

Understanding the GSA/HHS Health and Sustainability Guidelines

Food Vending Options

To meet the U.S. General Services Administration/U.S. Department of Health and Human Services Health and Sustainability Guidelines, all items must meet sodium and trans fat standards, and 25% of food items must meet calorie, saturated fat, trans fat, sodium, and sugar standards.

Nutrition Facts	
Serving Size 1.5 oz (about 42g)	
Servings Per Container 1	
Amount Per Serving	
Calories 200	Calories from Fat 72
% Daily Value*	
Total Fat 8g	12%
Saturated Fat 2g	10%
Trans Fat 0g	
Cholesterol 0mg	0%
Sodium 230mg	9%
Total Carbohydrate 30g	10%
Dietary Fiber 1g	4%
Sugars 4g	
Protein 2g	
Vitamin A 10%	• Vitamin C 0%
Calcium 10%	• Iron 6%

At least 25% of items are limited to 200 calories or less*

At least 25% of items are limited to 10% of calories from saturated fat**

At least 25% of items are limited to 35% of weight from sugars***

All items must be 0 grams trans fat

All items are limited to 230mg of sodium or less

* Excluding nuts and seeds without added fats, oils, or caloric sweeteners.

**Any item with 180 to 200 calories can have up to 2g saturated fat, items with 135 to 175 calories can have up to 1.5g saturated fat, items with 90 to 130 calories can have up to 1g saturated fat, items with 45 to 85 calories can have up to 0.5g saturated fat, and items with less than 40 calories must have 0g saturated fat.

***Excluding fruits or vegetables with no added caloric sweeteners. The weight of the item can be found in grams at the top of the nutrition facts panel, in this case 42g. The sugars can be found in grams under the Total Carbohydrate category, in this example 4g. To calculate the percentage of weight that comes from sugars, divide 4g by 42g, $4 \div 42 = 0.095 = 9.5\%$. Anything up to 35% meets the standard.

Understanding the GSA/HHS Health and Sustainability Guidelines

Beverage Vending Options

To meet the U.S. General Services Administration/U.S. Department of Health and Human Services Health and Sustainability Guidelines:

- Offer as many milk and 100% juice options as would work in the location.
 - If milk is offered, only offer 2%, 1%, and fat-free milk.
 - If juice is offered, offer at least one 100% juice with no added caloric sweeteners.
 - Vegetable juice must contain less than 230 mg of sodium per serving.
- Of the remaining options, at least 50% must contain less than 40 calories per serving.

Sample Healthier Beverage Options

Water
Seltzer Water
Flavored Unsweetened Water
Unsweetened or Diet Iced Tea
Diet Iced Tea
Diet Soda
Diet Sports Drinks
Diet Juice Drinks
100% Juice Diluted with Water
