**Bureau of Public Water Supply**

**INTRODUCTION**

The Federal Safe Drinking Water Act Amendment of 1996 (SDWA) established the national Drinking Water State Revolving Fund (DWSRF) Program. The program allows the Environmental Protection Agency (EPA) to make capitalization grants to states who in turn provide low cost loans to public water systems which helps them to achieve or maintain compliance with SDWA requirements. Accordingly, the State Legislature in the 1995 Regular Session (through Section 41-3-16, MS Code of 1972 Annotated) created what is now called the Drinking Water Systems Improvements Revolving Loan Fund (DWSIRLF) Program, to receive the federal DWSRF capitalization grants from EPA. The Program provides low cost loans to the public water systems to finance needed infrastructure improvements.

As a condition of receiving the DWSRF capitalization grants, the SDWA requires each state to implement a “Capacity Development Program” to improve the technical, managerial, and financial capacity of the state's existing public water systems and to prevent the creation of new public water systems that do not have the capacity to comply with current and future provisions of the SDWA. This report describes Mississippi's Capacity Development Program and outlines the implementation results since the last Report to the Governor in 2011. Submission of this report represents a reporting milestone required by EPA to avoid withholdings from the FFY-2015 DWSRF capitalization grant.

**NEW PUBLIC WATER SYSTEMS' CAPACITY DEVELOPMENT**

To comply with the capacity development requirements of the SDWA for new systems, the State Legislature enacted the Mississippi Safe Drinking Water Act (Section 41-26-8, MS Code of 1972 Annotated) to require that all new community and non-transient non-community public water systems be approved by the Mississippi State Department of Health (MSDH) prior to beginning construction. During the review/approval process, MSDH is required to ensure that each proposed new Community and Non-Transient, Non-Community public water system has the technical and operational capacity to comply with all SDWA requirements. This process is effectively the Program's first "control point," or point at which the State can exercise authority to ensure the demonstration of a newly proposed system's capacity to serve its customers from the *technical* side. Another control point created by the State Law's revision is the requirement that, prior to approving a new public water system, MSDH must have written certification from the Executive Director of Mississippi's Public Utilities staff that the new water system has the *managerial* and *financial* capacity to comply with all SDWA

requirements. There have been no changes in the State's legal authority or control points since the inception of the Capacity Development Program.

## **EXISTING PUBLIC WATER SYSTEMS' CAPACITY DEVELOPMENT**

Implementation of a capacity development program for existing public water systems is a much more difficult task than it is for new public water systems. The State of Mississippi has approximately 1,227 public water systems that are subject to the requirements of the SDWA. Since Mississippi is a rural state, the vast majority of these systems are small with limited financial resources. It is therefore impossible to develop a mandatory program in the State that would solely force all these small systems to immediately make the necessary capital improvements to achieve the technical, managerial, and financial capacity needed to comply with the SDWA. However, recent additions to the SDWA, such as the Ground Water Rule, have forced small systems to make necessary improvements, be on a state approved timeline to make needed improvements or consolidate their system with other surrounding systems. Regardless, the method implemented by MSDH consists primarily of two components: 1) stringent enforcement of existing laws and regulations, and 2) implementation of a capacity assessment rating system and technical assistance procedures.

**ENFORCEMENT** - MSDH stringently enforces the water supply laws and regulations, such as those related to: 1) SDWA water quality standards, 2) waterworks operator certification, 3) overloaded water systems, 4) corrosion control treatment facilities, 5) cross-connection control, and 6) water system board member training. By strictly enforcing these laws and regulations, MSDH helps ensure that a safe supply of drinking water is provided. Strict enforcement also encourages water systems without adequate capacity to seek alternate methods of compliance, including the pursuit of mergers with neighboring viable water systems. In most cases, these mergers (or "consolidations") result in the creation of much more viable public water systems in the capacity assessment categories.

**CAPACITY ASSESSMENT** - MSDH has developed a Capacity Assessment Rating Program to rate the capacity of existing systems. The technical, managerial, and financial capacity of each public water system is rated annually during inspections conducted by MSDH regional engineering staff. The maximum rating possible is "5.0", and a rating of "0.0" is the minimum. The rating is determined using Capacity Assessment Forms (CAFs), which consist of three major sections: 1) Technical, 2) Managerial, and 3) Financial. Each section includes key questions designed to identify those tasks that a public water system must routinely accomplish in order to demonstrate their capacity to comply with all current and proposed requirements of the SDWA and Mississippi's Safe Drinking Water Act.

The CAFs are developed by MSDH in conjunction with an Advisory Committee consisting of representatives of stakeholder organizations such as the Mississippi Rural Water Association; the Mississippi Municipal League; the Mississippi Water & Pollution Control Operators' Association; Community Resource Group (CRG) - Rural Community Assistance Program; Mississippi Development Authority; Public Service Commission, etc., as well as selected water system managers and operators from throughout the State. Each year, prior to the annual Advisory Committee meeting (typically held in the last quarter of the state fiscal year), the MSDH staff reviews and evaluates the program, discusses the strengths, weaknesses, and any related problems which may have arisen during the fiscal year. The staff then recommends changes to be considered by the Advisory Committee. Later at the Advisory Committee meeting, the recommended changes are presented for their review and comment.

Additional suggestions may be offered during the course of the meeting beyond initial staff recommendations. At the conclusion of the meeting, MSDH, using the Advisory Committee's suggestions, makes changes as needed to the Program's strategy for the following year's CAFs.

In April 2014, the Advisory Committee met to discuss the overall performance of the current capacity development/implementation strategy. Based on input from this year's Advisory Committee meeting, it was decided that the capacity assessment in its current form should not change for SFY-2015.

Appendix A contains copies of the three CAFs used during SFY-2014. Included are the: 1) Standard Form – used for community public water systems; 2) Private Form – used for public water systems that are owned by private investors; and 3) Non-Transient Non-Community Form – used for public water systems that provide water to 25 or more of the same individuals, in a non-residential manner, on a daily basis (schools, industries, etc.). At this time a capacity assessment for systems meeting the definition of a Transient Non-Community public water supply is not required or performed.

**TECHNICAL ASSISTANCE** – One of the major advantages of the MSDH Capacity Assessment Rating is its ability to aid the department in identifying public water systems that are at risk of becoming unable to provide safe adequate drinking water to their customers. Once systems are shown to have low capacity, efforts are made to provide assistance to improve the systems within the limits of funding. Through grants from EPA, the Drinking Water Systems Improvements Revolving Loan Fund (DWSIRLF) Program funds, the Small System Technical Assistance Set-Aside, and the State Program Management Set-Aside. DWSIRLF technical assistance providers and the Bureau of Public Water Supply Staff provide technical assistance at no cost to at-risk water systems.

Technical assistance can take several forms which allow the water system recipients options to improve their technical, financial, and managerial capabilities. The set-asides have provided MSDH the ability to contract with technical assistance providers such as Community Resource Group (CRG), Mississippi Rural Water Association (MsRWA), and the Mississippi State University Extension Service (MSU-ES). The technical assistance providers are able to provide specialized assistance beyond which the MSDH Bureau of Public Water Supply staff can provide. The assistance includes: 1) Comprehensive and Intermediate Technical Assistance provided by CRG; 2) Board Management Training Coordination provided by MSU-ES; 3) Hands-On Operator Training provided by MsRWA; and 4) PEER Review Program provided by both MSU-ES and MsRWA. These programs have an impact on a system's ability to obtain or remain in compliance with the SDWA.

Annually MSDH determines which public water systems are in the most need of assistance. Based on the previous year's capacity assessment scores and SDWA violations, the comprehensive and intermediate technical assistance contractor and the PEER review program are provided a list of systems to contact to offer assistance. Periodic reports are provided by the contractors to MSDH to confirm that the assistance being provided is benefitting the public water supplies of Mississippi.

The Comprehensive and Intermediate technical assistance provided through CRG allows the water system officials and staff to receive one-on-one assistance to improve their overall capacity ratings. This type of technical assistance is not voluntary. MSDH provides a list of the poorest performing systems. The listed water systems receive a letter notifying them of their selection for technical assistance. Refusing the assistance may affect future compliance actions that may be taken on that

system, if warranted, by the Compliance and Enforcement Branch of MSDH. The assistance provided is specific and specialized, based on the water supply's needs. It could take the form of obtaining new management policies, financial budgeting, or operational improvements. MSDH Regional Engineering staff may recommend additional water systems for assistance that they deem are in need of technical assistance; CRG then performs an assessment of the system by meeting with the officials and operator. After the assessment, CRG develops a specialized task list of assistance for the system. After MSDH's approval of the list, CRG, in cooperation with the system, proceeds to execute the identified tasks. If the system is selected for comprehensive assistance, they can potentially receive the assistance throughout the year. In these instances, it is necessary to ensure that certain policies are implemented, management adjustments are made, and CRG follows the changes throughout the improvement process. Selected intermediate systems are usually identified as having one or two major issues that can be resolved in considerably less time.

The PEER Review program provides improved technical operations to the water supply staff through peer-to-peer interaction. The voluntary program pairs selected water system operators with other water system operators to assist them in preparing for annual MSDH inspections. Similar to comprehensive and intermediate technical assistance, MSDH provides MsRWA, the present technical assistance contractor; a list of poorly performing systems having Capacity Assessment scores less than 3.0. The technical assistance contractor contacts those referred systems by letter to determine their interest in participating in the PEER Review Program. To ensure that the assistance will have the greatest impact, contact is made with the system's responsible officials as well as the certified operator. Additionally, the technical assistance contractor also advertises the benefits of the PEER Review Program at various trade shows and in publications throughout the year. A water system desiring a PEER Review makes contact with the contractor's personnel, who in turn, coordinate a meeting for all parties involved, including at a minimum the operators on the PEER Review team, the water system operator, and the responsible official(s). At that meeting, all components of the capacity assessment are performed, including an onsite inspection of the water system itself. Additionally, the PEER Review team looks beyond the standard capacity assessment by reviewing other technical, managerial, and financial aspects not previously evaluated. The team also brings each of their unique operational/managerial styles and experience due to the fact they have encountered many of the same problems. The team approach to problem solving provides an additional boost in capacity assessment areas thereby providing increased operational efficiency, managerial stability, and financial solvency. Shortly after the review is completed, a report by the PEER Review team is generated outlining the issues raised at the meeting, including suggestions for possible improvements that could be made for the benefit of the water system and its users. Whereas the comprehensive and intermediate assistance emphasizes managerial and financial components, the PEER Review Program primarily emphasizes technical components while providing limited managerial and financial assistance.

The Board Management Training Program for Water System Officials assists newly elected water system board members in meeting the requirements of the state law. This law requires board management training for all newly elected water system board members of private, non-profit water supplies and officials of municipal systems with a population of 10,000 and less. Mississippi State University Extension Service (MSU-ES), the present contractor, coordinates with the selected training partners, to provide training throughout the state to these public water system officials. Board officials are given training that outlines their duties in managing and overseeing the operation of a public water system and their responsibilities under state law. This training allows the new board members to have

the management skills necessary to effectively fulfill their duties. The program is in the process of exploring the possibility of providing the required training in an online format so as to be more accommodating for the busy schedules that board member may have. That opportunity should be available within the next year.

The Hands-On Operator Training, conducted by MsRWA, the present contractor, provides small system operators specialized “hands-on” training and skills they need in order to better operate their water systems on a daily basis. Some operators, especially new ones, may not have all the needed hands-on skills in order to effectively operate the water system. The training sessions, held throughout the State, provide participants with experience in actual hands-on skills such as meter repair, chlorinator repair, fire hydrant maintenance, leak detection, etc. The operators’ newly acquired skills could lead to potential cost savings to the water system, since operators learn how to make repairs themselves rather than having to hire specialized help.

MSDH has noted significant improvements to the water systems the implementation of the assistance programs.

Comprehensive and Intermediate Assistance:

In SFY-2012 Community Resource Group (CRG) provided long-term comprehensive assistance and intermediate assistance to public water systems, which resulted in an average capacity assessment improvement of 1.36 points, specific results are as follows:

Mount Olive Water Association	Improved from 0.67 to 5.0
City of Ripley	Improved from 2.0 to 4.67
Kessler Air Force Base	Improved by 3.0 points
Thrasher Water Association	Improved by 0.33 to 4.67 over two years

The Towns of Como, Shuqualak & Alligator improved their rankings by 2.67 points over two years

In SFY-2013 Community Resource Group (CRG) provided long-term comprehensive assistance to 13 public water systems and intermediate assistance to 15 public water systems. This resulted in an average capacity assessment improvement of 1.20 points after comprehensive assistance was received.

Tallula Utility District	Improved from 1.67 to 4.3
Town of Fayette	Improved from 2.0 to 3.3
City of Schlater	Improved from 2.7 to 4.0
Town of Gunnison	Improved from 2.67 to 3.33
Walnut Hill Water Association	Improved from 2.0 to 3.0
East Pontotoc Water Association	Improved from 2.67 to 3.3
Escatawpa Utility District	Improved from 2.67 to 4.0

In SFY-2014 Community Resource Group (CRG) provided long-term comprehensive assistance to 10 public water systems and intermediate assistance to 10 public water systems. The following is a list of

the systems receiving assistance in SFY-2014 with their previous and present year's scores; some additional follow-up will be necessary:

Systems Receiving Comprehensive Assistance	Previous Year's Score & Current Year's Score
Meadville, Town of (Franklin Co.)	Improved from 4.67 to 5.00
NE Itawamba Water Association (Itawamba Co.)	Declined from 3.67 to 3.33
CCM Water Association (Chickasaw Co.)	No Change 3.67 and 3.67
Coles Water Association (Amite Co.)	Improved from 4.00 to 4.33
Plum Point Water & Sewer (Panola County)	Improved from 1.00 to 2.00
Walnut Hill Water Association (Panola Co.)	Improved from 3.00 to 3.33
Deerwood Utilities (Harrison Co.)	Improved from 3.00 to 3.67
Palmer Creek Utility Association (Harrison Co.)	Improved from 3.33 to 3.67
Lumberton, Town of (Lamar Co.)	Improved from 3.33 to 5.00
Eden, Town of (Yazoo Co.)	Improved from 3.33 to 4.00

Systems Receiving Intermediate Assistance	Previous Year's Score & Current Year's Score
Bolivar County Port Commission (Bolivar Co.)	No Change 5.00 and 5.00
Moss Point, City of (Jackson Co.)	Improved from 4.00 to 5.00
Central Yazoo Water Association (Yazoo Co.)	No Change 5.00 and 5.00
Hermanville Water Association (Claiborne Co.)	No Change 3.67 and 3.67
C.S. & I. Water Association (Claiborne Co.)	Improved from 4.00 to 5.00
Lexie Water Association (Walthall Co.)	No Change 5.00 and 5.00
Webb, Town of (Tallahatchie Co.)	No Change 3.33 and 3.33
Bay Springs, Town of (Jasper Co.)	Improved from 4.33 to 4.67
Montrose, Town of (Jasper Co.)	No Change 5.00 and 5.00
Summit, Town of (Pike Co.)	Declined from 3.67 to 3.33

PEER Review Assistance:

Since the inception of the Peer review program in 2002, one hundred ninety-nine (199) PEER Reviews have been conducted in the State through the end of the SFY-2014 reporting period. All the systems which have participated so far have received improvements in their Post Review Average Rating.

In SFY-2012 twenty (20) reviews were conducted. When the systems' Post Review Capacity Ratings were completed, the reviewed systems showed an average increase in their Capacity Assessment scores of 0.41 points. The systems increased from an average of 2.39 to 2.80, with the highest individual increase being 2.0.

In SFY-2013 twenty (20) reviews were conducted. When the systems Post Review Capacity Rating were completed, the reviewed systems increased from an average Initial Rating of 2.36 to a Post

Review average Rating of 3.16 or an overall Capacity Rating Increase of 0.84, with the highest individual increase being 2.6; this system went from a 1.7 rating to a 4.3 rating.

In SFY-2014 sixteen (16) reviews were conducted. It will take approximately one year until the next annual review by the MSDH to determine the results of the assistance provided to all the public water systems in SFY-2014; however, for those systems which had reviews completed at the beginning of the year and have since been reviewed or inspected by MSDH, the results are as follows:

<u>Review ID.</u>	<u>Score Before Review</u>	<u>Score After Review</u>	<u>Increase</u>
PR 1	2.33	3.66	1.33
PR 2	1.66	2.33	0.67
PR 3	2.66	3.33	0.67
PR 4	2.66	4.00	1.34
PR 6	0.50	2.50	2.00

The contractor for this program provides both monthly and quarterly reports of their activities including specific redacted reports of the individual PEER Reviews.

Board Management Training Program for Water System Officials:

In SFY-2012, Mississippi State University Extension Service (MSU-ES), the coordination contractor, successfully administrated 21 training sessions for the Board Management Training Program to water system officials around the state. Two hundred and ninety (290) board members and managers representing 180 public water supplies attended the sessions. These individuals received training in the various technical and management skills necessary to effectively fulfill their duties as board members and officials of a public water system.

In SFY-2013, Mississippi State University Extension Service successfully administrated 13 training sessions for 216 board members and managers; this represented 119 public water supplies around the state.

In SFY-2014, Mississippi State University Extension Service successfully administrated 16 sessions around the state and trained 429 board members and managers, which represented 235 public water supplies.

Most assuredly having system officials knowledgeable of the laws, regulations and requirements of how a system should be managed helps the overall operation of the public water supply program.

MSDH has found that the majority of public water systems are making efforts to improve even though the Capacity Development Program for existing systems is not mandatory. There are no specific penalties for a water system refusing assistance (which does occasionally occur) or failing to improve/maintain their Capacity Assessment Rating, however, such actions do have inherent

consequences. The annual capacity assessment results for all systems are publicized in a paper of local circulation and on the MSDH website. Similar to the way the Consumer Confidence Report (CCR) is perceived, a primary goal of the program is for the public, not just the public water systems, to take an active role in assuring the quality of their water supply. The general public desires that their utilities be in compliance with laws and regulations, be viable for the future, and provide the best quality water at a reasonable cost.

Additional indirect consequences of failing to take action to improve Capacity Assessment Ratings include: 1) “losing” to neighboring water systems - many neighboring water system view the capacity rating as a competition to see who has the “best” water system; and 2) receiving lower priority when seeking certain government funding. Regarding funding priority, the State’s DWSRF Loan Program contains priority ranking incentives related to Capacity Assessment Ratings, and other government agencies such as the Mississippi Developmental Authority (CDBG Program) have been including a portion of the Capacity Assessment Ratings to evaluate applicants for funding. Additionally, the DWSRF requires that when reviewing facilities plans (with less than a perfect score) the potential loan recipients must address why points were missed. This competition between water systems and their attempts to seek funding results in more viable water systems, which ultimately translates into a benefit to the customers and the general public.

## **RESULTS**

The efficacy of Mississippi’s Capacity Development Program is best demonstrated by actual results. At the present time there are 1,227 active public water systems in the state; using the Enforcement Targeting Tool List (ETT) from EPA:

The July 2013 report listed 138 systems in the state with violations; of those systems 46 had an ETT score greater than 10.

The April 2014 report listed 41 systems in the state with violations; of these systems no system had an ETT score greater than 10.

Appendix B contains a complete listing of the Technical, Managerial, Financial, and Overall/Average Capacity Assessment Ratings (scores) of Mississippi’s public water systems for SFY-2012, SFY-2013 and SFY-2014 (Partial). During the past three-year reporting period the Capacity Assessment Ratings on average have progressively increased; the “Yearly State Overall Averages” have increased from the SFY 2011 score of 4.00 as follows:

SFY 2012	4.20
SFY 2013	4.30
SFY 2014	4.41

When reviewing the data, the following should be considered:

Consolidated or merged systems are indicated with the “CON” - they were consolidated with other existing water supplies.

Newly created water supplies are identified by “NS”.

Dissolved Systems are designated as “DIS” and are no longer serving customers.

There are a few systems that have felt the effects of destruction by some type of natural disaster such as flood, tornado, hurricane, etc; they are designated as “NAT.”

Transient, Non-Community Public Water Supplies are not required at this time to have Capacity Assessments performed. However, they are included in the Capacity Assessment listing of systems in Appendix B and account for the total 1,227 public water supplies operating within the state.

Appendix C contains individual 12 Year Distribution Charts (SFY-2003 to SFY-2014) of the scores for each category. This information clearly reflects a trend in all categories away from lower scores (0 through 3) and toward higher scores (4 and 5) and, thus, toward improved capacity for water systems throughout the State. Mississippi’s Capacity Development Program continues to prove very effective in producing the desired result of protecting public health by improving the technical, managerial, and financial capacities of the public water systems throughout the State.

## **PUBLIC INVOLVEMENT**

A primary goal of the Capacity Development Program is for the public, not just the public water systems, to take an active role in assuring the quality of their water supply. Customers of public water systems which have received a high rating are encouraged to contact their water system officials to congratulate them for doing an excellent job of operating and managing their water system. Likewise, customers of public water systems which have received a low rating are strongly encouraged to contact their water system officials and request a copy of the system’s most recent Capacity Assessment Form. That form will quickly identify the areas where the water system needs improvement. A lower rating could indicate that the system is more likely to be non-viable and thus unable to protect public health by complying with all SDWA requirements. Customers of such systems are also strongly encouraged to get involved with their water system to ensure that any needed improvements are completed.

## **FUTURE**

The state is still seeing the effects of recent regulations such as the Ground Water Rule and Stage 2 Disinfection By-Products Rule with the additional difficulty some systems are having with compliance. As mentioned in previous year’s reports, new SDWA rules are an area where there is a special need for additional small system technical assistance. Currently, MSDH has contracts for the compliance challenges associated with the Ground Water Rule, the Disinfection By-Products Rule, and the State Fluoride Regulation. Furthermore, the Revised Total Coliform Rule could have a yet undetermined increased burden to public water systems once implementation begins, and this could affect water system capacity assessment. It is MSDH’s intention to provide assistance to ensure that non-compliance is kept to a minimum. MSDH discovered long ago that it is easier and less costly to help systems maintain compliance by providing targeted technical assistance than by attempting to bring a troubled system back in to compliance. We believe that the assistance has already had a profound effect on compliance rates, the capacity assessment program and water systems’ scores. Based on information from various sources, it appears that the water supply concepts of asset management and sustainable infrastructure will be a major part of future needs and requirements of water systems. Additional funding provided to the DWSRF program will allow for more specialized assistance in the

previously mentioned areas of asset management planning or sustainable infrastructure to the water systems in the State. Furthermore, we believe the Board Management Training of officials of water systems of 10,000 population and less is having a positive impact on capacity assessment scores. It should also be noted that in the current economic climate, water systems are “doing their best” with less financial and operational resources. As economic conditions improve, many water systems may make significant infrastructure improvements that may be long overdue.

## **SUMMARY**

Through the passage of proper legislation, the strict enforcement of existing laws and regulations, and the implementation of sound capacity assessment and technical assistance procedures, Mississippi continues a Capacity Development Program that has resulted in higher levels of technical, managerial, and financial capacity of new and existing public water systems throughout the State. The program also provides an additional benefit to the public in the form of better utilization of assistance resources and funding. Although no major changes have been made over the last three years, the annual evaluation process, along with the Advisory Committee review and public involvement, help to assure that any needed future changes are identified and implemented in a timely manner.

If there are questions regarding the information presented in this report, or if you have recommendations for improving the Public Water System Capacity Development Program, please contact:

William F. Moody, P.E., BCEE, Director  
Bureau of Public Water Supply  
P. O. Box 1700  
Jackson, MS 39215-1700

Technical Capacity Assessment	Point Scale	Point Award
[T1] Does the water system have any significant deficiencies? [Y N]	N - 1pt. Y - 0pt.	
[T2] 1) Was the water treatment process functioning properly? [Y N] (i.e. Is pH, iron, free chlorine, fluoride, etc. within acceptable range?) 2) Was needed water system equipment in place and functioning properly at the time of survey? [Y N] (NOTE: Equipment deficiencies must be identified in survey report.) 3) Were records available to the regional engineer clearly showing that all water storage tanks have been inspected and cleaned or painted (if needed) within the past 5 years? [Y N NA] (NOTE: All YESs required to receive point)	All Y - 1 pt. Else - 0 pt.	
[T3] 1) Was the certified waterworks operator or his/her authorized representative present for the survey? [Y N] 2) Was log book up to date and properly maintained and did it show that MSDH Minimum JOB Guidelines for W. W. Operators were being met? [Y N] 3) Was the water system properly maintained at the time of survey? [Y N] 4) Did operator satisfactorily demonstrate to the regional engineer that he/she could fully perform all water quality tests required to properly operate this water system? [Y N] (NOTE: All YESs required to receive point)	All Y - 1 pt. Else - 0 pt.	
[T4] 1) Does water system routinely track water loss and were acceptable water loss records available for review by the regional engineer? [Y N] 2) Is water system overloaded? (i.e. serving customers in excess of MSDH approved design capacity)? [Y N] 3) Was there any indication that the water system is/has been experiencing pressure problems in any part(s) of the distribution system? [Y N] (based on operator information, customer complaints, MSDH records, other information) 4) Are well pumping tests performed routinely? [Y N NA] (NOTE: YES FOR #1 & YES OR N/A FOR #4 AND NOs FOR #2 & #3 required to receive point)	1)Y - pt. 2)N - pt. 3)N - pt. 4)Y - pt.	
[T5] 1) Does the water system have the ability to provide water during power outages? (i.e. generator, emergency tie-ins, etc.) [Y N] 2) Does the water system have a usable backup source of water? [Y N] (NOTE: Must be documented on survey report)	All Y - 1 pt. Else - 0 pt.	
<b>TECHNICAL CAPACITY RATING = [ ____ ] (Total Points)</b>		

<b>Managerial Capacity Assessment</b>	<b>Point Scale</b>	<b>Point Award</b>
<b>[M1]</b> Were all SDWA required records maintained in a logical and orderly manner and available for review by the regional engineer during the survey? [ <u>Y</u> <u>N</u> ]	Y - 1pt. N - 0pt.	
<b>[M2]</b> 1) Have acceptable written policies and procedures for operating this water system been formally adopted and were these policies available for review during the survey? [ <u>Y</u> <u>N</u> ] 2) Have all board members (in office more than 12 months) completed Board Member Training? [ <u>Y</u> <u>N</u> <u>NA</u> ] 3) Does the Board of Directors meet monthly and were minutes of Board meetings available for review during the survey? ( <b>NOTE:</b> Quarterly meetings allowed if system has an officially designated full time manager) [ <u>Y</u> <u>N</u> <u>NA</u> ] ( <b>NOTE:</b> ALL YESs or NAs required to receive point. NA - Not Applicable)	All Y - 1 pt. Else - 0 pt.	
<b>[M3]</b> Has the water system had any SDWA violations since the last Capacity Assessment? [ <u>Y</u> <u>N</u> ]	N - 1pt. Y - 0pt.	
<b>[M4]</b> Has the water system developed a long range improvements plan and was this plan available for review during the survey? [ <u>Y</u> <u>N</u> ]	Y - 1pt. N - 0pt.	
<b>[M5]</b> 1) Does the water system have an effective cross connection control program in compliance with MSDH regulations? [ <u>Y</u> <u>N</u> ] 2) Was a copy of the MSDH approved bacti site plan and lead/copper site plan available for review during the survey and do the bacti results clearly show that this approved plan is being followed? [ <u>Y</u> <u>N</u> ] ( <b>NOTE:</b> All YESs required to receive point)	All Y - 1 pt. Else - 0 pt.	
<b>MANAGERIAL CAPACITY RATING = [ _____ ] (Total Points)</b>		

<b>Financial Capacity Assessment</b>	<b>Point Scale</b>	<b>Point Award</b>
<b>[F1]</b> Has the water system raised water rates in the past 5 years? [ <u>Y</u> <u>N</u> ] ( <b>NOTE:</b> Point may be awarded if the water system provides acceptable financial documentation clearly showing that a rate increase is not needed, i.e. revenue has consistently exceeded expenditures by at least 10%, etc.)	Y - 1pt. N - 0pt.	
<b>[F2]</b> Does the water system have an officially adopted policy requiring that water rates be routinely reviewed and adjusted as appropriate and was this policy available for review during the survey? [ <u>Y</u> <u>N</u> ]	Y - 1pt. N - 0pt.	
<b>[F3]</b> Does the water system have an officially adopted cut-off policy for customers who do not pay their water bills, was a copy of this policy available for review by the regional engineer, and do system records (cut-off lists, etc.) <u>clearly</u> show that the water system effectively implements this cut-off policy? [ <u>Y</u> <u>N</u> ]	Y - 1pt. N - 0pt.	
<b>[F4]</b> Was a copy of the water system's officially adopted annual budget available for review by the regional engineer and does the water system's financial accounting system clearly and accurately track the expenditure and receipt of funds? [ <u>Y</u> <u>N</u> ]	Y - 1pt. N - 0pt.	
<b>[F5 - Municipal Systems]</b> 1) Is the municipality current in submitting audit reports to the State Auditor's Office? [ <u>Y</u> <u>N</u> ] 2) Was a copy of the latest audit report available for review at the time of the survey? [ <u>Y</u> <u>N</u> ] 3) Does this audit report clearly show that water and sewer fund account(s) are maintained separately from all other municipal accounts? [ <u>Y</u> <u>N</u> ] ( <b>NOTE:</b> Yes answer to all questions required to receive point.)	All Y - 1 pt. Else - 0 pt.	
<b>[F5 - Rural Systems]</b> 1) Has the rural water system filed the required financial reports with the State Auditor's Office and were these reports available for review? [ <u>Y</u> <u>N</u> ] 2) Does the latest financial report show that receipts exceeded expenditures? [ <u>Y</u> <u>N</u> ] ( <b>NOTE:</b> Yes answer to both questions required to receive point)	All Y - 1 pt. Else - 0 pt.	
<b>FINANCIAL CAPACITY RATING = [ _____ ] (Total Points)</b>		

**Mississippi State Department of Health  
Bureau of Public Water Supply  
Capacity Development Rating Form Assessment Criteria  
01 July 2013 - 30 June 2014**

**Technical Capacity**

- T1 Does the water system have any significant deficiencies?**
- T2 (1) Was the water treatment process functioning properly?** Corrosion control plants: within +/- 0.5 of target pH (approximately 8.4, Langelier Index, or 7.2-7.8 if adding phosphate for corrosion AND minimum phosphate residual of 0.5 mg/L as P or 1.5 mg/L as PO<sub>4</sub> (most test kits)), Iron removal plants: finished water Fe < 0.3 mg/l, Chlorine: Adequate at plant to provide free residual throughout system, spot checked on system, Systems adjusting Fluoride: 0.7 - 1.3 mg/l with optimum dose at 0.7 mg/l.
- T2 (2) Was needed water system equipment in place and functioning properly at the time of survey?** Adequate security: locked fence around wells/treatment plant/tank (6' or 5' + barbed wire at top), locked hatches on water storage tanks (operator verifies), Security Vulnerability Self-Assessment and Emergency Response Plan, both updated annually. Required equipment in place (i.e., phosphate and/or fluoride feeders on all wells if required), major components sized correctly if affects water quality or quantity, major components working at time of inspection unless provisions for repairs made. Must be noted on inspection report.
- T2 (3) Were records available to the regional engineer clearly showing that all water storage tanks have been inspected and cleaned or painted (if needed) within the past 5 years?** Maintenance and painting contracts, tank inspection reports, operator can inspect own tank if he/she writes a report and/or takes pictures, painted if needed.
- T3 (1) Was the certified waterworks operator or his/her authorized representative present for survey?** Operator or representative must be present unless emergency; operator of record shouldn't miss two in a row.
- T3 (2) Was log book up to date and properly maintained and did it show that MSDH Minimum JOB Guidelines for W. W. Operators were being met?** Log book: Cl<sub>2</sub> recorded as required, pH, Fe, Fluoride, and phosphate where applicable, major events recorded (fix major leaks, replace chlorine cylinder, equipment repairs, etc.) Part time operator must make required entries in log book to show MSDH MINIMUM JOB GUIDELINES are met. Major events can be recorded separately (work orders).
- T3 (3) Was the water system properly maintained at the time of survey?** Grass cut, packing not leaking excessively, plant presentable, etc.
- T3 (4) Did the operator satisfactorily demonstrate to the regional engineer that he/she could fully perform all water quality tests required to properly operate this water system?** Must have appropriate test kits, fresh reagents, and able to perform tests (where applicable: chlorine, pH, iron, fluoride, phosphate). Regional engineer may perform tests to verify operator's results. Chlorine test must be performed by operator at all inspections.
- T4 (1) Does water system routinely track water loss and were acceptable water loss records available for review by the regional engineer?** Requires metered connections and master meter or annual pump test with run time. Must show calculating water loss at least quarterly.
- T4 (2) Is the water system overloaded?** Cannot exceed MSDH design capacity, consecutive systems overloaded if supplier overloaded or based on hydraulic calculations or pressure recording.

- T4 (3) Was there any indication that the water system is/has been experiencing low pressure in any part(s) of the distribution system?** Documented by hydraulics or pressure recording, or verified by operator. Must be documented on inspection report
- T4 (4) Are well pumping tests performed routinely?** Must have pump tests at least every two years on all wells that are greater than three (3) years old, OR pump tests every year on wells at systems with design capacity exceeding 80%.
- T5 (1) Does the water system have the ability to provide water during power outages?** Credit given for generators, can give credit for emergency tie-ins w/ system w/ generator if hydraulics work, credit given for right angle drive if motor attached during survey, may be required to operate during inspection. Credit given for generator on trailer if quick-connect, systems with elevated storage may share generator on trailer, must have prior agreement.
- T5 (2) Does the water system have a usable backup source of water?**

### **Managerial Capacity**

- M1 Were all SDWA required records maintained in logical and orderly manner and available for review?** In one location, sample results, MSDH correspondence, copy of CCR report, etc.
- M2 (1) Have acceptable written policies and procedures for operating this water system been formally adopted and available for review?** Must have water users agreement (connection fees, late charges, deposits, wastewater requirements) and subdivision/line extension policy (written procedure requiring developer/system obtain MSDH approval before construction begins) and either By-laws or Job Description for Employees (employee handbook), plus at least two of the following: Emergency or contingency plan (chain of command, phone numbers, etc.), Flushing program (flushing schedule w/ records), Fire hydrant policy (maintenance schedule, flow tests, agreement w/ fire dept.), or Updated distribution map (can be updated by operator).
- M2 (2) Have all Board Members (in office more than 12 months) completed Board Member Training?** Must have certificate (or copy) available for review. This does not apply to Municipalities with population over 10,000.
- M2 (3) Does Board meet monthly and were minutes of Board meetings available for review?** Allow quarterly meetings with full time manager. Manager must be appointed by the board and documentation of appointment provided.
- M3 Has the water system had any SDWA violations since the last Capacity Assessment?** System and Regional Engineer's records
- M4 Has the water system developed a long range improvement plan and was this plan available for review?** Hydraulic analysis, engineering report, completed State Needs Survey Form or list of goals prepared by operator and adopted by board, can give credit for major improvement project within past 5 years. Plan in use should indicate progress towards improvements. **For FY-2015:** Water systems will need to provide proof of annual review by the governing body of the water system.
- M5(1) Does the water system have an effective cross connection program in compliance with MSDH regulations?** Shall include the following: Cross connection policy, records of backflow preventers installed on the system, current test results for each backflow preventer on system.
- M5(2) Was a copy of the MSDH approved bacti sample site plan and lead and copper sample site plan available for review and bacti results show site plan is followed?** Copy of sampling site plans available and bacti results show plan is being followed.

**Financial Capacity**

- F1** **Has the water system raised water rates in the past 5 years?** Credit also allowed if revenue exceeds expenditures (excluding out of pocket for major improvements and depreciation) by 10% for past five years.
- F2** **Does the water system have an official policy requiring rates routinely reviewed and adjusted if necessary?** Must be in minutes showing adopted
- F3** **Is the water system following an official cut off policy?** Must be published (in minutes or on bills), must follow policy (cut off customers who by policy should be cut off)
- F4** **Was a copy of system's adopted annual budget available for review and does financial accounting system clearly and accurately track receipts and expenditures?** Must provide copy of budget and balance sheet (income statement) for review.
- F5** **Is the municipality current in submitting audit reports to State Auditor? Was audit report (Municipal) available for review? Were water and sewer fund accounts separate from other accounts?** List of violators, copy in records, can accept CPA audit report
- F5 1)** **Has the water system filed financial report with State Auditor and copy available (Rural) for review?** List of violators, copy in records, can accept CPA audit report **2) Does the latest report show that receipts exceed expenditures?** Excluding out of pocket for major improvements

- T4 (4) Are well pumping tests performed routinely?** Must have pump tests at least every two years on all wells that are greater than three (3) years old, OR pump tests every year on wells at systems with design capacity exceeding 80%.
- T5 (1) Does the water system have the ability to provide water during power outages?** Credit given for generators, can give credit for emergency tie-ins w/ system w/ generator if hydraulics work, credit given for right angle drive if motor attached during survey, may be required to operate during inspection. Credit given for generator on trailer if quick-connect, systems with elevated storage may share generator on trailer, must have prior agreement.
- T5 (2) Does the water system have a usable backup source of water?**

### Managerial Capacity

- M1 Were all SDWA required records maintained in logical and orderly manner and available for review?** In one location, sample results, MSDH correspondence, copy of CCR report, etc.
- M2 (1) Have acceptable written policies and procedures for operating this water system been formally adopted and available for review?** Must have water users agreement (connection fees, late charges, deposits, wastewater requirements) and subdivision/line extension policy (written procedure requiring developer/system obtain MSDH approval before construction begins) and either By-laws or Job Description for Employees (employee handbook), plus at least two of the following: Emergency or contingency plan (chain of command, phone numbers, etc.), Flushing program (flushing schedule w/ records), Fire hydrant policy (maintenance schedule, flow tests, agreement w/ fire dept.), or Updated distribution map (can be updated by operator).
- M2 (2) Have all Board Members (in office more than 12 months) completed Board Member Training?** Must have certificate (or copy) available for review. This does not apply to Municipalities with population over 10,000.
- M2 (3) Does Board meet monthly and were minutes of Board meetings available for review?** Allow quarterly meetings with full time manager. Manager must be appointed by the board and documentation of appointment provided.
- M3 Has the water system had any SDWA violations since the last Capacity Assessment?** System and Regional Engineer's records
- M4 Has the water system developed a long range improvement plan and was this plan available for review?** Hydraulic analysis, engineering report, completed State Needs Survey Form or list of goals prepared by operator and adopted by board, can give credit for major improvement project within past 5 years. Plan in use should indicate progress towards improvements. **For FY-2015:** Water systems will need to provide proof of annual review by the governing body of the water system.
- M5(1) Does the water system have an effective cross connection program in compliance with MSDH regulations?** Shall include the following: Cross connection policy, records of backflow preventers installed on the system, current test results for each backflow preventer on system.
- M5(2) Was a copy of the MSDH approved bacti sample site plan and lead and copper sample site plan available for review and bacti results show site plan is followed?** Copy of sampling site plans available and bacti results show plan is being followed.

**Financial Capacity**

- F1 Does the water system have a Certificate of Need and Necessity (certificated service area) issued by PSC?** Copy of tariff or PSC filings
- F2 Has the water system petitioned PSC for a rate increase in the past 5 years?** Credit given if the water system provides acceptable documentation clearly showing that receipts consistently exceed expenditures by 10%.
- F3 Is the water system following an official cut off policy?** Must be published in tariff or lease agreement, must follow policy (cut off customers who by policy should be cut off).
- F4 Was a copy of system's adopted annual budget available for review and does financial accounting system clearly and accurately track receipts and expenditures?** Must provide copy of budget and balance sheet(income statement) for review.
- F5**
- 1) Does the water system file annual financial reports with PSC and copy available for review?**  
Must provide copy.
  - 2) Does the latest financial report show that receipts exceed expenditures?** Excluding out of pocket for major improvements.

- T5 (1) Does the water system have the ability to provide water during power outages?** Credit given for generators, can give credit for emergency tie-ins w/ system w/ generator if hydraulics work, credit given for right angle drive if motor attached during survey, may be required to operate during inspection. Credit given for generator on trailer if quick-connect, systems with elevated storage may share generator on trailer, must have prior agreement. Credit not given for renting generator w/o contract. SYSTEM MAY PROVIDE BOTTLED WATER IF INCLUDED AS PART OF A PUBLISHED EMERGENCY PLAN.
- T5 (2) Does the water system have a usable backup source of water?**

### **Managerial Capacity**

- M1 Were all SDWA required records maintained in logical and orderly manner and available for review?** In one location, sample results, MSDH correspondence, copy of CCR report, etc.
- M2 Have acceptable written policies and procedures for operating this water system been formally adopted and available for review?** Must have Job Description for Employees associated with potable water system (employee handbook) and Emergency or Contingency plan (chain of command, phone numbers, etc.), plus at least one of the following: Construction policy (written procedure requiring MSDH approval before construction begins), Flushing program (flushing schedule w/records), Fire hydrant policy (maintenance schedule, flow tests, agreement w/fire dept.), or Updated distribution map (can be updated by operator).
- M3 Has the water system had any SDWA violations since the last Capacity Assessment?** System and Regional Engineer's records
- M4 Has the water system developed a preventative maintenance schedule and was this plan available for review?** Maintenance schedule for: wells (including annual pump tests), service pumps, tank inspections, with recommendations and corrective action taken. Documentation must be available for review.
- M5(1) Does the water system have an effective cross connection program in compliance with MSDH regulations?** Shall include the following: Cross connection policy, records of backflow preventers installed on the system, current test results for each backflow preventer on system.
- M5(2) Was a copy of the MSDH approved bacti sample site plan and lead and copper sample site plan available for review and bacti results show site plan is followed?** Copy of sampling site plans available and bacti results show plan is being followed.

**APPENDIX B**

**Capacity Assessment Ratings**
