

MISSISSIPPI STATE HOSPITAL TAKE NOTE

A PUBLICATION FOR EMPLOYEES OF MSH

Vol. 39 No. 18

May 04, 2026

PAINTING IN THE 'SIP: EOY 2026

Mississippi State Hospital celebrated its 2025 Employees of the Year during the annual Employee Recognition Event held Thursday, April 23, in the Public Relations Conference Center.

This year's theme, "Painting in The 'Sip," brought a fun and creative touch to the celebration. Kelli Ponder Reynolds of Mendenhall, owner and operator of Art with Kiki, opened the event by leading the 2025 Employees of the Month in a painting class. Each honoree painted and textured the state of Mississippi using a color of their choice.

The MSH Art Department, including Ceci Whitehurst, Ricky Shelby, and Betty Thompson, led a group art project with participation from Employees of the Month and guests. The finished piece, pictured on page 3, will be displayed on campus.

The program opened with a welcome from Amy Walker, President of Friends of Mississippi State Hospital, Inc., followed by the invocation from Melvin Collins, Chaplain with MSH Pastoral Care. MSH Director James G. "Bo" Chastain, shared remarks and introduced guests. The Employee Recognition Committee, which votes each month on Employees of the Month, was also recognized. Committee members include Chiquita Boyd, Stacey Davis, Robert Dixon, Michelle Jackson, Mary Moore, Johnnie Clark, Marie Bingham, Kina Woods, and Michael Robinson.

Guests enjoyed Art Trivia led by Carolyn Trigg, Friends of MSH, Inc. Board Member, along with a meal provided by Cura Hospitality. Chastain, Walker, and MSH Human Resources Director Bo Blanks recognized each of the 2025 Employees of the Month before the program concluded with the announcement of the 2025 Employees of the Year.

"We spend the largest amount of our time each week at work, and that being the case there are few things better in life than coming to work and having great people to work with," Chastain said. "That's who our Employees of the Month are, and we are so thankful to be able to celebrate them today."

Wendy Bailey, Director of the Mississippi Department of Mental Health, also thanked the honorees for the care they show each day.

"We are so proud and honored that these employees work for Mississippi State Hospital," Bailey said. "They pour their heart and their soul into taking care of the patients and residents they serve, and they help us fulfill our mission each and every day. So this is a small way to honor them for their dedication day in and day out. We could not be Mississippi State Hospital without them."

The 2025 Employees of the Year are Maurice Woods for Direct Care, Rena Rideout for Clinical Service, and Teresa Wilson for Support Services.

MSH DAY IS WEDNESDAY, MAY 13!

MSH Day is scheduled for May 13th and promises to be a day filled with fun, food, and engaging activities for our patients and residents. Departments and buildings across the hospital have come together once again to sponsor a variety of games and activities designed to bring joy and a sense of community to those we serve. We appreciate everyone's participation and support in making this a special day! Below is the list of games for this year's event.

MONTHLY ANNOUNCEMENTS

Annual Training Fair 2026

Staff Education is pleased to announce that the Annual Training Fair is available online for everyone through the Intranet and Relias (for those with accounts). See the attached flyer for further instructions.

Reminder:

An employee injured on the job must submit an occurrence form on the day of injury even if not seeking treatment. The occurrence form must be sent to Workers Comp on building 21. This will be submitted as a report only. If treatment is needed the occurrence form will need to be sent with employee to Employee Health during normal operation hours or Building 60 clinic after hours.

If there is a witness to the incident; a statement must be written by the witness and submitted to the Workers Comp Coordinator at fax number 8297.

When claims are not submitted in a timely manner the Hospital will be penalized for each late reporting incident.

Thank you in advance for your time and help with this matter.

Patients have the right to not have visitation privileges restricted on the basis of race, color, national origin, religion, sex, gender identity, sexual orientation, or disability. - Policy 161-04 ATT A

POSITION VACANCIES ARE INITIALLY POSTED FOR CURRENT MSH EMPLOYEES WITH SIX MONTHS OF STATE SERVICE. PLEASE SUBMIT APPLICATIONS TO THE PERSONNEL DEPARTMENT (B-61). AFTER INITIAL POSTING, IF THE POSITION IS NOT FILLED BY A MSH EMPLOYEE, THE POSITION MAY BE FILLED THROUGH THE OPEN COMPETITIVE PROCESS.

POSTING DATE: 05/04/2026

CLOSING DATE: 05/12/2026

START SALARY: \$40,286.40

ACADEMIC TEACHER B202/A-Shift

Academic Teaching professional position responsible for developing curriculum and lessons plans, and planning and implementing course content and methods to meet the needs of State facility clients. Employees at this level are accountable for classroom discipline and adhering to State and Federal testing guidelines and mandates. Employees may be accountable for accommodating IEPs for individuals with special needs. Employees are also accountable for preparing reports based on client attendance, performance, progress, and skills assimilation. Advanced degree Academic Teachers may be required to also serve as a school administrator.

Typically requires a relevant Bachelor's Degree and certification.

Applicants must apply on www.mspb.ms.gov for this position.

POSITION VACANCIES ARE INITIALLY POSTED FOR CURRENT MSH EMPLOYEES WITH SIX MONTHS OF STATE SERVICE. PLEASE SUBMIT APPLICATIONS TO THE PERSONNEL DEPARTMENT (B-61). AFTER INITIAL POSTING, IF THE POSITION IS NOT FILLED BY A MSH EMPLOYEE, THE POSITION MAY BE FILLED THROUGH THE OPEN COMPETITIVE PROCESS.

POSTING DATE: 05/01/2026

CLOSING DATE: 05/07/2026

START SALARY: \$ 28,542.30

Pharmacy Technician I B50/A-Shift

First-level technical position accountable for assisting a pharmacist in drug distribution and inventory. A familiarity of medical terminology and drug types, as well as the common abbreviations used in writing medication orders, and a knowledge of names, strengths, and dosage forms of medications is required. The incumbent must be able to follow procedures efficiently and accurately with minimum supervision.

Typically requires a High School Diploma or high school equivalency, 0-2 years of experience, and a passing score on the registration exam must be obtained within the first year of being a technician.

Applicants must apply on www.mspb.ms.gov for this position.

POSITION VACANCIES ARE INITIALLY POSTED FOR CURRENT MSH EMPLOYEES WITH SIX MONTHS OF STATE SERVICE. PLEASE SUBMIT APPLICATIONS TO THE PERSONNEL DEPARTMENT (B-61). START SALARY: \$35,443.26

SUPPORT CARE PROFESSIONAL TEAM LEAD B87/B-SHIFT

First-level supervisory position accountable for professional program planning and management for a treatment sub-unit or multiple residential locations. Develops, implements, coordinates, and evaluates individual habilitation or treatment plans for individuals with developmental disabilities. Supervises direct care staff.

Typically requires High School Diploma or high school equivalency, and 3-5+ years of experience. May require a Certified Nurse Assistant (CNA) designation.

Applicants must apply online at www.mspb.ms.gov

POSITION VACANCIES ARE INITIALLY POSTED FOR CURRENT MSH EMPLOYEES WITH SIX MONTHS OF STATE SERVICE. PLEASE SUBMIT APPLICATIONS TO THE PERSONNEL DEPARTMENT (B-61). AFTER INITIAL POSTING, IF THE POSITION IS NOT FILLED BY A MSH EMPLOYEE, THE POSITION MAY BE FILLED THROUGH THE OPEN COMPETITIVE PROCESS.

POSTING DATE: 04/30/2026

CLOSING DATE: 05/19/2026

START SALARY: \$31,111.11

THERAPEUTIC THERAPIST II

Second-level Professional position accountable for planning, directing, and coordinating complex recreation-based or music-based treatment programs for people with disabilities, injuries, or illnesses. Accountable for assessing patients, performing treatment planning, facilitating activities, using, and maintaining therapy equipment, and maintaining documentation. Directs the work of or provides training for lower-level vocational positions. Work at this level allows for wide latitude of individual initiative and program planning; however, it must be coordinated with other programs and services. Incumbents may participate in staff and administrative planning.

Typically requires a bachelor's degree and 3-4 years of experience.

Applicant must apply online at www.msph.ms.gov for this position.

POSITION VACANCIES ARE INITIALLY POSTED FOR CURRENT MSH EMPLOYEES WITH SIX MONTHS OF STATE SERVICE. PLEASE SUBMIT APPLICATIONS TO THE PERSONNEL DEPARTMENT (B-61). CLOSING DATE: 05/19/2026

START SALARY: \$31,111.11

THERAPEUTIC THERAPIST II

This position as a music support specialist or a certified music therapist requires using music as a therapeutic and supportive tool to engage patients and residents, encourage emotional expression, and promote social interaction.

EXAMPLES OF WORK: • Facilitate individual and group music sessions tailored to the patients/residents needs and abilities. • Incorporate a variety of instruments, singing, songwriting, and listening activities into therapeutic programming. • Encourage patients/residents to explore music as a means of self-expression, stress reduction, and skill-building. • Collaborate with interdisciplinary treatment teams to support individualized care plans. • Maintain accurate documentation of sessions and patient/resident progress. • Organize and lead performances and other music activities.

Typically requires a bachelor's degree and 3-4 years of experience. *Agency Preferred Qualifications: A Bachelor's degree in Music, Music Therapy, Music Education. Guitar proficiency is strongly desired. Or A Bachelor's degree with a related field with an in-depth musical background of four (4) or more years. Guitar proficiency is strongly desired.

Applicant must apply online at www.mspb.ms.gov for this position.

IT IS THAT TIME AGAIN!!

Staff Education is pleased to share that the Annual Training Fair (ATF) will be available online for EVERYONE through the Intranet and Relias (for those with accounts). Staff may complete the test in their buildings while being supervised by a supervisor, shift leader, or designee. *Please watch the Suicide Prevention video via DVD in your building or on the Intranet during this month.

Be sure to include all agency staff in this training.

ANNUAL TRAINING FAIR 2026

HOW TO ACCESS ATF FROM THE COMPUTER

1. Click on the link found on the MSH Intranet main page for “2026 Annual Training Fair Comprehensive Test” (Test, Test Booklet, Answer sheet, MSH-1115C) will be located here.
2. Remember to click on the direct link found on the MSH Intranet main page for “Suicide Prevention Video” to watch video or watch DVD on your building.
3. Once the test is completed and all staff in the building have watched the video, the supervisor, shift leader, or designated staff member should submit the following to Staff Education for grading:
 - Each employee’s original answer sheet (completed in black ink)
 - Signed MSH-1115C
 - Signed Vulnerable Person Acknowledgement
 - MSH-55 signed by all staff
4. Once all items are received, completion will be verified, and each participant will receive an Annual Training Fair Certificate of Completion by mail.

2025 Annual Drinking Water Quality Report
Mississippi State Hospital - Whitfield
PWS ID #: 0610032
April 2026

We're pleased to present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water.

We at Mississippi State Hospital work around the clock to provide top quality water to every tap.

Please share this information with anyone who drinks this water (or their guardians), especially those who may not have received the report directly (for example, people in apartments, nursing homes, schools, and businesses).

Contact & Meeting Information

If you have any questions about this report or concerning your water utility, please contact Stephen Strong, Operator, at 601.351.8000, Ext:4362. We encourage our valued customers to be informed about their water utility. A copy of this report will be posted on all bulletin boards and will be available in the main office.

Source of Water

Our water source is from ground water from three (3) wells drawing from the Cockfield Formation and Sparta Sand Aquifers. The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identify potential sources of contamination. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The wells for our system have received a lower ranking in terms of susceptibility to contamination.

Period Covered by Report

We routinely monitor for contaminants in your drinking water according to federal and state laws. This report is based on results of our monitoring period of January 1st to December 31st, 2025. In cases where monitoring wasn't required in 2025, the table reflects the most recent testing done in accordance with the laws, rules, and regulations.

As water travels over the surface of land or underground, it dissolves naturally occurring minerals and, in some cases, radioactive materials and can pick up substances or contaminants from the presence of animals or from human activity; microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm-water runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm-water runoff, and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations and septic systems; radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some contaminants. It's important to remember that the presence of these contaminants does not necessarily indicate that the water poses a health risk.

We are required to monitor your drinking water for specific contaminants on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. In addition to the contaminants listed in the table, we tested for additional chemicals for which the state and EPA have set standards. We found no detectable levels of those chemicals.

In 2025, our system also tested for the Unregulated Contaminant Monitoring Rule #5 for and polyfluoroalkyl substances, where no detectable levels were found.

Violations

Our system had no violations. We're proud that your drinking water meets or exceeds all Federal and State requirements.

Lead Educational Statement

Lead can cause serious health problems, especially for pregnant women and your children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Our water system is responsible for providing high quality drinking water and removing lead pipes, but cannot control the variety of materials used in plumbing components in your home. You share the responsibility for protecting yourself and your family from the lead in your home plumbing. You can take responsibility by identifying and removing lead materials within your home plumbing and taking steps to reduce your family's risk. Before drinking tap water, flush your pipes for several minutes by running your tap, taking a shower, doing laundry or a load of dishes. You can also use a filter certified by an American National Standards Institute accredited certifier to reduce lead in drinking water. If you are concerned about lead in your water and wish to have your water tested, contact our water system. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure are available at <https://www.epa.gov/safewater/lead>.

Our system has completed the Lead Service Line Inventory, and no lead lines were found. The methods used to make that determination were visual inspections, water operator knowledge and archived records. This inventory report is available for viewing at our office upon request.

Fluoride Information

To comply with the "Regulation Governing Fluoridation of Community Water Supplies", our system is required to report certain results pertaining to fluoridation of our water system. The number of months in the previous calendar year in which average fluoride sample results were within the optimal range of 0.6-1.2 ppm was 8. The percentage of fluoride samples collected in the previous calendar year that was within the optimal range of 0.6-1.2 ppm was 61%. The number of months samples were collected and analyzed in the previous calendar year was 12.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man-made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1.800.426.4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbiological contaminants are available from the Safe Drinking Water Hotline 1.800.426.4791.

TEST RESULTS								
Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL	Unit Measurement	MCLG	MCL	Likely Source of Contamination
Inorganic Contaminants – Salts and metals which can occur naturally in the soil or groundwater or may result from urban stormwater runoff. Industrial or domestic wastewater discharges, oil and gas production, mining, or farming.								
10. Barium	N	2025	.0042	.0026 - .0042	ppm	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
	N	2023*	3.4	No Range	ppb	100	100	Discharge from steel and pulp mills; erosion of natural deposits
14. Copper	N	2023/25	.3	0	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
16. Fluoride**	N	2025	.561	.265 - .561	ppm	4	4	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
17. Lead	N	2023/25	2	0	ppb	0	AL=15	Corrosion of household plumbing systems; erosion of natural deposits
Sodium	N	2023*	137	83.6 - 137	ppm	20	0	Road Salt, Water Treatment Chemicals, Water Softeners and Sewage Effluents.
Disinfection By-Products – Substances formed when disinfectants, like Chlorine, used to treat drinking water react with naturally occurring materials in the water.								
81. HAA5	N	2025	18	9.6 – 20.6	ppb	0	60	By-Product of drinking water disinfection.
82. TTHM [Total trihalomethanes]	N	2025	56	38.5 – 78	ppb	0	80	By-product of drinking water chlorination.
Chlorine	N	2024	1 - RAA	.5– 1.2	mg/l	0	MDRL = 4	Water additive used to control microbes

* Most recent sample. No sample required for 2025.

TEST RESULTS – UCMR5								
Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL/MRDL	Unit Measurement	MCLG	MCL	Likely Source of Contamination
Unregulated Contaminants – Contaminants which EPA has not established drinking water standards. The purpose of unregulated contaminant monitoring is to assist EPA in determining the occurrence of unregulated contaminants in drinking water and whether future regulations are warranted.								
lithium	N	2025	14.6	No Range	Ug/l	9		Naturally occurring metal that may concentrate in brine waters; lithium salts are used in electrochemical cells, batteries, and in organic syntheses.

Terms and Abbreviations

In the table you may find unfamiliar terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level : The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow.

Maximum Contaminant Level (MCL): The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG): The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL): The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary to control microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG): The level of a drinking water disinfectant below which there is no known or expected risk of health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Parts per billion (ppb) or micrograms per liter (ug/L): one part by weight of analyte to 1 billion parts by weight of the water sample.

Parts per million (ppm) or Milligrams per liter (mg/l): one part by weight of analyte to 1 million parts by weight of the water sample.

RAA: Running Annual Average

Unregulated Contaminants: Unregulated contaminants are those for which EPA has not established drinking water standards. The purpose of unregulated contaminant monitoring is to assist EPA in determining the occurrence of unregulated contaminants in drinking water and whether future regulation is warranted. UCMR 5 specifies monitoring for 29 per- and polyfluoroalkyl substances (PFAS) and lithium.
