Documenting and Reporting Vaccine Administration

==All vaccine administration must be documented in MIIX within 24 hours of administration.== This may require manual entry. If the facility's EHR is directly linked to MIIX the vaccine administration will be populated through their EHR entry.

A Vaccine Information Statement (VIS) or Emergency Use Authorization (EUA) fact sheet must be given to the patient before any vaccine is given.
https://www.immunize.org/catg.d/p2027.pdf

Vaccine Administration Record (VAR) must be completed and signed acknowledging that the VIS was given and received. Vaccine Administration could also be used to hand record the administration. However, the information <u>must</u> also be entered into MIIX within 24 hours.

Entering Patients and Vaccinations in MIIX
1. Go to the login page on the MSDH MIIX Home Page: https://miixhealthyms.org/siis/
2. If, after logging in to MIIX, you are prompted to select an Organization, Facility, School, VFC PIN, or appropriate category for your agency.
3. Then follow the instructions below:
https://documentation.stchome.com/assets/prodfiles/IWeb/Mar2018/qrg/IWeb_Mar2018_SearchAdd_Pts_Vacs_QRG.pdf
4.To add/edit vaccinations in MIIX.
