

MISSISSIPPI STATE DEPARTMENT OF HEALTH

**This is an official
MS Health Alert Network (HAN) Alert**

MESSAGE ID: MSHAN-20210830-00535-ALT (Health Alert)
RECIPIENTS: All Physicians, Hospitals, ERs, ICPs, NPs, and
Healthcare Providers – Statewide
Monday, August 30, 2021
SUBJECT: Mandatory Hospital Participation in Mississippi
COVID-19 System of Care Plan and Delay of
Elective Procedures

STATE HEALTH OFFICER'S ORDER

Pursuant to Mississippi Code Ann. § 41-23-1 et. seq. and the State of Emergency Declaration by the Governor of the State of Mississippi related to the coronavirus COVID-19 issued on March 14, 2020, I, Thomas Dobbs, MD, MPH, State Health Officer, Executive Director of the Mississippi State Department of Health, hereby issue this statewide Order making participation in the Mississippi COVID-19 System of Care Plan mandatory for all licensed hospitals in Mississippi effective **August 31, 2021 until September 7, 2021**, unless revoked prior to that time, as follows:

Crisis Operations - Critical Care Services

As Mississippi has reached a point where hospitals can no longer accommodate acute clinical demands, Mississippi ESF-8 will enact a COVID-19 rotation to ensure the proper assignment of patients to the appropriate hospital.

- Transfers for critical care services that cannot be accommodated by the normal referral processes will be routed through ESF-8 Mississippi Med-Com. Sending facility should call Mississippi MedCom at (601) 984-4367.
- All sending facilities must report to Med-Com all transfers requiring ICU level care, both COVID and Non-COVID.
- Mississippi Med-Com will direct patients to available beds, and, when no beds are available, to hospital destinations on a rotating basis based on geography and resource availability.
- Patients in Mississippi at level 4 hospitals in need of a higher level of care and critical care patients at level 2 and 3 hospitals that lack appropriate services to care for patients will be eligible for the rotational transfer process when necessary. Following stabilization patients will be transferred back to the hospital of origin as directed by Med-Com.
- Med-Com will distribute patients from level 1 and 2 facilities to service levels (3 and 4) according to medical necessity and service availability.
- All patients accepted by higher level facilities will be accepted by the ED physician.

MISSISSIPPI STATE DEPARTMENT OF HEALTH

- Provider to provider and nurse to nurse communications shall be maintained by sending facility.
- Mississippi Med-Com will monitor hospital capacity and capability related to providing care to patients with COVID-19.
- Rotation only applies to transfers originating in Mississippi.
- Any refusal or deviation from the COVID-19 System of Care will be investigated by MSDH.

Inpatient Medical Capacity, Effective 8/31/2021 through 9/7/2021

To meet the increasing demands of rising COVID-19 hospitalization, all hospitals must delay all:

- Elective surgeries in Tier 1 and 2 (from Appendix) that require overnight hospitalization.
- Given that prolonged delays of some elective surgeries in Tier 2 may lead to adverse consequences, any urgent surgery in Tier 2 that requires overnight hospitalization should have a compelling justification documented in the medical record.

Appendix:

Tiers	Action	Definition	Locations	Examples
Tier 1a	Postpone surgery/procedure	Low acuity surgery/healthy patient -outpatient surgery Not life-threatening illness	HOPD* ASC** Hospital with low/no COVID-19 census	-Carpal tunnel release -EGD -Colonoscopy -Cataracts
Tier 1b	Postpone surgery/procedure	Low acuity surgery/unhealthy patient	HOPD ASC Hospital with low/no COVID-19 census	-Endoscopies
Tier 2a	Consider postponing surgery/procedure	Intermediate acuity surgery/healthy patient - Not life threatening but potential for future morbidity and mortality. Requires in-hospital stay	HOPD ASC Hospital with low/no COVID-19 census	-Low risk cancer -Non urgent spine & Ortho: Including hip, knee replacement and elective spine surgery -Stable ureteral colic -Elective angioplasty
Tier 2b	Postpone surgery/procedure if possible	Intermediate acuity surgery/unhealthy patient	HOPD ASC Hospital with low/no COVID-19 census	
Tier 3a	Do not postpone	High acuity surgery/healthy patient	Hospital	-Most cancers -Neurosurgery -Highly symptomatic patients

MISSISSIPPI STATE DEPARTMENT OF HEALTH

Tiers 3b	Do not postpone	High acuity surgery/unhealthy patient	Hospital	-Transplants -Trauma -Cardiac w/symptoms -Limb threatening vascular surgery

This the 30th day of August 2021.

Thomas Dobbs, MD, MPH
State Health Officer

Alerting Message Specification Settings

Originating Agency: Mississippi State Department of Health
Alerting Program: MS Health Alert Network (MS HAN)
Message Identifier: MSHAN-20210830-00535-ALT
Program (HAN) Type: Health Alert
Status (Type): Actual ()
Message Type: Alert
Reference: MSHAN-00535
Severity: Unknown
Acknowledgement: No
Sensitive: Not Sensitive
Message Expiration: Undetermined
Urgency: Undetermined
Delivery Time: 600 minutes

Definition of Alerting Vocabulary and Message Specification Settings

Originating Agency: A unique identifier for the agency originating the alert.

Alerting Program: The program sending the alert or engaging in alerts and communications using PHIN Communication and Alerting (PCA) as a vehicle for their delivery.

Message Identifier: A unique alert identifier that is generated upon alert activation (MSHAN-yyymmdd-hhmm-TTT (**ALT=Health Alert**, **ADV=Health Advisory**, **UPD=Health Update**, **MSG/INFO=Message/Info Service**)).

Program (HAN) Type: Categories of Health Alert Messages.

Health Alert: Conveys the highest level of importance; warrants immediate action or attention.

Health Advisory: Provides important information for a specific incident or situation; may not require immediate action.

Health Update: Provides updated information regarding an incident or situation; unlikely to require immediate action.

Health Info Service: Provides Message / Notification of general public health information; unlikely to require immediate action.

Status (Type):

- Actual: Communication or alert refers to a live event
- Exercise: Designated recipients must respond to the communication or alert
- Test: Communication or alert is related to a technical, system test and should be disregarded

Message Type:

Alert: Indicates an original Alert
Update: Indicates prior alert has been Updated and/or superseded
Cancel: Indicates prior alert has been cancelled
Error: Indicates prior alert has been retracted

Reference: For a communication or alert with a Message Type of “Update” or “Cancel”, this attribute contains the unique Message Identifier of the original communication or alert being updated or cancelled. “n/a” = Not Applicable.

Severity:

Extreme: Extraordinary threat to life or property
Severe: Significant threat to life or property
Moderate: Possible threat to life or property
Minor: Minimal threat to life or property
Unknown: Unknown threat to life or property

Acknowledgement: Indicates whether an acknowledgement on the part of the recipient is required to confirm that the alert was received, and the timeframe in which a response is required (Yes or No).

Sensitive:

Sensitive: Indicates the alert contains sensitive content
Not Sensitive: Indicates non-sensitive content

Message Expiration: Undetermined.

Urgency: Undetermined. Responsive action should be taken immediately.

Delivery Time: Indicates the timeframe for delivery of the alert (15, 60, 1440, 4320 minutes (.25, 1, 24, 72 hours)).
