If you have been tested for COVID-19 because you have symptoms:

**AFTER YOU’VE BEEN TESTED, GO HOME AND STAY HOME**

You will receive your results within approximately 48 hours of the test

**While you are waiting for test results:**

1. If you are tested because you are having symptoms, you should remain at home and isolate while waiting for your test results.
2. Stay in a specific room and away from other people in your home to the extent possible. Use a separate bathroom, if available. Household members can consider staying in a separate location, if available, to decrease their risk of exposure.
4. If you must leave home, such as to seek medical care, wear a mask.

**If your test results are POSITIVE for the COVID-19 virus:**

If your results are positive, you will need to continue to isolate for 10 days from the time your symptoms started or 10 days from your positive test date if you have no symptoms.

**If your test results are NEGATIVE (or not detected) for the COVID-19 virus, continue to reduce your risk of illness:**

1. Isolate yourself until fever-free for at least 24 hours (if fever was present) and improvement of your symptoms
2. Practice social distancing
3. Wash your hands
4. Avoid non-essential outings
