direct URL)*

### CERTIFICATION

I hereby certify that the CCR has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the PWS officials by the Mississippi State Department of Health, Bureau of Public Water Supply

Brian Williams, Operator  
Name/Title (Board President, Mayor, Owner, Admin. Contact, etc.)

**CCR Deadline to MSDH & Customers by July 1, 2020!**

2019 Annual Drinking Water Quality Report  
Chalybeate Water Association  
PWS#: 0700003  
June 2020

We're pleased to present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to providing you with information because informed customers are our best allies. Our water source is from wells drawing from the Coffee & Sand Aquifers.

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identify potential sources of contamination. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The wells for the Chalybeate WA have received a lower ranking in terms of susceptibility to contamination.

If you have any questions about this report or concerning your water utility, please contact Brian Wilbanks at 662.223.9195. We want our valued customers to be informed about their water utility. If you want to learn more, please join us at any of our regularly scheduled meetings. They are held on the third Thursday of each quarter at 6:30 PM at the water office.

We routinely monitor for contaminants in your drinking water according to Federal and State laws. This table below lists all of the drinking water contaminants that were detected during the period of January 1<sup>st</sup> to December 31<sup>st</sup>, 2019. In cases where monitoring wasn't required in 2019, the table reflects the most recent results. As water travels over the surface of land or underground, it dissolves naturally occurring minerals and, in some cases, radioactive materials and can pick up substances or contaminants from the presence of animals or from human activity; microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm-water runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm-water runoff, and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations and septic systems; radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some contaminants. It's important to remember that the presence of these contaminants does not necessarily indicate that the water poses a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

**Action Level** - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

**Maximum Contaminant Level (MCL)** - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

**Maximum Contaminant Level Goal (MCLG)** - The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

**Maximum Residual Disinfectant Level (MRDL)** - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary to control microbial contaminants.

**Maximum Residual Disinfectant Level Goal (MRDLG)** - The level of a drinking water disinfectant below which there is no known or expected risk of health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

**Parts per million (ppm) or Milligrams per liter (mg/l)** - one part per million corresponds to one minute in two years or a single penny in \$10,000.

**Parts per billion (ppb) or Micrograms per liter** - one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

**Level 1 Assessment.** A study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.

TEST RESULTS								
Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL/MRDL	Unit Measure -ment	MCLG	MCL	Likely Source of Contamination
<b>Inorganic Contaminants</b>								
10. Barium	N	2019	.2008	.2014 - .2008	ppm	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits

13. Chromium	N	2019	.9	.6 - .9	ppb	100	100	Discharge from steel and pulp mills; erosion of natural deposits
14. Copper	N	2015/17*	.3	0	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
16. Fluoride	N	2019	.148	.142 - .148	ppm	4	4	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
17. Lead	N	2015/17*	1	0	ppb	0	AL=15	Corrosion of household plumbing systems, erosion of natural deposits
Sodium	N	2019	18000	17000 - 18000	PPB	0	0	Road Salt, Water Treatment Chemicals, Water Softeners and Sewage Effluents.

### Disinfection By-Products

81. HAA5	N	2016*	2	No Range	ppb	0	60	By-Product of drinking water disinfection.
82. TTHM [Total trihalomethanes]	N	2019	1.52	No Range	ppb	0	80	By-product of drinking water chlorination.
Chlorine	N	2019	1	.4 - .6	mg/l	0	MRDL = 4	Water additive used to control microbes

\* Most recent sample. No sample required for 2019.

We are required to monitor your drinking water for specific constituents on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. In an effort to ensure systems complete all monitoring requirements, MSDH now notifies systems of any missing samples prior to the end of the compliance period.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Our water system is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing. Please contact 601.576.7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1.800.426.4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline 1.800.426.4791.

The Chalybeate Water Association works around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.

# Proof of Publication

## The State of Mississippi Tippah County

Personally appeared before me a Notary Public in and for said County and State, the undersigned

Tim Watson

who, after being duly sworn, deposes and says that he is the Publisher of the **SOUTHERN SENTINEL**, a newspaper published in the City of Ripley, in said County and State, and that the

# OAKLAND NEWS

By Elizabeth Wildman  
Community Correspondent

Greetings from the Oakland community. At our June 14 service, the Mathis Family opened our song service with "What A Friend We Have In Jesus." The congregation joined together with Elizabeth Dollar on piano for "Because He Lives" and Bro. Terry Wilburn sang "Above All." Bro. Don's sermon was taken from John 16, Romans 13 and 1 Peter 1:3,5 and 4.

"A new commandment I give to you, that you love one another; as I have loved you, that you also love one another. By this all will know that you are My disciples, if you have love for one another." John 13:34-35.

Love is our evidence

that our claim to be disciples of Jesus is valid. Love is the visible, outward demonstration of who we are. Jesus tells us that if we do not demonstrate love; we cannot be disciples of Him. An absence of love shows you are not of Jesus.

Submission is love. "Owe no one anything except love one another; for he who loves another has fulfilled the law." Romans 13:8

This verse does not refer to loans or money. Romans 13:8 in the context of submission to the government. As long as the government doesn't ask me to do something, in contradiction to the Word of God, I am to submit. This verse ties together submission and love. If you fight against the

government, you fight against God. God has put the government over you, and you are to submit.

"Therefore, submit yourself to every ordinance of man for the Lord's sake, whether to the king as supreme, or to governors, as to those who are sent by him for the punishment of evildoers and for the praise of those who do good. For this is the will of God, that by doing good you may put to silence the ignorance of foolish men - as free yet not using liberty as a cloak for vice, but as bondslaves of God. Honor all men. Love the brotherhood. Fear God, Honor the king." 1 Peter 2:13-17

He did not say "obey ordinance of God" although he could have.

When you submit you are honoring God. As Christians we do not do what we want to do anymore. We do what God wants. Don't hide behind our freedom in order to do what you want.

Submit for wrath - to escape. We obey to avoid punishment. "Since you have purified your souls in obeying the truth through the Spirit in sincere love of the brethren, love one another fervently with a pure heart, having been born again, not of corruptible seed but incorruptible through the word of God which lives forever." 1 Peter 1:22-23

Without purity of heart you will never love the people God calls you to love. You

obtain purity by obeying the truth. The Word of God is truth. Whether people believe or not; or in part - it is still the truth.

"Finally all of you, be of one mind, having compassion for one another, love as brothers, be courteous, not returning evil for evil or reviling for reviling, but on the contrary blessing, knowing that you may inherit a blessing." 1 Peter 3:8-9

"And above all things have fervent love for one another, for love covers a multitude of sins." 1 Peter 4:8

This does not mean the sin goes away only that when looking through love's eyes we do not see the sins. You can get along with people if we have love.

The peace we desire comes from Jesus reigning in the hearts of everyone. For Jesus is love.

Please remember to pray for our country and our world.

Pray for peace. Pray for perspective. Pray for patience. Pray for an outpouring of wisdom and direction. Remember the sick and brokenhearted and those who have lost loved ones. It is difficult to give the support needed in these situations when we can not be together, but we can pray and make phone calls and drop off care packages. We can all get these things together by loving one another. God bless you all. Stay safe; stay healthy.

# CHALYBEATE/WALNUT NEWS

By Tim Watson  
Community Correspondent

Well, all I can say is what a beautiful Father's Day weekend. The weather was so nice and sunny.

Oh, here's the joke of the week and let's see if you get it. Why was the belt arrested? Because it held up some pants! Did you get it? I hope so.

Wow, when I say busy, it was busy around Chalybeate and Walnut this past weekend with all the beautiful weather plus being Father's Day weekend. Many families were

together for cookouts and gatherings. Of course, they were practicing what social distancing. I had the chance to see a lot of people at the country store in Chalybeate. While I was there admiring all the fresh produce, I had the honor of seeing Jim and Danette Jackson. They are wonderful people. They are fun to be around and love to laugh and have a good time every time you see them.

Also, I ran into Jean Mathis at the store. Many families were

weekly fresh produce. She is also a wonderful person. She will be missed at Chalybeate school.

It was great seeing Lavell Dolas back at work after her surgery. She has been on our prayer list and seems to be having a great recovery.

I believe Jimmy and Wanda Nowell celebrated an anniversary of 50 years this past week. Congratulations!

I also had the chance to see Betty Clifton. She said Dabo was home and doing better. She appreciated all the thoughts,

calls, texts, and prayers. Let's travel across the bridges to Walnut and see what's going on. The new addition of the classrooms at Walnut Attendance Center is coming along well. I had the chance to tour the classrooms the other evening. The students and teachers will enjoy the new spacious rooms and the community will be very grateful to know our schools are expanding to meet the needs of students. The brick building School is fast approaching. I don't know if it will be

completed by then, but once completed it will be nice.

Our prayer list for this week consist of praying and asking the Lord to continue to give strength to Lavell Dolas, Dale Clifton, Hubert Bennett and Glen Hopkins. Please keep them in your prayers this week for a touch in their bodies.

Dear Lord, We just want to praise this week and thank you for a new day and the new week that is ahead of us. We also say thank you for all the strength and all the grace that you have

bestowed for us and for seeing us through everything we had to face so far. I pray that we start and finish each day with an attitude of gratitude. Continue Lord, to give us hope, peace, joy, and love. In Jesus Name!

Please don't forget to keep me informed. Share your news, talk about your upcoming gardens, and share great things happening with your family. To send information, remember to email me at [tim.watson@journalonline.com](mailto:tim.watson@journalonline.com), or call the mo at the office 860-887-8111.

**2019 Annual Drinking Water Quality Report**  
Chalybeate Water Association  
PWS# 070002  
June 2020

While pleased to present you this year's Annual Drinking Water Quality Report, this report is designed to inform you about the quality water and services we provide to our customers. We are committed to providing you with the most reliable and safe drinking water possible. Our commitment to providing you with the most reliable and safe drinking water possible is our top priority.

The water we provide is treated to meet or exceed the strictest standards for drinking water. We use a variety of treatment processes to ensure that our water is safe and healthy for you and your family.

If you have any questions about this report or anything you see, please contact Bill Williams at 860-887-8111. We want your feedback to help us improve our service to you.

We are pleased to serve you and we are committed to providing you with the highest quality water possible. We will continue to work hard to ensure that our water is safe and healthy for you and your family.

**TEST RESULTS**

Parameter	Sample ID	Unit	Limit	Range of Results	Detected	Notes
<b>Inorganic Constituents</b>						
10. Nitrate	N 2019	mg/L	10	0 - 10	0	Change of Nitrate Levels, change from 0 to 10 mg/L
11. Chloride	C 2019	mg/L	250	0 - 250	0	Change in Chloride Levels, change from 0 to 250 mg/L
14. Copper	C 2019	mg/L	1.3	0 - 1.3	0	Change in Copper Levels, change from 0 to 1.3 mg/L
15. Fluoride	F 2019	mg/L	4	0 - 4	0	Change in Fluoride Levels, change from 0 to 4 mg/L
17. Lead	L 2019	mg/L	0.01	0 - 0.01	0	Change in Lead Levels, change from 0 to 0.01 mg/L
18. Iron	I 2019	mg/L	0.3	0 - 0.3	0	Change in Iron Levels, change from 0 to 0.3 mg/L
<b>Disinfectant By-Products</b>						
20. Total THM's	T 2019	mg/L	0.1	0 - 0.1	0	Change in Total THM's Levels, change from 0 to 0.1 mg/L
21. Haloacetic Acids (HAA5)	H 2019	mg/L	0.1	0 - 0.1	0	Change in Haloacetic Acids Levels, change from 0 to 0.1 mg/L
22. Haloacetonitriles (HAN)	H 2019	mg/L	0.1	0 - 0.1	0	Change in Haloacetonitriles Levels, change from 0 to 0.1 mg/L

**Disinfectant By-Products**

20. Total THM's: 0 mg/L (Limit: 0.1 mg/L)

21. Haloacetic Acids (HAA5): 0 mg/L (Limit: 0.1 mg/L)

22. Haloacetonitriles (HAN): 0 mg/L (Limit: 0.1 mg/L)

**Disinfectant By-Products**

23. Total Trihalomethanes (TTHM): 0 mg/L (Limit: 0.1 mg/L)

24. Total Haloacetic Acids (THAA): 0 mg/L (Limit: 0.1 mg/L)

25. Total Haloacetonitriles (THAN): 0 mg/L (Limit: 0.1 mg/L)

26. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

27. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

28. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

29. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

30. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

31. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

32. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

33. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

34. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

35. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

36. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

37. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

38. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

39. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

40. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

41. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

42. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

43. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

44. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

45. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

46. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

47. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

48. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

49. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

50. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

51. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

100. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

**2019 Annual Drinking Water Quality Report**  
Walnut Water Association  
PWS# 000011  
June 2020

While pleased to present you this year's Annual Drinking Water Quality Report, this report is designed to inform you about the quality water and services we provide to our customers. We are committed to providing you with the most reliable and safe drinking water possible. Our commitment to providing you with the most reliable and safe drinking water possible is our top priority.

The water we provide is treated to meet or exceed the strictest standards for drinking water. We use a variety of treatment processes to ensure that our water is safe and healthy for you and your family.

If you have any questions about this report or anything you see, please contact Bill Williams at 860-887-8111. We want your feedback to help us improve our service to you.

We are pleased to serve you and we are committed to providing you with the highest quality water possible. We will continue to work hard to ensure that our water is safe and healthy for you and your family.

**TEST RESULTS**

Parameter	Sample ID	Unit	Limit	Range of Results	Detected	Notes
<b>Inorganic Constituents</b>						
10. Nitrate	N 2019	mg/L	10	0 - 10	0	Change of Nitrate Levels, change from 0 to 10 mg/L
11. Chloride	C 2019	mg/L	250	0 - 250	0	Change in Chloride Levels, change from 0 to 250 mg/L
14. Copper	C 2019	mg/L	1.3	0 - 1.3	0	Change in Copper Levels, change from 0 to 1.3 mg/L
15. Fluoride	F 2019	mg/L	4	0 - 4	0	Change in Fluoride Levels, change from 0 to 4 mg/L
17. Lead	L 2019	mg/L	0.01	0 - 0.01	0	Change in Lead Levels, change from 0 to 0.01 mg/L
18. Iron	I 2019	mg/L	0.3	0 - 0.3	0	Change in Iron Levels, change from 0 to 0.3 mg/L
<b>Disinfectant By-Products</b>						
20. Total THM's	T 2019	mg/L	0.1	0 - 0.1	0	Change in Total THM's Levels, change from 0 to 0.1 mg/L
21. Haloacetic Acids (HAA5)	H 2019	mg/L	0.1	0 - 0.1	0	Change in Haloacetic Acids Levels, change from 0 to 0.1 mg/L
22. Haloacetonitriles (HAN)	H 2019	mg/L	0.1	0 - 0.1	0	Change in Haloacetonitriles Levels, change from 0 to 0.1 mg/L

**Disinfectant By-Products**

20. Total THM's: 0 mg/L (Limit: 0.1 mg/L)

21. Haloacetic Acids (HAA5): 0 mg/L (Limit: 0.1 mg/L)

22. Haloacetonitriles (HAN): 0 mg/L (Limit: 0.1 mg/L)

**Disinfectant By-Products**

23. Total Trihalomethanes (TTHM): 0 mg/L (Limit: 0.1 mg/L)

24. Total Haloacetic Acids (THAA): 0 mg/L (Limit: 0.1 mg/L)

25. Total Haloacetonitriles (THAN): 0 mg/L (Limit: 0.1 mg/L)

26. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

27. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

28. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

29. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

30. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

31. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

32. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

33. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

34. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

35. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

36. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

37. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

38. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

39. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

40. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

41. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

42. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

43. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

44. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

45. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

46. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

47. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

48. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

49. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

50. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

51. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

52. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

53. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

54. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

55. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

56. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

57. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

58. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

59. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

60. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

61. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

62. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

63. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

64. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

65. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

66. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

67. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

68. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

69. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

70. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

71. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

72. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

73. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

74. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

75. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

76. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

77. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

78. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

79. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

80. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

81. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

82. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

83. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

84. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

85. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

86. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

87. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

88. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

89. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

90. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

91. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

92. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

93. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

94. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

95. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

96. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

97. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

98. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)

99. Total Halomethanes (THM): 0 mg/L (Limit: 0.1 mg/L)

100. Total Halonitriles (THN): 0 mg/L (Limit: 0.1 mg/L)
