

Rec'd 6/7/2023

Certification

Water systems serving 10,000 or more must use:
Distribution Method I

Water systems serving 500 - 9,999 must use:
Distribution Method I OR
Distribution Method II, III, and IV

Water system serving less than 500 people must use:
Distribution Method I OR
Distribution Method II, III, and IV OR
Distribution Method III and IV

OFFICE USE ONLY

Public Water Supply name(s):

East Lowndes Water Association

7-digit Public Water Supply ID #(s):

0440005(AL0001809), 0440080, 0440081,
0440100, 044103

Distribution (Methods used to distribute CCR to our customers)

I. CCR directly delivered using one or more method below:

- *Provided direct Web address to customer
- Hand delivered
- Mail paper copy
- Email

*Add direct Web address (URL) here:

<http://eastlowndes.com/DOCS/ELWA-2022CCR.pdf>

Example: "The current CCR is available at
www.waterworld.org/ccrMay2023/0830001.pdf.
call (000) 000-0000 for paper copy".

II. Published the complete CCR in the local newspaper.

Date(s) published:

III. Inform customers the CCR will not be mailed but is available upon request.
List method(s) used (examples – newspaper, water bills, newsletter, etc.).

Date(s) notified:

FOUR BILLING CYCLES - 5/5/22, 5/12/22, 5/19/22, 5/26/22

Location distributed:

Water Bill

IV. Post the complete CCR continuously at the local water office.

Date: 4/24/2023

"Good Faith Effort" in other public buildings with the water system service area (i.e. City Hall, Public Library, etc.)

Locations posted:

See Attachment

Certification

This Community public water system confirms it has distributed its Consumer Confidence Report (CCR) to its customers and the appropriate notices of availability have been given and that the information contained in its CCR is correct and consistent with the compliance monitoring data previously submitted to the MS State Department of Health, Bureau of Public Water Supply and the requirements of the CCR rule.

Name:

Title:

General Manager

Date:

6/7/2023

Submittal

Email the following required items to water.reports@msdh.ms.gov regardless of distribution methods used.

1. CCR (Water Quality Report)
2. Certification
3. Proof of delivery method(s)

2022 Annual Drinking Water Quality Report
East Lowndes Water Association
PWS#: 440005 (AL0001809), 440080, 440081, 440100, 440105
April 2023

RECEIVED
MSDH-WATER SUPPLY

2023 APR 20 AM 8:23

We're pleased to present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water.

ABOUT OUR SYSTEM

East Lowndes Water Association has more than 700 miles of distribution mains, serving more than 9,650 active connections. The system has a capacity to provide 7.6 million gallons per day (MGD), with an average usage of 1.7 MGD. This is accomplished within five treatment plants, two pump stations, nine underground water wells and eight elevated storage tanks. System improvements over the past year include approximately 6,000 feet of line extensions throughout the system, various infrastructure upgrades within the plants and distribution system, approximately 2,700 automated meter reading (AMR) meters upgraded, 108 new meter connections, and 13 new hydrants installed throughout the distribution system for fire protection and flushing purposes. A rate increase was instituted January 1, 2023 to aid in balancing budgeted expenses with inflation, as well as to prepare for long-term infrastructure planning of the system. Each improvement reflects the Board of Directors' and Management Team's commitment to provide quality water in the most efficient and cost-effective way. Another reflection of this commitment is that all Board Members have completed the Mississippi Rural Water Association Board Management Training Course, with the Board President and Vice President having completed Advanced Board Management Training.

CONTACT & MEETING INFORMATION

If you have any questions about this report or concerning your water utility, please contact Brad Braddock at 662.328.1065. We encourage our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the fourth Monday of every month except December at 6:30 PM at the East Lowndes Water Office located at 1325 Ridge Road, Columbus, MS 39705.

SOURCE OF WATER

Our water source is from ground water from nine (9) wells drawing from the Gordo and Massive Sands Aquifers. The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identify potential sources of contamination. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The wells for our system have received a lower to moderate rankings in terms of susceptibility to contamination.

PERIOD COVERED BY REPORT

We routinely monitor for contaminants in your drinking water according to federal and state laws. This report is based on results of our monitoring period of January 1st to December 31st, 2022. In cases where monitoring wasn't required in 2022, the table reflects the most recent testing done in accordance with the laws, rules, and regulations.

As water travels over the surface of land or underground, it dissolves naturally occurring minerals and, in some cases, radioactive materials and can pick up substances or contaminants from the presence of animals or from human activity; microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm-water runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm-water runoff, and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations and septic systems; radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some contaminants. It's important to remember that the presence of these contaminants does not necessarily indicate that the water poses a health risk.

TERMS AND ABBREVIATIONS

In the table you may find unfamiliar terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level (AL) : The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow.

Maximum Contaminant Level (MCL): The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG): The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL): The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary to control microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG): The level of a drinking water disinfectant below which there is no known or expected risk of health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Parts per billion (ppb) or micrograms per liter: one part by weight of analyte to 1 billion parts by weight of the water sample.

Parts per million (ppm) or Milligrams per liter (mg/l): one part by weight of analyte to 1 million parts by weight of the water sample.

Picocuries per liter (pCi/L): picocuries per liter is a measure of the radioactivity in water.

Level 1 Assessment: A study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.

Level 2 Assessment: A very detailed study of the water system to identify potential problems and determine (if Possible) why an *E.coli* MCL violation has occurred and/or why total coliform bacteria have been found in our water system.

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in drinking water.

PWS ID # MS0440005 – AL0001809 Plant One – Lee Stokes Road- TEST RESULTS								
Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL/MRDL	Unit Measurement	MCLG	MCL	Likely Source of Contamination

83. HAA5	N	2022	1.09	No Range	ppb	0	60	By-Product of drinking water disinfection.
84. TTHM [Total trihalomethanes]	N	2022	2.23	1.17 – 2.23	ppb	0	80	By-product of drinking water chlorination.
81. Chlorine	N	2022	1.2	1.05 – 1.33	mg/l	0	MRDL = 4	Water additive used to control microbes

*Most recent sample. No sample required for 2022.

** Unregulated contaminants for which EPA requires monitoring.

** Fluoride level is routinely adjusted to the MS State Dept of Health's recommended level of 0.6 – 1.2 mg/l.

We are required to monitor your drinking water for specific contaminants on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. In an effort to ensure systems complete all monitoring requirements, MSDH now notifies systems of any missing samples prior to the end of the compliance period.

LEAD INFORMATION

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Our water system is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing. Please contact 601.576.7582 if you wish to have your water tested.

FLUORIDE INFORMATION

To comply with the "Regulation Governing Fluoridation of Community Water Supplies", our system is required to report certain results pertaining to fluoridation of our water system.

East Lowndes #1 – Lee Stokes Road

The number of months in the previous calendar year in which average fluoride sample results were within the optimal range of 0.6-1.2 ppm was 8. The percentage of fluoride samples collected in the previous calendar year that was within the optimal range of 0.6-1.2 ppm was 100%. The number of months samples were collected and analyzed in the previous calendar year was 8.

East Lowndes #2 – Huckleberry Lane

The number of months in the previous calendar year in which average fluoride sample results were within the optimal range of 0.6-1.2 ppm was 8. The percentage of fluoride samples collected in the previous calendar year that was within the optimal range of 0.6-1.2 ppm was 100%. The number of months samples were collected and analyzed in the previous calendar year was 8.

East Lowndes #3A – East Old Yorkville Road

The number of months in the previous calendar year in which average fluoride sample results were within the optimal range of 0.6-1.2 ppm was 8. The percentage of fluoride samples collected in the previous calendar year that was within the optimal range of 0.6-1.2 ppm was 100%. The number of months samples were collected and analyzed in the previous calendar year was 8.

East Lowndes #3B – West Old Yorkville Road

The number of months in the previous calendar year in which average fluoride sample results were within the optimal range of 0.6-1.2 ppm was 8. The percentage of fluoride samples collected in the previous calendar year that was within the optimal range of 0.6-1.2 ppm was 100%. The number of months samples were collected and analyzed in the previous calendar year was 8.

East Lowndes #4 – Herman Vaughn Road

The number of months in the previous calendar year in which average fluoride sample results were within the optimal range of 0.6-1.2 ppm was 8. The percentage of fluoride samples collected in the previous calendar year that was within the optimal range of 0.6-1.2 ppm was 100%. The number of months samples were collected and analyzed in the previous calendar year was 8.

Note: this system adds fluoride to your drinking water to help prevent and reduce cavities and improve overall oral health. Supply-chain issues have limited or prevented this water system's ability to obtain fluoride on a regular basis. The data presented above only reflects the months when this water system added fluoride to your drinking water.

VIOLATIONS

As you can see by the table, our system had no violations. We're proud that your drinking water meets or exceeds all Federal and State requirements. We have learned through our monitoring and testing that some contaminants have been detected however the EPA has determined that your water IS SAFE at these levels.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man-made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1.800.426.4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline 1.800.426.4791.

The East Lowndes Water Association, Inc. works around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future. The Association has received the highest rating of 5.0 through the Mississippi State Department of Health's Capacity Assessment Program on all five systems. The Association has the ability to notify its customers with an "Immediate Response Information System" for emergencies and critical information pertaining to its water supply. If you have not updated your contact information, please do so.

Drinking Water - Consumer Confidence Report (CCR) Certification Form

Community Water System Name: East Lowndes Water Association

Public Water System Identification No: AL0001809 Year: 2022

Important: Community water systems are required to both deliver a copy of the CCR to each customer, and reach non-bill paying customers using "good faith" efforts. For direct delivery, you may choose either traditional or electronic methods, or both.

1. A community water system that sells water to another community water system shall deliver the information needed to complete the CCR to the buyer system by April 1. If mutually agreed upon in writing, seller and buyer may select a different date for delivery.

Date Accomplished: _____ -OR- Not applicable

2. For systems that were cited for violation(s) during the CCR reporting year:

The CCR contains information on the violation(s) plus any required notice -OR- Not applicable.

3. For systems serving a population of at least 100,000 (33,333 customers):

Good faith effort made to reach consumers who do not receive bills (Complete #11 below).

Copy posted to publicly accessible website. Date: _____

Copy mailed to all customers*. Date: _____

*The system may optionally distribute the CCR electronically by completing #9 and/or #10 below.

4. For systems serving a population of 10,000 – 99,999 (3,333 – 33,332 customers):

Good faith effort made to reach consumers who do not receive bills (Complete #11 below).

Copy mailed to all customers*. Date: _____

*The system may optionally distribute the CCR electronically by completing #9 and/or #10 below.

5. For systems serving a population of 500 – 9,999 (167 – 3,332 customers):

CHOOSE ONE OF THE FOLLOWING:

Notify customers in writing (in advance) the date the CCR will be published in newspaper (Date: _____) AND Publish CCR in one or more local papers (Date: _____)

Mail copy of CCR to all customers*. Date: _____

*The system may optionally distribute the CCR electronically by completing #9 and/or #10 below.

6. For systems serving a population less than 500 (166 or fewer customers):

CHOOSE ONE OF THE FOLLOWING:

Notify customers in writing the CCR is available upon request (Date: _____) AND Display CCR in a prominent place easily accessible to consumers (Date: _____)

Mail copy of CCR to all customers*. Date: _____

*The system may optionally distribute the CCR electronically by completing #9 and/or #10 below.

7. Applicable to ALL systems:

Copy provided to local health department. Date: 04/24/2023

Copy provided to any public library within 5 miles of water system office. Date: 04/24/2023

8. For systems whose rates are regulated by the Alabama Public Service Commission (PSC):

Copy provided to the PSC. Date: _____ -OR- Not applicable.

9. For optional internet posting instead of a customer mailer, all of the following requirements must be met:

Direct URL provided to CCR: http://eastlowndes.com/DOCS/ELWA-2022CCR.pdf (example: adem.gov/ccr)
Date published on internet: 04/24/2023

Each bill contains information on how a customer may elect to continue receiving a paper copy of the CCR.

System has assessed customers' preferred delivery method prior to delivery of CCR.

Paper copy of CCR mailed to those customers who requested it. Date: _____

Good faith effort made to provide a copy of CCR to consumers who do not receive a bill or are known to not have access to the internet and/or electronic delivery of CCR (Complete #11 below).

A direct URL to the CCR is provided on each bill in a typeface at least as large as the largest type on the bill.

A direct URL to the CCR is included on all correspondence or notifications to customers.

The system shall send an email with a CCR-related subject line to inform customers of the availability of the CCR each year. A copy of the email shall be attached to this form.

If the CCR contains a violation, a short message to encourage reading the CCR shall be included above or near the URL.

10. For optional email instead of a customer mailer, all of the following requirements must be met:

CCR emailed to customer list. Date: _____

CCR mailed to customers not on email list. Date: _____

Customer email list is kept up-to-date.

For customers with undeliverable email addresses, a paper copy was sent. Date: _____

11. Good faith efforts to inform consumers who are not direct customers (check all that apply):

Copies of CCR sent to apartment complexes, large employers, public libraries, etc.

CCR posted in public locations such as government buildings.

CCR provided to local media.

Other (specify): East Lowndes Water Association Business Office, 1325 Ridge Road, Columbus, MS 39705

AUTHORIZED REPRESENTATIVE CERTIFICATION:

The community water system named above hereby confirms that its Consumer Confidence Report (CCR) contains all information required by ADEM Admin Code r. 335-7-14, was properly distributed to customers, and the appropriate notices of availability were given as specified on this form. Further, the system certifies that the information contained in the CCR is correct and consistent with the compliance monitoring data previously submitted to the Alabama Department of Environmental Management.

Name (please print): Brad Braddock

Title: General Manager Phone #: (662) 328-1065

Signature:  Date: 06/07/2023

Please sign the certification above, and upload this form along with a copy of the CCR and supporting documents to eDWR (filetype: CCR) no later than June 30. If you have questions please contact your district inspector or the Drinking Water Branch at (334) 271-7773.
