

DANGER

ULTRAVIOLET RADIATION

Follow instructions.

Avoid overexposure. As with natural sunlight, overexposure can cause eye and skin injury and allergic reactions. Repeated exposure may cause premature aging of the skin and skin cancer.

Wear FDA compliant protective eyewear.

FAILURE TO USE PROTECTIVE EYEWEAR MAY RESULT IN SEVERE BURNS OR LONG-TERM INJURY TO THE EYES.

Medications or cosmetics may increase your sensitivity to ultraviolet radiation. Consult a physician before using sunlamps, indoor tanning beds or booths if you are using medications or have a history of skin problems or believe yourself especially sensitive to sunlight.

If you do not tan in the sun, you are unlikely to tan from the use of this product.

Consumers should report to the agency any injury for which medical attention is sought or obtained resulting from the use of registered tanning equipment.
