601-798-1484

Is my water safe?

Last year, as in years past, your tap water met all U. S. Environmental Protection Agency (EPA) and Mississippi State Department of Health drinking water standards. We vigilantly safeguard our water supply and once again we are proud to report that our system has not violated a maximum contaminant level or any other water quality standard. This report is a snapshot of last year's water quality. Included are details about where your water comes from, what it contains, and how it compares to standards set by regulatory agencies. We are committed to providing you with information because informed customers are our best allies.

Do I need to take special precautions?

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice from their health care providers about drinking water concerns. EPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Where does my water come from?

Our water comes from three (3) wells (Well #2, Well #3, and Well #4) that draw ground water from the **Miocene Series Aquifer**.

Source water assessment and its availability:

Our source water assessment has been completed by the Mississippi State Department of Health. Copies will be made available upon request.

Why are there contaminants in my drinking water?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

How can I get involved?

Our board meets on the **second WEDNESDAY evening of every month. Meetings start at 6:30 p.m. at the Hide-A-Way Lake Club House.** We encourage all customers who have any concerns or questions to meet with us. Our association conducts its annual membership meeting on the third Saturday in July at 10:00 a.m. at the Hide-A-Way Lake Club House. This is a very important meeting in which all customers are encouraged to attend. If you have any questions or concerns, you may contact the HAWL Office during business hours (Monday – Friday, 8:00 am – 4:30 pm) at 601-798-1484 or by email at office@hawlms.net.

Other information:

You may want additional information about your drinking water. You may contact our certified waterworks operator or you may prefer to log on to the Internet and obtain specific information about your system and its compliance history at the following addresses: <http://www.healthymms.com> or <https://pws.mswater.us>. Information including current and past boil water notices, compliance and reporting violations, and other information pertaining to your water supply may be obtained.

Water Quality Data Table

The following table lists all of the drinking water contaminants that we detected during the calendar year of this report. The presence of contaminants in the water does not necessarily indicate that the water poses a health risk. Unless otherwise noted, the data presented in this table is from testing done in the calendar year of the report. The EPA and the Mississippi State Department of Health requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants do not change frequently. Some of the data though representative of the water quality may be more than one year old.

Total Coliform

Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other, potentially-harmful bacteria may be present. All results showed all samples free of total coliform.

Additional Information for Lead

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Hide-A-Way Water System is responsible for providing high-quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing. Please contact 601-576-7582 if you wish to have your water tested.

Terms and Abbreviations used in the Table of Test Results

<p>MCLG: <i>Maximum Contaminant Level Goal</i> - is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.</p> <p>MCL: <i>Maximum Contaminant Level</i> - The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.</p> <p>AL: <i>Action Level</i> - The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.</p> <p>ND: <i>Non-detect</i>.</p>
--

TEST RESULTS						
Contaminant	MCLG	MCL	Your Water	Sample Date	Violation Y/N	Likely Source of Contamination

Hide-A-Way Lake Echoes

----- May 2022 -----

Violet Golf Cart and Boat Decals expired April 30, 2022. Any boat in the water or golf cart on the road beginning May 1, 2022, with an expired decal will be issued a citation; no exceptions.

Cinco de Mayo

Celebrate Cinco de Mayo on Thursday, May 5, 2022, from 5:00 pm - 8:00 pm, with Waters Edge. The special for the evening will include: a cup of tortilla soup, Mexican rice, black beans, chicken enchilada bake, a taco, roasted corn on the cob, and cinnamon tortillas with vanilla ice cream for dessert. The cost of the special is \$14.99 per plate. Due to popularity, reservations are required for this event. Take out orders must be picked up between 5:00 pm - 5:45 pm with the time specified when ordering. To make reservations, call the HAWL Office at 601-798-1484.

Mother's Day Lunch

This year for Mother's Day, treat Mom to a day out with lunch and good company. Waters Edge will be hosting a Mother's Day buffet (served by staff) on Sunday, May 8, 2022, from 11:00 am - 2:00 pm.

The menu will include: ham, fried chicken, bronzed catfish, sweet potato casserole, three types of vegetables, rolls, dessert, and beverages! The cost of the dinner is \$21.99 for Adults, \$10.99 for Children 5-12, and 99¢ for Children 4 & Under. **Reservations are required** and can be made by calling the HAWL Office at 601-798-1484.

Mother's Day Lunch To-Go

This year for Mother's Day, stay out of the kitchen and in the middle of the fun by ordering your Mother's Day Lunch to-go from Waters Edge! To-go dinners include: 8 oz. of ham, fried chicken (2 pieces - your choice of white or dark), a bronzed catfish filet, 4 oz. of sweet potato casserole two types of vegetables (4 oz. serving of each), a cup of soup, a dinner salad, a dinner roll, and a dessert. The cost of the to-go dinner is \$16.99 per plate. **Reservations must be placed by Friday, May 6, 2022, and must be picked up on Sunday, May 8, 2022, between 10:30 am - 11:00 am and then from 1:00 pm - 1:30 pm.** Orders can be made by calling the HAWL Office at 601-798-1484. When placing the order, indicate the time of pick-up so it will be ready when you arrive.

HAWL's Spring Fishing Rodeo

Saturday, May 14, 2022

Dusk (May 13th) - 12:00 pm (May 14th)

The Spring Rodeo will begin at dusk May 13th and end at noon May 14th. Pick up a map of fishing habitat locations at the Lodge, HAWL website, or East Marina Pavilion (when scales are open) to locate fishing spots. Underwater structures (fish habitats) have been placed to attract bait and game fish. Four areas are located within casting distance of the dam (look for the orange arrows), both marinas, and other locations. Weigh-in will be at the East Marina Pavilion by the Lodge. The scales open at 9:00 am and close promptly at noon.

Awards will be presented at 12:30 pm. There will be only one weigh-in per fisherman; all fish must be caught by hook and line. There will be four fish categories (bass, bream/bluegill, crappie, and catfish) and three age groups (10 & under, 11 - 14, and 15 & older). 1st, 2nd, & 3rd place prizes for the largest total weight of fish will be awarded in all age groups in each fish category. (Entry limit for bass, bream/bluegill, and crappie is up to five fish. Unlimited catfish may be entered.) Two

separate trophies open to all age groups will be presented for Largest Bass and Largest Total Weight of Grass Carp. There is no need to register for this FREE Rodeo. Participants are encouraged to collect litter or debris while fishing to help maintain the beauty of the lake. For more information, call the Office at 601-798-1484. Attention: No skiing or tubing will be allowed on the lake during the fishing rodeo.

Memorial Day Weekend Activities

Saturday, May 28, 2022

Pool Open for All: 10:00 am - 9:00 pm

Prime Rib Dinner: 5:00 pm - 8:00 pm

Kick off the beginning of summer with delicious prime rib, loaded potato casserole, the vegetable of the day, soup, and salad for \$19.99. Reservations are required and can be made by calling the HAWL Office at 601-798-1484.

Sunday, May 29, 2022

Pool Open for All: 10:00 am - 7:30 pm

Waters Edge Open for Lunch:

11:00 am - 2:00 pm

Monday, May 30, 2022

Southgate Closed

Flag Raising Ceremony: 8:00 am HAWL Lodge

HAWL Office Open: 8:00 am - 4:30 pm

Pool Open for All: 10:00 am - 7:30 pm

Memorial Day Hamburger Special:

11:00 am - 2:00 pm Enjoy any delicious Waters Edge burger, anyway you want it, with chips for \$8.99.

Available for dine-in or take-out. No menu items available.

- EFT Diversified has been scheduled to remove sediment from the back horseshoe area.
- The Lodge generator has been installed. The total capital improvement cost for the generator and installation is \$44,447.90 which was paid to Taylor Power Systems and Gulf South Electric.
- Two office replacement computers (bookkeeper and receptionist) were installed by NVI Technologies. The total capital replacement cost was \$4,866.62.
- AVL Installations installed new cloud based access control software through Chamberlain Group/Liftmaster. The total capital improvement cost was \$1,603.74 plus an annual cost of \$150.00 to maintain the software.
- Thirty-five replacement pool chaise lounge chairs have been ordered from Home Depot. The total capital cost was \$4,868.13.
- The Gate Sentry Visitor Management System is up and running. If you have not created your account, please contact the Office for assistance. See page 8 of this *Echoes* for details on signing up with the system.
- Orange boat and golf cart decals (for the 2022 – 2023 season) are on sale now. The violet decals expired on April 30, 2022.
- American Sport Fish Hatchery delivered 2" threadfin shad for a total capital cost of \$7,200.00.
- The permit with the U.S. Fish and Wildlife Service for Canadian Goose Nest and Egg Depredation is in works. Property owners are encouraged to call the Office if they notice any geese pairing up in the area. As of April 12, 2022, there have been 3 nests and 18 eggs.
- Resident Swim begins on Tuesday, May 3, 2022, and will be open from 10:00 am – 4:00 pm Tuesday through Friday. The pool will open with lifeguards on Saturday, May 21, 2022, and will be open from 10:00 am – 7:30 pm, Tuesdays - Fridays, and Sundays. Saturdays, the pool will be open from 10:00 am - 9:00 pm.
- The Consumer Confidence Report "CCR" for the water system is available on the HAWL website or in the Office.
- City of Picayune has cancelled their request to drain surface water into our lake from Cooper Road, which was denied by the Hide-A-Way Lake Board of Directors on January 12, 2022.
- Hide-A-Way Lake's Annual Fireworks Celebration is scheduled for Sunday, July 3, 2022, with a rain date of Monday, July 4, 2022. In order for the Firework's Celebration to proceed, there must be dry weather conditions at 7:00 pm. This fireworks show depends solely on the donations from Property Owners and is 100% funded through donations. The donation goal is \$7,500. \$643.00 was carried over from the 2021 donations for this year's show.
- All insurance policies are being reviewed with Eagan Insurance for the renewal period of April 30, 2022 through April 30, 2023.
- My door is always open to you. I encourage your suggestions and/or concerns regarding the improvement of the community. Community members working together is essential to protect, maintain, enhance, and preserve not only the community but your home as well. It is in my daily prayers that everyone is healthy and working together.

2021 Drinking Water Report

The **2021 Drinking Water Report** (CCR 2021) for HAWL's water system is now available. This report is on the HAWL website under the "Water System" tab and can be located directly at: <https://www.hawlms.com/f/CCR21.pdf>. Copies are also available in the HAWL Office. Additionally, you may also call the Office (601-798-1484) to request that a copy be mailed to you.

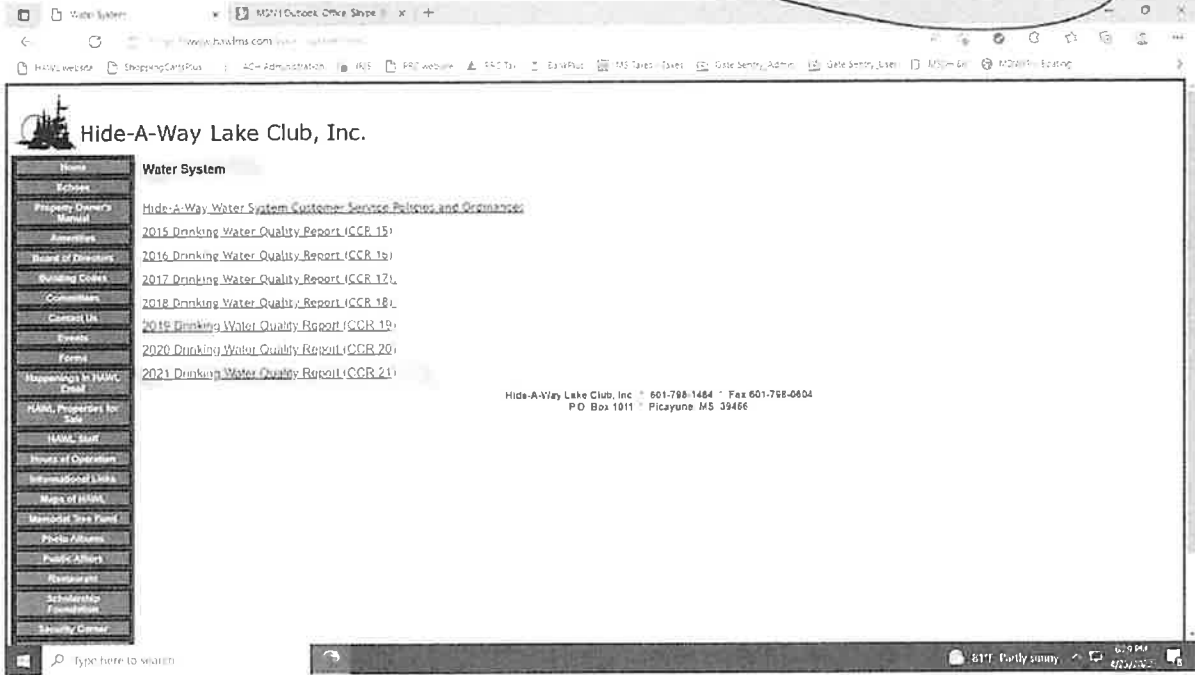

Geese in HAWL

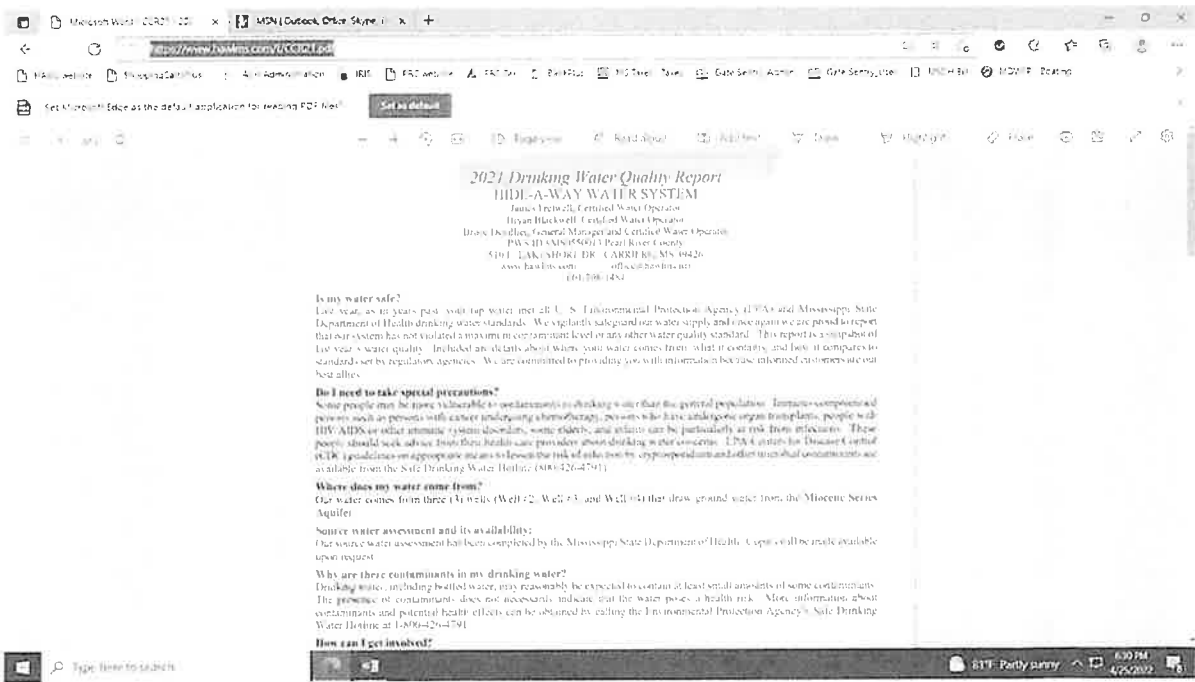

Every March through June since 2010, Hide-A-Way Lake counts geese nests and carries out egg depredation to control the geese population. This is conducted through permit authorization from the US Fish and Wildlife Service. In years past there were over 100 geese in the lake. This over population created a major nuisance to the Property Owners of the community. The last few years have shown a vast improvement in this area and we continue to work with the US Fish and Wildlife Service to control this matter.

To help accomplish this goal, please do not feed the geese in HAWL due to the fact that geese are causing a nuisance in the community. Additionally, please notify the HAWL Office (601-798-1484) with the date, time, and location if you see geese nesting or pairing up.

601-798-1484

Is my water safe?

Last year, as in years past, your tap water met all U. S. Environmental Protection Agency (EPA) and Mississippi State Department of Health drinking water standards. We vigilantly safeguard our water supply and once again we are proud to report that our system has not violated a maximum contaminant level or any other water quality standard. This report is a snapshot of last year's water quality. Included are details about where your water comes from, what it contains, and how it compares to standards set by regulatory agencies. We are committed to providing you with information because informed customers are our best allies.

Do I need to take special precautions?

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice from their health care providers about drinking water concerns. EPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Where does my water come from?

Our water comes from three (3) wells (Well #2, Well #3, and Well #4) that draw ground water from the Miocene Series Aquifer.

Source water assessment and its availability:

Our source water assessment has been completed by the Mississippi State Department of Health. Copies will be made available upon request.

Why are there contaminants in my drinking water?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

How can I get involved?

Our board meets on the second WEDNESDAY evening of every month. Meetings start at 6:30 p.m. at the Hide-A-Way Lake Club House. We encourage all customers who have any concerns or questions to meet with us. Our association conducts its annual membership meeting on the third Saturday in July at 10:00 a.m. at the Hide-A-Way Lake Club House. This is a very important meeting in which all customers are encouraged to attend. If you have any questions or concerns, you may contact the HAWL Office during business hours (Monday – Friday, 8:00 am – 4:30 pm) at 601-798-1484 or by email at office@hawlms.net.

Other information:

You may want additional information about your drinking water. You may contact our certified waterworks operator or you may prefer to log on to the Internet and obtain specific information about your system and its compliance history at the following addresses: <http://www.healthymms.com> or <https://pws.mswater.us>. Information including current and past boil water notices, compliance and reporting violations, and other information pertaining to your water supply may be obtained.

Water Quality Data Table

The following table lists all of the drinking water contaminants that we detected during the calendar year of this report. The presence of contaminants in the water does not necessarily indicate that the water poses a health risk. Unless otherwise noted, the data presented in this table is from testing done in the calendar year of the report. The EPA and the Mississippi State Department of Health requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants do not change frequently. Some of the data though representative of the water quality may be more than one year old.

Total Coliform

Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other, potentially-harmful bacteria may be present. All results showed all samples free of total coliform.

Additional Information for Lead

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Hide-A-Way Water System is responsible for providing high-quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing. Please contact 601-576-7582 if you wish to have your water tested.

Terms and Abbreviations used in the Table of Test Results

MCLG: *Maximum Contaminant Level Goal* - is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
MCL: *Maximum Contaminant Level* - The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
AL: *Action Level* - The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.
ND: *Non-detect*.

TEST RESULTS						
Contaminant	MCLG	MCL	Your Water	Sample Date	Violation Y/N	Likely Source of Contamination
Inorganic Contaminants						
Antimony (ppm) Well #2 Well #3 Well #4	0.006 0.006 0.006	0.006 0.006 0.006	0.0005 0.0005 0.0005	09/04/18 12/02/19 10/25/21	NO NO NO	Discharge from petroleum refineries; fire retardants; ceramics; electronics; solder.
Arsenic (ppm) Well #2 Well #3 Well #4	0 0 0	0.010 0.010 0.010	0.0005 0.0005 0.0005	09/04/18 12/02/19 10/25/21	NO NO NO	Erosion of natural deposits; runoff from orchards; runoff from glass and electronics production wastes.
Barium (ppm) Well #2 Well #3 Well #4	2 2 2	2 2 2	0.0058 0.0011 0.0078	09/04/18 12/02/19 10/25/21	NO NO NO	Discharge of drilling waste; discharge from metal refineries; erosion of natural deposits.
Beryllium (ppm) Well #2 Well #3 Well #4	0.004 0.004 0.004	0.004 0.004 0.004	0.0005 0.0005 0.0005	09/04/18 12/02/19 10/25/21	NO NO NO	Discharge from metal refineries and coal-burning factories; discharge from electrical, aerospace, and defense industries.
Cadmium (ppm) Well #2 Well #3 Well #4	0.005 0.005 0.005	0.005 0.005 0.005	0.0005 0.0005 0.0005	09/04/18 12/02/19 10/25/21	NO NO NO	Corrosion of galvanized pipes; erosion of natural deposits; discharge from metal refineries; runoff from waste batteries and paints.
Chromium (ppm) Well #2 Well #3 Well #4	0.1 0.1 0.1	0.1 0.1 0.1	0.0024 0.0022 0.0005	09/04/18 12/02/19 10/25/21	NO NO NO	Discharge from steel and pulp mills; erosion of natural deposits.
Copper (mg/l)	1.3	AL = 1.3	0.1	01/01/18 – 12/31/20 (Triennial)	NO	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives. 10 samples collected on 08/03/20.
Cyanide (ppm) Well #2 Well #3	0.2 0.2	.02 .02	0.015 0.015	05/06/19 05/06/19	NO NO	Discharge from steel/metal factories; discharge from plastic and fertilizer factories.
